AUTHOR Brandhorst, Ted, Ed.
TITLE ERIC Administrative Bulletin (EAB), 1976-1987.
INSTITUTION ERIC Processing and Reference Facility, Bethesda, Md.
SPONS AGENCY Educational Resources Information Center (ED), Washington, DC.
PUB DATE 87
CONTRACT 300-87-0004
NOTE 4,212p.; Succeeds "ERIC Management Notes." The EAB is issued monthly or bi-monthly, depending on available material. This compilation includes issues published during the 12-year period 1976-1987.
PUB TYPE Collected Works - Serials (022) -- Information Analyses - ERIC Information Analysis Products (071) -- Reference Materials - General (130)
JOURNAL CIT ERIC Administrative Bulletin; v1-11 1976-1987
EDRS PRICE MF40/PC169 Plus Postage.
DESCRIPTORS *Clearinghouses; *Databases; Information Dissemination; Information Services; *Information Systems; Newsletters
IDENTIFIERS *ERIC

ABSTRACT

The ERIC Administrative Bulletin (EAB) is the internal "house organ" of the Educational Resources Information Center (ERIC), the nationwide bibliographic information system covering the educational literature. ERIC is sponsored by the Office of Educational Research and Improvement (OERI) within the U.S. Department of Education. The EAB is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by the ERIC Clearinghouses and other components of the ERIC system. The EAB is issued every month or two, depending on the volume of material available. All EAB articles are reviewed and approved by Central ERIC before publication. The EAB is distributed solely within the ERIC system (approximately 20 contractors) and is intended as an internal newsletter or journal of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, "ERIC Processing Manual" revisions, etc.). Current major categories for announcements are: Action Items; Network News; Personnel; Clearinghouse Publications; Meetings Participated In. All new forms and all major reports commonly are included as Attachments to EAB issues. This compilation consists of 116 issues of the EAB, extending from July 1976 through December 1987, a period of 12 years. (WTB)

Administrative Bulletin
(1976-1987)

IR 052298

The ERIC Administrative Bulletin (EAB) is an internal newsletter prepared by the ERIC Processing and Reference Facility on the basis of material submitted by the ERIC Clearinghouses and other components of the ERIC system. It is sponsored by the U.S. Department of Education, Office of Educational Research and Improvement (OERI), Educational Resources Information Center (ERIC).

Educational Resources Information Center, National Institute of Education, Washington, D.C. 20208

1. Publication of the ERIC Administrative Bulletin

This issue of the ERIC Administrative Bulletin is the first of what is intended to be a monthly series. Content of the bulletin will primarily be notices of an administrative nature. Occasionally, as the need arises amendments to the ERIC Processing and ERIC Administrative Manuals will be published herein prior to the actual issuance of the amendments to the manuals.

Clearinghouses are encouraged to forward items for inclusion. Contributions should be mailed, or phoned, to Frank Smardak not later than the 25th of each month for inclusion in the next month's issue.

2. ERIC Directors' Meeting

The ERIC Directors' Executive Committee has advised Central ERIC that the most compatible dates for all directors to attend an ERIC Directors' Meeting are March 2nd and 3rd. Accordingly, the next meeting will be held on those dates at the Ramada Inn in Alexandria, Va.

The Executive Committee is in the process of formulating an agenda for the meeting in conjunction with Central ERIC. Copies of the agenda, meeting logistical information, etc., will be mailed to all of you on or about 4 February.

3. ERIC Technical Meeting

The next ERIC Technical Meeting will be held at the Hilton Inn in Annapolis, Maryland, during the three day period beginning early Monday morning, April 5, 1976, and ending in the late afternoon of April 7.

The format of this technical meeting will differ somewhat from those of previous years. The first two days of the meeting (Monday and Tuesday), will be devoted solely to an indexing and abstracting workshop. This two day session will be conducted by the National Federation of Abstracting and Indexing Services (NFAIS). Ms. Toni Carbo Bearman, Dr. E.H. Brenner, and possibly several other NFAIS experts, will work with all of us on indexing and abstracting matters and problems directly oriented to the ERIC system.

Because this workshop is intended to be an interaction session we are compelled to restrict the size. Consequently, attendance is to be limited to two attendees per clearinghouse. The individuals who are nominated to attend should be persons who are full-time clearinghouse employees, actively engaged in indexing-abstracting duties or in the close supervision of individuals engaged in such activities. This is not intended

to be a training session for new personnel so inexperienced abstracters-indexers should not be sent to this workshop.

The third day, Wednesday, April 7, will be devoted to subject matter similar to that of previous years' workshops--administrative problems, user services, information analysis products, standing order customer workshops, etc. If any director feels that neither of his nominees for the IA workshop has sufficient background or experience to represent him at the third day of the tech meeting, he may, if he so desires, have one of his experienced senior staff attend on the third day only.

Please inform your clearinghouse contract monitor, as soon as possible, and preferably not later than February 4th, as to the names of the two individuals you are nominating for the indexing-abstracting session. Also, please specify if one or both individuals will remain for the third day, or be replaced or supplemented by a third individual.

4. Subscriptions to RIE Semi-Annual Indexes

In the near future the GPO will notify subscribers to RIE that beginning in 1976 subscriptions to the Semi-Annual Indexes of RIE will be available from the GPO.

Prices for the two volumes to be published each year will be \$18.00 domestic, \$22.50 foreign. (Single copies will be \$9.00 domestic, \$11.25 foreign.) Subscribers should forward a check or money order (no stamps) to the following address:

The Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

5. RIE Changes

Beginning with the January 1976 issue of RIE the ED number spread for the month will appear on the bottom of the front page as well as on the spine. This is a change which has been requested by numerous readers of RIE.

Another change which affects RIE, and also CIJE--starting with the February 1976 issues--concerns the section entitled "New Thesaurus Terms". Each new term listed will thereafter carry a date indicating when the term was added to the Thesaurus of ERIC Descriptors.

6. IR Publications

The ERIC Clearinghouse on Information Resources has published two useful documents: (1) ERIC: What It Can Do for You/How to Use It; (2) How to Prepare for a Computer Search of ERIC: A Non-Technical Approach.

Arrangements have been made by Central ERIC to provide each of our standing order customers with a copy of each of these valuable documents. The publications will be enclosed in the January EDRS shipment of microfiche.

Educational Resources Information Center, National Institute of Education, Washington, D.C. 20208

1. ERIC Directors' Meeting

ERIC directors are reminded that the directors' meeting is being held at the Alexandria Ramada Inn, located at 901 N. Fairfax Street in Alexandria, Virginia. If you are catching a cab please make this distinction to the cab driver so that you do not wind up at the Ramada in Rosslyn. Free transportation to the Inn is available from National Airport if you phone the Inn from one of the Alexandria Ramada's four courtesy phones at the air terminal. The Inn is only about five or six minutes drive from the airport. (fs)

2. Systemwide Awareness of Assigned Scopes

A recent inquiry about which clearinghouse, if any, included Asian Americans in its scope revealed that members of the ERIC network are sometimes unaware of each other's broadened responsibilities. For well over a year the Urban Education Clearinghouse has had "education of black, Puerto Rican and Asian American populations" as part of its scope. It would be well, however, if any clearinghouse processed a document within its own discipline which also referenced another's, to use the term in indexing it. This makes it more readily available to searchers using a particular descriptor for a cross section of documents in a certain field. (cw)

3. Reproducibility of ERIC Documents

Central ERIC has become increasingly aware of the existence of a few documents input into the file each month that do not reproduce acceptably on microfiche. In some cases the documents should be classified as Level II; in others, the documents photograph so poorly that they should not be input into the system at any level.

Central ERIC is taking three steps to deal with the reproducibility quality of RIE documents.

- a. Input is being examined by a representative from Central ERIC as it arrives at the Facility. A few documents are being rejected at this point on the basis of reproducibility; poor documents, but those which might be considered marginal, are being returned to the clearinghouses involved to make a judgement if the importance of the of the documents justifies the marginality.
- b. As documents are being filmed at EDRS, additional problem documents will be identified. After filming (which must be done because RIE has gone to press) these documents will be examined along with a production fiche and sample of hard copy. If a level change is deemed necessary, it will be made at this time for subsequent updating of tape files. If the document does indeed represent a major problem, the original document, a microfiche of the document, and a sample of hard copy will

returned to the clearinghouse which submitted the document to provide a sample of the type of document that is causing problems.

- c. The Facility has been given the responsibility of putting together a guide called "Document Input Acceptance Guidelines." This document will provide examples of the many sorts of problems that cause reproducibility difficulties, e.g., small type, broken type, colored paper, faint ink, etc. Also included will be copies of resulting microfiche and hard copy blowback. EDRS, Central ERIC, and the ERIC clearinghouses will work closely with the Facility in setting and testing standards for the guidelines. (rc)

4. ALA and ERIC Microfiche

Recently Bob Chesley from Central ERIC attended a joint meeting of the ALA Standards and Microreproduction Committees at the ALA winter meeting in Chicago. ERIC was the subject of discussion for about one hour.

Several concerns were expressed, among them the quality of microfiche, which primarily reflects the quality (for photoreducing) of the input document. A study by a librarian in Nebraska was reported which indicated that 50 of 300 ERIC documents were "unreadable." Since the results of the study were widely disseminated, clearinghouses may hear of it. Bob was able to report that he and Chuck Hoover had examined every frame of each reported "unreadable" document. Although some documents with serious problems were identified, many of the defects were relatively minor, e.g., small print in graph legends, footnotes, single pages somewhat faint, etc. A large majority of the documents were appropriate for inclusion in ERIC. The study appeared to suffer from a serious misunderstanding of the nature of a fugitive data file.

The complaints previously heard concerning EDRS problems seemed, in general, to be resolved. A few minor complaints such as absence of Level III cards, can be dealt with on an individual basis.

Although vesicular fiche are not totally accepted by everyone, the availability of silver fiche, at the predicted higher cost, should be pointed out. There are still users that have difficulty in reproducing fiche. Hard copy reproduction difficulty is relatively rare. Significantly, there are visicular file holders who do not have difficulty reproducing fiche from visicular masters. Some equipment, notably the more expensive makes, do seem to do an adequate job. Users with reproduction needs should be advised to test the equipment carefully before purchasing. Central ERIC can supply names of several agencies that report satisfactory reproduction from vesicular fiche. (rc)

Educational Resources Information Center, National Institute of Education, Washington, D.C. 20208

1. Bill Burgess Goes to Systems Development Corporation

It was with regret that we heard Bill Burgess announce his departure from Macmillan Information. Bill has been with the ERIC system since its early days, first at North American Rockwell and later with Macmillan. We have all had occasion to appreciate his contributions to ERIC, not only as a highly capable publisher but as a friend and supporter of our efforts.

We shall miss him, but he leaves us to go to an interesting new job with the Systems Development Corporation. We wish him great good luck and should temper our regret at losing him because he is delighted to return to California and looks forward to new directions in his work.

Bill's successor at Macmillan is David Biesel whom some of us already know as he has been working with CIJE the past few years. He is familiar with all the ERIC related publications and we can expect him to become even more knowledgeable shortly. He may be reached at 212/935-4300. (kw)

2. Changes to Clearinghouse Information Analysis Product Plans

Clearinghouse directors are reminded that when a clearinghouse submits a list of information analysis products in its annual renewal proposal and that proposal is accepted the I/A products plan then becomes a contractual obligation. For a variety of reasons it sometimes becomes necessary to replace a product or make substantive changes. Such alterations to the contract proposal must be submitted in writing to the project monitor concerned in advance of the changes for approval because when contracts undergo a GAO audit the work accomplished under a contract must agree with the work proposed. Also, on occasion, CERIC staff are asked by NIE program elements what information analysis products are underway in a certain clearinghouse. Unfortunate ramifications can occur if a proposed product has been cancelled or altered and there is no documentary evidence to indicate the change.

Therefore, to eliminate embarrassing and frustrating situations, please make certain that you send a letter to your friendly clearinghouse coordinator when you make I/A product changes. (dt)

3. Duplication, Duplication, Duplication

In the past few months there have been several occurrences of a lack of communication among clearinghouses which have resulted in duplication of abstracting and indexing efforts. The problems have arisen when a clear-

inghouse, for one reason or another, has processed an RIE document which is partly or wholly in the scope of another clearinghouse and has not notified that clearinghouse of its intent to input. Each instance of duplicate processing of such documents is a clear waste of a minimum of \$30.00.

All of us being members of a decentralized system, must continually be on guard against duplication of effort--whether in the area of RIE, acquisitions, CIJe, information analysis products, workshops, or any other activity. A short phone call on the FTS line or a postcard will often avoid duplication and eliminate the frustration and disappointment felt by the party at the other end.

So, let's have a little more coordination, Folks! (dt)

4. Final Reminders on the ERIC Technical Meeting

The following are a few last minute reminders concerning the technical meeting:

- a. Persons arriving at the Baltimore Airport will find the limousine service directly to the right of the exit doors of the baggage claim area. Limousines to the Annapolis Hilton leave hourly at a quarter past--5:15, 6:15, etc. The last limousine leaves at 11:15 PM and the first in the morning leaves at 6:15 AM.
- b. Once you arrive at the Hilton Inn and get settled, please come to Rooms 512-514 where we will have the same kind of registration activity that we had in Columbia at last year's meeting. Packets of materials containing information on restaurants, night clubs, and other entertainment activities will be available as handouts.
- c. Parking is available at the Hilton. There is a dollar charge for registered guests; however, there is an additional charge for non-registrants.
- d. One of the items on the agenda for the tech meeting is a discussion of ideas concerning recognition of RIE's tenth anniversary in November 1976. We are asking that clearinghouse representatives who will be coming to the tech meeting to attend the administrative session, if possible, brainstorm this subject with their respective associates at the clearinghouses. It would be of considerable assistance if the various ideas were written up succinctly so that they could be submitted to the session coordinator prior to convening of the meetings.
- e. Attendees at the indexing and abstracting session are reminded that there will be an evening meeting on Monday, April 5th, from 7:00 PM to 9:00 PM. (dt)

Educational Resources Information Center, National Institute of Education, Washington, D.C. 20208

1. Preparation of Documents for Filming by EDRS

Recently an EDRS representative suggested the following additional guidelines to assist clearinghouses in preparing documents to conform with current filming practices:

a. Reducing Oversize Pages to Standard Size

The placement of pages on the camera bed for filming results in their being justified at the top lefthand corner. This can result in text being lost at the bottom and right when physical pages exceed the 8½ inch by 11 inch standard size. This can happen even if the text area itself is no more than 8½ inches by 11 inches. In order to avoid loss of text in such situations, it is sometimes possible to trim the top and left margins off oversize pages so that the entire text is in the 8½ inch by 11 inch area that the camera will pick up.

When most of a document is standard 8½ x 11", but a few pages are oversize, it is helpful to cut the oversize pages down, perhaps creating two standard size pages where one long page existed before. In cases where excess text from a long page is being affixed to a white backing sheet, remember to use transparent tape rather than staples. Staples not only film, but can also affect the machinery.

b. Excessive Amounts of 6-Point Type

The ERIC Processing Manual specifies 6-point type as the lowest size acceptable type. Even so, documents that contain all or substantial amounts of 6-point type do not generally blow back from microfiche to be satisfactorily readable. In other words, while some 6-point type is acceptable, too much can incapacitate a document. Consequently, such documents should often be entered at Level II rather than Level I, with a "Note" explaining why that document is not available in hard copy.

c. Arrangement of Brochures and Pamphlets

Odd-size brochures and pamphlets may be opened up and taped on 8½" by 11" sheets in order to make better use of available frame space. This is usually only feasible with vertical strip formats. (Backed-up pamphlets would need to be Xeroxed if a second copy were not available).

d. Notes in Resumes

Whenever a document is significantly defective in legibility or repro-

ducibility, and yet is selected for the system, it is helpful to the user if a word of explanation is placed in the "Note" field of the resume. This alerts the user to the problem and avoids unpleasant surprises.

e. Notes to EDRS

Clearinghouse notes attached to documents can be helpful to the EDRS camera operator when they call attention to out-of-the-ordinary factors such as colored inks, colored papers, changes in page orientation that would require a change in the way the page is placed on the camera bed, etc.

f. Cost Awareness

Throughout the entire process of preparing documents for filming, the clearinghouses should keep in mind the effect of microfiche frames on price, and should avoid artificially crossing a price hike step when it can be avoided. (RC)

2. New Descriptor/Identifier Indexing Depth Conventions

As a result of suggestions made by clearinghouse staff at the last ERIC Technical Meeting, it has been decided to increase the number of permissible Major (i.e. published) identifiers from one to two. This change is effective immediately.

The ERIC Processing Manual (Section 5.3.21, par. 3, lines 1-2) will be modified to read as follows:

"There is no minimum requirement for Identifiers, however, NO MORE THAN TWO IDENTIFIERS CAN BE ASTERISKED (*) as major indexing terms."

Since this change increases the total permissible major index terms from six to seven, it was also felt appropriate to permit an indexer to "trade" an unused major identifier for an additional major Descriptor.

The ERIC Processing Manual (Section 5.3.20, par. 3, lines 12-13) will, therefore, also be changed to read as follows:

"AT LEAST ONE (1) major Descriptor MUST be assigned. A total of NOT MORE THAN FIVE (5) major Descriptors are permitted if there are two (2) major Identifiers used; a total of NOT MORE THAN SIX (6) major Descriptors are permitted if there is only one (1) major Identifier."

Please note that the new limit of seven (7) major index terms (five Descriptor/two Identifier or six Descriptor/one Identifier) is an upper limit and not necessarily a goal to be achieved for every document. (RC)

3. New Survey of ERIC Data Base Search Services

The Facility is completing work on a new edition of The Survey of ERIC Data Base Search Services. It should be available from the printers in June. There are 211 listings of institutions which conduct computer

searches of the ERIC file, up from 123 contained in the last survey.

Data are also being collected for a new edition of The Directory of ERIC Microfiche Collections. The new directory is scheduled for completion in August and will contain additional information such as hours of operation, contact persons, and types of reading equipment available at each of the locations. (RC)

4. ERIC Data Base Users' Conference

The 1976 ERIC Data Base Users' Conference will again be held in conjunction with the American Society for Information Science (ASIS) annual meeting. The ASIS meeting will be held in San Francisco during the week of October 5. Dates for the ERIC conference are October 6 and 7/1976. (RC)

5. CLJE Journal Coverage

All clearinghouses are requested to check the journals they are covering for CLJE with regard to currency and publication. It has come to the attention of Central ERIC that the Source Journal Index in CLJE shows journals presumably being covered which are no longer in existence. Tom Wright at Macmillan depends on each and every clearinghouse to provide him with the names of journals either being added or deleted so he can see that the Source Journal Index reflects only presently active periodicals.

For those libraries which desire to subscribe to the entire list it is daunting to find even a small percentage no longer being published and it is certainly self-defeating for CLJE to print an inaccurate listing each month. Would you therefore go over the journals you cover and compare them to those in the latest CLJE Index. Then provide Mr. Wright with any needed changes. Notifying him of changes in publication status should be continuous in the future. (CW)

Educational Resources Information Center, National Institute of Education, Washington, D.C. 20208

1. Exhibit of ERIC Educational and Promotional Materials

At the 1976 ERIC Users Conference in San Francisco, we are planning an exhibit of materials developed to introduce, promote, or educate people about the use of ERIC. We are doing this so that attendees can see what has been done by different organizations, and what materials can be used in their own situation.

If your clearinghouse has developed any brochures, flyers, special request forms, training packages, slide-tape shows, etc., relating to ERIC, we would like to include them in this exhibit. We will provide space for audio-visual presentations, as well as printed materials. Those developers that attend can meet informally with interested parties, if they wish.

So that we can prepare the appropriate exhibit space, we would like to have at least two to three copies of each printed item sent to the Facility before September 15. Unless you request otherwise, we would like to retain the material for our files and future reference. You are also invited to bring hand-out copies of your materials with you to the conference. Any amount is welcome, but you should keep in mind in this regard that there will be over 100 attendees.

If for any reason you cannot send the material in advance, you are invited to bring copies with you to the conference. Late arriving material will still be placed on display. (rc)

2. Copies of Single Frame Resumes

With the old ERIC resume data input forms, it was common practice for the clearinghouses to keep Xerox copies of the typed form they submitted to the Facility. These copies were then used for a variety of purposes: sending to authors, sending to acquisition sources, sending to data exchange partners of one kind or another, for local files, etc.

Now that the form is changing over to OCR format, the clearinghouses are coming to recognize that they will no longer have this handy form available for this purpose. The OCR form might be an adequate substitute in some of these applications, but when heavily laden with corrections (blobs, hooks, and follow-on corrections) it is not suitable for any formal use.

Some clearinghouses have inquired about the possibility of getting copies of the Single Frame Resumes the Facility prepares for EDRS.

Beginning with the August issue of RIE, we have directed the Facility to print one additional set of Single-Frame to be sent to the clearinghouses to satisfy this need. (rc)

3. Change in Clearinghouse Contractors

As a result of a recently concluded competition there is to be a change in the contractor for the operation of the ERIC Clearinghouse on Career Education. Effective as of 14 September 1976, the clearinghouse will be located at the Center for Vocational Education, Ohio State University, 1960 Kenny Road, Columbus, Ohio, 43210. The director of the clearinghouse will be Dr. Joel Magisos, and he can be reached at Area Code 614/486-3655.

Transfers of documents to ERIC/CICE at Northern Illinois University should be discontinued. All pending transfers are to be held in abeyance until about 1 September and then shipped to the new clearinghouse. (fs)

4. ERIC Regional Technical Meeting

A pilot session of an ERIC Regional Technical Meeting will be held by the midwestern clearinghouses in Urbana, Illinois. The meeting will be a two day affair running from 1:00 PM, Tuesday 21 September to noon, Thursday, 23 September. The clearinghouses which will be participating will be CS, PS, CG, SE, and the the new CE CH. The hosts for the meeting will be CS and PS. If this trial run proves to be fruitful the regional meeting concept will be introduced throughout the ERIC system as an annual feature. Future annual budgets for such meetings will provide funding for attendance at these meetings. Budgetary guidance will be provided at a later date. The results of the Midwest Regional Meeting will be written up and distributed to all clearinghouses in the system and other ERIC contractors shortly after conclusion of the meeting. (rc)

5. Document Acceptance Guidelines

Due to budgetary problems the Facility has had to temporarily suspend work on the Document Acceptance Guidelines which were to provide examples of various input quality with suggestions for improvement. Although EDRS has reported a very significant improvement in the quality of legibility of documents input into the system over the past four months, (COMMENDATIONS to document processors) the guidelines project still retains a high priority. Work on the manual will be resumed at the earliest possible date. (rc)

Educational Resources Information Center, National Institute of Education, Washington, D.C. 20208

The ERIC Administrative Bulletin (EAB) has been born again! Barbara Sanders has accepted responsibility for editing and distributing the EAB with hopes of getting it out to you on a monthly basis. Plans are to get input from the ERIC Facility, EDRS, Macmillan and the Central ERIC staff. Clearinghouses are invited to forward items for inclusion. Contributions should be mailed directly to Ms. Sanders at Central ERIC no later than the 5th. of each month in order to be included in the same month's issue. The bulletin will be ready for distribution by the 18th. of each month.

Announcements from Central ERIC

1. Status of June Dissemination Conference

For the past several years, ERIC has been responsible for three annual meetings: ERIC Directors, ERIC Technical and an ERIC users meeting. At the 1975 Users Meeting in Boston, a number of users suggested that ERIC might consider consolidating these meetings. Other NIE programs (State Capacity Building grantees, State Dissemination Coordinators, etc.) also have annual meetings. To make a long story short, a planning group has been formed for a nationwide conference on dissemination. This meeting is being sponsored by organizational dissemination units within the National Institute of Education and the United States Office of Education. The purposes of this meeting is:

- To increase collaboration and coordination among NIE and OE contractors and grantees in the field of dissemination.
- To increase common understanding of resources, linkage and leadership with respect to quality control, financing, staffing (training), research, needs assessment and evaluation.
- To consider prospects for the future of educational dissemination activities in terms of political, financial, and organizational considerations.
- To identify areas in which increased understanding is needed.
- To develop a statement of principles affecting the development of educational dissemination.

Tentatively, the framework for the June conference (at present June 20 - 24) has been outlined to have specific group meetings (ERIC Directors, SEAs, Technical Users) on Monday, Tuesday morning, Thursday afternoon and Friday. Tuesday afternoon, Wednesday and Thursday morning will be common meetings for all groups. Detailed information, agenda, location, etc., will be forwarded to you as soon as it is available.

I urge all clearinghouses to reserve the dates June 20 through June 24 for both directors and technical representatives. It is extremely important that ERIC be well represented. You should also be aware that ERIC has had and will have a voice in agenda items and format.

2. Quarterly Report List of Information Analysis Products

One of the recommendations of the Midwest Regional Clearinghouse Technical Meeting was that ERIC Clearinghouses exchange lists of information analysis products (in progress and completed). Rather than have each clearinghouse assume the chore of duplicating and mailing 15 copies of the pertinent portion of the quarterly report, Central ERIC has volunteered to perform this task on a quarterly basis. Due to the size of the consolidation, however, only one copy of the reproduction will be provided to each clearinghouse. It is recommended that each clearinghouse further reproduce these to assure that each individual concerned with document planning, document production, and possibly user services, has ready access to the information.

Attendees at the Technical meeting also recommended that the quarterly reports include completed information analysis products as well as items in progress and continue to show the completed items in succeeding quarterly reports for the balance of the clearinghouse contract year. It is requested that this information be included in all future quarterly reports commencing with the report due in Central ERIC not later than April 15, 1977. (FS)

3. Western Regional Technical Meeting held February 1 - 2, 1977

The Western group of clearinghouses, EA, JC, RC, and SO met in Boulder on February 1 - 2 to discuss all phases of clearinghouse technical operations. Barbara Booth, JC, was responsible for forwarding the numerous recommendations to the ERIC Steering Committee for possible inclusion in the agenda of the

National Technical Meeting in June. The group's evaluation was unanimous in describing the meeting as a resounding success, and all participants indicated they were looking forward to the next meeting in Las Cruces, New Mexico in 1978. (DT)

4. The New ADR Format

We have received several suggestions concerning changes in the forthcoming new ADR format. The Facility will circulate a copy of the proposed format for additional comments. (RC)

5. Change in Dye Used in Vesicular Fiche

In March or April the film supplier has scheduled a change in the composition of the emulsion used in vesicular fiche produced at EDRS. The present gray appearing fiche will have a slight yellow cast which may be noticeable to standing order customers. The new dye has slightly better ultraviolet absorption characteristics and, as a result, could result in a slight improvement in fiche-to-fiche reproduction from vesicular masters. However, silver masters will still have slightly better reproduction characteristics. (RC)

6. Missing Fiche?

For a long time, we have received user complaints that a primary file maintenance problem has been the difficulty of determining whether a missing fiche is level 3, or truly missing. To help with the problem, hash marks (#) have been added to the RIE ED-Number to Clearinghouse Number Index Cross Reference. Also, level 3 cards are shipped with the monthly fiche collections.

A sample fiche is attached. This fiche is different in that it contains a notation in the first (A-1) frame indicating that the following fiche is level 3 and will not be contained in the file. We believe that this will help users, once they are aware of the system, to check for missing fiche more simply than has previously been the case. It will not solve all problems (such as the case in which fiche containing the notation might, itself, be missing), but it should help. If adopted, level 3 cards would no longer be printed. If you have comments, or see any problems, please contact Bob Chesley at Central ERIC by March 1. (RC)

7. Clearinghouse Contract Competitions in the Offing

During the next 10 to 12 months Central ERIC will be deeply involved in clearinghouse competition activities. The RFP for FL, for example, will be hitting the street about February 15 to 20. That will be followed by the RFPs for HE and UD which will probably be published in late March or during April. The resulting contracts will be for five-year periods--that is, a contract for one year with four Government options to renew. (DT)

Announcements from ERIC Facility

Following are announcements from the ERIC Facility:

TIPS AND REMINDERS ON DOCUMENT PREPARATION

A sampling of contacts between the ERIC Processing and Reference Facility and the ERIC Clearinghouses on the subject of "Document Preparation" reveals the following points to be the most frequently touched on:

- o Remove and discard any pages that are exact duplicates of other pages.
- o Disclaimer label, Clearinghouse Accession Number, and other labels, should appear on the first sheet to be filmed, not the second or third.
- o Clearinghouse Accession Number should be printed largely and plainly at the bottom of the page, parallel to the left side of the document.
- o If a document contains just a few poorly printed pages, take the time to rectify the situation via re-typing, manual corrections, or contact with the source for replacements. Remember that the document you send in is distributed and reproduced all over the world.
- o For Level 3 documents, be sure to send the Facility enough pages and information from which to generate author names, institution names, pagination, etc.
- o Price is considered an important element of the Availability field (when this field is present). Having the price can often save the user one complete cycle of correspondence with the source. If this information is not contained in the document, it is worth a phone call to obtain.

SPECIAL NOTICE

ERIC TITLE INDEX, 1966 - 1976

The ERIC Title Index for the period through 1976 is a decennial cumulation in two volumes, A - J and K - Z. It contains a total of 120,351 titles announced in Resources in Education (RIE) since its first issue in November 1966.

Due to the size of this reference work (1,350 pages), it may not be possible to continue to cumulate it in printed form. It is likely that future editions of the ERIC Title Index will be either in the form of microfiche or of annual supplements to this decennial cumulation.

For this reason, we have printed the 1966 - 1976 cumulation in more than the usual number of copies, recognizing that it may be the last of its kind. Even so, the stock is limited and we suggest that if you require this reference work you order it early in order to ensure receipt. We further suggest that some form of care or preservation, such as insertion in a binder, be practiced. The present cumulation may have to last a long time.

Price and ordering information appear below.

DELIVERY AND PAYMENT

All orders for ERIC TOOLS *must* be accompanied by payment in full. (This requirement will be waived for government (Federal, State, or Local) organizations, *current* ERIC TAPES subscribers, and in certain other special cases). Publications will be shipped via commercial carrier or USPS Priority Mail in the United States, and by Postal Union (surface) mail to other countries. Delivery to other countries by Air Mail is available at the increased price indicated. ALL SALES ARE FINAL. Subscriptions are noncancelable, except for non-delivery, except that multi-year subscriptions are cancellable *after the first year* on 60 days notice.

SCHEDULE

ERIC TOOLS publications are synchronized with the publication of *RIE*. All updates correspond to the last *RIE* issue in a calendar quarter (i.e., March, June, September, and December). To insure current delivery (and continuity in subscriptions), orders must be received by ORI prior to the cut-off for the calendar quarter, which is generally the 15th of the preceding month (i.e., February 15, May 15, August 15, or November 15).

PRICE LIST

ANNUAL SUBSCRIPTIONS

Description	No. of Issues	Standard		Foreign Air	
		Stock Number	Price	Stock Number	Price
Title Index, Cumulative (through 1976), plus supplements	4	PRTNASCK	\$ 75	PRTNAFCK	\$ 90

Title Index, Second Quarter 1977 Supplement (when available)	PRTNASS2 15	PRTNAFS2 17
Title Index, Third Quarter 1977 Supplement (when available)	PRTNASS3 20	PRTNAFS3 22

THESAURUS INPUT/CHANGE FORMS - THE DJF AND THE TCN

The two forms which the Clearinghouses regularly use in requesting changes to the Thesaurus of ERIC Descriptors are:

- a. DJF - Descriptor Justification and Data Input Form;
(ERIC Facility Form No. EFF-11 (12/73)).
- b. TCN - Thesaurus Term Change Notice;
(ERIC Facility Form No. EFF-21 (8/72)).

These two forms have distinct uses. The DJF is used as a direct input form for keying new data into the Thesaurus file and for making simple, routine, and non-controversial changes. The TCN is used for recommending significant changes to old data, which must first be reviewed by the nationwide ERIC Vocabulary Review Group prior to actual implementation.

In order to avoid delays in processing their Thesaurus change recommendations, Clearinghouses are reminded of the specific uses of these two forms.

1. The DJF, or "implementation form", should be used when recommending:
 - a. New Main Terms and their cross-references ("Main Term" is synonymous with "Descriptor");
 - b. Routine changes in the cross-reference structure of existing Main Terms; and
 - c. Routine changes in Group Codes.
2. The TCN, or "review form", should be used when recommending:
 - a. Mergers of existing Main Terms and their postings;
 - b. Significant changes in the form of Main Terms (e.g., adding or dropping parenthetical qualifiers);
 - c. Significant additions or changes of Scope Notes; and
 - d. Deletions of existing Main Terms and their postings (after all merger possibilities have been investigated and rejected.)

Both the DJF and the TCN may be required in the preparation of some change recommendations. For example, a recommendation involving the replacement of an existing Main Term with a new Main Term would include: (1) a DJF showing the new term and its cross-reference structure and (2) a TCN justifying a transfer of postings from the old term to the new term. In such cases, the DJF would be considered "inactive" until its related TCN is approved by the Vocabulary Review Group.

CENTRAL REFERRAL LIST

Most Clearinghouses maintain a list of organizations to which requests can be referred when ERIC sources are either exhausted or inappropriate. At the recent ERIC Technical Meeting in Washington, it was suggested that a central list of these referral points be maintained by the Reference Librarian at the ERIC Facility. Such a "referral center" would permit the Clearinghouses to check telephonically with the Facility (when their own resources don't provide an answer) in an attempt to take advantage of the past experience of all Clearinghouses. In effect, a wider selection of organizations to which referrals can be made would be made available to participants. Consideration to publication and dissemination of such a list will be made later if the response from the Clearinghouses warrants it.

All ERIC Clearinghouses are invited to send their "referral lists" to the ERIC Facility. We will keep you informed via the ERIC Administrative Bulletin as to the progress of this project.

Administrative Bulletin

Volume: 1
Number: 2
Date: March, 197

Charles W. Hoover, Branch Chief

Barbara B. Sanders, Bulletin Coordinator

Educational Resources Information Center, National Institute of Education, Washington, D.C. 20208

Central ERIC, along with the ERIC Facility, have submitted a number of informative tid-bits for this month's issue of the EAB. The invitation still stands to others who want to submit items for inclusion in the Bulletin. Please send them to Barbara Sanders at Central ERIC. But do not forget, the deadline for submission is the 5th. of every month! Suggestions for improving the bulletin are also welcomed.

ANNOUNCEMENTS FROM CENTRAL ERIC

1. Publication Type "Other" Classification

Analysis was recently made of input which has been classified by Publication Type "other". In 2 1/2 years there have been about 400 documents so classified.

Several recommendations have been made for new or revised categories and will be considered in the study by the Teacher-Education-Clearinghouse Study. The following recommendations were also made concerning some of the documents classified as "Other". Many items coded as "Other" fit easily into existing categories and must be regarded as categorizing errors. In our opinion approximately 75% should not have been coded as "Other". The following kinds of items are prominent among the miscodings:

- Journal articles, parts of journals, collections of journal articles, etc. - these should have been coded "J".
- Tests, test specifications, compilations of tests, reporting booklets, questionnaires, opinion polls, evaluation materials, assessments - these should have been coded "Q".
- Legal decision, legal briefs, legal memorandums, summaries of legislative actions, legal-related discussions, Government regulations, etc. - these should have been coded "H".
- Project descriptions - these should have been coded "K".
- Papers presented at ----, - these should have been coded "S".
- Seminar summaries, Reports, on Workshops, etc. -- these should have been coded "P".
- Resource Guides, Teaching Guides, Manuals - these should have been coded "G". (RC)

2. ERIC Facility to Check Document Pagination

As part of its new contract activities, the ERIC Facility will be checking monthly microfiche shipments for correct document pagination. Where differences are detected that will cause an incorrect price in either paper copy or microfiche sales, a correction will be made to the master tape and EDRS will be notified concerning the correction. Consequently, clearinghouses no longer need to check the monthly shipment for pagination errors. (RC)

3. New Clearinghouse Administrative Form

The ERIC Clearinghouse on Rural Education and Small Schools has a new idea that should prove useful to both the clearinghouses and Central ERIC. They have developed a new form (blank copy attached) which shows a breakdown of comparison of cost distribution by categories. Shortly, Mr. Hoover will dispatch a

policy letter to all clearinghouses which will make this form a part of the data required for the annual review. A change to the Administrative Manual will follow at a later date. (BS)

ANNOUNCEMENTS FROM ERIC FACILITY

1. Resources in Education (RIE) - Systematic Review (appeared in February 1977 Interchange)

It has been a long time since RIE was examined from the point of view of "sprucing" it up. Central ERIC has recently authorized a systematic examination of RIE, its cover, art work, front matter, advertising, notices, layout, etc. The objective is to study all the available ideas about how RIE, as a physical object and an arrangement of data, can be improved. The report will encompass both graphic art and textual content matters, i.e., it will encompass "substantive" changes as well as "cosmetic" changes.

Examples of some of the RIE characteristics that will be covered are the following:

- New page format
- Index format
- Fields covered
- Cover design

In order to impact the January 1978 issue of RIE, the study is scheduled to take place between April and August of 1977.

Clearinghouses are invited and urged to submit their ideas and

suggestions for improving RIE. Every suggestion received will be given proper consideration. If you have any feedback, whether negative or positive, to give us on RIE, now is the time to have your say. Help us to make RIE responsive to your needs.

2. ERIC: What It Is, How To Use It (Address correction)

The blue and white, 7" x 7" ERIC brochure entitled ERIC: What It Is, How To Use It, which offers a multi-media kit for \$35 was printed with an erroneous mailing address. The correct address for placing orders is:

National Audiovisual Center
Government Services Administration
Attn: Order Section
Washington, DC 20409
Telephone: (301) 763-1896

Order Number: 009000

3. Number of Major Descriptors and Major Identifiers Permitted in Document Resume Preparation

Early last year Central ERIC approved new guidelines for indexers in the use of Descriptors and Identifiers in the preparation of document resumes. The combinations of six major Descriptors and one major Identifier or five major Descriptors and two major Identifiers are acceptable. However, because six and one and five and two add up to seven, some Clearinghouses have been misled into believing that seven major Descriptors are acceptable if no Identifiers are selected. This is not so. Six major Descriptors are the limit, regardless of Identifier selection.

4. Document Selection Practices

It has been noted that some Clearinghouses believe that documents transmitted to them from the ERIC Facility must go into the system. This is not the case. Documents sent to the Clearinghouses by the Facility are discretionary and should be evaluated against the selection criteria like all other acquisitions. The possible exception is material to which a PRIORITY sticker is attached. PRIORITY items are so designated by Central ERIC and should be accessioned and handled on an expedited basis (See ERIC Processing Manual, pgs. 112-113).

ANNOUNCEMENTS FROM CENTRAL ERIC

1. We, here at Central ERIC, would like your reactions to an idea that came out of one of our staff meetings. We were trying to think of new ideas about how to get new Standing Order Customers introduced to the world of ERIC. One idea suggested was to have each clearinghouse designate a representative to be responsible for gathering together a welcome package that would contain information and materials most useful to a new Standing Order Customer—such as (1) ERIC, What It Can Do For You/How To Use It, (2) examples of ERIC Clearinghouse Products, (3) Directory of ERIC Microfiche Collections, and (4) literature on NIE.

Whenever practicable, this package of material could be hand delivered by the clearinghouse representative to the Standing Order Customer, or if this is not possible, it should be sent with an explanatory covering letter. How do you feel about such an idea? Do you have any others or improvements on this one? Please send them in. We would like to do something in this area as soon as possible. (BS)

2. It has been confirmed that the June Dissemination Conference will be held June 20 - 24, 1977 at:

Sheraton National Hotel
Washington Boulevard and Columbia Pike
Arlington, Virginia 22204

3. Dr. William Work, Director of the Speech Communication Module of the ERIC Clearinghouse on Reading and Communication Skills has written us indicating he has received a number of inquiries from professionals on a topic of mutual interest to all of us in the ERIC system.

The inquiries are concerned with the matter of institutional (particularly in post-secondary settings) policies and practices about giving "credit" to faculty members whose works are published through ERIC. The basic question is: "What credit, if any, should a faculty member be given in promotion or tenure or salary increase decisions by virtue of having a research report or syllabus or essay entered into the ERIC system via RIE?"

If such publication is clearly not to be equated with publication of an article in a "major scholarly or professional journal", to what should it be equated? With presentation of a paper at a national meeting? With publication of a book review in a major journal? Or perhaps, with that of an essay in a state or regional journal?

Bill realizes that practices vary from field to field and discipline to discipline. He would, therefore, welcome (and so would Central ERIC) any input from ERIC directors that will help in gaining a better picture of prevailing practices.

Any of you who can contribute are asked to write Bill at the following address:

Dr. William Work
ERIC Speech Communication Module
Speech Communication Association
5205 Leesburg Pike, Suite 1001
Falls Church, Virginia 22041 (FS)

ANNOUNCEMENTS FROM ERIC FACILITY

1. Six new organizations have agreed to place the ERIC Facility on automatic distribution of their documents. This brings the total list of ERIC Facility Acquisitions Arrangements to 120. A list of the 114 standing arrangements previously in effect appears on pages 61-62 of the ERIC Processing Manual (revised August 1976). The names of the six new organizations are listed below:
 - #115 Southwest Educational Development Laboratory
 - #116 University of Pittsburgh, Learning Research and Development Center
 - #117 Defense Advanced Research Projects Agency, Cybernetics Technology Office
 - #118 ACTION
 - #119 Southern Regional Council
 - #120 National Science Foundation, Directorate for Science Education

2. Descriptor Justification Form (DJF) Status Report is attached.

ANNOUNCEMENTS FROM CENTRAL ERIC

1. Thank you for responding to our "welcome wagon" idea and for sending in your suggestions. It is hoped that those of you who have not yet responded will have a chance to do so. Remember to include the name of your clearinghouse representative and also ideas on what the welcome package should contain. We want to hear from all of you! (BS)
2. By now, all clearinghouses should have received their invitational package for the June Dissemination Forum. Please return the hotel reservation cards and registration forms as soon as possible. It is important to get this in early. (BS)
3. Each month EDRS will make available a list of new standing order customers and cancellations. This list will be attached to the monthly administrative bulletin and thus will keep all clearinghouses informed of new customers in their areas. (BS)
4. The company which supplies the film for ERIC vesicular microfiche has made a change in the composition of the film. This film, which EDRS began using in April, 1977, has a slight greenish tint. This coloration is normal and can be used to identify the new film stock.

The new film has improved absorption characteristics in the ultraviolet range. As a result, when duplicating microfiche from this film stock, a greater exposure is required. On duplicators we have tested, an increase of about 50% over the older gray vesicular fiche is required. An advantage of the longer exposure is that more accurate exposure settings for optimum reproduction can be determined and used. When reproducing hardcopy from the new fiche, it will not be necessary to increase the exposure since most hardcopy reproduction does not use ultraviolet light for exposure. (RC)

5. The availability of the RFP for an ERIC Clearinghouse on Urban Education was announced in Commerce Business Daily in April. Written requests only for RFP-NIE-R-77-0007 may be addressed to:

DHEW/National Institute of Education
Contract and Grants Management Division
1832 M Street, NW, Stop #37
Washington, DC 20208
ATTN: Patrick J. Noone

The closing date for receipt of proposals is June 15, 1977. (CW)

ANNOUNCEMENTS FROM EDRS

The ERIC Search Fiche, a new product announced by EDRS several weeks ago, has already been sent to a number of interested customers. There have been 44 requests filled for the entire fiche set consisting of four parts; and 5 requests filled for portions of the set. Interested customers may be informed that they can send their orders and checks for \$20.00 to receive the four-part Search Fiche to: EDRS, P.O. Box 190, Arlington, Virginia 22204. The fiche contains information on ERIC files arranged in four sequences—Title, Author, ED Number, and Clearinghouse Number. The \$20.00 fee will cover the quarterly update cost for all four parts and \$5.00 will cover the cost of updates for individual parts. (DG)

ANNOUNCEMENTS FROM ERIC FACILITY

1. The fourth TAP meeting was held on April 26 at Central ERIC. Several items of general interest were discussed.

The first item was the beginning of a program to increase Clearinghouse participation in vocabulary improvement. A formal announcement of the program will be made at the 1977 Dissemination Forum (ERIC Vocabulary Improvement session) in June. At that time, another meeting will be scheduled for late summer 1977 to implement the program. This latter meeting will involve the Clearinghouse Vocabulary Coordinators (or their designated representatives), as well as staff members of Central ERIC, the ERIC Facility, and such user groups as RLSE and SMERC.

The Identifier Clean-up was a major topic of discussion at the TAP meeting. It was announced that actual file mergings should begin about September 1977, with the first published authority list expected to be available in early 1978. The authority list is expected to contain Identifier synonyms, which will preserve many of the Clearinghouse merger decisions and will eliminate the current need to post acronyms as complements to spelled-out Identifiers. The TAP invited Mrs. Mary McCord to participate in the Identifier discussions. Mary is the Facility Lexicographic Consultant on Identifiers. (She was the Lexicographer at the early ERIC Facility, operated by North American Rockwell Corporation.)

Thirteen (13) Term Change Notices (TCN's) examined by the Vocabulary Review Group in 1976 were reviewed during the TAP meeting. All approved change recommendations involved in these TCN's are expected to be reflected in the June 1977 Thesaurus Working Copy. The one unresolved TCN for 1976 is the recommendation to change "Negro" to "black", but this, too, should be settled in time to be reflected in the June Thesaurus.

A complete summary of the TAP meeting will be distributed to the Clearinghouse Vocabulary Coordinators within the next few weeks. (JH)

Ramblings from the Chief of ERIC	Charles W. Hoover Branch Chief
Announcements from EDRS	Deborah Gallagher Customer Service Rep.
Announcements from the Facility	Jim Houston
Standing Order Customer Listing	Barbara B. Sanders

ANNOUNCEMENTS FROM CENTRAL ERIC

1. Because of our involvement in the Dissemination Conference during the week of June 20-24, 1977 in Washington, D.C., Central ERIC thought it best to distribute the ERIC Administrative Bulletin a couple of weeks early. The bulletin will be back to the old schedule (18th. of each month) in July. You are all invited to send in tidbits which you wish to share with the rest of the ERIC family. (BS)

2. Ramblings From Charles W. Hoover, Central ERIC

Shortly after I was appointed head of ERIC 6½ years ago, I wrote a short piece for the old Administrative Bulletin. In this piece, I stated that it was my impression that ERIC was leaving childhood and entering adolescence. Continuing this analogy, today I would say ERIC is entering maturity. Mature not in the sense of fully developed, full-grown, or having reached maximum development, but rather in terms of a stage (passage maybe?) in development wherein most of the trials and tribulations of adolescence are past.

Two additional observations: this maturity is first the result of dealing with a lot of frustrations and anxiety-provoking work on the part of all of you in the system. The future appears to be brighter and more stable.

Since some of you have not had the opportunity to meet with us here in CERIC I thought I might share with you some random thoughts, ideas, and ramblings of my own:

- o The Garbage Issue -- Practically disappearing. Primarily this is due to the efforts of Clearinghouses in awareness type training of users, hands-on training, user service efforts and a vigilant quality control system. The issue was invariably raised by those who did not understand the system.
- o Quality Control -- This usually was used as a synonym for the garbage issue. But we all know that quality control is a broad term that encompasses many procedures.

We have never in the 10 year history had as good a quality control program as we have today--quality control in such areas as dupe checking, pagination, filming, legibility, etc. We've accomplished a great deal and if one lists all of the quality control measures we have developed it is a most impressive list.

We are constantly looking for additional ideas--especially in the use of technology such as mini-computers for editing, use of word processing, etc.

Thank you for your past efforts, and keep sending us ideas.

- o During the past two years we in CERIC have spent a great deal of time with various groups, including other Federal agencies, sharing with them our experience and knowledge in system development. Several of these are now using and developing systems based on ERIC, i.e., Government Accounting Agency (GAO), Office of Aging, Womens Program in OE, etc.

The unfortunate aspect of this activity has been that we frequently do not get the opportunity to talk to planners before some of them go too far in planning. This is especially true in the proliferation of so-called clearinghouses being developed by other agencies. However, there is some indication that this may begin to change.

- o New Files -- There is an RFP out now for the development of two new files. One is to be a practice/product file and the other a legal file. (The legal file could be conceived of as three files--legislative, case law or opinions such as the opinions handed down by agencies, general councils which have the effect or force of law.) You will hear more about this at the June meeting.

- o Future -- The future of the system seems brighter to me than at anytime in the past 4 to 5 years. This is primarily due to your sacrifices, struggles, innovativeness in continuing and actually adding products and services plus the tapping of outside resources. The most important result of this, I believe, is that we've received recognition of the reality and effects of inflation. Some help for this I hope is now a fact.

- o Out Year Planning -- We try to maintain a wish list of ideas for targets of opportunity (spare funds). These items come from all of the system components, some come from users, workshops, technical meetings, advisory boards and CERIC staff. In fact, we in CERIC sometimes have original ideas we didn't steal from anyone.

You might be interested in some we included in FY'79 planning if we should receive additional funding—above a maintenance level. They are listed in groups of improvement packages:

- Group 1 Newsletters in all Clearinghouses
CLJE to OCR
"Welcome Wagon" package activity
New technologies study
- Group 2 Tag backfile
Free product list to SOCs
Study selection criteria
Study of six on-line searching sites (feedback & feedforward)
- Group 3 Expansion of Clearinghouses into gaps (Music and Fine Arts)
Dissertation file
Abstracts in CLJE

The above is not all we have in the list and does not include a big Vocabulary Improvement Program in FY'78.

Let me suggest that if you have some ideas we should include in this Wish List, send them to us anytime.

o ERIC Improvement Program -- Under the Information Communications Division (ICS)—ERIC is a branch of this division—there has been a plan for some evaluation of ERIC. This program is to be a tri-partite program that includes a project for recommendations for specific improvements in ERIC; a focus on ERIC clients and the contents of the information base itself, and third, an opportunity for stakeholders in formal information services such as ERIC, and other interested individuals, to offer their comments on a five-year plan before it is adopted.

Another way of summarizing the program would be to simply state that the activities will be directed at recommending research, development, and implementation activities.

We have been and will be working very closely with those responsible for this program—particularly Mollie MacAdams, the project monitor.

o June Meeting -- By the time you receive this bulletin, you should have quite a bit of material about the June Dissemination Forum (Conference). I hope you will find many parts of the program(s) of interest to you and I urge your active participation.

I want to call to your attention the paper by Larry Hutchins and Greg Benson. We shall have some discussion of this at the ERIC director's meeting but I urge all of you to look it over and either respond in writing before the meeting or hold your comments for the Thursday morning session.

o Thanks -- Thank you for your responses in reference to a Dissertation File. We haven't summarized them yet but I found the ideas, suggestions, and comments most useful.

Well,—the above is just as I stated—a lot of ramblings. Hopefully, you will find them useful and maybe they will trigger some ideas, questions, and criticisms that you can share with us in June. Just remember—if you can keep your head when all about you are losing theirs—you may not understand the problem.

ANNOUNCEMENTS FROM EDRS

1. Beginning with the June issue of ERIC microfiche, a special notation concerning Level 3 documents will appear. This note will appear on the microfiche prior to a Level 3 document in frame A-1, just before the resolution target. For example, on the fiche for ED 113 570, the special level note will look like this:

ED 133 571
not available
from EDRS

If there are several consecutive unavailable documents, then this will be noted:

ED 133 879 thru
ED 133 893 not
available from
EDRS

The special notation will replace the Level 3 cards previously enclosed with each issue. However, the Level 3 cards will be enclosed with the June issue, but after that, no cards will be made available. Level 3 documents are also indicated by the double slash mark in the Accession Number Cross Reference Index in each edition of RIE. (DG)

2. Effective July 6, 1977, the U.S. Postal Service will increase its rates on 4th. class book rate mail. EDRS will be reprinting order forms to reflect this change. Be sure to check the July issue of RIE for the new rates. (DG)

ANNOUNCEMENTS FROM THE ERIC FACILITY

The May Descriptor Justification Form (DJF) Status Report is attached. (JH)

STANDING ORDER CUSTOMERS

There are no additions or deletions of standing order customers for this period. (BS)

* To be referred to the Thesaurus Advisory Panel (TAP) for final disposition.

Report Date May 1977

1. INTRODUCTION

There have been many reactions to the recent Dissemination Forum held here in June. Some reactions were very positive and others were not so positive. However, one of the most recent comments received was from Bill Work, Director, Speech Communication Module. How many of you feel as he does about the following question: How's your AQ (Acronym Quotient)? During the first day or so of the Dissemination Forum, Bill jotted down some of the acronyms that made up a generous part of the dialogue. Test your AQ to see how many of these you can translate. Thanks Bill! (BS)

Spellouts are in Attachment 1.

2. RAMBLINGS FROM CHIEF OF ERIC

We have been hampered by vacation schedules, site visits, and the usual minor crash requests in trying to critique the events of the June Dissemination Forum. However, we will try within the next 6 weeks to review our perceptions of the successes and/or failures, ideas, suggestions, and develop plans/strategies for the future. In the meantime, my personal overall perception is that the Forum was a success and will provide the basis for a collaborative, cooperative dissemination program for the future with ERIC serving as a major activity and catalyst.

We are proud of your efforts in the successes achieved and I personally want to thank all participants. ERIC and its 'family' received many compliments.

Attached is a copy of the statement of agreement resulting from the meeting. (Attachment 2) I suggest you keep copies of this and we can integrate some of the ideas into future ERIC plans.

I should also note that ERIC suffered from a lack of time in each of the three meetings (directors, Technical and users) but we will try to correct this in future meetings.

I hope you all have an enjoyable summer--what's left.

P.S. At the risk of sounding like a poor loser, the winners of the OCR box folding contest had an unfair advantage. I suggest next year that we have a contest of directors only--maybe a cataloging, indexing and abstracting contest also.

P.P.S. Please read Hop Davies Pub Type study--we need to examine some of the findings and develop some new guidelines. (CH)

3. ANNOUNCEMENTS FROM CERIC/MICROFICHE INVENTORY REPORT

Beginning in February, the Facility initiated a contract modification which enables them to inspect each microfiche in the month's standing order collection. A judgment is made regarding the severity of any problems noted, along with an indication of its magnitude (e.g., number of pages affected) plus any additional notes. For the first time we have hard evidence of the results of the system's efforts over the past two years to improve input and microfiche output.

The results are encouraging. Only about one-half of one percent of the microfiche have severe problems. Among the approximately 5 percent of "marginal" fiche, most have note-field comments indicating the problem. These figures represent a significant improvement over several spot checks made last year. We will have better comparison figures soon.

Meanwhile, we want to share these reports with your so that clearinghouses can have a means of reviewing their input after completing photo reduction. We are also reviewing the problem documents for problems that may exist due to filming. It seems fair to state that most problems result

from the nature of the input document, not surprising for a fugitive document system. Where this review indicates future submissions may yield questionable results, consider, in light of the importance of the document:

- (1) Using Level II (this has already been done in many cases).
- (2) Using the Note Field (likewise).
- (3) Reviewing the decision to submit.

In the future, these reports (in microfiche form) will be sent to you via the EAB. February and March reports are Attachments 3 and 4. (RC)

4. ANNOUNCEMENTS FROM EDRS

The U.S. Postal Service is increasing the cost of 4th class mail, effective July 6. Until new EDRS order forms can be reprinted and distributed, the following is the new postage chart which will now appear on the EDRS order forms:

(DG)

Effective July 6, 1977

5. ANNOUNCEMENTS FROM FACILITY

The June Descriptor Justification Form (DJF) Status Report is attached. (Attachment 5) (JH)

6. ANNOUNCEMENTS FROM ERIC CLEARINGHOUSES

At the June Dissemination Forum there occurred a discussion on acquisitions and quality control which might be of interest to those not present at that session. Notes from the session are as follows:

o Facility Report

This session was divided into three major areas of concern. The first focused on acquisitions. Murray Howder of the Facility shared information on the new ADR form which will soon be available. Specifics will be issued by the Facility in regard to use of this form.

o Scope Overlap for Conference Solicitation

A major concern in this area continues to be overlap among clearinghouses in the matter of conference acquisition efforts. It was recommended that those clearinghouses with overlapping interests contact each other by phone and decide which of several proposed methods they would prefer to employ. Methods proposed were:

1. One clearinghouse should solicit and acquisition all potential ERIC materials and transfer received documents to appropriate clearinghouses.
2. Involved clearinghouses should share convention program book (one clearinghouse should mark and send solicitation letter then send to next to prevent duplication of efforts).
3. One clearinghouse should solicit all potential ERIC material BUT other clearinghouses involved should supply their own acquisition form letters and stamped envelopes. Clearinghouses involved in this conference overlap are as follows:

ASA: CG, EA, SO
APA: CG, CS, EA, EC, PS, SO
ASCD: EA, SP

Additional recommendations made and supported by the Facility were:

1. Clearinghouse acquisition list should be updated annually.
2. A conference calendar should be compiled and made available to all ERIC acquisitions personnel.
3. Transferred documents should be accompanied by as much information as possible.

o Scope Clarification

The group decided that, because of lack of clarity regarding expanded scopes, all clearinghouses would do informal write-ups of their scopes with sufficient clarification to make document acquisitions and transfers easier. These statements are to be sent, by August 1st, to David Trivett at HE and Murray Howder at the Facility.

o EDRS and Selection Quality

The second phase of the meeting focused on quality control and miscellaneous technical concerns. Steve Jones of EDRS praised the clearinghouses for their attention to the improvement of "original" input. The Facility indicated that the new guidelines for document reproducibility will be available by this fall. He stressed that EDRS does not change the level of a document--decisions are

made by CERIC and are generally made only in cases of reproducibility problems.

o Style Manual

In the area of processing/editing, several recommendations evolved. It was agreed that when the Processing Manual is not adequate, clearinghouses would use the Chicago Style Manual to retain consistency in style.

o OCR Shipments

The Facility requests that, since separately shipped resumes and documents can cause delays in processing, all clearinghouses start shipping their input in one of the following ways:

1. OCR box placed within a carton containing the documents;
or
2. OCR box taped securely to box or Jiffy bag containing documents.

Under NO circumstance are resumes and documents to be placed in a single container without use of the standard OCR resume carton. The Facility will develop a memo to be sent to the clearinghouses with further clarification.

o Note Field

Clearinghouses recommended that the Processing Manual be amended by expanding examples where the note field may be used to provide more information to ERIC Users.

o Feedback

In their concern for maintaining quality and consistency of input, the clearinghouses expressed deep concern in two areas.

1. Macmillan does not provide any editorial feedback on CIJE and, in fact, does not perform any editorial function on CIJE input.
2. While the Facility provides feedback on serious and recurrent problems, the clearinghouses feel a strong need for some form of regular and ongoing feedback to enable them to maintain consistency and quality.

The group, therefore, recommends that CERIC work with Macmillan and the Facility to establish some form of feedback compatible with the needs of the clearinghouses to maintain quality of input and, at the same time, the manpower and time constraints of both contractors.

o Followup

Followup memos are being developed, and will be sent to all clearinghouses acquisitions personnel, as well as to CERIC and the Facility. (CJ)

Steering Committee for Technical Operations

The Steering Committee is now in the process of collecting recommendations from the tech meeting. If you have any suggestions concerning future tech meetings or other items you'd like the Steering Committee to consider, please contact Kathleen McLane (FL). The Committee will meet next in September.

As was announced at the tech meeting, the Committee is presently overseeing the development of two kinds of training materials. The first, a brief introduction to the ERIC system for new employees, is being prepared by PS and will be finished and distributed to all components of the system by early fall. The second, a workbook of training materials for cataloguers and abstractor/indexers, is being prepared by a Working Group consisting of Barbara Booth (JC), Betty Rose Rios (RC) and Sydney Meredith (SO). All clearinghouses will be hearing from them shortly. These materials are scheduled to be finished by next summer. (KM)

FYI

Jean Barabas has resumed her maiden name. She is now Jean Marzone.

7. STAFF CHANGES WITHIN THE ERIC SYSTEM

At the Clearinghouse on Counseling and Personnel Services, Pat Sjogren, Coordinator of the Learning Resources Center (LRC) for the past six years, has left to return to graduate school. Nancy Avrin, a Librarian, will assume Pat's responsibilities in the LRC. Ms. Avrin will also take on cataloguing and searching duties.

8. STANDING ORDER CUSTOMER LISTING

New additions and cancellations to the Standing Order Customer List are attached. (Attachment 6)

Continuous efforts are required to maintain and improve educational practice so that all Americans have the opportunity to learn in accordance with their need. Research, development, evaluation and dissemination of effective practice are vital to the achievement of this goal.

At the current time a number of agencies, organizations, programs and systems are working in the area of dissemination. These existing efforts are making significant headway in providing support for educational improvement and should be encouraged to continue.

At the same time it is believed that the results of these efforts will be significantly improved if they can be incorporated into a "Nationwide Dissemination Configuration."* The development of such a configuration can help to alleviate the problems identified by recent analyses and assist the Office of Education and the National Institute of Education and other elements in the Education Division of HEW in meeting Congressional mandates related to dissemination.

The deliberate development of such a nationwide configuration, over time, can also help educators better understand the array of resources available to help them improve the educational system. The undertaking of such a nationwide effort is important; no single agency or group of agencies could or should develop a nationalized system or acquire and manage all the necessary resources.

To promote the development of such a Nationwide Dissemination Configuration, a group of professionals** in the area of dissemination met in Arlington, Virginia for one week in June 1977. They adopted the following statement of agreements as a means of providing a common base for all those who would undertake the development of the Nationwide Dissemination Configuration. (The recorded vote was 191 yes, 4 no, 4 not voting).

* The word "configuration" was chosen to coincide with Guba and Clark's use of the term in their paper cited below. The word "system" was rejected, as connoting central control and "network" was rejected because of possible confusion with the National Diffusion Network. Guba, Egon G. and David L. Clark. The Configuration Perspective: A View of Educational Knowledge Production and Utilization, Council for Educational Development and Research, Washington D.C., November, 1974.

** Participant groups included representatives from: ERIC Clearinghouse Personnel and Users; Evaluation contractors for major dissemination programs in O.E. and N.I.E.; National Diffusion Network Facilitators & Developer/Demonstrators; National Institute of Education--Office of the Director & Dissemination & Resources Group; Office of the Assistant Secretary for Education; Office of Education--All major Bureaus and the Reg. Offices; Research & Development Exchange contractors--selected Laboratories & Centers; Research & Development Utilization contractors; State Dissemination Representatives--National Dissemination Leadership Project.

No official endorsement from any of these groups should be inferred.

Agreement 1: The purposes and outcomes of dissemination activities are many--ranging from acquiring knowledge for its own sake to specific improvements in educational practice. Although the adoption of innovations and changes in practice are possible outcomes, dissemination activities can also lead to decisions to maintain existing practices rather than to change.

Agreement 2: A number of efforts have been made to define the word dissemination. These efforts make it clear that several meanings are possible when the word is used. The Dissemination Analysis Group (DAG), a joint government task force, has delineated four possible usages:

Usage 1: Spread: The one-way-casting-out-of-knowledge-in-all-its-forms: information, products, ideas and materials, "as though sowing seeds."

Usage 2: Exchange: The two-way or multi-way flow of information, products, ideas and materials as to needs, problems, and potential solutions.

Usage 3: Choice: The facilitation of rational consideration and selection among those ideas, materials, outcomes of research and development, effective educational practices and other knowledge that can be used for the improvement of education.

Usage 4: Implementation: The facilitation of adoption, adaptation, and installation of improvements.

It is recommended that future usage make clear which, if not all, are denoted.

Agreement 3: The development of a NATIONWIDE DISSEMINATION CONFIGURATION can enhance improvements in educational practice. Such a configuration should be open, non-prescriptive, and multi-purpose. It should be influenced by all levels of government and by other groups and individuals and not dominated by any one.

Agreement 4: An effective NATIONWIDE DISSEMINATION CONFIGURATION will require a broad, integrated resource base of knowledge. Information about educational research and development, practices, policy and legal matters should all be available through an ERIC-compatible index and a universally available set of access systems. These resources should be based on the current ERIC system, enlarged to encompass the resources of other educational information systems and clearinghouses as well as the addition of new types of data files as appropriate. Quality control of resources should be maintained. Adequate information should be provided so that the users may judge and evaluate these resources of their own purposes.

Agreement 5: Resources should be accessible to and supported by a variety of means and styles of linkage:

- (a) Continuous efforts to organize and transform the knowledge base into language, format and styles suitable to a variety of different audiences should be maintained. Particular

attention should be paid to the needs of educators, lay-persons, policy-makers and especially those groups that traditionally have not had access to the knowledge base;

(b) human assistance in searching, interpreting and supporting the use of the knowledge base should be given by providing services that are accessible to users, provide rapid assistance and are as objective as possible;

(c) human, technical and financial assistance in implementing knowledge that promises to improve educational efforts should be available, particularly to decision-making groups within educational institutions. This assistance should include:

- technical assistance in implementing specific innovations, practices or products that meet the requirements of users;
- assistance to educational institutions to insure that they gain the capacity to use knowledge effectively;
- assistance to lay-persons and citizens groups that will provide them with the increased capability to influence educational practice;
- encouragement to those who risk changes in the status quo to undertake activities they believe will improve education.

The styles by which such linkage services are available should be broad and non-prescriptive.

Agreement 6: Dissemination, including the NATIONWIDE DISSEMINATION CONFIGURATION, should be an object of study and improvement in its own right.

(a) information about the configuration should be developed and communicated to insure an informed, public process for coordinating the configuration. Particular emphasis should be placed on the development of information about user needs and requirements--both in terms of new knowledge that should be created through research and development and in terms of services needed from the configuration;

(b) specific tools, training programs and other support efforts should be developed to insure the effective strengthening and growth of the configuration;

(c) research and development on alternative models, theories and practices of dissemination should be carried out and shared in a systematic way.

Agreement 7: Since the components of the configuration are now, and perhaps always will be developing, there may be no absolute roles for various agencies, groups and individuals. In general, however, the configuration should be initiated with these assumptions about functions that should be performed at various levels.

(a) a national level function should be to:

- o develop a community of interest that will establish goals for the configuration;
- o operate those elements that serve nationwide needs;
- o provide incentives for a variety of institutions to build their own capacity to operate the configuration within their spheres of activity;
- o and support research and development on the configuration.

(b) a state level function should be to provide leadership in defining statewide dissemination systems unique to the requirements of each state. The autonomy of States must be carefully preserved, consistent with their constitutional and legal responsibilities;

(c) agencies engaged in direct instruction and those they serve should be the primary beneficiaries of the Configuration. The function of the Configuration should be to serve their needs with a minimum of constraint upon them. The Configuration should not promote change needlessly; instead, it should support efforts to maintain an environment in which students of all ages can learn. The Configuration should recognize the contribution that educators make as a source of exemplary practices and information about the effectiveness of other innovations. The autonomy of these agencies and their boards should be respected.

(d) educational laboratories, research centers, universities and colleges, professional associations, independent institutions, individual scholars and professionals should be encouraged to share and provide their knowledge and services through the Configuration and to participate in its study and management. They should be encouraged to build their capability to extend the Configuration as well as to provide technical assistance to it.

(e) it is recognized that the activities of public and tax-supported agencies are complementary with the activities of the private sector. Functions not adequately provided by the private sector can be undertaken by public and tax-supported agencies in

a way that encourages the private sector to be involved in the fullest extent possible.

Agreement 8: Support for such a Configuration must be cooperatively shared by all participants and beneficiaries. The development of this Configuration will require the expenditure of both fiscal and human energy. These resources are obtainable only through efforts that focus on cooperative and accommodating relationships among participants for the mutual benefit of all.

Agreement 9: The long term vitality of the National Dissemination Configuration is dependent not only on more effective utilization of existing knowledge and resources but on the continued support for appropriate research and development (R&D) so as to renew the knowledge base.

1. Introduction

On August 4-5, 1977, Charles Hoover and Barbara Sanders paid a site visit to the ERIC Clearinghouse on Information Resources in Syracuse, New York. This particular site visit was a little unique in that it gave Mr. Hoover and Ms. Sanders a first-hand look at what a new clearinghouse contractor has to go through during the first few months of operation. To their amazement they found that IR had made all the necessary adjustments to being new as well as having most clearinghouse operations up and running.

Dr. Ely is certainly blessed with having such a highly qualified staff to assist him in running the clearinghouse. From all of us here at CERIC, we send him our best wishes and congratulations on a successful start up. (BS)

Announcements from CERIC

o Microfiche Inventory Report

Attached are the Microfiche Inventory Reports for April and May. (Attachments 1 and 2) (RC)

o A Report on the Council for American Private Education (CAPE)

Central ERIC has had a number of meetings during the past year with the Council for American Private Education (CAPE). During the next several months CAPE will be distributing over 10,000 brochures to their member schools. These brochures will describe ERIC and how private schools may benefit from its use. The brochures will also solicit the submission of appropriate documents to ERIC. From searches we have done of the ERIC data base, it is clear that relatively few documents from or about private education have found their way into the system.

Many educational issues are obviously the same for public and private schools. One area where these issues are different is in the organization and management of the schools. This subject falls under the scope of the Clearinghouse on Educational Management. Since clearinghouses may receive inquiries resulting from this rather large mailing, you should be aware of this activity. (RC)

o Vocabulary Improvement Project

A national meeting of the Vocabulary Improvement Project will be held at One Dupont Circle, N. W., Washington, D. C. during September 20-21, 1977. Attendance will be limited to one person from each clearinghouse and representatives from RISE, SMERC, the ERIC Facility, the NIE Educational Reference Center, and Central ERIC. All expenses for conference attendees, including travel, per diem, and hotel will be furnished by the ERIC Clearinghouse on Junior Colleges. Shortly, you will receive some further details about the meeting from Barbara Booth, Chairperson. (DT)

o A New Dissertation File?

Back in April, CERIC asked for comments on six questions relating to the possibility of creating a new ERIC file for dissertations. We compiled the answers from the 12 clearinghouses that responded and came up with a considerable variety of answers having little distinguishable pattern. About the only inference that could be gained was that although most clearinghouses thought they could do a satisfactory job of preparing the input, they were not sure that ERIC should do it.

For the time being we are shelving consideration of this item, but the background material has proved very valuable and we appreciate your considered and thoughtful responses. We may use them again sometime in the future. (DT)

Announcements from ERIC Facility

o Additions to the Automatic Distribution List

Four additional organizations have agreed to place the ERIC Facility on automatic distribution for their documents. This brings the total list of ERIC Facility Acquisitions Arrangements to 124. The names of the four new organizations are listed below:

- . #121 Bureau of Social Science Research
- . #122 National Bureau of Standards (500 sub-series)
- . #123 Alberta Education, Canada
- . #124 Institute for Educational Leadership-OPTIONS IN EDUCATION (GS)

o Selection of Bills, News Releases, and Interim Reports

Items which are developmental, unfinished, or transient, such as Congressional bills, news releases, and interim or preliminary progress reports, should only be selected when they contain substantive material which is independent of any final action or succeeding report. If, in the normal course of events and in a reasonable time frame, they will be replaced. In effect, by a later public law, final report, or other succeeding document, then it is unlikely that they should be selected. This guideline holds true even if the document has been received from the ERIC Facility. All documents received by the clearinghouse (including those coming through the Facility) should be subjected to the regular selection criteria outlined in the ERIC Processing Manual (see ERIC Administrative Bulletin, March 1977). (MH/FB)

o Descriptor Justification Form (DJF)

The Descriptor Justification Form Status Report is attached. (Attachment 3)

4. Announcements from EDRS

o Order Form Redesigned

EDRS has redesigned its order form. A supply will be going to all clearinghouses as soon as they become available from the printer. A major new feature on the new form is the addition of a chart for estimating UPS delivery charges. Now, any customer within the 50 United States has the option of requesting orders from EDRS to be sent via 4th Class Mail (cheap but slow), or by United Parcel Service (more expensive, but reliable and faster).

5. Announcements from ERIC Clearinghouses

o Announcement from the Steering Committee for Technical Operations

The next meeting of the Steering Committee will be held on September 22 and 23. At present, the following items are on our agenda: (1) recommend to CERIC a general format and time requirements for the next national

technical meeting; (2) receive reports on the status of training materials currently under production (a handbook of ERIC "basics" for the new employee and a workbook of materials for training catalogers and abstractor/indexers); (3) formulate plans for the development of other kinds of training materials; (4) discuss a cooperative effort to raise awareness of ERIC, including the possible development of promotional materials, (5) the possibility of an informal ERIC newsletter; (6) the possibility of staff exchange for in-house work at other clearinghouses; and (7) other recommendations from the tech sessions or from ERIC staff members.

Item (7) is where we need your help. We have already spoken to most of the tech session leaders from the June meeting, but we want to hear from the rest of you guys, too. The Steering Committee is designed to provide system input to ERIC policy on technical operations, and we need your input in order to do that. If you have any questions, suggestions or ideas that you would like the Steering Committee to take up, please let us know about it--call or write Kathleen McLane, ERIC Clearinghouse on Languages and Linguistics. (KM)

6. Staff Changes Within the ERIC System

o New Appointment at IR

Dr. Marla Peters is the new Director for the ERIC Clearinghouse on Career Education, vice Dr. Joel Magisos who will be assuming additional duties as a Division Director at the Center for Vocational Education. (FS)

o New Appointments at the Facility

Murray Howder, who has been the Acquisitions Librarian at the ERIC Facility, has been promoted (effective July 1) to the position of Associate Project Manager. In this new position, Murray will be monitoring the day-to-day operations of the Facility and will be responsible for seeing that schedules are met and that all contract-deliverable products are delivered as specified. Grace Sundstrom, Assistant Acquisitions Librarian, will inherit the Acquisitions function.

Dan Kautz has also been promoted (effective July 1) and will head all "computer operations and data entry" functions. In this position he will be responsible for scanning all OCR forms, for seeing that all corrections are properly keyed, for setting up all specified computer runs (including tape duplications), and for operational control over tapes, disks, JCL decks, etc.'

7. Standing Order Customer Listing

The update of the Standing Order Customer Listing is attached. (Attachment 4)

I. Introduction

The Senate has approved the nomination of Patricia Albjerg Graham to serve as Director of NIE. She was nominated by the White House on July 15, and her nomination was confirmed by the Senate August 3.

Dr. Graham grew up in Indiana. She began her career in education as a teacher and guidance counselor in rural and urban Virginia and in New York City. From 1965 to 1974, while Director of Barnard College's Education Program, she worked closely with New York City teachers and administrators to assist beginning teachers in their schools.

Dr. Graham has also served as a lecturer at the Indiana University School of Education, a visiting professor at Northern Michigan University and a professor of history and education at Teachers College, Columbia University. She became Dean of the Radcliffe Institute in 1974 and Vice President of Radcliffe College in 1976. Since 1974, she has also been a professor at Harvard's Graduate School of Education.

She is the author of three books that illustrate the range of her interests—a history of progressive education, an analysis of community and class in American education, and a study of women in American education. In her Senate confirmation hearing, she stressed the need for all Americans to receive a high quality education.

A formal swearing-in ceremony took place on September 9. Dr. Graham was sworn in by the Secretary. (BS)

2. Announcements from CERIC

o Clearinghouse Conference Participation

The Facility will soon be distributing a Conference Calendar showing conferences and dates for clearinghouse participation in professional association activities. It shows an impressive range of involvement and should be a valuable tool to help clearinghouses coordinate their activities. Another version of the calendar will also be published-- this one showing the meetings in chronological order. However, before that calendar is prepared we need dates and sites for quite a number of the meetings. Please send this information to Liz Pugh at the Facility by September 30.

Meanwhile, we will be in touch with some of you concerning help with ERIC booths or other system-wide activities at these meetings. (CH)

o ERIC Clearinghouse on Urban Education

Congratulations to Teachers College at Columbia University, New York! Once again, they have been awarded the ERIC Clearinghouse Contract on Urban Education. Best wishes for continued success. (CW)

o Microfiche Inventory Report

The Microfiche Inventory Report for the month of June is attached. (Attachment 1) (RC)

3. Announcements from the ERIC Facility

o Addition(s)/Changes to the Automatic Distribution List

This month, one organization has agreed to place the ERIC Facility on automatic distribution for its documents. This brings the total list of ERIC Facility Acquisitions Arrangements to 125.

New Addition

#125 The Kansas State Department of Education, KEDDS Resource Component

Changes

HEW, Office of Child Development's name has been changed to HEW, Administration for Children, Youth and Families. See EFAA Nos. 20,21,100,101.

HEW, Social and Rehabilitation Administration's name has been changed to Health Care Finance Administration. (GS)

o Duplicate Titles

There are several instances in the ERIC file where two consecutive clearinghouse accessions bear the same title and can only be distinguished from one another by other factors such as date, author, pagination, etc. (See example below)

It is always helpful to the user if such items can be differentiated from one another rapidly and easily. This is best done if the titles themselves can be made to vary in some legitimate way. Sometimes this can be done by the addition to the title of subtitle information, e.g., Volume 1, Volume 2; Final Report, Interim Report; Issue 1, Issue 2; Preliminary edition, Final edition; January 1977, February 1977; #1, #2,; 1975, 1976; Sixth edition, Seventh edition; Supplement. Where this can legitimately be done without doing violence to the rules of cataloging, it should be done. When the titles can be varied in some informative way, the user is benefited in a number of instances: Title Index entries, microfiche headers, abbreviated on-line search output, etc. In all these cases, duplicate titles are troublesome to the user because accessions become hard to tell apart without additional research. A small variation at the end of the title, placed there by a helpful cataloger can sometimes bypass such problems altogether.

<u>CH#</u>	<u>ED#</u>	<u>Title</u>

TO: Clearinghouse Directors

FROM: Charles Hoover

SUBJECT: New forms for obtaining permission to reproduce documents

You will find enclosed with this memorandum a supply of the new "Request for Reproduction Release" forms (EFF-53). This form has been drawn up to bring ERIC into compliance with the Copyright Revision Law, which takes effect on January 1, 1978. The law appears to require written permission for every document reproduced and disseminated by ERIC (except those which are Government-funded). Consequently, Clearinghouses will have to secure signed permission from contributors for the documents they process starting with those for the January 1978 RIE, on which work is scheduled to begin September 26. This means that unless you have either blanket written permission to reproduce all documents from an organization or an author or else possess a letter clearly giving ERIC permission to reproduce a particular title, you will have to secure a signed Request for Reproduction Release for every title before you can ship it to the Facility.

The following answers to three questions about the new law may prove helpful to you as you work with these new requirements and respond to inquiries about photoduplication.

1. A document issued without a copyright notice may still be registered by the author within a five-year period from the date of public distribution. If the work is not registered within this period, then the document is considered to be in the public domain. (Refer to "General Revision of the Copyright Law", House Report No. 94-1733.)
2. It is legally permissible to abstract and announce copyrighted documents whether or not a reproduction release has been obtained. However, ERIC will not announce any document unless users can be referred to a source of ready availability.

September 9, 1977

3. Federal Government agencies may grant to Government contractors the right to copyright (for a limited time) a given document if it can be shown that this will result in more effective dissemination. In all such cases, however, the Government retains the right to reproduce the document for its own purposes.

The new form is now standard for the entire ERIC system. It supersedes any local forms you may have been using. You are encouraged to develop a form letter to send to contributors along with the Request for Reproduction Release form. In this letter you should make it clear that the completed form is to be returned to the Clearinghouse.

If there are any questions about using the new form, you should contact Kit Welsh or Frank Bryars at Central ERIC.

REQUEST FOR REPRODUCTION RELEASE

I. DOCUMENT IDENTIFICATION

Title: _____
 Author(s): _____
 Corporate Source (if appropriate): _____
 Sponsor/Funder (if appropriate): _____

II. REPRODUCTION RELEASE

In order to disseminate as widely as possible timely and significant materials of interest to the educational community documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche and paper copy (or microfiche only) and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, the following notice is affixed to the document.

"PERMISSION TO REPRODUCE THIS
 MATERIAL HAS BEEN GRANTED BY

 TO THE EDUCATIONAL RESOURCES
 INFORMATION CENTER (ERIC) AND
 THE ERIC SYSTEM CONTRACTORS"

If permission is granted to reproduce the identified document, please check one of the options below

- Microfiche (4" x 6" film) and paper copy (8 1/2" x 11") reproduction
- Microfiche (4" x 6" film) reproduction only

If reproduction permission is granted, please sign the following release.

"I hereby grant to the Educational Resources Information Center (ERIC) permission to reproduce this document as indicated above and to disseminate it through the ERIC Document Reproduction Service"

Signature: _____ Date: _____
 Organization: _____ Title: _____
 Address: _____ Zip Code: _____

If permission is not granted to reproduce the identified document, please complete items III and IV, as appropriate.

III. DOCUMENT AVAILABILITY INFORMATION

If permission to reproduce is not granted to ERIC, please provide the following information regarding the availability of the document. ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents which cannot be made available through EDRS.

Publisher/Distributor: _____
 Address: _____
 Price Per Copy: _____ Quantity Price: _____

IV. REFERRAL TO COPYRIGHT/REPRODUCTION RIGHTS HOLDER

If the right to grant reproduction release is held by someone other than the addressee, please provide the appropriate name and address.

1. Announcements from CERIC

o NIE's Proposed Reorganization

As many of you are aware, a reorganization of the NIE is being planned. Thursday, October 6 we were shown part of the structure that has resulted from this planning (See Attachment A).

I want to keep you informed as quickly as possible of actual decisions and of those proposals that have credibility. The following is a list of bits and pieces of information that may answer some of your concerns/questions:

- o Reasons for reorganization are (a) to better accomplish the Congressional mandate to deal with educational equity issues, (b) more effective communication with our publics' and, (c) reduce the fragmentation existing from the present organizational structure.
- o The present six program groups will be consolidated into three.
- o The location of present programs has not been determined.

- o The first concern is to identify functions and place them in the three groups.
- o Existing programs may or may not exist, or have discernable visibility.
- o ERIC is one of only two programs mentioned as being included in the Dissemination and Research Studies Group, at this point in time.
- o What programs/branches ERIC will be linked with or in what division is unknown.
- o Marc Tucker will head the Educational Governance Group but heads of the other two Groups have not been named.
- o A work group of 20-24 individuals will be created to plan the reorganization below the present "major blocks." Make-up of this group is unknown at the present time.
- o December 1 is the present target date for the completed reorganization. However, the Department, HEW, must approve any plan.
- o Until such time as the reorganization is approved and in place, present structures, plans, etc. will continue in a "business as usual" mode.
- o Funding levels, changes in funding, etc. are unknown. But for a program like ERIC, I see no indication whatsoever that FY 1978 funding plans will be changed.

The above list exhausts my knowledge at this time. I hope it will at least answer a few questions. As substantive and detailed information is available, I will pass it on as soon as possible. (CH)

o Copyright Update

All clearinghouses have just been sent the new Reproduction Release Forms and a memo which contains some questions and answers about Copyright problems. Already several more questions have arisen and as they do I will try to get helpful answers from the experts to you at intervals. Bring any other questions to the upcoming Regional Meeting. If I can answer them on the spot, I will. If not, you can expect to hear from me by memo shortly thereafter. (CW)

o Foreign Documents

Several months ago it came to the attention of Central ERIC that fifty documents from the Philippines on microfiche had been distributed to clearinghouses for possible selection at Level III availability. An order was placed for one of these microfiche over two months ago to test availability. As of this writing, the order has not been filled.

Previously, there has not been an ERIC system policy regarding input of foreign Level III documents. We would now like to establish the policy that foreign Level III documents should not be accepted for entry to ERIC. There are several factors which contribute to this decision: difficulty in acquiring the document even when availability is cited; excessively long postal delays; and the existing somewhat restrictive policy in announcing U.S. dissertations.

We realize that there may be some exceptions that should be made to this general policy and would like to discuss the issue at the forthcoming Regional Technical Meetings. (CH)

o Microfiche Inventory Report

The Microfiche Inventory Report for the month of July is attached. (See Attachment B)

2. Announcements from the ERIC Facility

o Additions to the ERIC Facility Acquisitions Arrangement

New additions are:

EFAA #126 -- Technical Education Research Center, Inc.
Cambridge, Massachusetts
Level I or as indicated

EFAA #127 - Illinois State Board of Education
Level I or as indicated

EFAA #128 - National Advisory Council on Equality of Educational
Opportunity
Level I (GS)

o DJF Report

An update to the DJF Report is attached. (See Attachment C) (JH)

3. Announcements from the ERIC Clearinghouses

o Announcement from the Steering Committee for Technical Operations

The report of the Steering Committee's meeting of September 22 and 23 is attached to this issue of the EAB (See Attachment D). Please get in touch with a member of the committee and let us know your ideas on the topics we are working with or give us your suggestions about matters you think we should address. For example, I'm sure everyone has ideas about how to increase public awareness of ERIC; the ideas

we came up with on pages 3 and 4 of the report may just scratch the surface. (They were our best ideas, however; I didn't bother to include the truly off-the-wall stuff, such as ERIC sweat pants. How about ERIC breakfast cereal?) I'm sure you all have ideas, so let us hear about them. Call us today, call us tomorrow, call us Ishmael, but call us! (KM)

MEMORANDUM

TO: Frank Smardak
CERIC

FROM: Kathleen McLane, Chairperson *KW*
Steering Committee for Technical Operations

RE: Report of the Steering Committee, Sept. 22 and 23, 1977

Since you are now the official liaison between CERIC and the Steering Committee, from now on I will address our reports, etc., to you and assume that you will route them to other interested CERIC staff.

The Steering Committee met at the Clearinghouse on Teacher Education on the above dates. All members attended except for Tom Wright, who was not present either day. Dorothy Slawsky was unable to attend Thursday, but was present Friday. Steve Jones attended on Friday and briefly on Thursday morning.

I'll report first on the materials we already have under production. The ERIC Staff Handbook, under production at PS, is nearly complete and should be distributed to the clearinghouses and other components (10 copies apiece) within the month. The workbook for training catalogers, abstractors, and indexers is pretty much on schedule; it suffered a month's delay this summer, which puts its projected completion date at July, 1978. (See Attachment C of our report dated April 25, 1977.)

I'll take the major items of new business in the order in which they were discussed:

- (1) Time frame for the next national tech meeting - We feel we need 2½ days, to run from Tuesday morning through Thursday noon. Of course, we can't decide on agenda topics and schedules until after the regional meetings, but we would like Thursday morning to consist of the following: At least two hours set aside for

MEMORANDUM

September 30, 1977

Page 2.

informal discussions set up by any group or session that cares to organize such a meeting during the conference. (Those meetings or discussions that would be open to anyone could be announced on a bulletin board in the lobby as they are decided upon.) Since there are nearly always topics that are not covered to everyone's satisfaction during the regular sessions, this would allow for the additional time many people feel they need. After the informal sessions, we'd like to have the concluding session, with a report given for each of the regular agenda sessions, a report that ideally should include recommendations to the Steering Committee or other groups.

As I mentioned, we will decide on agenda topics after the regional meetings - at our December meeting - but one session we do have in mind is on "using the computer terminal for clearinghouse functions other than searching" (e.g., cupe checking).

The reason we want the meeting to begin on a Tuesday is that we would like to reserve Monday for a meeting of the vocabulary coordinators. Ideally, such a meeting should be held before the tech meeting, when everyone is fresher and better able to work productively.

- (2) Training and other materials - A description and time frame for a projected product to be entitled An Acquisitions Idea Book is provided in the attachment to this report. As soon as we get CERIC's OK on this project, I will contact the people we suggested as compilers.

As you know, the development of user services training materials was on our long-range agenda, but we decided that we should stay away from that area temporarily, until Holly O'Donnell's project is completed. There is no point in our proceeding with our own ideas while her project is in the works, particularly since all user services personnel have already been tapped to work on it.

- (3) Staff exchange/staff development - This topic arose out of a suggestion from the training session of the last tech meeting that we consider staff exchange for 1-6 months for training/development purposes. Although we don't see that as practical

MEMORANDUM

September 30, 1977

page 3.

enough to implement, we did come up with two ideas on this topic:

- (a) We recommend sending a staff member to another clearinghouse (or other component, or user, or vendor) for specialized training in a particular area (such as abstracting or computer searching), or, instead, the "trainer" could come to the "trainee(s)." This already happens to a certain extent within the system; we simply plan to promote the idea, perhaps through a note in the Administrative Bulletin.
 - (b) Staff development in information science - In order to help ERIC staff members (especially those who ordinarily attend tech meetings) keep up to date in the information field, we propose to collect information about any meetings, workshops, etc. that we hear about and periodically send this information around to ERIC staff members to encourage them to attend whenever possible. Since attendance is usually dependent on allocation of travel funds, we also plan to write a memo to ERIC directors asking their cooperation in this effort.
- (4) Developing public awareness of ERIC - We came up with the following ideas, listed here in descending order of their priority:
- (a) Have ERIC posters made (a professional job in color with a catchy slogan) and sent to schools and libraries all over the country - SOCs, other public and university libraries, education departments and other academic departments.
 - (b) Create ERIC public service spots for radio and TV - using an appropriate slogan and a celebrity with the right kind of public image as a spokesperson (such as Bill Cosby).
 - (c) Develop a comprehensive ERIC products/tools brochure with tabbed pages - one page describing each product and, for easy update, a back page with a pocket to insert current prices and addresses. This could replace some existing brochures, so it could be a cooperative effort between Macmillan and EDRS. The rationale behind this is that such a brochure would cut down on the number of brochures we currently hand out, which would, in turn, simplify the user's task in figuring out what is available and from whom.

MEMORANDUM

September 30, 1977

page 4.

(d) Get a new, inexpensive, smaller (and more practical) ERIC display to be used to exhibit at major conferences in the information field and in general education. We also visualize this as something that clearinghouses could borrow for their own exhibits.

(e) Update the ERIC audiovisuals.

Other miscellaneous items of business were as follows:

- (5) The Steering Committee plans to work with the regional tech meetings by asking their opinions on the new copyright form and by asking their specific recommendations on several indexing areas identified at the vocabulary meeting. We also hope to have a report from the Committee presented at each regional meeting.
- (6) The Committee believes it would be very helpful in contacting others within the system if one could tell from the Directory who within a clearinghouse is in charge of which function - acquisitions, RIE processing, CIJE processing, IAPs, user services, vocabulary coordination. What we would like to see is a code for the appropriate function put after the proper person's name or title in the Directory. This would involve a minor addition to the information clearinghouses currently send to the Facility for the Directory. To that end, with CERIC's approval, the Committee Chairperson will work with the Facility to see if something of the sort can be arranged.
- (7) We also recommend, in response to clearinghouse requests, that the Facility expand the number and types of examples in the note field, particularly preferred forms for notations of copy quality.
- (8) Purely as a matter of internal policy for the Steering Committee, we would like to point out that there is no such thing as a substitute for an absent member. If a member can't make a meeting, then he/she will just have to miss it.
- (9) At a suggestion from the vocabulary meeting, the Steering Committee again addressed the issue of letter-by-letter versus word-by-word alphabetizing for the various indexes and the thesaurus. Apparently, the present situation is that CIJE and other Macmillan publications (except the Thesaurus) are word-by-word, while RIE and the Thesaurus

MEMORANDUM

September 30, 1977

page 5.

are letter-by-letter. Obviously, regardless of the merits of either method, a combination is the worst. The Committee's recommendation is that the RIE and Thesaurus alphabetization remain the same until the Thesaurus improvement is done and after that, when the new Thesaurus is published, that it and RIE go word-by-word. Then the whole system would be word-by-word. To anticipate this, we recommend that CMIC go word-by-word with its fiche indexes.

- (10) The Steering Committee also has some recommendations regarding the format of RIE. The first is, we understand, already being implemented -- that prices be dropped from resumes with a "running foot" (either recto or verso or on each page) in the main entry section, saying "See latest issue for current prices." (To aid users, the word "price" should be included in the EDRS order form listing in the table of contents.) The Committee also strongly recommends a "running foot" for the subject index section of RIE and CIJE: "See Thesaurus for complete list of index terms."

The next meeting of the Steering Committee will be held on Thursday and Friday, December 15 and 16, 1977. I expect to be able to hold it here at the FL clearinghouse.

I realize that this is a lengthy report, and I appreciate your attention.

MEMORANDUM
September 30, 1977

ATTACHMENT

An Acquisitions Idea Book -- Description, Method and Time Schedule
Suggested compilers: To be announced

This will be a booklet of acquisition approaches, a compilation of various approaches used by the clearinghouses. It is intended not so much as training material as ideas to help acquisitions personnel improve their work.

The material compiled will be edited slightly to give a hypothetical clearinghouse and fictitious names, in order to prevent the book from becoming dated rather quickly. The booklet will consist primarily of approaches to the following:

1. record-keeping and document control
2. potential or current use of the computer
3. solicitation, broken down by type:

types of sources

conferences
institutions: professional
and other organizations
individual

types of solicitation

mass
direct
form letter vs. personal
letter vs. phone vs. visit
focused on particular
subject areas

4. reproduction releases, including blanket releases and how to get them
5. monitoring standing arrangements
6. acknowledgments -- receipt, acceptance and rejection -- also pr, such as resumes and fiche to authors -- also to whom you should not send acknowledgments
7. techniques that don't work or were more trouble than they were worth

Method:

1. Examine acquisition packets from all clearinghouses and get updates by phone.
2. Contact all clearinghouse acquisitions personnel and Grace Sundstrom about acquisition approaches and techniques.
3. Compile the various approaches and put together in a usable form.
4. Review by Steering Committee and CERIC.
5. Develop a second draft incorporating suggestions.
6. Second review by Steering Committee and CERIC
7. Preparation of ms.; then xerox, stuff in folders and distribute.
25 copies will be made. The ms. will be xeroxed and stuffed in folders at UD clearinghouse.

Time Schedule:

Steps 1 and 2 will be done during January and February, 1978; Step 3 will be done March - May, with a meeting at the time of the national tech meeting; Step 4 will be in May; Steps 5, 6 and 7 will be done during the summer; and the product will be finished in September, 1978.

1. Announcements from CERIC

o National Regional Technical Meeting

As has been announced at the various Regional Technical Meetings, plans are being developed for the next National Regional Technical Meeting.

At this time the decisions which have been definitely made are:

- a) the technical meeting will be held at Hill Top House, Harper's Ferry, West Virginia (about 60 miles west of Washington, D. C.);
- b) the technical meeting will be two and a half days long. It will begin at 9:00 a.m., Tuesday, April 25, 1978 and will end at noon, Thursday, April 27, 1978;
- c) Each clearinghouse will be allowed to send up to but not more than three representatives to the meeting. (This includes the Vocabulary Improvement Program representative.)

Separate arrangements are being made for the national vocabulary group to meet in Washington, D. C. the day preceding the National Technical Meeting, Monday, April 24, 1978. A tentative block reservation has been made at the Dupont Plaza Hotel (at Dupont Circle) for Sunday evening. The meeting will be held at the SP clearinghouse on Monday.

Immediately following the meeting—about 4:15—a chartered bus will transport the entire VIP group out to Harper's Ferry arriving in time for dinner.

The Tech Steering Committee has again been assigned the responsibility for formulating an appropriate agenda which builds on many of the interesting ideas which have been generated at this year's round of regional meetings.

Clearinghouses will be kept posted on the progress of plans for the national meeting as they are developed. For further details watch for them in future issues of the EAB. (FS)

.. o ERIC Facility Contract Renewed

The ERIC Processing and Reference Facility has recently negotiated the third year of its current contract. It begins on November 15, 1977. The contract has been modified to include two additional option years.

In addition to the basic centralized processing and ERIC system support, the Facility is undertaking several system improvement projects. These include the following:

- a) Support for some of the activities in the Vocabulary Improvement Program for the coming year.
- b) A limited experiment with on-line editing at the Facility. This activity will also include a test of clearinghouse editing and transmission of data by electronic means.
- c) Technical assistance to State Education Agencies which are constructing their own local files of data. The activity will help insure compatibility of newly developed state files with the ERIC data base. Funds are provided to cover limited costs of travel for clearinghouse personnel who may also become involved in this project through coordination by the Facility and Central ERIC.
- d) A cost and feasibility study of on-line duplicate checking. Should such activities be adopted in the future, they would eliminate the present need for the Acquisitions Data Report (ADR).
- e) An acquisitions brochure which will support all ERIC acquisitions efforts.

- f) Development of an "ERIC Search Strategy Manual." This manual will assist ERIC system users in developing their searching techniques, and could serve as a text for future training sessions in search of strategy formulation.
 - g) PUBTYPE Index in RIE. Provided we solve some of the problems presently recognized with PUBTYPES, this project will permit the development of software to include PUBTYPES in RIE resumes and to produce a PUBTYPE index for RIE.
 - h) RIE exchange. This activity will continue the information exchange concerning availability of past issues of RIE which was formerly offered at the Stanford IR Clearinghouse.
 - i) ERIC Bibliography. A bibliography listing articles and documents dealing with the ERIC system will be produced and made available.
 - j) ERIC Clearinghouse Scope-of-Interest Manual. It is time to again review and formalize Clearinghouse Scopes-of-Interest statements.
 - k) Study of the desirability to add new data elements to the file. This study will identify data elements and determine desirability of adding such elements to resumes and/or tape file.
 - l) Level III accessions list. A listing of all the Level III documents will be prepared and distributed to standing order customers.
 - m) Reference Manual. A reference manual designed to help ERIC system personnel in the processing of reference inquiries will be prepared and added to the ERIC Processing Manual as a new section.
 - n) Document acceptance guide. This project which will give examples of the sorts of input which cause reproduction difficulties, is scheduled for completion in February 1978.
 - o) Identifier cleanup. Work on the identifier cleanup project is also scheduled to be completed by February. Rather than wait until all categories are complete, the Facility will be sending out authority lists as the categories are completed. The authority list for personal names will be distributed this month. (RC)
- o Future RIE Changes

There are a number of changes in RIE presently under consideration. These potential changes have been shared with clearinghouse representatives at the regional technical meetings. A number of these changes, such as a new cover, will be introduced in January 1978, with additional internal format improvements following shortly thereafter. (RC)

o Copyright

HURRY—with whatever means you may devise to get authors to return reproduction release forms to the clearinghouse from which it was sent, and not to Washington. The suggestion has been made that you "neatly obliterate" (how, is up to you) the line at the top of the form which says "Washington, D. C. 20208." That is one way, but the name and address of the clearinghouse must also appear prominently (a stamp made?). The back of the page is a logical and economical place to put an instructional form letter which would of course include the address of the clearinghouse.

In answer to a question the form is printed on 60 lb paper stock.

Next question re Copyright.....must reproduction release be obtained for material marked with copyright which is in federally funded documents and already bears a copyright release clause? Yes, because the original release applies only to the first publisher.

Note: The same reproduction release procedures apply to documents received from foreign countries e.g., Australia as to U. S. documents. Either a letter which says "we would like this put into ERIC" or a filled out release form should accompany any material prior to input.

o CIJE Input on OCR

At the Midwest Regional Technical Meeting I asked the participants to let me know what problems they would have if we asked the clearinghouses to make CIJE input on OCR typewriters in the same way RIE is done. I asked them to consider the question and get back to me. I should like to make the same request of the other 10 clearinghouses. If you see no problem—a quick phone call to that effect would be fine. If there are difficulties I'd appreciate a briefly written explanation of what they are for CERIC consideration—ASAP please.

o Update of the New File Studies

The "practice File" project has been awarded to Bibliographic Retrieval Services, Inc., Scotia, New York. Gregory Benson is Project Director. This project is designed to systematically identify information needs in education and to devise and implement reference files to improve educator access to the needed information.

The initial task of this project will be to generate a variety of file "ideas" within the practice-related information domain. Each idea shall define file content, format of materials, tentative sources and specifics regarding whether design features can or should be consistent with ERIC or a modification of the current ERIC design features.

The National Foundation for the Improvement of Education (NFIE) is under contract from September 30, 1977 to June 15, 1978, with the NIE to conduct for DRG the Education Law and Policy File Study. The study will research the scope of content needs for such information files and will result in one or more designs for an automated, easily accessed bibliographic reference file to be considered by NIE. For further information concerning either of these projects, please contact Mollie MacAdams at (202) 254-7930. (BS)

2. Announcements from the ERIC Facility

o DJF Report

An update to the DJF Report is attached. (See Attachment A) (JH)

3. Standing Order Customer Listing

An update to the Standing Order Customer List is attached. (See Attachment B)

4. Copyright and ERIC

(See Attachment C)

P.S. From personal observations and feedback from Central ERIC staff, the recent Regional Technical meetings were quite successful and exceeded everyone's expectations. My thanks to all participants and special commendations to Joyce Aegerter from EC, Betty Rose Rios from RC, and B. J. Daugherty from CE.

Chuck

Copyright and ERIC

by Mort Bachrach

In recent months, there has been considerable discussion about how the new copyright law (effective January 1, 1978) will affect the ERIC operation. A new release form has been devised and instructions provided the Clearinghouses as to actions to take to satisfy a number of different situations.

This is the problem: Under the current (old) law, ERIC has taken the position that a document submitted to ERIC with a copyright notice applied is copyrighted and that one submitted without a copyright notice is in the public domain. That is based upon the requirement of the current statute that, in order to copyright a document, it is necessary to apply a copyright notice to the document prior to publication.

ERIC could have taken a different tack, however, at least with regard to documents which had not previously been published. It could have assumed that these documents are protected by "common law" copyright and that ERIC has no right to place the document in the public domain by publishing it (making it available from EDRS) without a copyright notice in the absence of a clear indication from the author that such is his/her intention.

However, an organization needs to make some assumptions in order to make the operation reasonably efficient. The assumption which ERIC made, that it is the intention of authors to dedicate their works to the public, if they do not place a copyright notice on the documents, is a correct one, in my judgment. After all, it is known that the ERIC system is primarily a public domain system and it would behoove authors to let it be clearly known if their intention is other than to place a document in the public domain when it is submitted to ERIC without a copyright notice.

How does the situation change under the new law? The new statute preempts the states with regard to protection for unpublished documents. Thus, there is no longer "common law" copyright protection for unpublished works. Furthermore, it is no longer true that copyright is lost when a document is published without a copyright notice. The author continues to have copyright protection for such documents (subject to the rights of "innocent" infringers) provided that a copyright claim is registered in the U.S. Copyright Office either before or within five years after publication with the copyright notice omitted from the document.

Thus, under the new law, ERIC does not know, in the absence of a stated intention, whether the author intends to claim copyright or not for a document which is submitted without a copyright notice. Remember that ERIC does not know this under the current law either. However,

ERIC does know that the likelihood is much greater under the new law than under the old that the author intends to claim copyright for the document which is submitted without a copyright notice. In view of this greater likelihood, ERIC has decided to "play it safe" and to ask for rights releases in certain questionable situations as well as in situations where it is clear that the author intends to claim copyright.

However, ERIC still needs to make some assumptions in order to maintain an efficient operation under the new law as was the case under the old law. ERIC can still assume, for example, that the author intends to place a document in the public domain which arrives with a request that the document be "put into" ERIC, since the author knows, or should know, that ERIC is primarily a repository for public domain documents. The more assumptions of this sort which are made, the more effective the system will be. The reason is that copyright restrictions of any sort tend to inhibit the free flow of information among the ERIC users. Nevertheless, it will be necessary to renegotiate blanket releases because the "rules of the game" are different now than they were when the old releases were negotiated. If the principles set forth herein are borne in mind, then it will be easier for the Clearinghouses to adjust to the new situation and for the ERIC system to operate as efficiently as possible, with a minimum risk of encroaching on the rights of authors.

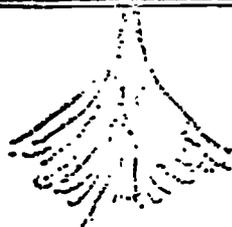

Administrative Bulletin

Charles W. Hoover, Branch Chief

Barbara B. Sanders, Bulletin Coordinator

Educational Resources Information Center, National Institute of Education, Washington, D.C. 20208

SEASONS GREETINGS

BEST WISHES TO ALL OF YOU FROM ALL OF US HERE AT
CENTRAL ERIC FOR A JOYOUS HOLIDAY AND A HAPPY NEW YEAR

TABLE OF CONTENTS

- 1. Announcements from CERIC
 - o Update on NIE's Proposed Reorganization Barbara B. Sanders
 - o New State Education Agency Dissemination Grants Robert E. Chesley
 - o Priority Documents Robert E. Chesley
 - o Microfiche Inventory Report Robert E. Chesley
- 2. Announcements from the ERIC Facility
 - o Additions to the ERIC Facility Acquisitions Arrangements Grace Sundstrom
 - o DJF Report Jim Houston
 - o Tidbits from the ERIC Facility Editor Orabelle Nuthall
 - o RIE Changes for 1978 Volume Year Ted Brandhorst
- 3. Standing Order Customer Listing Barbara B. Sanders

1. Announcements from CERIC:

o Update on NIE's Proposed Reorganization

NIE's Planning Task Force met on December 6, 1977. The meeting was chaired by Gladys Hardy. The draft mission and function statements for each major unit within the proposed reorganization was discussed.

The meeting pointed out areas of overlap among the draft missions and function statements from the different subgroups that will require further work.

More thorough discussion of the overlapping issue and task force's progress so far will be discussed at their next meeting. (BS)

o New State Education Agency Dissemination Grants

Several grants have been awarded in the State Dissemination Grants Program conducted by the Information and Communication Systems Division in DRG. Awards have been made to:

<u>State</u>	<u>Type of Grant</u>	<u>Project Director</u>
Hawaii	Special Purpose	Kellet Min
Arkansas	Special Purpose	Roland Carpenter
Vermont	Special Purpose	Karon McCarthy
Wisconsin	Capacity Building	Donald Russell
Utah	Capacity Building	Kenneth Lindsay
Oklahoma	Capacity Building	Jack Craddock

Additional awards are in negotiation and will be awarded later (RC)

o Priority Documents

In order to clarify the status of "Priority" documents, the ERIC Processing Manual will be changed to read: "The Clearinghouse must process PRIORITY documents, if selected for entry into the system, in time to make the next issue of RIE still open to accessions." The underlined phrase has been added to indicate that Clearinghouses should exercise selection criteria for priority documents. (RC)

o Microfiche Inventory Report

The Microfiche Inventory Report for the month of August is attached. (See Attachment 1.) (RC)

2. Announcements from the ERIC Facility:

o Additions to the ERIC Facility Acquisitions Arrangements

New additions are:

EFAA #130 - California State Department of Education
Level II

EFAA #131 - Research & Development Center for Teacher Education
University of Texas, Austin
Uncopyrighted Level I, Copyrighted as indicated (GS)

o DJF Report

An update to the DJF Report is attached. (See Attachment 2.) (JH)

o Tidbits from the ERIC Facility Editor

The following points are frequently touched on in ERIC Facility Editor contacts with ERIC Clearinghouses, and are presented here as a reminder to Clearinghouses of common problems experienced:

- o Copyright and disclaimer labels should be placed on the first page to be filmed. Check that the copyright label truly reflects the level at which the document is entered. (A number of calls have been generated when the label indicates Level II while the resume shows Level I, or vice versa.)
- o Remove and discard pages that are exact duplicates of other pages in the same document.
- o On covers and title pages, replace any added handwritten notes involving cataloging data (e.g., author's name) by re-typing the data (or page).
- o Level III documents - be sure to enter the number of pages on the OCR resume, as, without the document, the pagination cannot otherwise be determined. Xerox enough pages and information to show author, editor, or institutional names, for the benefit of the editors.
- o There are occasional disagreements, between the log, resume, and document, in the information recorded (particularly in the clearinghouse accession number). All shipments should be re-checked once before transmittal.
- o If an abstract contains sentences where the initial word is a number that would ordinarily be written in numerals, please spell it out. If this is impractical, the sentence should be reconstructed so that it does not begin with a number. (ON)

o RIE Changes for 1978 Volumes Year

During 1978, various improvements will be made to Resources in Education (RIE). Some of them are being made to coincide with the beginning of the 1978 volume year, i.e., with the January 1978 issue. These "early" changes deal primarily with the Cover, Spine, Front Matter, Introductory Statements to Indexes, and Advertising, most of which have been re-designed or re-written. The changes to be made later in the year require either programming, or some other sort of advance preparation, and cannot be implemented rapidly enough to make January 1978. Examples of some of the changes projected for later in 1978 are the following:

- o Running Heads in the Three Indexes
- o PUBTYPE in the Citation
- o PUBTYPE Index
- o Possible New Data Elements (Language, Country of Origin, Identification of Government Documents, i.e., Federal, State, Local)

The changes in RIE that users will see in 1978 are being made largely in response to suggestions received from the field. ERIC is gratified at the response made to its past call for suggestions and remains open to such suggestions in the future. (TB)

1. Announcements from CERIC:

o ERIC Logo

At the Eastern Regional Technical Meeting, there was a flurry of interest and excitement for publicity and marketing ERIC to the entire educational community. Organized campaigns. Many different approaches. On a continuing basis. However, before Central ERIC can do anything about this, we must engage in long-range plans, budget approvals, and contract negotiations. A slow process.

One small step we can take now is to make the whole wide world aware of the ERIC logo. We would like you to slap our logo on everything movable and immovable. Like letterheads, information analysis products, newsletters, flyers, publicity materials, booth signs, and anything else your facile minds can devise. Bernie and Holly O'Donnell's christening their son Erich was a step in the right direction--except that his name really should be ERIC®. That format is the proper one. Or see the format on the cover of RIE. (BT)

o Filming Oversized Documents

For over a year, EDRS has photographed long documents (8½ x 14) at 29:1 reduction ratio in order to get the image of the page on one microfiche frame and avoid the overlapping images previously used. When the new filming technique was begun it was requested that Clearinghouses attempt to batch some documents in consecutive Clearinghouse number sequence. When there are several such documents from a Clearinghouse, this permits EDRS to make one splice into the master file instead of several. EDRS reports that, in general, these documents are not batched and have to be individually spliced. We would like to request that, where possible, Clearinghouses group such documents in consecutive Clearinghouse number sequence. (See ERIC Processing Manual, Page 182.) These instructions do not apply to 8½ x 14 documents in which the lines of text run parallel to the long dimension. These are photographed in right-reading orientation across the space occupied by two frames. (RC)

o Copyright Release Form

It has been decided that it is not within ERIC's province to advise authors of their legal rights in connection with the new copyright law. Therefore, the back of the copyright release form should not be used for this kind of quasi-legal purpose which could be open to misinterpretation despite our good intentions. Instead, the space could profitably be used for more specific instructions on how to fill out the form. (CW)

o FTS

The new 1978 prefix to the FTS code number is 17. The rest of your code stays as it has been. This number changes semiannually and your CERIC monitors are now in a better position to announce the change here in the Bulletin when they hear of it. CERIC has no magic key to further FTS information, but if you are faced with any FTS related difficulty, it would be best to consult the monitors before trying to solve the problem on your own. (CW)

o Lists of One-Shot Journals

The Clearinghouses are not encouraged by CERIC or Macmillan to maintain lists of journals to monitor for one-shot articles. These were meant to be serendipitous finds. Several difficulties could arise from keeping and using such lists (beside the time it takes to do so):

1. The journals from which one-shot articles are taken do not appear in the Source Journal Index and reprint availability from U.M.I. is not known. To find out whether the journal is covered by a U.M.I. agreement takes some of Tom Wright's precious time to make a check of U.M.I.'s larger list.

2. Clearinghouses do not monitor one-shot journals on a system wide basis as they do those on the Selective List. Therefore, articles pertinent to a variety of Clearinghouses' scopes could slip between the cracks, and there are often more than one ERIC-type article in an issue. For your information, Macmillan scans a variety of non-listed journals for the occasional education-related article, i.e.,

The New York Times
Time
Newsweek
U.S. News and World Report
Publishers Weekly

3. Macmillan has no mechanism to check duplicates which might appear if there was a year's time lag (as there sometimes is) in in-putting an article. Therefore, there could be duplicates in the system--something we all deplore! So try not to index one-shots more than a year old.

As has been said before, if it is found that more than three articles are chosen from a journal in a year, it is a candidate for the Selective List. Both Tom Wright and the appropriate monitor should be consulted as to whether new journals can be put on the list at a particular time. Finally, if you do feel it is necessary to keep a list of one-shot journals, please send them to Tom Wright. He can then check for duplicate journals and have better knowledge of where potential articles may appear. (CW)

o Technical Steering Committee

Attached hereto is a copy of the minutes (Attachment 2) of the most recent meeting of the ERIC Technical Steering Committee. The Committee has done an admirable job of assembling all the recommendations of the Regional Technical Meetings. Attached hereto is a copy of the consolidation of these recommendations and the Committee's comments on actions taken or referrals elsewhere for action.

Because a large number of the recommendations require thorough coordination with other elements of the system—the ERIC Facility, CCM, EDRS, Clearinghouse directors, etc.—we are not including a summary at this time of the results of the various recommendations. Time, however, has been reserved on the Technical Meeting agenda to allow for a full rundown on the actions taken and a discussion of the reasons for not implementing the suggestions which were not favorably considered. (FS)

o Microfiche Inventory Report

The Microfiche Inventory Report for the month of September is attached. (See Attachment 1.) (RC)

2. Announcements from the ERIC Facility:

o Additions to the ERIC Facility Acquisitions Arrangements

New additions to the ERIC Facility Acquisitions Arrangements List are as follows:

EFAA #132 - Southern Regional Education Board
Level I or as indicated
(Note: While EA and HE each show an arrangement with SREB, forty-six reports have been submitted directly to the Facility for processing.)

EFAA #133 - National Health Planning Information Center
Health Resources Administration
Level I (Uncopyrighted contractor reports)

Note for your records (Update to EPM Fig. 2-13).

Prescribed level of input for College Entrance Examination Board reports is Sales items - Level II, free items - Level I. (GS)

o Ordering Rand Corporation Reports

The ERIC Facility has had a letter from the Rand Corporation reminding us that Clearinghouses should NOT order Rand reports directly from the Rand Corporation. Clearinghouses MUST request titles through Grace Sundstrom at the Facility. Please make a note of this request for your files. (See EFAA #114.) (GS)

o DJF Report

An update to the DJF Report is attached. (See Attachment 3.) (JH)

3. Announcements from EDRS:

o Microfiche Replacement

You may have noticed that recent monthly ERIC issues from EDRS have contained microfiche documents with an ED number appearing with a slashed zero (Ø) instead of a regular zero (0). EDRS heard from a number of sources that this made for great difficulty in filing the fiche because the ED number could be read as an "8" instead of a "Ø". Therefore, EDRS has agreed to replace all the microfiche which were sent out with the Ø. The Ø appeared in the August, September, October, and November 1977 issues. Approximately 190 corrected fiche will be sent with the January 1978 issues of ERIC microfiche. We sincerely hope that this will correct the problem. (DG)

o EDRS Sales Report

EDRS produces a quarterly sales report, on microfiche, giving demand order sales of microfiche and paper copy for each document in the ERIC file. We shared this report with all Clearinghouses in 1976. If your Clearinghouse would like an update through 1977, contact Bob Chesley at CERIC. (RC)

4. Announcements from the ERIC Clearinghouses:

o The White House Conference on Libraries and Information Science

One of the major outcomes of the National Commission on Libraries and Information Science will be the White House Conference on Libraries and Information Science to be held in October, 1978. At the present time, each of the 50 States is planning to hold a state conference prior to the White House Conference. Since the present Administration is looking to the White House Conference as a vehicle for major policy development in libraries, it is important that ERIC provide inputs through the state meetings which may eventually reach the White House Conference agenda. Following this notice is a list of dates for state conferences which have already been established. The usual procedure for participation is to request an opportunity to testify at a regional meeting or to participate in a state meeting. Each Clearinghouse should be in touch with the state conference representatives to insure that ERIC ideas and concerns are represented. (DE)

Chairperson, Steering Committee

RE: Report of the Meeting of the Steering Committee for Technical Operations,
December 15 and 16, 1977

The Steering Committee held its regular quarterly meeting at this clearinghouse on Thursday and Friday, December 15 and 16, 1977. The following were the major items on our agenda: (1) nominate a new chairperson to succeed me in April, 1978; (2) develop an agenda for the 1978 national tech meeting; (3) go through the recommendations in the regional meeting reports and take action on appropriate items and refer other items to the proper group or individual; (4) recommend a course of action to get the subtype situation resolved by the time of the national tech meeting; and (5) come up with ideas for the "Welcome Wagon" packets for new standing-order customers.

All members of the committee were present: John Waters, Barbara Booth, Minda Klein, Dorothy Slawsky, Steve Jones, Lynn Smarte and Tom Wright. Steve Jones informed us that this was his last meeting, as he is resigning from EDRS. Apparently attrition is helping to solve the problem of when to rotate membership! One other membership matter was discussed: Barbara Booth reported that she was not aware of having expressed an interest in getting off the committee; she had been surprised, as we all were, to hear that she will leave the committee next April.

I'll report on the agenda items as they are numbered above:

(1) We nominated John Waters to become chairperson in April. With CERIC's approval, he is prepared to assume the chairpersonship after the national tech meeting.

(2) Our proposed agenda is attached. We are pleased with the sessions and the way everything fits together. Needless to say, none of the proposed session leaders have yet been contacted. As soon as we get CERIC's approval of the agenda, I will work with the committee in contacting all the proposed session leaders and inviting their participation.

(3) Our item-by-item response to the recommendations of the three regional tech meetings is also attached. A number of the recommendations were used to develop sessions for the tech meeting, several we referred to the facility or elsewhere, and several involved projects already underway. In our responses to several items, we have made recommendations to CERIC, and I'd like to call your attention to those: items 5, 6, 15, 17, 28, 30, 34, and 39.

(4) At the eastern regional meeting, Chuck Hoover gave the Steering Committee the task of resolving the subtype controversy by the time of the national tech meeting.

in April. The committee decided that the only feasible way to do this would be to appoint a committee of three people knowledgeable in this area. This committee would be charged to consider all the recommendations that have been made—Hop's 14 discussed at the eastern meeting, Barbara Booth's new classification scheme, Cathy Clay's ideas, and the recommendations from the regional meetings (cited on the attached list)—and then decide on a course of action for the system. We recommend that such a committee be formed and that it consist of Hop Davies (chairperson), Ted Brandhorst and Barbara Booth.

(5) "Welcome Wagon"—We suggest including the following in each packet, free of charge:

- (a) ERIC products bibliography
- (b) fiche copy of processing manual
- (c) EDRS search fiche
- (d) NIE brochure
- (e) "How to Prepare for a Computer Search; A Non-Technical Approach"
- (f) ERIC tools brochure
- (g) ERIC products sheet
- (h) "Survey of ERIC Data Base Search Services"
- (i) ERIC fact sheet
- (j) bibliography of documents about ERIC (due June 1976)
- (k) the new "ERIC: What It Is, How to Use It"
- (l) "Directory of ERIC Microfiche Collections"
- (m) Macmillan brochures
- (n) EDRS technical and maintenance hints (e.g., "Vesicular Film as a Library Microfilm")
- (o) basic guidelines on starting an ERIC collection (e.g., floor space needs, buying fiche cabinets)
- (p) cover letter from clearinghouse
- (q) "Interchange"

The standard tools would, of course, be offered as sale items: thesaurus, title index, etc.

We look forward to getting CERIC's reactions to our recommendations.

Steering Committee Action
on the
1977 Regional Technical Meeting Recommendations

December 28, 1977

Western Regional Meeting

1. That there be inclusion of user services agenda time at national technical meetings.

ACTION: This has been included in the agenda the Steering Committee has submitted to CERIC for approval.

2. That Central ERIC be requested to provide its position on the kinds of services we can offer to dissemination and linkage groups.

ACTION: This is one of the primary concerns of a session entitled Dissemination Groups in Education, which is part of the national tech meeting agenda we have submitted to CERIC.

3. That the facility be requested to provide the field limits and overall limits (with examples) for the new resume form.

ACTION: The Committee has referred this matter to the facility, with the request that this information be supplied to the clearinghouses. In addition, the Committee has asked Tom Wright to supply the same information for CIJE.

4. That the revised acquisitions guidelines include instructions that multiple copies of conference programs should be sought, marked and shared with overlap clearinghouses.

ACTION: As this concerns part of the Processing Manual, this recommendation has been referred to the facility.

5. That the present guidelines permitting clearinghouse loaning of documents through ERIC be examined.

ACTION: The Steering Committee has recommended to CERIC that a determination be made as to whether this is still being done--if so, why; if not, we recommend that the policy be abolished and the example removed from the manual.

6. That quality control selection standards be examined in terms of the future growth of the ERIC data base.

ACTION: This matter has been referred to the ERIC directors' meeting and to Del Trester.

7. That when content focuses on an educational level, that descriptor should be majored, but it should be minored when the level is not the content.

ACTION: This has been referred to the Indexing Practices session of the national tech meeting agenda that has been submitted to CERIC.

8. That the form and content homograph descriptors should be recognized as such, split out, and scoped.

ACTION: This has been referred to the Vocabulary Improvement Program.

Midwest Regional Meeting

9. We recommend that a survey of the clearinghouses be conducted to determine if there is widespread dissatisfaction with current required quarterly report statistics. If this is determined to be the case, a session at the national technical meeting should be devoted to the study of these required statistics. The development of suggested revisions and guidelines for compiling statistics can then be forwarded to Central ERIC for consideration.

ACTION: User services quarterly report statistics will be discussed at the user services session on the tech meeting agenda that has been submitted to CERIC.

10. We recommend the appointment of one person from each clearinghouse to serve as an information person within the clearinghouse and to be responsible for facilitating an informal exchange of information on management (i.e., appropriate journal articles on training or task analysis) between clearinghouses. We recommend the one person be designated to represent the system in this activity and insure appropriate input of this type of information into the Administrative Bulletin and coordinate the interchange of information between clearinghouses.

ACTION: The Committee refers this matter to the Associate and Assistant Directors.

11. We recommend that substance areas (i.e., acquisitions, user services, etc.) at the national technical meeting or other national conferences be divided into smaller sections and scheduled in a way that technical staff will be able to rotate between different sections and groups.

ACTION: The Committee believes that scheduling difficulties and the problem of very broad sessions running concurrently have been resolved in the tech meeting agenda for 1978 that has been submitted to CERIC.

2. We recommend that clearinghouses be given an opportunity to provide input in any processing manual revisions.

ACTION: The Committee refers this to the facility, with the recommendation that this logically should apply only to substantive processing manual revisions.

13. We recommend that the areas of responsibility held by the clearinghouses, CERIC, and the ERIC Facility for soliciting documents and forming standing agreements be reviewed and clarified by members from each of the three levels of operation. We also recommend that this portion of the processing manual be updated if deemed necessary during this review.

ACTION: The Committee refers this to the facility to consider in updating the processing manual.

4. We recommend that the development of an on-line duplicate checking system proceed as soon as possible.

ACTION: A study of on-line dupe checking is already in the works at the facility. This study is scheduled for the facility's current contract year.

5. We recommend that all clearinghouses be informed of any document pulled by CERIC and of information regarding this decision at the time the document is pulled.

ACTION: It was once the practice to inform a clearinghouse when a document was pulled and to give the reason why. Apparently this practice has been abandoned, since many clearinghouses do not know that a document has been pulled until the remove list comes out and do not know why unless they call CERIC to find out. The Committee supports this recommendation and asks that CERIC resume the practice of informing clearinghouses about documents pulled.

16. We recommend that someone check on mail rates and arrangements possible for or organizations which mail a large amount of material and that this information be provided to the clearinghouses.

ACTION: This information is available from the post office (they have a booklet on the subject).

17. (This was labeled "suggestion" rather than "recommendation.") A list of blanket release agreements held by the clearinghouses and the ERIC Facility should be put in the Administrative Bulletin.

ACTION: The Committee discussed the whole issue of sharing information on blanket releases and came up with the following recommendations to CERIC: (1) that all clearinghouses send the originals of their organizational blanket releases to CERIC for a permanent archive (of course, clearinghouses should keep xeroxes of the releases for themselves); and (2) that notation of these blanket releases at whatever level be included in the SW area of the appropriate listings in the Source Code Directory.

18. (suggestion) Ideas on in-house computer files and computer applications for acquisitions should be brought to and shared at the national technical meeting.

ACTION: There is a session on this subject on the agenda that the Steering Committee has submitted to CERIC for approval.

19. (suggestion) Information on notices to authors about transferred documents should be exchanged among clearinghouses and perhaps standardized.

ACTION: This has been referred to the acquisitions session on the tech meeting agenda that has been submitted to CERIC.

20. We recommend that the following possible solutions to the subtype and form descriptor problems be considered: (1) Scope notes could be developed for descriptors which designate type (form). Such scope notes would clearly limit the descriptor's use to form (e.g., the present scope note for REPORTS). Alternative descriptors also with scope notes would be available for indexing content, e.g., THESES (DOCUMENTS) could be a form descriptor and THESES could be a content descriptor. (2) The number of subtype categories could be expanded to include forms that are not contained in the present list and to separate some that are presently grouped together. Each term should be clearly defined. Parallel form descriptors would be listed for each subtype.

ACTION: (1) has been referred to the Vocabulary Improvement Program; (2) has been referred to the proposed Pubtype Committee, which is described in the attached report of the Steering Committee's meeting of Dec. 15 and 16.

21. We recommend that the needs of the manual searcher who wishes to separate documents by subtype be considered in any study and revision concerning subtype.

ACTION: The Committee refers this to the proposed Pubtype Committee (see 20 above).

22. We recommend that a list of mandatory age level terms be developed to be used when appropriate and/or when mandatory educational leveling terms are not appropriate. A suggested list has been developed by PS, whose scope is especially affected.

ACTION: The Committee has referred this to the Indexing Practices session on the tech meeting agenda that has been submitted to CERIC.

23. We recommend that the 16 educational leveling terms be more clearly defined, expanded if some terms have been omitted, and the guidelines for their use be more clearly specified. Since the assignment of major-minor status to educational level descriptors is a problem, should be studied and clear guidelines developed.

ACTION: Ditto response to no. 22.

24. We recommend that there be a session at the national technical meeting during which clearinghouse personnel involved with the training of abstractors and indexers review together a draft of the new A/I training materials for the purpose of becoming familiar with them and their possible use and of suggesting needed changes.

ACTION: There is such a session on the agenda the Committee has submitted to CERIC.

25. We recommend that there be a session at the national technical meeting on the implications of full-text computer searching for abstracting.

ACTION: This is one of the items to be included in a session called New Trends in Information Science on the agenda that has been submitted to CERIC.

26. (suggestion) A list of new descriptors (which have been approved and put on the Master Thesaurus tape) should be distributed to the clearinghouses as soon as the descriptors reach this stage so that clearinghouses will have a signal as to when they can use these new descriptors.

ACTION: The Committee recommends to the facility that it send out the list of new approved thesaurus terms monthly, instead of every few months, as is the current practice.

27. We recommend that a list of aids, presentation materials and handouts used at workshops be created and distributed to the clearinghouses.

ACTION: An exchange of acquisitions materials among clearinghouses has been attempted and was not very successful (poorly coordinated, late, and involved a staggering quantity of paper being shuffled around), so the Committee proposes to simplify such exchanges of info by having a display area at the national tech meeting--an area to which each component will bring one copy of all its forms, handouts and other products, along with a sign-up sheet. We can all look at everyone else's stuff and sign up to receive a copy of anything we want.

28. We recommend that the Facility develop a list of subscribers to RIE and OLJE who do not receive the microfiche collection. These subscribers may have different workshop needs and they should be identified and addressed.

ACTION: Several years ago, GPO generated a list of RIE subscribers. We recommend to CERIC that GPO generate an updated list and that this be distributed to all clearinghouses. Then it would be fairly simple, using this and the Directory of Microfiche Collections, for each clearinghouse to determine whether a particular subscriber receives the fiche or whether all subscribers in its region receive the fiche.

29. We recommend that CERIC consider the development of a brochure which stresses the people and service aspects of the ERIC system such as workshops, question answering, negotiation process, etc.

ACTION: CERIC has nearly completed a new brochure; we should wait and see whether it has the user services emphasis described in the recommendation.

30. We recommend that an abbreviated directory of user services personnel be compiled (one page back and front) and distributed to ERIC user groups, other dissemination systems and standing order customers.

ACTION: The Committee believes that the spirit of this recommendation can be accomplished without preparing a new list. The Committee recommends to CERIC that they send copies of "The ERIC Network: Components" in quantity to Lockheed, SDC and DRS to send out with their newsletters.

31 (This was labeled "action" rather than "recommendation.") The journals which are one-shot journals will be listed and the list distributed to the other clearinghouses and to the ERIC Facility (?) to avoid the duplication of indexing and annotating. ERIC/ECE will coordinate this activity.

ACTION: To facilitate this effort, the Committee has recommended that clearinghouses send a list of any journals that they regularly monitor for one-shots to Tom Wright, who has agreed to compile the lists and send them to all the clearinghouses.

32. (action) Clearinghouses will check the source index in the current CIJE to see if they can possibly cover some of the journals Macmillan is currently annotating.

ACTION: To facilitate this activity, Tom Wright has agreed to send a list of these journals to the clearinghouses.

Eastern Regional Meeting

33. All materials from David Trivett's Clearinghouse Scope Project should go to the other clearinghouses not represented at this meeting. . . . Murray Fowler should be supported in his plan to review the Clearinghouse Scope of Interest Manual . . .

ACTION: All this is already underway.

34. Information for authors should be printed on the reverse side of the Reproduction Release Form. It is hoped that this information would be developed by Central ERIC and the facility with input from the clearinghouses. Until this is effected, each clearinghouse is encouraged to add information on the reverse of the current release forms.

ACTION: The Committee endorses this recommendation and refers it to CERIC.

35. The ERIC Document Reproducibility Guide, being developed at the facility, should be given priority status to meet its February release date.

ACTION: It is the Committee's understanding that this guide is currently in preparation.

36. Investigate the feasibility and legality of developing valid and reliable abstracting tests for systemwide use in the screening process when hiring ERIC indexer/abstractors.

ACTION: The Committee refers this matter to Tests and Measurements and asks whether they can offer any advice or guidance on this subject.

37. Collect and examine data on current training costs for producing ERIC A/Is and on their longevity with the system. Are present training methods cost effective? How could such methods be improved? Would such inducements as merit increases and flexible scheduling increase A/I longevity?

ACTION: As far as collecting and examining the data are concerned, there are so many variables involved (political, regional and otherwise) that the Committee doesn't consider such a study feasible at this time (although if anyone wants to undertake such a study, more power to them!). As far as improved training methods are concerned, it is anticipated that the A/I workbook will do just that. As far as merit increases and flexible scheduling are concerned, this is up to the individual organization; there is nothing the system as a whole can do.

38. Encourage clearinghouse managers to inform A/Is regarding all phases of clearinghouse operation and to allow A/Is to actively participate in a wide range of these activities

wh)ver possible.

ACTION: The Committee agrees, but feels that this is really an in-clearinghouse communication problem.

39. Encourage the simultaneous publication of updates of the Main Working Thesaurus and the Rotated Descriptor Display.

ACTION: The Committee has recommended this to CERIC and the facility in the past and still supports this.

40. Examine the feasibility of replacing the present Pubtype field with a more expansive Format field which could accommodate up to three format descriptors, one of which would be starred as majored and included in the RIE index.

ACTION: The Committee refers this to the proposed Pubtype Committee (see the report of our meeting of Dec. 15 and 16).

41. Encourage the systemwide use of age and grade level terms, in addition to the Mandatory Leveling Terms, through the addition of a list of said terms facing the list of Mandatory Leveling Terms in the introduction to the ERIC Working Thesaurus.

ACTION: This has been referred to the session on Indexing Practices of the tech meeting agenda that has been submitted to CERIC.

42. Increase from 10 ~~and~~ ^{to} 12 the total number of descriptors allowed when indexing for CIJ)

ACTION: This was brought up last year and only two people supported the idea; however, this can be brought up again at the tech session on Indexing Practices.

43. Investigate the option of using (Editor) or (Editor/Abstractor Initials) when signing journals known to use editor abstracts.

ACTION: As it is usually difficult to determine when an abstract is an editor's and when it is an author's, this idea seems to the Committee to pose more potential complications than what we're doing now.

44. Suggest that a running foot: "See the Thesaurus" be added to ERIC subject index terms which are now captioned "See also . . ."

ACTION: According to Ted Brandhorst in response to a previous recommendation from the Committee, running feet in RIE have already been investigated, and it was found that there is insufficient room in the margin.

45. Request that all clearinghouses amend and update their scope statements and lists of preferred descriptors which presently appear as an appendix to the manual.

ACTION: This is already underway.

46. Lynn Smarte to prepare and circulate an evaluation study of ERIC/CEC's SDI service.

ACTION: This is being done.

47. Compilation of the services of all clearinghouses (including information about computer searches, mailing lists, etc.)

ACTION: The Steering Committee will see that this is done and distributed to all components.

48) Have clearinghouses exchange personnel for short periods of time (1 or 2 days), but not for long-term periods.

ACTION: The Steering Committee recommended this in its last report, and it still does, but due to the finances and logistics involved, this apparently has to be left to the discretion of the individual clearinghouses.

49. Committee be formed to study subtype classifications and that a user services representative be included.

ACTION: The Committee has recommended to CERIC the formation of such a committee (see the report of our meeting of Dec. 15 and 16).

50. Recommend that there be quantitative guidelines developed for assigning subtypes.

ACTION: The Committee refers this to the proposed Subtype Committee.

51. Clearinghouses provide a list of preferred descriptor terms within their scope to be shared with all clearinghouses.

ACTION: This will be done as part of the Scope project.

52. Participants recommended that CERIC begin to explore other than print products.

ACTION: The Committee has referred this to the IAP session of the tech agenda that has been submitted to CERIC.

53. Participants recommended that the need for a systemwide ERIC product be placed on the agenda of the Directors Meeting.

As this is beyond the purview of the Steering Committee, we record this here simply to bring it to the attention of the parties involved.

54. Participants recommended that the advice of an education marketing specialist be sought by the ERIC system to increase dissemination of IAPs and to direct our efforts to promote the system and increase public awareness of it.

ACTION: Subsequent to the eastern meeting, Frank Smardak informed the Steering Committee that hiring a marketing consultant is out of the question for ERIC. Our awareness efforts, which the Steering Committee will continue to work on, apparently will have to depend exclusively on in-system expertise.

55. Participants recommended that the time is ripe for the system to expend major energies in fostering visibility, promotion for the whole system, now that ERIC is unquestionably on solid ground technically.

ACTION: Mercy, who could disagree? And the Steering Committee is continuing to work on its "awareness" ideas (posters, etc.). Any help anyone wants to offer on this would be welcomed.

56. Participants recommended that the reasons and goals for a committee on IAPs be referred to the Directors Meeting and that Section Meetings for IAP coordinators be planned at subsequent Regional Technical Meetings.

As directors' and regional meetings are beyond the purview of the Steering Committee, we record this recommendation simply to bring it to the attention of the parties involved.

Administrative Bulletin

Charles W. Hoover, Branch Chief

Loretta G. Brown, Bulletin Coordinator

Educational Resources Information Center, National Institute of Education, Washington, D.C. 20208

TABLE OF CONTENTS

1. Announcements from CERIC

- o ERIC Says Farewell to Barbara Sanders Charles Hoover
- o National Technical Meeting Frank Smardak
- o Cooperation with CAPE Robert Chesley
- o "How To Use ERIC" Catherine Welsh
- o Review of Mailing Lists Frank Smardak
- o Microfiche Inventory Report Robert Chesley

2. Announcements from the ERIC Facility

- o Additions to the ERIC Facility Acquisitions Arrangements Grace Sundstrom
- o Other Announcements from the Acquisitions Department. Grace Sundstrom
- o DJF Report Jim Houston

3. Standing Order Customer Listing Loretta Brown

1. Announcements from CERIC:

o ERIC Says Farewell to Barbara Sanders

Barbara Sanders, CERIC's Staff Assistant and former EAB Coordinator, has left ERIC after approximately 3 years of association. She has taken a position in the Director's Office of NIE with the Panel for the Review of Labs and Centers Operation. We wish her well in her future endeavors.

Loretta Brown has assumed responsibility for the EAB. Please forward all contributions to her at CERIC no later than the 5th. of each month.

(CH)

o National Technical Meeting

The agenda for the National Technical Meeting is in the final stages of preparation. In the next two weeks copies of the agenda will be mailed directly to those individuals who have been nominated (thus far) as attendees by institution directors.

At the same time, additional information on how to get to Harpers Ferry from National, Dulles, and Baltimore/Washington International Airports will be included. Maps for those who wish to drive rented cars and railroad schedules for others who prefer to travel via the scenic railroad from D.C. to Harpers Ferry will be enclosed. Additional information on the logistics of the conference will also be forwarded in the packet.

If you are coming to the meeting and your name has not yet been forwarded to Frank Smardak at Central ERIC be sure to get in touch with him by telephone in the next week or so. (FS)

o Cooperation with CAPE

During the past year we have met a number of times with representatives of the Council for American Private Education (CAPE). CAPE is a Washington based coalition of fourteen national organizations which represent a large proportion of the nation's private schools. It has been their concern, and ours, that ERIC contains relatively few documents dealing with the unique concerns of private schools.

One result of these meetings has been the production of a brochure (Attachment 1) which has been printed by ERIC and will be distributed to over 15,000 private schools by CAPE. The purpose of the brochure is twofold. First, it describes the ERIC system and its services. Second, it requests the submission of suitable documents to ERIC and describes the input procedure.

In the course of our discussions, CAPE has made a number of suggestions concerning Thesaurus terms. Although the Clearinghouse on Educational Management has primary responsibility for documents dealing with the administrative concerns of private schools, all Clearinghouses may acquire documents in their own scope which deals with private education. As we begin a year of intensive activity in thesaurus improvement, we have asked CAPE to review the existing terminology that deals with private school concerns. These comments will be included in a future issue of EAB. (RC)

o "How To Use ERIC"

The new edition of this informative brochure about ERIC is attractive in appearance and well written. Unfortunately, a variety of errors both minor and major have been incorporated in it. You are invited to let me know of any you come across. In very constructive and helpful ways several people already have. The next printing will, hopefully, reflect all the

necessary corrections. In the meantime, make the best and widest use of the booklet you see possible, flaws permitting. (CW)

o Review of Mailing Lists

From time to time mail from ERIC Clearinghouses arrives at NIE addressed to individuals who are no longer associated with the Institute. Specific examples of this are: Drs. Glennan and Hodgkinson, and Lee Burchinal, Messrs. Harvey Marron, Thomas Clemens, and believe it or not, James Eller. In addition, NIE organizational changes often fail to be reflected properly for considerable periods of time. Some letters occasionally arrive addressed to Chuck Hoover at Code 400, Office of Education. One letter came last week addressed to Dr. Ward Mason, NIE Task Force, etc., an address which has been obsolete for almost four years.

It is suggested that reviews of clearinghouse mailing lists be made every six months or so by individuals who have been associated with the system for at least two or three years. Organizational changes at NIE and related address changes will, in the future, be reported in early issues of the EAB. (FS)

o Microfiche Inventory Report

The Microfiche Inventory Report for the month of October, 1977 is attached. (Attachment 2) (RC)

2. Announcements from the ERIC Facility

o Additions to the ERIC Facility Acquisitions Arrangements

The new addition to the ERIC Facility Acquisitions Arrangements is:

EFAA #134 - National Highway Traffic Safety Administration
Level I (Contractor reports in the area of
education and training) (GS)

o Other Announcements from the Acquisitions Department

- The Facility Acquisitions Department has distributed 50 copies of the new Blanket Reproduction Release form to each Clearinghouse for use in setting up acquisitions arrangements. (GS)
- A Reminder: Please review Section 4.2.10 (Reply Cards) of the ERIC Processing Manual which states a Reply Card should be sent back to the Contributor by the Clearinghouse if the document is rejected and should remain with the document if it is forwarded to the Facility for processing into RIE. (GS)

- Copyright: All Clearinghouses should continue to assume that the copyright permission shown on the EFAA Prescribed Level of Input Column (Fig. 2-13, Processing Manual p. 61) is still valid. As time permits, a new Blanket Reproduction Release form will be requested, when applicable, for each arrangement, and a copy of the signed form will be sent to each Clearinghouse for the record. (GS)

- o DJF Report

An update to the DJF Report is attached. (Attachment 3) This report begins with entry no. 21; entries are no longer to be renumbered as other earlier entries are dropped from the report. Entries are dropped from this report as they are announced in the "New Descriptor Listing," the supplement to the Thesaurus Working Copy. Clearinghouses may begin using the Descriptors marked "implemented" in this report; it is not necessary to wait for the Thesaurus supplement.

Two pages (13 items) reflecting current action were inadvertently omitted by CERIC last month; these items appear in the present report. (JH)

- 3. Standing Order Customer Listing:

An update to the Standing Order Customer list is provided below. Please note that last month's EAB did not distinguish between additions and cancellations, and are herein repeated. The large number of cancellations in January is due, in part, to EDRS taking action on outstanding accounts. In the past, when this has happened, many have resubscribed.

- o DJF Report Jim Houston

3. Announcement from EDRS

- o Standing Order Customer Listing Debbie Gallagher

4. Announcements from ERIC Clearinghouses

- o Pauline Rothstein's Journal Column Pauline Rothstein

1. Announcements from CERIC:

o Short Documents

We have been aware for some time that there are a considerable number of very short documents contained in the ERIC file. For example, in the past two years, 781 documents have been entered which contain five or fewer pages. While the number of pages in a document is not a measure of that document's quality or significance, inspection has raised the question whether some of these documents warrant the cost to input and subsequently to purchase by 650 standing order files. As was announced at the recent Directors' Meeting, documents containing five or fewer pages may still be entered into the system, but approval to do so must be obtained from the Clearinghouse monitor. (CH)

o Microfiche Inventory

During the past year, the Facility has conducted a monthly "microfiche inventory". This has involved a check of each frame of the microfiche in the monthly shipments, with relative judgments on the quality of the reproduction. Each Clearinghouse receives a microfiche copy of these monthly reports which should be reviewed for the Clearinghouse's own input.

These and other efforts to improve the quality of input appears to be having an effect. The present proportion of problem fiche, of marginal or unsatisfactory quality, is running around 2%. This compares with approximately the same samples taken from the microfiche produced in earlier years.

The microfiche inventory report prepared by the Facility is reviewed by EDRS. Where previously undetected filming errors are the cause of the problem, these documents are being refilmed and the fiche redistributed to standing order customers. In some of the other cases, we note that the document has been submitted at Level II and/or the marginal fiche have notes in the note field indicating the marginal nature of the material. We applaud this effort to warn users of potential difficulties. In a few cases, there have neither been Level II entry nor notes indicating potential difficulties. Realizing the difficulty of the subjective judgments involved, we would nonetheless like to decrease, even further, the number of problem documents. To help inform Clearinghouse with recent examples of these problem documents, we are including, as Attachment 1, three follow-up reports from EDRS indicating the documents involved and the nature of the problem. Noted on the EDRS follow-up reports is the level of the document and whether or not there is a note calling attention to marginal copies. Depending on how bad the problem is, Level II and a note may constitute an adequate treatment for a significant document. In some cases, a document should not be entered. This feedback should help Clearinghouses in making this decision. (RC)

o Filming and Automatic Exposure Setting

The microfiche inventory has turned up several examples recently where two-color pages have been exposed for one of the colors, leaving the remainder of the page unreadable. For example, where a dark colored box extends over the top portion of a page, the automatic exposure device at EDRS will measure reflectivity from this area, and underexpose the remainder of the page that is not colored. Therefore, it will be useful for document preparers to be aware of the exposure mechanism and to take necessary action to deal with the problem. When a document page is transported under the camera prior to filming, a light sensitive probe measures reflectivity along a line about two inches from the top of the page, entirely across the page. This reading determines the exposure for that frame. Although EDRS camera operators have been asked to be aware of this problem, the Clearinghouses should be aware of the situation and to bring it to the attention of the camera operator with a small note clipped to the page stating "Expose Manually". This will allow the camera operator to estimate an exposure midway between the range of contrasts and to expose at this setting. Although, as with most problem instances, while neither light nor dark text will look particularly good, at least they should be readable. If you want to see an example of the problem created by this situation, see the last page of Document ED 137 985. (RC)

o Mandatory Level II for "Sideways-Reading" Documents

Over a year ago, ERIC began filming all document pages in "right-reading" orientation. This has permitted microfiche users to read all documents without getting the cricks in their necks which previously prompted strong protests. Since ERIC is primarily a microfiche based system, the change has benefited a large majority of our users. Unfortunately, resulting hardcopy from these "sideways-reading" documents is difficult to use and significant numbers of users are refusing to pay EDRS for them.

Until more specific criteria are published in the ERIC Processing Manual, documents which consist primarily of pages in which the text runs parallel to the long dimension should be entered at Level II. Occasional charts or pages filmed sideways are acceptable at Level I, although, it is requested that, where feasible, these pages be made standard in document preparation. (RC)

o ERIC Processing Manual

Periodically, there are revisions made to the ERIC Processing Manual. Frequently, these are the result of system changes, or new procedures. In some cases, references to old procedures may be found elsewhere in the Processing Manual which may not have been deleted or corrected. When Clearinghouses become aware of such problems, we would appreciate it if you would bring it to the attention of the ERIC Facility so that

further corrections can be made to bring the Processing Manual up to date. In addition, if you are aware of other changes which should be made, or wish to recommend changes to the Processing Manual, please also send these suggestions to Ted Brandhorst at the ERIC Facility. (RC)

o ERIC Logo--Again

In case there is a question in anyone's mind, the ERIC logo looks like this ERIC® , see the front cover of RIE. The ® is what makes it a registered trademark and not legally reproducible by any unauthorized person or organization. So, would everyone please reread the first CERIC announcement in the January issue of EAB and let's try putting ERIC® on everything that moves in the system. The R can be made very small. (CW)

o State Capacity Building Grants

For several months, negotiations have been in progress to complete awards to States that submitted proposals in last year's competition in the State Dissemination Grants Program. With only one negotiation left uncompleted, we would like to announce those which have received awards in this competition. New capacity building States and NIE project monitors are as follows:

Arizona	Del Trester	(202) 254-5555
Nebraska	Kit Welsh	(202) 254-5555
Oklahoma	Del Trester	(202) 254-5555
Utah	John Coulson	(202) 254-7930
Wisconsin	Kit Welsh	(202) 254-5555

States with special purpose awards for capacity building and other purposes are:

Arkansas	Arch Steiner	(202) 254-5555
Hawaii	Arch Steiner	"
Dist. of Col.	Arch Steiner	"
Vermont	Arch Steiner	"
Washington	Arch Steiner	"

If you would like further information about these projects, contact the NIE monitor. (RC)

o Microfiche Inventory Report

The Microfiche Inventory Report for the month of November, 1977 is attached. (Attachment 2) (RC)

2. Announcements from the ERIC Facility:

o Publication Date--Importance in RIE Report Resumes

Publication Date (PDAT) should be captured as a data element for virtually every ERIC document processed by the Clearinghouses. Publication Date can be a crucial piece of information to the user attempting to evaluate search output. When searches employ Publication Date as an element in the search logic, the absence of a date can prevent an otherwise legitimate retrieval from occurring.

Documents carry dates on their covers or title pages, or they carry them in their front matter, or the dates can be inferred from internal evidence (including bibliography entries). In addition, contacts with authors or sources via telephone or correspondence, can also often reveal dates.

With these several avenues open to the cataloger, it should be a very rare situation for a document to enter the ERIC system without a date. Recent experience at the ERIC Facility reveals, however, that Publication Date is absent on incoming resumes with increasing frequency.

Publication Date was not made a mandatory field because of the occasional journal article in RIE and the occasional item that is genuinely undateable. This fact should not lead the Clearinghouses, however, to feel that Publication Date is an optional data element. Rather, it should be treated as one of the most important data elements and should be cataloged whenever it is humanly possible to do so. (TB)

o Input of ADR Forms

Clearinghouses are reminded to send the Facility their completed ADR Forms on the last working day of the month, as provided in Section 4.3.5 of the ERIC Processing Manual. This promptness is necessary because, in order to get the Acquisitions Data Report out three weeks after the cut-off, the Facility must have all forms in hand within the first week of each month. Delay in receiving the forms from just one Clearinghouse makes it very difficult for the Facility to complete the ADR on schedule. Furthermore, because of this tight schedule, Clearinghouse data received late may not make the current ADR.

In completing the Forms, attention should be paid to including the number of pages (Columns 9-12) and the Publication Date (Columns 13-19) whenever they can be determined. Both of these discriminators help differentiate items with similar titles. It should also be borne in mind that documents may be entered on the ADR at any point in the processing cycle, as soon as accession numbers have been assigned. Because recording of Disposition Codes (Column 20) is optional,

documents need not have been selected for RIE to be entered on the ADR. The sooner accessions appear on the ADR, the earlier the entire ERIC network is on notice that items are in processing which several Clearinghouses may have acquired at about the same time. (MH)

o Blanket Reproduction Releases

For your records, the following Blanket Reproduction Release forms have been signed and returned to the Facility. (Note: We will announce receipt of signed Blanket Reproduction Release forms in the EAB rather than send every Clearinghouse a xerox copy of the form.) (GS)

American Driver and Traffic Safety Education Association
Level II - Sherry Thornton

Association for Childhood Education International
Level II - Monroe Cohen

Atlanta Public Schools
Level I - Jarvis Barnes

HuRRRO

4. Announcements from the ERIC Clearinghouses:

o Pauline Rothstein's Journal Column

Pauline Rothstein at the Clearinghouse on Urban Education is writing a regular journal column, "News from ERIC" for Education Libraries, a publication of the Special Libraries Association/Education Division. She will be happy to announce exciting news from other Clearinghouses. System related news as well as information about special services and new publications now published three times a year. Send all information to Pauline Rothstein at UD. (PR)

2. Announcements from the ERIC Facility

- o Additions to the ERIC Facility Acquisitions Arrangements List Grace Sundstrom
- o Blanket Reproduction Releases Grace Sundstrom
- o Lost and Found Grace Sundstrom
- o DJF Report Jim Houston

3. Announcement from EDRS

- o Standing Order Customer Listing Debbie Gallagher

4. Announcements from ERIC Clearinghouses

- o Job Vacancy at ERIC TM Gail Dietz Conley

NOTE: Due to a tremendous workload by the entire Central ERIC staff, the April, 1978 edition of the EAB never "got off the press." Therefore, this issue contains items which would have been announced at that time. (LB)

1. Announcements from CERIC:

o ERIC Facility Contract Modification

The ERIC Facility contract has recently been modified to permit experimentation with direct file entry from Clearinghouses and editing at Clearinghouses and the Facility by computer editing programs and by word processing equipment. Access to computer editing programs will be supplied by two Clearinghouses (SE, FL) and the Facility. Word processing equipment, which was demonstrated at the recent Technical Meeting, will be supplied to three Clearinghouses (SO, EC, SP) and the Facility. The experiment will last for four months during which time records on use and costs will be maintained.

The Facility contract modification also included provision for producing a bibliography of ERIC Information Analysis Products (IAPs). The bibliography will cover the period from the last bibliography of IAPs through 1977, a period of two and a half years. It will be produced in the format of RIE. The Facility will be in contact with Clearinghouses concerning identification of appropriate products produced during this time. Hereafter, it is planned that annual bibliographies of IAPs will be produced. (RC)

o National Bureau of Standards Study of ERIC

NIE is contracting with the National Bureau of Standards for a study of ERIC. The study will consist of an investigation concerning how technology and computers can be used to advantage in the ERIC system. This will include both the input and processing of documents and other activities dealing with the operation of the system as well as aspects of searching, acquiring and using ERIC documents, products and materials. The study is being conducted by the Institute for Computer Sciences and Technology at the National Bureau of Standards. (RC)

o Answer Please

It is expected, when Clearinghouses are asked by CERIC, the Facility, EDRS, or an ERIC committee for an opinion on a subject of system-wide importance, that an answer, yes; no; or have no opinion, will be forthcoming. In a recent poll asking Clearinghouses for comments or suggestions on a list of new data elements being added, the Facility received only 8 replies! No names will be mentioned, but if you want to know if you were among the delinquents, call Liz Pugh; she knows. From now on, answer please. (CW)

o U.S. Postal Service Improves Machining of Small Film Cases

Cooperative efforts between the U.S. Postal Service and the National Audio-Visual Association, Inc. (NAVA) are underway to begin machine processing of small film cases which are needed in shipping films through the mail. Attachment 1 is a letter from NAVA citing these efforts. (CH)

o "Worksheet on How to Use RIE"

A one-page "Worksheet on How to Use RIE" is now available from the Association of College and Research Libraries, a division of the American Library Association. (Note: The worksheet is on two single sheets of paper due to the EAB format as Attachment 2.)

Prepared by the Education and Behavioral Sciences Sections's Committee on Bibliographic Instruction for Educators, the worksheet is designed to be used for individual and/or group instruction and presupposes no previous use of the ERIC system.

To request a reprint of the worksheet, send a self-addressed mailing label and \$.26 in postage to ACRL, American Library Association, 50 East Huron Street, Chicago, Illinois 60611.

(CH)

o Microfiche Inventory

The Facility has made an effort in the past couple of months to "catch up" in performing the monthly microfiche inventory. This has resulted in an unusually large number of microfiche inventories and EDRS responses to the inventories in this issue of EAB.

From the inventories, Clearinghouses can see which of their documents, if any, have presented filming difficulties. Also, the EDRS response to the inventories further indicates the nature of the problem, whether the document was input at Level II, if there was a note indicating potential problems and shows those titles that will be refilmed and redistributed to all standing order customers. These activities are significantly improving the overall quality of the ERIC file of microfiche. Attached are microfiche inventory quality checks for the months of December, 1977, and January and February, 1978. (Attachment 3)

(RC)

o ERIC Admin Bull.

Attachment 4 is a copy of the text presented during the Talent Show at the recent Harpers Ferry ERIC Technical Meeting. Copyright release has not been obtained, but skillful negotiation by our Acquisitions Librarian has resulted in obtaining this copy. Any resemblance to an information system living or dead, is remarkable!
(RC)

o Microfiche Inventory Reports

The Microfiche Inventory Reports for the months of December, 1977, January, 1978 and February, 1978 are enclosed as Attachments 5, 6, and 7, respectively.

2. Announcements from the ERIC Facility:

o Additions to the ERIC Facility Acquisitions Arrangements List

The new additions to the ERIC Facility Acquisitions Arrangements List are:

EFAA #150 - Library of Congress, Congressional Reference Service
Level I

EFAA #151 - Florida Educational Research and Development Council, Inc.
Level II

EFAA #152 - Ontario Secondary School Teacher's Federation
Level I

(Note: The missing numbers are included in the Arrangements List which was distributed at the Harpers Ferry meeting.)

o Blanket Reproduction Releases

The following Blanket Reproduction Releases have been reported by the ERIC Clearinghouse on Counseling and Personnel Services:

Center for Creative Leadership
Box P-1, Greensboro, NC 27402
Level I - Moran W. McCall, Jr.

Counseling Center, Central Virginia Community College
Lynchburg, VA 24502
Level I - Edwin J. Nolan

Counseling Center, University of Maryland
College Park, MD 26742
Level I - Wm. Sedlacek, Dir.

Martin M. Bruce Publishers
P.O. Box 228, New Rochelle, NY 10804
Level II

(GS)

o Lost and Found

Anyone out there looking for Reproduction Release forms for the following should contact the Facility Acquisitions Department.

Proceedings: Spring Conference 1977, Occ. Paper
Center for Development of Community College Education
College of Education, University of Washington
Signed - Henry M. Reitan

Modification of Female Leadership Behavior in the
Presence of Males. Final Report
Signed - Marlaine Lockheed

Public Relations: A Frontier Profession
Signed - Frank Wylie

(GS)

o DJF Report

Two updates to the DJF Report are attached. (Attachment 8) (JH)

4. Announcements from ERIC Clearinghouses:

o Job Vacancy at ERIC TM

ERIC TM is seeking an Indexer/Abstractor. The position is now vacant. Please contact either Eleanor Horne, (609) 921-9000, X2180 or Gail Dietz Conley, (609) 921-9000, X2662 for further details. (GC)

) National
 Audio-Visual
 Association. Inc.

3150 SPRING STREET · FAIRFAX, VIRGINIA 22030 · (703) 273-7200

May 15, 1978

Mr. Charles W. Hoover, Chief
 Educational Resources
 Information Center
 National Institute of Education
 Washington, D.C. 20208

Dear Mr. Hoover:

We are pleased to report that the U.S. Postal Service has agreed to begin machining small film cases at the Nation's 21 Bulk Mail Centers. Previously, all film cases were considered non-machineable, were held out of the mail stream at the Centers, and were processed by hand. This tended to make delivery times unpredictable and sometimes slower, resulting in diminished revenues for film distributors and repeated inconvenience for film users.

) In return for Postal Service cooperation, NAVA has agreed to do everything it can to work with you and others to accomplish the following:

- Make sure all film users actually lock their plastic cases before putting them in the mail.
- Find ways to improve straps and buckles on fiber cases.
- Encourage distributors to affix a permanent label under the moveable label on all cases.

During the NAVA Convention in Houston (January, 1978), NAVA members adopted unanimously the following resolution:

"WHEREAS, the U.S. Postal Service is cooperating with the National Audio-Visual Association in seeking a solution to problems faced by all who ship films through the mail; and

"WHEREAS, through the work of the NAVA Film Council, the NAVA Legislative Committee, and NAVA Staff, an initial agreement has been reached as a first step toward what we hope will be a series of permanent solutions to various aspects of the problem; now therefore,

) "BE IT RESOLVED, that we, in convention assembled, do agree, to the extent possible, to cooperate with the U.S. Postal Service by launching a public education program to urge film users to lock plastic shipping cases, and to urge film distributors to place permanent labels on plastic and fiber film cases being sent through the mail system."

We wanted you to know of these developments so that we could ask you to help spread the word. Reminding film users to lock their cases and urging all owners of film cases to use permanent labels wherever possible could certainly assist. Anything you can do will be appreciated.

Sincerely,

Kenton Pattie
Vice President and
Educational Director

OPERATIONS GROUP
Washington, DC 20260

Mr. Richard G. Fuller
Legislative Consultant
National Audio-Visual Association, Inc.
3150 Spring Street
Fairfax, Virginia 22030

Dear Dick:

As we discussed at Denver in January, we would keep you abreast with our action to machine process plastic film cases at the Bulk Mail Centers. Several of our Bulk Mail Centers have been running tests to see if it is feasible to machine the plastic film cases. The tests have been successful enough to allow us to direct our Regional Postmasters General to proceed to forward machine processing by July 1, 1978, provided there are no major objections from the field. Mr. John D. McPoland's study of film case weights was most helpful.

We appreciate your organization's cooperation and assistance during the past months. Hopefully, we will be machine processing 97% of the plastic containers this summer.

Sincerely,

Truman T. Moore, Director
Bulk Mail Processing Office
Mail Processing Department

Worksheet on How to use Resources in Education

Instruction for Librarians:

The use of this worksheet should be preceded by instruction in the use of the Thesaurus of ERIC Descriptors and Resources in Education. The worksheet is designed to be used for individual and/or group instruction. It presupposes no previous use of the ERIC system. The worksheet is selective in the kinds of information it covers. Only the most important information a beginning researcher needs to know to complete a successful search is covered.

Objectives:

Following instruction by a librarian on how to use the Thesaurus of ERIC Descriptors and Resources in Education, the student will be able to:

- 1) Match a particular topic with the most appropriate ERIC Descriptors by using the Thesaurus of ERIC Descriptors.
- 2) Recognize and identify the following parts of a Document Resume in Resources in Education:

ED number
Author
Title
Date
Document Availability

1. State your topic as precisely as possible. (EXAMPLE: Designing a mathematics curriculum for gifted students at the junior high school level.)
2. Examine the Thesaurus of ERIC Descriptors and write down those Descriptors printed in boldface which best describe your topic. You may use any Descriptors except those marked UF (used for).

3. In the Thesaurus note the other Descriptors listed beneath the Descriptor(s) you have chosen. Are there RELATED TERMS (RT), NARROWER TERMS (NT), or BROADER TERMS (BT) which may be better Descriptors for you to use? If so, write them below.

--	--	--

4. Search the Subject Index in Resources in Education under the Descriptor(s) you identified in the Thesaurus of ERIC Descriptors. List below the ED numbers of those titles which look useful to you.

Note: An Author Index and an Institution Index may also be searched in Resources in Education.

5. Choose one ED title that interests you. Locate that number in the Document Resume Section of Resources in Education and write it below:

6. From the information in the Document Resume, identify the following:

Author _____

Title _____

Date _____

After reading the Abstract, does the Document seem to contain information useful to your topic?

Yes _____ No _____

7. Does the Document Resume contain the following statement: "Document not available from EDRS"?

Yes _____ No _____

8. If Yes, the document is not available on microfiche. Check with the Librarian. The document may be available in another format in the Library.

9. If No, the document is in the ERIC microfiche collection.

10. Is the document relevant to your topic?

Yes _____ No _____

If No, go back and resume the search at Step #5.

ERIC ADMIN BULL

In recent months, we have become aware of a trend which began over two years ago and has continued unabated until this time. Central ERIC has been receiving fewer and fewer complaints about ERIC microfiche from standing order collections and librarians across the country. We view this as a serious problem because it has decreased our contact with users and librarians, and has curtailed their input into our planning process.

In order to alleviate this situation, we are proposing action along several lines:

1. The reduction ratio for microfilming will be changed to 34 $\frac{1}{2}$. Investigation has revealed that there is no lens made that is appropriate for this reduction ratio. This will foster renewed interest in the development of readers and permit the replacement of old and outmoded equipment. This format will permit 10 1/6 rows of 20 1/8 frames each. This will lend itself to documents in which some pages are not completely filled with text. There may be a slight problem if the text of fractional pages at the end of the rows is not sideways reading, but this is minor and will be referred to the technical meeting steering committee.
2. Vesicular film is becoming widely accepted by users. Many of the early fears concerning file cabinet destruction have been quieted. Reproduction from vesicular masters is being accomplished by more and more institutions as reproduction equipment has been improved. Consequently-- we are pleased to announce the production of a new microfiche filmbase made from tuna fish scales. This new film has the advantage of fading in the areas where it has been exposed to the light in a reader, thus permitting data gathering on file use in the field. Unfortunately, this fading is accompanied by the faint odor of decaying fish, but it is felt that this can be used to our advantage in the publicizing of microfiche (e.g., "fiche from tuna with good taste"). Also, there will be less trouble locating the ERIC collection in large libraries.
3. Due to the combined efforts of EDRS, Central ERIC, the Facility, and Clearinghouses, the number of problem microfiche has greatly diminished. Studies have found that user appreciation is significantly greater when there are some small difficulties to overcome in the use of microfiche. As a result, the Facility will be sending to all Clearinghouses a Document Input Preparation Kit. These kits will consist of several elements which will help us bring the proportion of "problem fiche" back up to the 6% level:
 - a. colored sheets of transparent acetate. These colored sheets of acetate can be taped over random pages. Where the pages are particularly readable and of high contrast, dark blue should be used.
 - b. printed ink blots. These come in a variety of sizes and can

also be taped on pages of text. It should be remembered that large blots need not be used if small ones can be placed in critical locations.

- c. assorted dust specks, gauges .001 to .075. In the event the above two procedures are not entirely effective, prepared dust particles can be applied directly to distribution microfiche. Because dust can be wiped off relatively easily, a swatch of cat fur is also included to induce a static charge before application. This dust application will be particularly effective if applied before microfiche reproduction.
- d. instructions for cropping. Instructions for cropping off up to one inch of text from either the right or left margin are included. If this can be accomplished at the Clearing-houses, it will save EDRS the trouble.

We will appreciate your help in implementing these system changes. It should help put us back in touch with librarians.

Two additional requests:

1. Do not attempt to make document abstracts unclear or difficult to understand. This will be accomplished during editing at the Facility.
2. In order to avoid lunch hour when calling Central ERIC, please call before 8:00 am or after 4:30 pm.

(RC)

3. Announcements from EDRS

- o New Postage Rates Debbie Gallagher
- o EDRS Moves Debbie Gallagher
- o Standing Order Customer Listing Debbie Gallagher

4. Announcements from ERIC Clearinghouses

- Ruth Truman Speaks Bonnie Sanchez

1. Announcements from CERIC:

o The ERIC Logo

Now that everyone in the ERIC family knows and agrees on what the ERIC logo looks like, ERIC® , it is hoped—even expected—that it will appear on all Clearinghouse IAPs, User Services Products, stationery, reports, T-shirts, and other miscellany. If it is ERIC connected the logo should be on it. This does not mean that you are to throw away existing stock of any kind, simply when reordering or producing anything new, put an ERIC® , on it. (CG)

o "Private" vs. "Nonpublic"

A letter from Robert Lamborn to NIE Director, Patricia Graham, (Attachment 1) requests that the term "private" rather than "nonpublic" be used in newsletters and communications to describe schools in the private sector. (RC)

o Microfiche Inventory

Attachment 2 is the March, 1978 microfiche inventory check. (RC)

o Microfiche Inventory Reports

The Microfiche Inventory Reports for the months of March, 1978 and April, 1978 are enclosed with this issue. (RC)

2. Announcements from the ERIC Facility:

o Additions and Changes to the ERIC Facility Acquisitions Arrangements List

The new additions and changes are:

EFAA #153 - Employment and Training Administration
(DOL) Office of Youth Programs - Level I

EFAA #79 - NEA - Communications
change
Level I - Dick Dashiell

EFAA #35 - add authorized by: E.N. Wright

o Blanket Reproduction Releases

The following Blanket Reproduction Releases have been received by the Facility:

Alaska State Department of Education
Level I - Nathaniel Cole

North Carolina State Dept. of Education
Level I - Elsie Brumback

World Confederation of Organizations of the Teaching
Professions (WCOTP)
Switzerland
Level I - John Thompson, Sec. Gen. (GS)

o Lost and Found

Anyone looking for Reproduction Release forms for the following
should contact the Facility Acquisitions Department:

Uses of the Television Delivery System for Community-Based
Education

Metropolitan Community Colleges
Signed: Dr. Ervin Harlacher

Modification of Female Leadership Behavior in the Presence of Males
Signed: Marlane Lockheed

Blank form
Signed: E. Cassandra Jordan
(Educational Services for Schoolage Parents) (GS)

o DJF Report

The May, 1978 DJF Status Report is attached. (Attachment 3) (JH)

3. Announcements from EDRS:

o New Postage Rates

As you know, the U.S. Postal Service has increased postage rates for both first class and parcel post mail. This increase will be passed on to customers ordering both microfiche and hardcopies from the ERIC Document Reproduction Service. The new postal rates are shown below. The price of the documents remains the same.

New Postage Rates

1 - 3 microfiche	.15	
4 - 7 microfiche	.28	
75 or fewer MF/HC pages	.36	
76-150 MF/HC pages	.50	
151-225 MF/HC pages	.64	
226-300 MF/HC pages	.78	
301-375 MF/HC pages	.92	
376-450 MF/HC pages	1.06	
451-525 MF/HC pages	1.20	
Each additional 75 MF/HC pages	.10	(DG)

o EDRS Moves

Computer Microfilm International Corporation (CMIC) which operates the ERIC Document Reproduction Service has recently moved to a new location. The EDRS post office box mailing address to receive ERIC orders remains the same: P. O. Box 190, Arlington, VA 22210. However, the new street address is now 5030 North Fairfax Drive, Arlington, VA 22201. The telephone number for CMIC and EDRS is still (703) 841-1212. (DG)

o Standing Order Customer Listing

4. Announcements from ERIC Clearinghouses:

o Ruth Truman Speaks

Ruth Truman, abstractor/indexer at the Clearinghouse for Junior Colleges, was selected to represent 7,611 bachelor's, master's, doctoral, and professional degree recipients as the Commencement Speaker at UCLA's 59th. commencement ceremonies, June 18. Ruth received a Ph.D. in Higher Education, exactly 26 years (to the day) after receiving her bachelor's degree. She is spending the summer in Wash., DC as an intern in OE's Bureau of Higher and Continuing Education, Community College Unit. (BS)

COUNCIL FOR AMERICAN
PRIVATE EDUCATION
1625 Eye Street, N.W., Washington, D.C. 20006

Pat
cc: pend file

(202) 659-3236
Dr. Robert L. Lamborn
Executive Director

June 8, 1978

Dear Pat:

CAPE's Directors have asked me to request that as a matter of practice emanating from your office, our schools be referred to throughout NIE as "private" rather than "nonpublic"-- a request which we feel is more significant than it might initially appear.

We believe that private schools--as one of many types of contributing private sector institutions--play, and should be recognized as playing, a constructive role in serving public needs. "Nonpublic" suggests to some-- and may be readily employed by some to suggest--a negative role, one somehow contrary to the public welfare. "Private", although it has its problems, seems clearly more positive and preferable.

We ask, therefore, that "private" be used as the reference term in legislative proposals, regulations, and routine communications, as well as in the designation of all appropriate offices and officials.

Sincerely,

Robert L. Lamborn
Executive Director

Dr. Patricia Graham, Director

1. Announcements from CERIC:

o NIE Reorganization

A number of assignments to Associate and Assistant Director positions have been announced. These have been noted on the organization chart, Attachment 1. Of particular interest are the assignments within DIP (Dissemination and the Improvement of Practice).

John Minor, Jr., previously Associate Superintendent of Schools has been appointed Associate Director for DIP. See Attachment 2 for more details.

Chuck Hoover has been appointed Assistant Director for Information Resources, which includes ERIC, the NIE Library, NIE Educational Reference Center, and the Satellite Programs. A team leader for ERIC has not yet been appointed. (RC)

o Name Change for CE

Effective as of September 14, 1978, the ERIC Clearinghouse on Career Education will have its name changed. The new title will be:

The ERIC Clearinghouse on Adult,
Career, and Vocational Education

Clearinghouses that are intending to publish any brochures or other publications which identify elements of the ERIC system should carry the new title in the listing in lieu of the old name. (FS)

o Have You Moved?

From time to time various changes in unit addresses or phone numbers occur. It is requested that the earliest possible notices of these changes be given Central ERIC so that the information can be entered into the next issue of the ERIC Administrative Bulletin. (FS)

o Microfiche Inventory

Attachment 3 is the May, 1978 Microfiche Inventory check. (RC)

o Microfiche Inventory Report

Enclosed is the May, 1978 Microfiche Inventory Report. (RC)

2. Announcements from the ERIC Facility:

o 1978 ERIC Users Conference

This year's Users Conference will be held in Arlington, Virginia in conjunction with the Dissemination Forum. See Attachment 4. (EP)

o Identifier Backfile Clean-up Status Report

A status report on the Identifier Backfile Clean-up project follows as Attachment 5. (MM)

o Additions and Changes to the ERIC Facility Acquisitions Arrangements List

The new additions and changes are:

EFAA #154 - Secretary's Advisory Committee on the Rights and Responsibilities of Women (SACRRW) HEW - Level I

EFAA #155 - World Health Organization (WHO) Copenhagen - Level as indicated

EFAA #156 - Unesco Regional Office for Education in Asia (UROEA) Level III

EFAA #157 - Project on Equal Education Rights (PEER) Level I - Robin Gordon

EFAA #158 - Alaska State Department of Education Level I - Nathaniel Cole

EFAA #92 - American Alliance for Health Physical Education and Recreation (AAHPER)
add authorized by:
William L. Cooper

EFAA #85 - Area Cooperative Education Services (ACES), New Haven, CT
add authorized by:
C.H. Steinberger

EFAA #143 - Association of Research Libraries (ARL)
add in Organization/Agency Column
also Office of Management Studies (ARL/OMS)
change Level/Authorization Column
ARL - Level I - S. Frankie
ARL/OMS - as indicated

EFAA #130 - California State Department of Education
add authorized by:
Theodore R. Smith

EFAA #72 - Council of Europe
change:
Level II - nonsales
Level III - sales

EFAA #90 - National Academy of Sciences
change:

Level I - nonsales
Level II - sales

(GS)

o Blanket Reproduction Releases

The following Blanket Reproduction Releases have been received by the Facility:

Nebraska State Department of Education
Level II - M. Anne Campbell

Education Commission of the States
Level I - Sally V. Allen

Resource Center on Sex Roles in Education
Level I - Shirley D. McCune

Institute for Research and Development in Occupational
Education, CASE/Graduate School and University Center
Level I - Lee Cohen

National Library of Canada - reported by IR
Level I - Roy H. Engfield

(GS)

o Lost and Found

Anyone looking for releases for the following reports?

Spread of Opinion, Strategy No. 9, Fall Out Shelter
Problem, Strategy No. 48, Brand Names, Strategy No. 74
from book entitled: Values Clarification (GS)

o DJF Report

The June, 1978 DJF Status Report is attached. (Attachment 6) (JH)

MEMORANDUM

ATTACHMENT 2
DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
NATIONAL INSTITUTE OF EDUCATION

TO : ALL NIE STAFF

DATE: 7/17/78

Patricia Albjerg Graham
FROM : Patricia Albjerg Graham

SUBJECT: Appointment of John A. Minor, Jr.

I am pleased to announce the appointment of John A. Minor, Jr., as Associate Director for Dissemination and the Improvement of Practice.

I am very enthusiastic about the contribution that he can make to our efforts. He has the perspective of a highly successful school practitioner which makes him particularly appropriate for the work we are doing in Dissemination and the Improvement of Practice.

Mr. Minor comes to us from Atlanta, Georgia, where he is Associate Superintendent of Schools. He has previously served as the Superintendent of Schools in Ravenswood, California, Principal of the Stege School in Richmond, California, and for eight years he was a teacher in the Richmond Unified School District.

Mr. Minor, who holds his doctoral degree from Atlanta University, has been Vice-President of the National Alliance of Black School Superintendents and Corresponding Secretary of the National Alliance of Black School Educators; he has served on the faculties of San Francisco State and Atlanta Universities, on the Board of Directors of numerous civic organizations, and has received many professional and civic honors.

He will begin his work at NIE at once, and will begin full time service on September 15.

1978 ERIC USERS CONFERENCE (AUGUST 17-18, 1978) TO BE JOINED AGAIN
WITH DISSEMINATION FORUM (AUGUST 14-16, 1978)

The 1978 ERIC Users Conference will be held August 17-18, 1978 (Thursday and Friday) at the Sheraton National Motor Inn, Arlington, Virginia. As in 1977, the ERIC Users Conference will be held during the same week and at the same location as the National Dissemination Forum. The ERIC Clearinghouse Technical Conference, which was also combined with the Dissemination Forum in 1977, was held in Harpers Ferry, West Virginia, this year (April 25-27, 1978) and will not be conducted at the Dissemination Forum.

An agenda for the 1978 Users Conference is currently being developed by ERIC — a preliminary version is available. Potential topics being discussed are: computer conferencing, techniques for training on-line users, copyright, new files, vocabulary improvement, and state data bases.

Arrangements for the Dissemination Forum itself are being handled, as last year, by the National Institute for Community Development (NICD). For further information, please contact:

*Ms. Lisa Levin Itte
National Institute for Community Development
1815 North Lynn Street
Arlington, Virginia 22209
Telephone: (703) 522-1461*

If you plan to attend the session designed for ERIC users, you are invited to pre-register with:

*Ms. Elizabeth Pugh
ERIC Processing and Reference Facility
4833 Rugby Avenue, Suite 303
Bethesda, Maryland 20014
Telephone: (301) 656-9723*

ERIC ADMINISTRATIVE BULLETIN:
IDENTIFIER BACKFILE CLEAN-UP STATUS REPORT

The ERIC Facility has processed 41,786 of the original 46,672 Identifier cards, leaving a balance of 4,886 Identifier cards needing lexicographic analysis and final decisions. The consolidation of scattered concepts, transfer of Identifiers to the Descriptor file, and purged Identifiers achieved thus far by this project will result in a 34% reduction in Identifiers on the ERIC Master File (i.e. 15,941 Identifiers less).

Six categories have been published: Foreign Words/Phrases; Historical/Special Events; Personal Names; Titles (Literature, Films, etc.); Geographic Locations; and Groups (Other). Four categories are at the printer: Curriculum Areas; Equipment; Facilities; and Groups (Other). Eight categories are in the edit phase: Groups (Ethnic); Health Related Terms; Language/Linguistics; Laws/Legislation; Methods/Theories; Organizations; Projects/Programs; and Science & Technology. The remaining 4,886 identifiers are in the following categories: Conference/Meetings (379 identifiers); Groups (Occupational) (1,532 identifiers); and Miscellaneous (2,975 identifiers).

Subsequent to completion of all cards, the ERIC Master Files will be systematically changed via a series of transfer and delete computer users utilizing the Identifier cards and the decisions recorded thereon.

(Mary McCord)

NDN-ERIC Linkage Committee Moves Ahead

One of the outcomes of the 1977 Dissemination Forum was the formation of a Linkage Committee to foster greater communication and cooperation between the National Diffusion Network (NDN) and the ERIC system. Through numerous memos and telephone calls and two meetings in Washington, the Committee has diagnosed problems, outlined some solutions to the problems, and taken a number of steps to insure more interaction between the two systems.

NDN is a network of about 225 locally-developed projects and programs, of which about 100 are funded each year as Developer/Demonstrators (D/Ds) to assist other districts in adopting or adapting their programs. Assisting in this process are State Facilitators (SFs) in all the states, a Materials/Support Center, and a Technical Assistance Broker. Begun in 1974, the NDN is a program of USOE's Division of Educational Replication and is funded at about \$7 million annually.

ERIC people on the Linkage Committee learned that there are a good many doubts among NDN people about the usefulness of the ERIC system. NDN is devoted to a hands-on philosophy of educational change. Many people in the Network view ERIC as a purely passive system, having little or no quality control, containing primarily research documents, most of which are of little interest to educational practitioners. They are unaware of the active role of ERIC clearinghouses in producing IAP's and in outreach activities such as workshops and demonstrations at professional meetings.

The other side of the coin: NDN people learned that many in the ERIC system are unaware of NDN as a nationwide system of talented

educational change agents active in the well-monitored dissemination of judiciously selected educational materials and programs.

As a result of the mutual lack of knowledge and communication between the two systems, very few of the many hundreds of documents produced by NDN have found their way into ERIC; one informed estimate puts it at eight percent. A first and major effort of the Linkage Committee is greatly to increase the flow of NDN documents into ERIC. To this end, special efforts are being made to (1) secure for ERIC most of the documents produced by various components of NDN, (2) make NDN documents more easily retrievable, and (3) get prompt feedback to NDN about documents submitted.

Information about ERIC and the work of the Linkage Committee has already appeared in the May and June NDN Newsletters and additional articles are scheduled for the July and September Newsletters. While relatively few documents about NDN projects and programs are now in ERIC, most of the documents dealing with NDN as a system are now in ERIC, thanks to the help of the NDN Materials/Support Center, located at the Far West Laboratory and directed by Diane McIntyre. Items that give a comprehensive picture of NDN and are now in ERIC include the following:

Casebook of Selected State Facilitators	ED 128 927
Packaging Your Education Program	ED 138 295
Evaluation of the NDN: Volume I	ED 147 327
Evaluation of the NDN: Volume II	ED 147 340
Executive Summary	ED 147 355
JDRP Ideabook	ED 148 329
Materials Inventory	ED 149 439
State Facilitator Profile	ED 149 440
Educational Programs That Work	ED 149 441
Transferring Success	ED 151 949
Forms and Formalities	(In process)
NDN: A Success Story	(In process)

It is expected that the special procedures for acquiring and processing NDN documents will be formulated before the August Dissemination Forum. Further possibilities for NDN-ERIC interaction include a joint session at the Dissemination Forum, representation of NDN people at the ERIC fall technical assistance meetings, and representation of ERIC people at the winter meeting of NDN.

ERIC members of the Linkage Committee are Joyce Aegerter and Don Erickson (EG), Karl Massanari (SP), Libby Benjamin and Gary Walz (CG), Frank Smardak (CERIC), Grace Sundstrom (ERIC Facility), and Irving Morrissett (SO), Chairman. NDN members are Harry Osgood (Connecticut SF), Ralph Parish (Kansas D/D), Deborah Clemmons (Michigan SF), Jean Narayanan (USOE Division of Educational Replication), and Diane McIntyre (Materials/Support Center).

I. CENTRAL ERIC ANNOUNCEMENTS

A. Personnel and Responsibility Changes

I am pleased to announce that Bob Chesley has been officially appointed as Head of ERIC. Bob has worked in a key management role for the past four years and has my strong backing and confidence. Responsibilities for the ERIC projects Bob has monitored, including the ERIC Facility, ERIC Document Reproduction Service, and the National Bureau of Standards Technological Study of ERIC, will be assumed by Jim Prevel. Jim has worked most recently with NIE's Educational Division and has been involved with information dissemination, and directly with ERIC, for the past eleven years.

...Chuck Hoover

Del Trester, as you may already know, has retired from Government service. Del played an instrumental role in ERIC from its inception and all of us at NIE will miss him. Meanwhile, as the Government goes through its personnel procedures, which we hope will be completed in October, Frank Smardak and Kit Welsh will handle Del's Clearinghouse projects. Kit Welsh will handle HE, RC, and SO; Frank Smardak will handle SP, EC, and JC.

...Bob Chesley

B. ERIC Administrative Bulletin (EAB) Input

We would like to have more input from the Clearinghouses for inclusion in the *ERIC Administrative Bulletin*. A lot of things are going on within the network and the EAB is a good vehicle to let others know about it. In particular, there are many Information Analysis Products (IAP's) being produced, which the rest of the system would benefit knowing about.

Please let your monitor know the name of the person who will be responsible for submitting your Clearinghouse input. We will need to have material here by the 10th of each month.

...Bob Chesley

C. Microfiche Inventory for June 1978

The Microfiche Inventory for June 1978 is enclosed with this EAB. Please check your Clearinghouse input.

...Bob Chesley

D. ELRS Followup on June 1978 Microfiche Inventory

Attachment 1 indicates problems found with June 1978 microfiche upon reinspection at EDRS. Asterisks indicate those documents which will be refilmed and redistributed to all standing order customers.

...Bob Chesley

E. New NIE Telephone Numbers

Attachment 2 gives new telephone numbers of NIE/DIP staff effective September 11, 1978.

...Bob Chesley

F. Guidelines for Processing NDN Materials

Through the work of the committee headed by Irving Morrisett (SO), arrangements have been made to work with the National Diffusion Network (NDN) to acquire more of their documents. We have agreed to provide a limited amount of special treatment for these documents. Attachment 3 gives guidelines for dealing with these documents.

...Bob Chesley

II. ERIC FACILITY ANNOUNCEMENTS

A. International/Foreign Document Acquisitions Arrangements

At Central ERIC's request, a report on the ERIC Facility's activities in acquiring international and foreign documents has been prepared for the EAB (Attachment 4). With the increasing interest in appropriate foreign documents to the ERIC data base, Central ERIC plans to do more to regularize and coordinate the acquisition of foreign documents from all levels of authors, including individuals, national ministries of education, private organizations, and international bodies.

...Grace Sundstrom

B. Additions to the ERIC Facility Acquisitions Arrangements

The following organizations have been added to the ERIC Facility Acquisitions Arrangements List:

EFAA #159 - New Hampshire State Dept. of Education
Level I - Dr. Robert L. Brunelle

EFAA #160 - Department of National Health and Welfare, Educational Services,
Health Protection Branch (Ottawa)
Level III

EFAA #161 - Michigan State Dept. of Education
Level I - Malcolm Katz

EFAA #162 - North Carolina State Dept. of Public Instruction
Level I - Elsie L. Brumback

EFAA #163 - Association of Universities and Colleges of Canada
Level II - Joan Rondeau

...Grace Sundstrom

C. Blanket Reproduction Releases

The following Blanket Reproduction Releases have been received
by the ERIC Facility:

Idaho State Dept. of Education
Level I - Jerry L. Evans

Educational Improvement Center - Northwest (N.J.)
Level I - Thomas Hamill

Project SEARCH
Level I - Alan J. White

Royal Institute of Technology Library (Sweden)
Level I - Stephan Schwarz
Reported by IR

Rumson-Fair Haven Regional High School (N.J.)
Level I - Newton Beron

...Grace Sundstrom

D. DJF Status Report

Attachment 5 shows the DJF status report for July 1978.

...Jim Houston

IV. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on ADULT, CAREER, AND VOCATIONAL EDUCATION (CE)

1. New Titles for Dr. Robbins and Dr. Bhaerman

When the ERIC Clearinghouse on Career Education changed its name to the ERIC Clearinghouse on Adult, Career, and Vocational Education, two staff members assumed new titles. Dr. Nevin Robbins, who is the specialist for Adult Education, is now also the Assistant Director for Adult Education. Dr. Robert Bhaerman, Career Education Specialist, is the Assistant Director for Career Education.

2. ERIC/CE Information Analysis Paper Nominated for Award

An ERIC/CE information analysis paper entitled *Research in Career Education: The State of the Art*, by Edwin Herr, Pennsylvania State University, has been nominated for a writing award that will be given by the National Association for Career Education. How about sorting out other noteworthy information analysis papers and nominating them for similar awards?

...CE

B. ERIC Clearinghouse on HIGHER EDUCATION

1. New Job Descriptions for Margot Eddy and Lynn Haupt

On September 1, the job descriptions of two staff members of the Clearinghouse changed. Margot Eddy, previously an Abstractor-Indexer, became the User Services Specialist. In addition to coordinating the acquisitions program, computer searching services, and user services, Margot will coordinate the logistics of the Clearinghouse co-sponsored regional conferences with universities.

Lynn Haupt, also an Abstractor-Indexer, became Abstractor-Indexer Coordinator. Her job will include hiring, training, and supervising part-time abstractor-indexers, as well as editing document resumes.

2. Jonathan Fife Assumes New Position with ASHE

Jonathan Fife, Director of the Clearinghouse, recently assumed the position of Executive Secretary-Treasurer of the Association for the Study of Higher Education (ASHE). This new position is in addition to his other responsibilities in ASHE: Chairman of the Publications Committee and member of the Membership Committee and Program Committee.

...HE

C. ERIC Clearinghouse on TEACHER EDUCATION

1. ERIC Steering Committee for Technical Operations News

The Committee is pleased to report that Janet Thorngate (ERIC/CE) has joined the ERIC Steering Committee for Technical Operations. Other members of the Committee are:

John Waters, Chairperson	(SP)
Kathleen McLane	(FL)
Betty Rose Rios	(RC)
Dorothy Slawsky	(ERIC Facility)
Lynn Smarte	(EC)
Tom Wright	(Macmillan)

The next meeting of the Steering Committee will be held at ERIC/SP on December 6-7, 1978. The primary objectives of this meeting will be to review suggestions and recommendations arising from the Regional Technical Meetings and to begin planning the National Technical Meeting.

Feel free to contact any member of the Committee with your suggestions and recommendations for either the National Technical Meeting or any system improvements.

...John Waters

GUIDELINES FOR PROCESSING
NATIONAL DIFFUSION NETWORK (NDN) MATERIALS

The NDN-ERIC Linkage Committee, designed to bring NDN and ERIC closer together, was established at the June 1977 Dissemination Forum. It has been working since that time to establish, among other things, guidelines for acquiring and processing NDN materials into the ERIC data base.

In order to ensure that NDN materials will be adequately retrievable, both as a group and individually, the following cataloging procedures have been agreed upon between ERIC and NDN:

1. "NATIONAL DIFFUSION NETWORK" should be used as an Identifier (preferably major) to index documents about NDN.
2. "NATIONAL DIFFUSION NETWORK PROGRAMS" should be used as a minor Identifier, to index documents generated by programs or projects with NDN sponsorship.
3. NDN project name, e.g., "PROJECT ADVENTURE," should be used as Identifiers (preferably major) to index documents dealing with these specific NDN projects.
4. The name/address of the developer/demonstrator to be contacted for further information should not appear in the citation as this is extremely transient information. It is unlikely that a decision to seek additional information about a program would be made solely on the basis of a citation/abstract. Contact point information will normally appear somewhere in the document and hence on the microfiche. This fact can be pointed out in the abstract, e.g., "*The availability of additional information on this program is discussed in Appendix A.*" or "*Briefings on this program are available from the developer (see p. 54).*"
5. All NDN projects are validated by JDRP. It is useful, however, to be able to retrieve all documents describing validated programs, whether NDN-sponsored or not. It is proposed, therefore, that the Descriptor "VALIDATED PROGRAMS" be used (as a minor term) to tag such documents.

Materials that simply are validated programs must be distinguishable during retrieval, however, from materials dealing with the actual subject matter of validation. For the latter, the Descriptor "PROGRAM VALIDATION" should be used.

Ideally, ERIC should eventually include a data element dealing with validation, e.g., validated or not, by which body, date of validation, etc. Such a data element is being considered in connection with the new educational practices file now under study. Until that time, however, this indexing approach will provide a means of retrieving validated programs.

Page Two

6. All NDN documents are to be submitted to the ERIC Facility and then distributed to the Clearinghouses by the Facility. Each NDN document sent to ERIC will be accompanied by a special self-addressed Reply Card. As soon as a decision about acceptance or rejection of the document has been made by the Clearinghouse, the Reply Card will be completed, detached, and returned to the submitter of the document.

In addition to the above, a summary description of the NDN is being prepared to be used as a front matter insert for all related documents. As a reference tool to aid in the identification of NDN materials, a comprehensive listing of all NDN documents currently in the ERIC data base is being prepared by the Educational Resources Center, New Haven, Connecticut. This bibliography will be available via ERIC.

At the National Diffusion Network meeting on August 17, held in conjunction with the National Dissemination Forum, a packet of materials relating to processing of documents for ERIC was distributed to all attendees. The enclosed documents represent the beginning of NDN input into the ERIC data base under these new guidelines. Since it is intended that the submission of NDN documents to ERIC will be accomplished via the ERIC Facility, if you have any questions covering these procedures, please call the Facility Acquisitions Librarian, Mrs. Grace Sundstrom.

BRIEF REVIEW OF INTERNATIONAL/FOREIGN DOCUMENT ACQUISITIONS
ARRANGEMENTS THROUGH THE ERIC FACILITY AND CENTRAL ERIC

The ERIC Facility acquires international documents for the ERIC data base primarily from three major organizations:

- Unesco (Paris);
- Organisation for Economic Cooperation and Development (OECD) (Paris); and the
- Council of Europe (Strasbourg).

In addition, the Facility has formal acquisitions arrangements with the following eight foreign organizations:

- Alberta Department of Education (Canada);
- European Information Center (EIC), Charles University for Further Education of Teachers (Czechoslovakia);
- Toronto Board of Education (Ontario);
- Ontario Secondary School Teacher's Federation;
- Schools Council (UK);
- World Health Organization (WHO), Regional Office for Europe (Copenhagen);
- Unesco Regional Office for Education in Asia (UROEA) (Bangkok); and the
- Association of Universities and Colleges of Canada.

Central ERIC receives publications directly from the:

- Australian Council for Educational Research Ltd.;
- Queensland Department of Education (Australia);
- Unesco (Hamburg);
- National Swedish Board of Universities and Colleges; and the
- Swiss Federation for the Education of Adults.

In addition, NIE receives directly a variety of formal foreign language publications from other sources. These are usually deposited with the NIE Library, rather than submitted to the ERIC data base.

Numerous contacts have been made by the Facility with foreign organizations for the purpose of soliciting specific documents, e.g.,

- German Foundation for International Development;
- International Council for Correspondence Education (London);
- Royal Institute of Public Administration (UK);
- University of Stockholm, International Association for the Evaluation of Educational Achievement;
- Research Institute for the Education of Exceptional Children (RIEEC) (Japan);
- World Confederation of Organizations of the Teaching Professions (Switzerland);
- World Health Organization (WHO) (Geneva);
- McGill University (Canada), and the
- International Institute for Adult Literacy Methods.

The Facility regularly checks the:

- Canadian Communications Research Information Centre Newsletter;
- Unesco's Bibliography, Documentation, Terminology, and the
- Awareness List of the International Educational Reporting Service,

and requests by title possible candidates for RIE.

It may be of interest to the Clearinghouses that 1979 has been designated as "The Year of the Child" by the UN and many publications from foreign countries may address themselves to this topic.

I. CENTRAL ERIC ANNOUNCEMENTS

A. Central ERIC Monitoring Changes

As a result of the NIE reorganization and emphasis on regionalization of monitoring, the following changes in monitor assignments have been made.

Pat Coulter will monitor JC and RC. In addition, Pat will be the Central ERIC liaison for the Vocabulary Improvement Program. Pat has worked for OE and NIE for the past 13 years in various programs, including OE's Junior College Program. More recently, she was in charge of NIE's library.

Mildred Thorne will monitor SE and CE. Mildred has also worked for OE and NIE for 13 years in dissemination. She is presently monitoring the RDX Resource and Referral Project at Ohio State University as well as coordinating the Knowledge Interpretation program which has recently funded five projects. (See Attachment 1 for a description of three of the projects).

Kit Welsh will become the monitor for IR and Frank Smardak will be the new monitor for SO and HE.

Del Trester's replacement is slated to monitor EC, FL, PS, and is yet to be selected.

...Bob Chesley

B. Publicity of Information Analysis Products

It has been brought to our attention that a number of Clearinghouses are using innovative ways of publicizing their information products to their clients. We would like those Clearinghouses to share these ideas through the *ERIC Administrative Bulletin* with other clearinghouses which are considering doing this for their clientele. Even though an approach may seem "old hat" to one Clearinghouse, it may be a "new bonnet" to another. Please write a short description of your approach, attaching samples of your publicity items, and send it to your monitor at CERIC for a future issue of the *ERIC Administrative Bulletin*.

...Bob Chesley

C. Clearinghouse Annual Review Sessions

The advent of a new fiscal year also brings on a whole new series of annual Clearinghouse review sessions here in NIE. Previously, we have had only a small group of ERIC and closely associated dissemination personnel present at these sessions. We will be expanding the group to include the contracts office, the Educational Reference Center (ERC), and our own increased number of monitors. As a result, we now ask that nine copies of the review

materials be furnished to this office at least five working days in advance of the scheduled meeting. Please allow sufficient time in the mails for the package to arrive in Central ERIC by the above deadline.

Since there will be a number of new people at the reviews, it will be helpful if you can bring Clearinghouse brochures, examples of IAP's, and other material that will help communicate the type and extent of your activities. We will be looking at the review procedures in the future. Meanwhile, added detail you can include in the report for the benefit of the expanded audience will be appreciated.

...Bob Chesley

D. Duplicate Remove List

Each month a "Duplicates List" is prepared by the ERIC Facility and distributed to each Clearinghouse. Its primary purpose is to apprise everyone in the ERIC system that duplications are occurring and wherever possible to exercise better care in avoiding duplication. At a recent ERIC Technical Meeting, however, it was discovered that personnel involved in technical operations are not uniformly seeing these lists. To assure greater visibility, a copy of each month's Duplicates List will be distributed, beginning with this issue, with the *ERIC Administrative Bulletin* (see Attachment 2).

Obviously there is no way that ERIC can recoup the wasted effort that has resulted from entered dupes. We can, however, salvage something in the way of evaluating how good the indexing was by comparing the documents involved in the duplication. If, for instance, the indexing of UD 018 397 is compared with that of HE 009 987, which was entered into October's *RIE* as ED 154 709, both of the Clearinghouses can see how they both viewed the same document from different scope perspectives (see Attachment 3).

(Please note that UD's and HE's entries of the same document were inadvertent, since it was of recent vintage, both Clearinghouses apparently acquired their copies of the document at approximately the same time. HE was only more fortunate in having their submission screened first for entry into the computer.)

Incidentally, we would like to see the list of "dupes appearing in *RIE* three months or more" reduced to zero. Needless to say, "readmission of a Clearinghouse's own input" is a cardinal sin.

...Bob Chesley

E. Standing Order Customer Workshops

Funding for the much discussed Standing Order Customer (SOC) workshops is set up in a contract with the CE Clearinghouse. Arrangements have also been made for the model workshop to be held in the Washington area on November 7, 1978 and invitation packets have been mailed to all Clearinghouses.

Undoubtedly a number of the Clearinghouses are now firming up dates and workshop sites for their own workshops. Since the information we currently have on Clearinghouse plans is only of a tentative nature, as of June, we ask that you notify us as soon as your plans become firm on any workshop listed in your tentative plan. We particularly desire knowing the dates, times, and sites of the meetings. This information will allow us the opportunity of fitting in visits to the workshops in conjunction with other Central ERIC travel plans. Please forward this data to Frank Smardak.

...Frank Smardak

F. New EDRS Product - RIE on Microfiche

Beginning with the January 1979 issue of *RIE*, all monthly microfiche shipments from EDRS to Standing Order Customers will incorporate a set of microfiche representing the actual text of the *RIE* issue.

These microfiche will be prepared from the *RIE* master magnetic tapes via COM (Computer Output Microfiche) techniques. They will not be prepared by filming the actual printed pages of *RIE*. *RIE* issues will average about 7 microfiche a month. Each microfiche set will contain:

Document Resumes
Subject Index
Author Index
Institution Index

The "Clearinghouse Number/ED Number Cross-Reference Index" will not be included, nor will any introductory or front matter, notices, or advertising.

As part of the regular subscription shipments, these *RIE* microfiche will sell at the regular rate of \$.833 per fiche. By June 1979, EDRS will have available *RIE* microfiche extending back to and including 1969 issues. *RIE* microfiche from 1969 through 1978 will sell at the rate of \$.122 per fiche.

...Jim Prevel

G. Mailing Labels Available (Standing Order Customers and Interchange Recipients)

SOC mailing labels (678) are available from EDRS for \$43.00. This is the up-to-date list of current subscribers to the ERIC microfiche. If you are interested, contact EDRS directly, attention: Jack Veale.

Mailing labels (1,272) for the recipients of the *Interchange* newsletters are available from the Facility for \$50. This list overlaps heavily with the SOC list but is not identical. Extra sets of *Interchange* labels are available at the significantly lower price of \$15, if they are prepared at the same time as the Facility's regular run. This occurs 4-5 times a year at no specific date. The next *Interchange* is scheduled for the end of October. You can take advantage of this \$15 per set price by contacting the Facility.

...Jim Prevel

H. New ERIC/National Bureau of Standards (NBS) Study

CERIC has contracted with NBS to conduct a study to investigate the use of computer and related technology to improve the operation of and user access to the ERIC system.

The principal investigator is Dr. Siegfried Treu, Associate Professor of Computer Science, University of Pittsburgh. Dr. Treu will be contacting some Clearinghouses, information centers, users and other individuals to gather information. Your assistance to Dr. Treu is required so he may gather all necessary information.

The final report is due in April 1979.

...Jim Prevel

I. Macmillan Offers Slightly Damaged ERIC Publications Without Charge

Dave Biesel of Macmillan Information announced at the National Technical Meeting this Spring the availability of slightly damaged ERIC publications printed by Macmillan to ERIC Clearinghouses without charge. This offer includes hard cover annual cumulations of ERIC Educational Documents Abstracts, and Indexes, and yearly cumulations of *CIEE*, from 1969 to the present. The number of copies is limited; however, Macmillan will try to supply copies as they become available.

...Kit Welsh

J. IAP's to be Sent to CERIC

Don't forget to send me your IAP's as they come off the press. As I have said, I now have shelf space on which to display your gems and I'd like to keep it nicely stocked so that we can point with pride to ERIC's former "best kept secrets."

...Kit Welsh

K. Revised VIP Schedule

It appears likely that a revised time schedule will be adopted by CERIC for the Vocabulary Improvement Project. This new schedule, which extends the Clearinghouse production period through September 1979, allows for approximately 440 hours of work per Clearinghouse---enough to complete all the most urgent work and some 100 additional hours for other necessary changes. Following the Clearinghouse work and time for a review and consistency check, the Facility will have 3 months for implementing the changes and producing the tapes. This schedule will permit publication of the revised *Thesaurus* early in 1980.

This tight schedule demands that the VIP project receive high priority in all Clearinghouses and that work proceed on a continual basis throughout the year. Progress will be monitored closely on a monthly basis.

An expanded version of the ERIC *Thesaurus - Rotated Descriptor Display*, developed especially for use in this project, has been distributed to all Clearinghouses. Please be sure that this edition is given to your VIP coordinator for use in this project.

Again, we stress the importance of this project to the entire system and our users.

...Pat Coulter

L. NIE Library/Educational Reference Center Bulletins

The NIE Library/Educational Reference Center prepares and distributes information bulletins and monthly accessions lists to the members of the Education Division of HEW. These lists are used to alert and inform its users about recent computer searches, new ERIC Clearinghouse products, and newly acquired books. Sample copies are attached for your information and possible use (see Attachments 4, 5, and 6). This is a part of the Library's new role in the Dissemination Program to explore how it can better share resources and exchange information. If you have any comments, please contact Charles Missar, NIE Library, (202) 254-5085.

...Charles Missar

M. Policy Options for Education Information Systems of the Future

The Research and Educational Practice Group (REP) of the Program on Dissemination and Practice Improvement at NIE has funded a one-year project (October 1, 1978 to September 30, 1979) to REHAB GROUP, INC., of Falls Church, Virginia, to assist them in the conduct of three symposia to be held in the winter, spring, and summer of 1979 to address the topics of new developments in information technology with respect to the field of education in general, and the ERIC system in particular.

This project is one of several on-going or proposed activities designed to provide Federal policy makers and program managers needed facts and data about information systems and services for the future. The project has three major foci. They are to identify and explore: (1) emerging changes in information needs, (2) new technological opportunities and options, and (3) economic related issues that affect the information industry.

Substantive information in each area will initially come from a series of commissioned papers written by authorities from appropriate disciplines and areas of interest. Paper discussants and interested participant observers are to be invited to each symposium. The information presented in the commissioned papers as well as that emanating from the symposia proceedings will be integrated, refined, and related to specific Federal programs and projects. The project is expected to deliver to NIE specific policy options and programmatic-related recommendations concerning the ERIC system and information distribution systems for education. ERIC Clearinghouse personnel will be contacted in the near future by staff members of REP and the REHAB GROUP to tap their views on the effort. Dr. Henry Ingle of the DIP/REP staff at NIE is serving as Project Monitor for the Policy Options Project.

...Henry Ingle (REP monitor)

N. Study of ERIC RIE Acquisition and Selection Procedures

The Research and Educational Practice Group (REP) of DIP has awarded a contract to REHAB GROUP, INC. to analyze acquisition and selection procedures within the ERIC system. REHAB will use documentary evidence (e.g., the *ERIC Processing Manual*, *Policy Manual*, Clearinghouse reports) and conduct interviews at the Clearinghouses in order to provide information about such questions as:

1. What kinds of institutions have standing arrangements to submit documents to ERIC?
2. What kinds of outreach activities are taking place? With what success?
3. What is the ratio of acquired to selected documents? Does this vary according to type of institution from which the documents come?

The outcomes of the study will influence future ERIC policies.

...Naida Bagenstos (REP monitor)

II. ERIC FACILITY ANNOUNCEMENTS

A. DJF Status Report

The DJF Status Report for August/September 1978 is included in this *EAB* as Attachment 7. The DJF Report originally prepared for August 1978 was inadvertently omitted from the last *EAB*; therefore, data for August and September have been combined into one report.

...Jim Houston

III. CLEARINGHOUSE ANNOUNCEMENTS

A. Writers Guide to Publication Development Available from CE

The ERIC Clearinghouse on Adult, Career, and Vocational Education is trying to assist persons who are interested in developing publications that will meet criteria for inclusion in information retrieval systems. The document, *Writer's Guide to Publication Development: How to Get Your Publication into an Information Retrieval System*, was developed at the National Center for Research in Vocational Education. The document is available from:

National Center Publications
National Center for Research in
Vocational Education
Ohio State University
1960 Kenny Road
Columbus, Ohio 43210.

Ask for SN-18. The cost per single copy is \$3.25. The Document will be in ERIC soon!

...Marla Peterson (CE)

B. New Assignment for Dr. Robert Bhaerman

Dr. Robert Bhaerman, Assistant Director for Career Education at the ERIC Clearinghouse on Adult, Career, and Vocational Education, will serve as Director of one of the new NIE Knowledge Interpretation efforts. Focus of the project will be on equity in the world of work. Dr. Bhaerman also coordinates the information analysis and knowledge transformation activities at ERIC/CE.

...Marla Peterson (CE)

C. The Portable ERIC Exhibit

The ERIC Exhibit, developed by CAPS and previewed at the National Technical Meeting last April, is being acclaimed as highly useful and eye-catching by both Clearinghouses and Standing Order Customers. ERIC/IR has already received its version of the display and one of our Michigan SOC's has ordered two! Several other Clearinghouses have expressed interest, and plan to include budgeting for an exhibit in their upcoming proposals. We would like to encourage as many of you as possible to purchase all or part of this easily transportable exhibit.

...CG

D. Teacher Series and Invisible College Products Highlight Clearinghouse Publications

What Research and Experience Say to the Teacher of Exceptional Children is the title of a series of monographs launched by the Clearinghouse on Handicapped and Gifted Children. Drawing on research data and demonstrated practice, authors of noted expertise offer suggestions and techniques for sound classroom management and instruction.

First titles released are: "Managing Inappropriate Behaviors in the Classroom," by Thomas C. Lovitt; "Early Childhood," by Merle B. Karnes and Richard C. Lee; "Developing Creativity in the Gifted and Talented," by Carolyn M. Callahan. Other topics of the *Series*, in preparation or production, include: "Reasoning Abilities of Mildly Retarded Children" "Discrimination Learning," "Affective Education," "Assessment and Individual Programming," "Social Acceptance and Peer Relationship," and "Instructional Technology."

Convening an Invisible College of 12 experts on the "cutting edge" of knowledge to produce major publications has been a successful approach used at CEC for several years. The program was initiated when the ERIC Clearinghouse was financially supported by the Bureau of Education for the Handicapped as part of a larger Information Center grant.

Now, under its current NIE contract, Clearinghouse staff have the preparations well underway for an Invisible College Conference on Education's Responsibility for Disruptive, Alienated, or Incarcerated Youth. Two major products will be the direct result of the Conference: (1) a tape album of six 60 to 90 minute cassettes of edited presentations and discussions recorded on-site; (2) a full length book containing chapters by each participant on his assigned, specific topic. The final manuscripts are prepared by the participants after the conference, based on the presentations, discussions, and editorial suggestions.

In addition to the immediate products, the Invisible College format suggests areas for additional, related publications. Two of the Clearinghouse's recent publications are spinoffs from previous Colleges: *Child Abuse and Neglect---A Primer for School Personnel*, by Donald F. Kline; and *Getting Schools Involved with Parents*, by Roger L. Kroth and Geraldine T. Scholl.

All Clearinghouse products are published by The Council for Exceptional Children and are promoted and distributed through the regular CEC publications program.

...June B. Jordan (EC)

E. FL Announces Staff Changes

Phyllis Anderson (Acquisitions Assistant) has left FL and has been replaced by Marianne Paul (Acquisitions Assistant). Christine Meloni and Ceil Kovacs (Document Analysts) have left FL and have been replaced by Nancy Rhodes and Anne Marie Harnett (Document Analysts).

...Roslyn P. Holdzkom (FL)

F. FL Announces New Publishing Arrangement

ERIC/CLL Information Analysis Products are now being produced jointly with the Center for Applied Linguistics under the series title *Language in Education: Theory and Practice*. (See Attachment 8). The Clearinghouse is commissioning and preparing the papers and the Center is publishing them. Volume 1, consisting of 12 IAP's, is now available and Volume 2 is in the early stages of preparation.

...Roslyn P. Holdzkom (FL)

G. Study of Sample Searches Being Conducted

As a follow-up to discussion at the workshop for trainers of abstractors and indexers at Thornfield in August, the questions from the ONTAP data base, which were used for the sample searches, are being searched at IR using ERIC descriptors. Individual

Clearinghouses will be contacted and asked to compare the retrieval results of these searches with those of the free text searches reported as examples, and a discussion of the contrasts found between the two modes of searching will be published as a supplement to *ONTAP: Online Training and Practice Manual for ERIC Data Base Searchers*.

...Barbara Minor (IR)

H. Conferences

ERIC/ECE staff members recently attended the annual meeting in New York of the National Association to Educate Young Children. The staff distributed off-the-shelf computer searches on selected topics and used a portable computer terminal to provide brief ERIC searches to people who visited the booth. Both the online searching and the short computer bibliographies were received with enthusiasm by conference participants.

ERIC/ECE will also be exhibiting at the Annual Meeting of the American Academy of Pediatrics this fall as part of a plan to increase coverage in the areas of child health and pediatrics. Any Clearinghouse interested in displaying materials or helping with the booth should contact Linda Baskin at ERIC/ECE.

...PS

I. Outreach

Dr. Lilian Katz, Director of ERIC/ECE, has done a series of short radio talks for WILL radio station in Urbana. So far, she has discussed getting children ready for school and has reviewed her trip to China. Dr. Katz has also been appointed the new Chairperson of the Committee on the Code of Ethics for Educational Researchers; this is an American Educational Research Association committee. Beginning with the November issue of *Parents Magazine*, Dr. Katz will be writing a monthly column for parents of preschool children.

Mima Spencer, Associate Director of ERIC/ECE, recently traveled to Alabama as part of an NIE Technical Assistance Team. Chuck Hoover (NIE), Ted Brandhorst (Facility), Pat Brown (Facility), and Ms. Spencer (PS), consulted with the Alabama State Department of Education on building their state file. Maureen Cassidy, from the Alabama office, will be visiting ERIC/ECE in September for training in resume preparation. Ms. Spencer has previously consulted on state files in Illinois and Kansas. Ms. Spencer has also been named a member of the Midwest Regional Exchange Advisory Group, which will meet at CEMREL in St. Louis this month.

...PS

J. Special Projects

Work on the ERIC/ECE - PLATO project is in progress. The staff is designing and implementing lessons on ERIC and how to use it. These lessons are expected to be available on the PLATO computer-based education system next year.

The Champaign-Urbana Online Users Group will meet at the ERIC/ECE Clearinghouse beginning in October. The Users Group includes members of the Lincoln Trails Library System (part of the ILLINET statewide library system), University of Illinois librarians, community librarians, and other persons interested in online systems.

The second volume of *Current Topics in Early Childhood Education*, a collection of topical papers, is in press (ABLEX Publishing Co.) and will be distributed in early 1979. *Current Topics* is edited by Dr. Lilian Katz and the Clearinghouse staff.

...PS

K. Jim Davis to be on Australian Lecture Tour

Jim Davis, Associate Director, will be on an Australian lecture tour in Sydney, Canberra, and Melbourne from October 27 to December 2, 1978. Although most of his time is committed to working with teachers on applied social science in the classroom, he expects to be able to do some ERIC-related work. If anyone in the Clearinghouse network has suggestions concerning contacts he might make or other things to do, please let him know.

...Jim Davis (SO)

L. New Products Available from SP

ERIC/SP has added the ninth title to its series, *Bibliographies on Educational Topics*. *Field Experiences in Preservice Teacher Education* is a compilation of ERIC citations selected by Dr. Peggy G. Elliott (Indiana University Northwest), who also prepared the Introduction. Copies are \$2 each from ERIC/SP (quantity discounts available). "Field Experiences" also was the theme of the first issue of *Action in Teacher Education*, the new journal of the Association of Teacher Educators.

The National Education Association's new cassette program, *PL 94-142: How It Affects Teachers*, was produced from tapes of a panel discussion sponsored cooperatively by NEA's Division of Instruction and Professional Development and ERIC/SP. The cassettes cost \$12 per set (two tapes and a printed discussion guide) and may be ordered from:

KNOWLEDGE INTERPRETATION PROGRAM

SAMPLE PROJECTS

Project Title: Knowledge Interpretation Program

Principal Investigator(s) and Grantees:

Frank Klassen and Donna Gollnick 10/1/78 to 6/30/79 \$73,795
American Association of Colleges
for Teacher Education
Washington, DC

Walt Wolfram and Donna Khristian 11/1/78 to 7/31/79 \$51,572
Center for Applied Linguistics
Arlington, VA

Joseph D'Amico and Barbara Presseisen 10/1/78 to 6/30/79 \$63,243
Research for Better Schools
Philadelphia, PA

Project Officer and Office: Mildred Thorne, Dissemination and Improve-
ment of Practice

Abstract: Research outcomes are generally not being used in educational practice. Often, information on research findings is unavailable; research reports are written in technical language and are difficult to understand; or potential users need help in applying the research findings to educational practice.

The purpose of this program is to provide practitioners and policymakers with interpretations of educational research and development outcomes and information on exemplary practices which have the potential for improving or facilitating practice. Projects supported under this program will synthesize and interpret current knowledge on three selected topics--Educational Equity, Consumer Education, and Nonacademic Influences on Education--and communicate or deliver this information to relevant educational audiences.

A New Concept in Educational Resources

Center for Applied Linguistics

The Center for Applied Linguistics is pleased to announce the publication of Volume 2 in its Language in Education: Theory and Practice series. This series is a collection of practical guides for classroom teachers, extensive state-of-the-art papers, topical discussions, and selected, annotated bibliographies designed to be used by anyone concerned with the education profession. Papers are prepared under the auspices of the ERIC Clearinghouse on Languages and Linguistics and are written by recognized authorities who deal with current issues in their specialties. The new series is a must for all professional libraries—public, private, and personal.

Language in Education: Theory and Practice is unique because it is available on a subscription basis—Fall-Summer. The first (1977-78) volume began in January 1978, and contained the following titles: "Directory of Foreign Language Service Organizations," by Sophia Behrens; "The Linguist in Speech Pathology," by Walt Wolfram; "Graduate Theses and Dissertations in English as a Second Language: 1976-77," by Stephen Cooper; "Code Switching and the Classroom Teacher," by Gaudalupe Valdes-Fallis; "Current Approaches to the Teaching of Grammar in ESL," by David M. Davidson; "From the Community to the Classroom: Gathering Second Language Speech Samples," by Barbara F. Freed; "Kinesics and Cross-Cultural Understanding," by Genelle G. Morain; "New Perspectives on Teaching Vocabulary," by Howard H. Keller; "Teacher Talk: Language in the Classroom," by Shirley B. Heath; "Language and Linguistics: Bases for a Curriculum," by Julia S. Falk; "Teaching Culture: Strategies and Techniques," by Robert C. Lafayette; "Personality and Second Language Learning," by Virginia D. Hodge. Back issues are available (see order form).

By subscribing to Language in Educa-

tion: Theory and Practice, you can receive timely, hard-to-find material at an affordable price—a subscription to Volume 2 costs only \$32.00 (\$33.50 foreign), while books retail for \$2.95 to \$3.95, depending on length. Forthcoming titles include: "Testing Oral Communication in the Classroom," by Walter Bartz; "Intensive Foreign Language Courses," by David Bensler; "Graduate Theses and Dissertations in English as a Second Language: 1977-78," by Stephen Cooper; "Evaluating a Second Language Education Program," by Gilbert Jarvis; "Reasons and Remedies for the Problems of ESL Students in Composition Classes," by Ann Ralmes; "Second Language Learning and Early Childhood Education," by Allene Guss Grognet; "The Idea of Learning Sequence and the Use of the Text," by Janet Swaffar and Truett Cates; "The Role of the Tutor in Second Language Acquisition," by Edna A. Coffin; "Gaming and Simulation in the Second Language Classroom," by Alice Omaggio; "Community-based Language Instruction Programs," by Wilma Hoffman; and more.

A subscription to Language in Education: Theory and Practice is one of the easiest, most economical ways to keep up with a rapidly moving field. There can't be any more affordable way to have current resources right at your fingertips or on your library shelves. Subscribe today!

Order Form

Note: Titles from Volume 1 may be ordered individually or through a back subscription to the entire volume. There is a \$1.50 postage and handling charge on orders under \$10.00. Virginia residents add 4% sales tax.

I. CENTRAL ERIC ANNOUNCEMENTS

A. Kudos to the Steering Committee for ERIC System Technical Operations

It seems we spend a lot of our time dealing with problems. Therefore, it is nice to be able to point out some things that have been done well.

The Technical Steering Committee, originated under Kathleen McLane's leadership and now led by John Waters, has provided an excellent mechanism for ERIC to surface, discuss, and solve some of its technical problems.

The Regional Technical Meetings, I am told, have been good, and many of the recommendations coming from them look promising.

The ERIC Abstractor/Indexer Workbook is an extremely valuable tool for the system. It must have been a labor of love by Barbara Booth, Betty Rose Rios, and Sydney Meredith, as it is hard to find the workbook in any performance category budget. I hope we can polish it up this next year for future use.

...BC

B. Delay in the Mails

The mails are taking longer than ever! For materials we need by a specific date, at least a week should be allowed. That is the case for submissions for the *ERIC Administrative Bulletin* due on the 10th of each month, some of which did not make the last issue. For larger packages, such as proposals or annual review materials, allow at least nine days.

...BC

C. Position Openings

Mike Butler, of the ERIC Clearinghouse on Teacher Education (SP), has suggested that a listing of position openings within ERIC be made in the *ERIC Administrative Bulletin*. In that connection, the NIE Personnel Office has had for some time the information necessary to announce the position to replace Del Trester. President Carter's "freeze" may well affect our intentions and we are awaiting a decision.

...BC

D. Educational Resources Information Center (ERIC) vs. Environmental Resources Information Center (ERIC)

We are receiving an increasing number of comments and complaints about the Environmental Resources Information Center (ERIC)! Since

ERIC is a registered trademark, we have referred the problem to NIE's legal counsel. Meanwhile, it has been noted that there are still a few ERIC® logos on stationery and brochures that do not carry the ®. That should be corrected as soon as existing stock is depleted.

...Bob Chesley

E. Annual Reviews

The annual reviews of seven ERIC Clearinghouses (five in October and two in November) have been conducted at NIE. The seven Clearinghouses were:

- Counseling and Personnel Services;
- Early Childhood Education;
- Educational Management;
- Information Resources;
- Science, Mathematics, and Environmental Education;
- Social Studies/Social Science Education;
- Tests, Measurement, and Evaluation.

Clearinghouse Directors and their Associate Directors made their presentations to the newly expanded Central ERIC staff, which now also includes Mildred Thorne, Pat Coulter, and Jim Prevel. Colleagues from other offices within Dissemination and Improvement of Practice (DIP) and the Information Resources Division are invited to these meetings to broaden their acquaintance with ERIC's important components and the work they do. It seemed appropos, and a pleasure, to have Dr. John A. Minor, DIP's New Associate Director, drop in on the review with the Information Resources Clearinghouse.

...Kit Welsh

F. Model SOC Workshop

One representative from each Clearinghouse and and twenty-one Standing Order Customers (SOC's) from the metropolitan area of Washington, D.C., Virginia, and Maryland, attended a Standing Order Customer Workshop in Alexandria, Virginia on November 7, 1978, to observe its operation and to make plans for conducting similar workshops for SOC's in their regions.

A total of twenty-six workshops will be held throughout the country before June 1, 1978. Only two workshops, however, have been scheduled to date:

- December 6-7, 1978
Minneapolis, Minnesota
(SOC's in Wisconsin, Iowa, and Minnesota)
Contact person: Holly O'Donnell (CS)
- December 7-8, 1978
Ann Arbor, Michigan
(SOC's in Michigan)
Contact person: Helen Marmarchev (CG)

All Clearinghouses are urged to set tentative dates for their workshops as soon as possible, and to inform Nevin Robbins (CE) of these dates no later than Wednesday, December 20. Nevin will coordinate schedules to prevent conflicts and a bunching of workshops in any one month, especially during late May 1979.

Clearinghouses planning workshops in southern states might consider scheduling them during the winter months, leaving the warmer months of April and May for workshops to be held in the northern states. (The caterpillars are woolly and black this year, you've no doubt heard.) Your cooperation will be much appreciated and will make everyone's job easier.

...Mildred Thorne

G. Preparing VIP Budgets

Clearinghouses are requested to include the Vocabulary Improvement Program (VIP) in the "Special Projects Section" of renewal proposals to facilitate CERIC's funding of this project. This funding request should be based on your projection of VIP activity through September 14, 1979 and include all your most urgent VIP work (Priority 1), as well as an estimated 100 hours of other necessary work (Priority 2 and below).

In calculating a budget figure for this project, you may find it helpful to use the VIP Log Form, which has been distributed by Barbara Booth, VIP Project Coordinator. Use of this log will enable you to project your workload, utilizing average time estimates by level of effort.

...Pat Coulter

II. ERIC FACILITY Announcements

A. ERIC Directory Updates

A new feature of the *ERIC Administrative Bulletin* has been added which will, it is hoped, enable the ERIC network to keep abreast of changes in its personnel. This new page (Attachment 1) is entitled *ERIC Directory Updates* and will list each month the new people hired by the network and, if appropriate, the names of the people being replaced. Please call or write Liz Pugh at the ERIC Facility with staff changes and she will submit these additions and deletions to Central ERIC for inclusion in the monthly *EAB*.

...EP

B. Routine Monthly Reports Announced in the EAB

The reports routinely included in the *EAB* from the ERIC Facility will in this and in future issues be displayed as attachments in order to tighten up the issue and to cluster these reports in one place to make them easier to find.

These reports are as follows:

Attachment 1:	ERIC Directory Updates	(Pugh)
Attachment 2:	DJF Status Report	(Houston)
Attachment 3:	Acquisitions Arrangements Updates	(Sundstrom)
Attachment 4:	Duplicates List	(Nuthall)

...Elizabeth Pugh

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. CE Conducts Workshop for Vocational Educators

Linda Wenkert and James Heilman of the ERIC Clearinghouse on Adult, Career, and Vocational Education will be conducting a two-day workshop for vocational educators on November 30 and December 1, prior to the American Vocational Association Convention in Dallas, Texas. The Workshop theme is "Accessing Resources on Handicapped and Bilingual Learners." ERIC, RDX, NDN, and other dissemination systems will be featured in the workshop.

...MP

B. Complete VT-ED Cross-Reference Index for the AIM/ARM System

The Complete VT-ED Cross-Reference Index for the AIM/ARM System is now available from National Center Publications, National Center for Research in Vocation, 1960 Kenny Road, Columbus, Ohio 43210. The cost is \$12.70. Ask for SN 17. ERIC/CE arranged to have one free copy distributed to each Clearinghouse representative who attended the SOC workshop in Alexandria, Virginia.

...Marla Peterson (CE)

C. CAPS Hosts Midwest Regional Technical Meeting in Ann Arbor

The ERIC Clearinghouse on Counseling and Personnel Services hosted the third annual Midwest Regional Technical Meeting in Ann Arbor, Michigan on September 25-27, 1978, and welcomed, for the first time, representatives from the ERIC Clearinghouse on Tests, Measurement, and Evaluation. Another "first" was

the attendance of Kathleen McLane, Past-Chairwoman of the Steering Committee for ERIC System Technical Operations. Special reports were presented by University Microfilms International, relative to CIJE reprints, and by the National Diffusion Network (NDN), concerning efforts to work closely with ERIC in order to disseminate NDN materials more widely. Concurrent small group sessions focused on specific concerns expressed in a pre-meeting participant survey. The Midwest group has always found these mini-sessions to be highly useful for airing problems, sharing techniques, and proposing solutions.

...CJ

D. CG Represented at Seven-District Detroit-Area Consortium

Carol Jaslow represented the ERIC Clearinghouse on Counseling and Personnel Services at a seven-district Detroit-area Consortium of teachers, counselors, and administrators. Ms. Jaslow provided the group with a look not only at ERIC and how it could be of help to them, but how they could become part of ERIC by contributing their materials. Additionally, they learned about S³ --- the Systematic Sharing System created by CG to encourage the sharing of locally developed and tested programs and practices. S³ is designed to be a national effort, and will submit appropriate acquisitions to ERIC.

..CJ

E. CAPS Working with ASCA to develop the Counselor Renewal System

The ERIC Clearinghouse on Counseling and Personnel Services is working with the American School Counselors' Association (ASCA) to develop the Counselor Renewal System (CRS), as part of an ongoing outreach program. CRS is designed to provide school counselors with at-hand ERIC resources in areas targeted to help them upgrade their skills. Areas of "renewal" include behavior modification, child abuse, minority/women counseling, decision-making, career guidance, legal concerns, proposal writing, and public relations. ASCA's 14,000-plus membership provides an unmatched opportunity for extending awareness and use of ERIC.

...Carol K. Jaslow (CG)

F. The Answer Van

The Answer Van is coming! Designed as an aid to new Standing Order Customers, the Answer Van will hopefully prevent gross abuses of the ERIC system (such as refiling the fiche according to the Dewey Decimal System, which rumor has it was actually attempted by an enterprising SOC). Now, however, each new SOC will be visited by

a consultant from the nearest Clearinghouse, presented with an Answer Van containing basic ERIC information, and generally welcomed to the system. What's more, it's all funded by Central ERIC - no charge to SOC. CAPS developed the prototype earlier this year, and the first fleet of Answer Vans is now being assembled. More information and a sample Answer Van will be arriving at each Clearinghouse soon.

...Beverly Pritchett (CG)

G. New Imperatives for Guidance Readied for 1979

A new collection of articles entitled *New Imperatives for Guidance*, edited by Garry Walz and Libby Benjamin, is in preparation at the ERIC Clearinghouse on Counseling and Personnel Services and is expected to be completed in early 1979. This book evolved from a survey of helping professionals concerning new directions for guidance. The thirteen authors who address these concerns are leaders in their fields, so CAPS considers this collection to represent a milestone in significant, as well as practical writing about guidance.

...Candace M. Paris (CG)

H. Computer Conferencing/Teleconferencing Meeting Planned

At the ERIC Users Conference in Arlington, Virginia (August 17-18, 1978), Holly O'Donnell assisted Roy Tally, Murray Turoff, Norman Sims, and Roxanne Hiltz, in conducting a panel on computer conferencing. Holly O'Donnell has recently set up a conference to plan a meeting with two ERIC Clearinghouses, the Midwestern Regional Exchange at CEMREL, and several state dissemination personnel. For additional information, please contact Holly O'Donnell at the ERIC Clearinghouse on Reading and Communication Skills.

...MM

I. CS Asked to Contribute to "Council-Grams"

The ERIC Clearinghouse on Reading and Communication Skills has been asked to contribute to the new national column "Council-Grams," a bulletin of the National Council of Teachers of English, designed to keep affiliate leaders informed of important educational information and trends.

...Mary K. Monteith (CS)

J. Thomas Linney Joins Staff

Thomas Linney is the new Research Associate with the ERIC Clearinghouse on Higher Education. His main responsibilities will be to write for the Clearinghouse's publication series, develop and maintain relationships with individuals in higher education professional associations and individuals in the scholarly disciplines, conduct workshops, make presentations at conferences and answer questions posed by users. Tom is originally from the San Francisco area and just completed his dissertation for a D.Ed. from Claremont Graduate School.

...MS

K. Conference Co-Sponsored by HE

The ERIC Clearinghouse on Higher Education co-sponsored a conference with the University of Florida's Higher Education Program on October 18-20, 1978. The theme of the conference was "Post-secondary Curricula: Meeting the Changing Needs." One hundred twenty-five people participated from the U.S., Canada, and Puerto Rico. Jonathan Fife gave a luncheon speech on ERIC. The Clearinghouse staff presented two sessions on using ERIC and sponsored a display. Arthur Cohen from the ERIC Clearinghouse for Junior Colleges keynoted the conference banquet.

...Marilyn Shorr (HE)

L. JC Receives Gift of Old ERIC Tools

The ERIC Clearinghouse for Junior Colleges has received a large gift of older ERIC tools, including a copy of the famous "double dictionary" index to the Disadvantaged Collection and many annual indexes for RIE (three copies of the 1967 index, for instance). All issues of RIE, including annual indexes, will be reported to Dorothy Slawsky of the ERIC Facility for the RIE Exchange.

Among the items available for distribution of potential clearinghouse interest are the following:

- *Office of Education Research Reports, 1956-65*
ED 002 747--003 960
Index volume - one copy
Resume volume - one copy
- *Thesaurus of ERIC Descriptors*
First Edition, December 1967
Five copies
- *Thesaurus of ERIC Descriptors*
Supplement I, March 1968.
Two copies

The thesauri are more than historical curiosities. They may be of some use in determining whether a descriptor originated during the period of free indexing or whether it was added after lexicographical procedures were instituted. (All descriptors established prior to March 1968 appear with the add date Jul66 in the current editions.) The First Edition should not be confused with the Interim Edition of January 1967; it contains about 800 additional terms added during 1967 which were subjected to lexicographic analysis. Nonetheless it can be used to make educated guesses about a descriptor's origin and may be helpful in some VIP decisions. Interested Clearinghouses should contact Barbara Booth at JC.

...Barbara Booth (JC)

M. New Staffing System at CRESS

The ERIC Clearinghouse on Rural Education and Small Schools has implemented a new staffing system with personnel being assigned primarily by scope areas, rather than specific tasks. One or more staff members are now responsible for the following major scope areas:

- (1) Rural and Small Schools;
- (2) Mexican American and Migrant Education;
- (3) American Indian Education; and
- (4) Outdoor Education.

Each person will then be responsible for the tasks within their scope area, which will include:

- (1) acquisitions;
- (2) selection;
- (3) abstracting and indexing (a limited amount);
- (4) user services requests; and
- (5) identification of information analysis products.

Contract abstractors will be used to complete the remainder of the abstracts. A library technician will aid in general user services requests and in computer searching. CIJE input will remain the responsibility of the information specialists in each of the scope areas.

This program will enable the audience served within each scope area to have direct contact with a professional employee in the Clearinghouse. This program will be evaluated after a year of operation to determine its effectiveness in meeting the goals of ERIC as well as ERIC/CRESS.

Specific scope area responsibilities are as follows:

- | | |
|---------------------------------|---|
| 1. Mexican American and Migrant | Manuela L. Quezada |
| 2. Rural and Small Schools | Everett D. Edington/
Betty Rose Rios |
| 3. Outdoor Education | Judi Conrad |
| 4. American Indian Education | Ramona Tecumseh Sandoval |
| 5. User Services Technician | Amelita Hill |

... (RC)

N. Jon Higgins Featured Speaker of the Peninsula and Tidewater (Virginia) Councils of Teachers of Mathematics

Jon L. Higgins, Associate Director for Mathematics Education at the ERIC Clearinghouse for Science, Mathematics, and Environmental Education, was a featured speaker at a recent joint meeting of the Peninsula and Tidewater (Virginia) Councils of Teachers of Mathematics. His speech, entitled, "It Ain't Necessarily So." focused on incorrect assumptions educators often make about junior high school students. Novel mathematics teaching ideas (many drawn from ERIC sources) were used as practical illustrations for meeting needs and abilities of junior high school students.

...BM

O. SMEAC Environmental Protection Agency Contract Renewed

The SMEAC Environmental Protection Agency contract was renewed for another year. Under this project SMEAC is collecting, reviewing, and processing education and training materials related to water quality and pesticides. The staff is also:

- (1) producing a bulletin to inform people about available materials and education and training programs;
- (2) providing workshops on the use of information sources;
- (3) answering questions regarding materials in this field.

If people have questions, or want to be on mailing lists, they should contact Dr. John Disinger or Dr. Robert Howe of the ERIC Clearinghouse for Science, Mathematics, and Environmental Education.

...Bev Malcolm (SE)

P. Publicity for SP Information Analysis Products

Announcements of new publications available from the ERIC Clearinghouse on Teacher Education have generally been made through the following means:

- (1) mailings to entire mailing list;
- (2) mailings to "tagged" portions of the mailing list;
- (3) sponsor bulletins, newsletters, and journals;
- (4) flyers and handouts at conventions and workshops;
- (5) inserts in information packets distributed by sponsor agencies at their workshops and conventions;
- (6) complimentary copies to other ERIC Clearinghouses, Administrative Committee members, and Advisory Committee members.

In addition, announcements of product and service availability are made in newsletters, journals, and publications of the few organizations which have offered us free advertising or listing, e.g., "The Executive Educator" magazine.

...Mike Butler (SP)

Q. "ERIC: It's That Easy"

The ERIC Clearinghouse on Urban Education in cooperation with the ERIC Clearinghouses on Higher Education and Teacher Education has developed a 15-minute videotape introducing users to the ERIC system. Copies of the tape, called "ERIC: It's That Easy," will be sent to the Clearinghouses in November 1978 on 3/4" video cassettes. Through a special project, ERIC/UD will produce three other training tapes on how the data base is built (acquisitions, selection, and abstracting/indexing, for the most part), and on how to do manual and computer searches (separate tapes). Copies of these tapes will be sent to the Clearinghouses in the Spring of 1979. For more information, call Erwin Flaxman at UD.

...EF

R. ERIC References on Urban and Minority Education

For the past three years, the ERIC Clearinghouse on Urban Education has been compiling annual bibliographies that capture a fairly wide selection of ERIC references on urban and minority education in a given year. These bibliographies include input by all of the ERIC Clearinghouses. It is a useful reference tool for anyone needing broad information, or who wants to see a cross-section of ERIC documents on urban and minority education. If you have such a request or need some information yourself, look at *ERIC References on Urban and Minority Education* (July 1976 (ED 128 492); July 1977 (ED 143 720); and July 1978 (no ED number yet)).

- Attachment 6: Microfiche Inventory and Quality Check (RIEJUL78)
- Attachment 7: Standing Order Customers Subscribers -
Additions and Cancellations

NOTES:

In addition to the routine reports sent with the *EAB* to the Clearinghouses each month, three new ones have been added as attachments.

1. *ERIC Directory* Updates
Please submit personnel changes to Liz Pugh at the ERIC Facility.
2. Acquisitions Arrangements List Updates
While this report is not new, in the future it will no longer appear in the text, but will be a regular attachment to the *EAB*.
3. New Information Analysis Products
This is a new report which will keep a current watch on IAP's being produced by the Clearinghouses. Please include your new IAP's in your *EAB* submissions to your contract monitor.

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC Clearinghouse on Higher Education

- a. "Collective Bargaining in Four-Year Colleges," by Barbara A. Lee.
- b. "Part-Time Faculty," by David Leslie.
- c. "Academic Programming," by S. V. Martorana and Eileen Kuhns.

2. ERIC Clearinghouse on Reading and Communication Skills

- a. *Recommended English Language Arts Curriculum Guides K-12*, edited by Sr. Rosemary Winkeljohann. 1978.

3. ERIC Clearinghouse for Science, Mathematics, and Environmental Education

- a. *Recent Research Concerning the Development of Spatial and Geometric Concepts*. \$6.00.
- b. *Recycling: Activities for the Classroom*. \$4.50.
- c. *Supply and Demand for High School Science Teachers in 1985*. \$1.50.

NOTE: These IAP's may be purchased through:

Information Reference Center
1200 Chambers Road, Room 310
Columbus, Ohio 43212.

4. ERIC Clearinghouse on Tests, Measurement, and Evaluation

- a. *Competency-Based Graduation Requirements: A Point of View*, by Mary Anne Bunda. \$2.00.

NOTE: This report addresses three general areas of concern:

- (1) What is involved in implementing a competency-based graduation requirement;
- (2) How are the new requirements likely to influence school practices;
- (3) What are the legal and financial ramifications of the requirements.

DOCUMENT REPRODUCTION SERVICE

P.O. Box 190 ARLINGTON, VIRGINIA 22210 • (703)841-1212

OPERATED BY: COMPUTER MICROFILM INTERNATIONAL, CORP.

November 10, 1978

Mr. Jim Prevel
National Institute of Education
1832 M Street, N.W.
Washington, DC 20208

Dear Jim:

We have reviewed the RIE July 1978 Microfiche Inventory and Quality Check and the following is submitted.

1. The following documents will be refilmed:

150 300 1/1	150 900 1/2	151 115 1/1
150 314 2/4	150 967 1/1	151 116 1/4, 2/4
150 489 2/3	150 999 1/1	151 213 1/1
150 529 1/1	151 063 1/1	151 270 1/1
150 772 1/1	151 080 4/4	151 364 2/2
150 797 5/6	151 111 1/1	151 376 1/4

2. The following documents are not recommended for refilming:

<u>ED#</u>	<u>CLHSE.</u>	<u>LEVEL</u>	<u>RESUME NOTE</u>	<u>REASON FOR NOT REFILMING</u>
150 930	HE	1	None	Pages 102 & 103 are a double-frame
151 301	SP	1	None	Very thin, light type
151 317	SP	1	None	No blurred images on camera/print master
151 322	SP	1	None	" " " " " "
151 327	SP	1	None	" " " " " "
151 328	SP	1	None	" " " " " "
151 329	SP	1	None	" " " " " "
151 350	SP	1	None	" " " " " "
151 376	TM	1	None	No blurred images on camera/print master, and broken, worn out letters on pages 295 and 322
151 470	UD	1	None	No blurred images on camera/print master

3. It is noted that the EDRS error rate was 1.6% for the documents filmed, or only 1.1% of the total microfiche created from the documents.

Sincerely,

Jack N. Veale
Director

I. CENTRAL ERIC ANNOUNCEMENTS

A. Note to ERIC Clearinghouse Directors

From time to time it is necessary for Central ERIC to respond quickly to NIE management. In most cases, when information from the Clearinghouses is required, the monitors try to communicate our needs to the Directors by telephone. In other instances, however, when the problems are more complex, they may forward the material to you asking early responses. Unfortunately, not all the replies are returned expeditiously. The problem frequently arises because of the absence of the Clearinghouse Director on out-of-town business. In some cases, the mail awaits the Director's return before any action is taken. I would like to ask that each Director make arrangements to open all mail addressed to the Clearinghouse from Central ERIC so that a prompt reply can be made. Your cooperation is appreciated.

B. Publicizing Information Analysis Products (IAP's)

By now you will recognize a recurring theme that stresses the need to increase the distribution of Information Analysis Products. The ERIC Clearinghouse for Science, Mathematics, and Environmental Education (SE), for instance, has been effective in creating wide awareness and sale of many of its products. Attachment 1 is entitled "Publicizing Information Analysis Products" and will routinely announce descriptions of procedures utilized by ERIC Clearinghouses to disseminate their IAP's as they are submitted. This month descriptions by Bob Howe (SE) and Mary Monteith (CS) are shared. We would welcome other reports on successful strategies.

C. Selection of Documents - A Clearinghouse Responsibility

Agencies and organizations regularly place Central ERIC and the ERIC Facility on their distribution lists to receive all of their publications; therefore all types of materials from many contributors are received. Many are of peripheral interest to ERIC. Central ERIC's policy has been that Clearinghouses bear the primary responsibility for evaluation and selection of documents. Documents received by the Clearinghouses, therefore, should be evaluated and selected by Clearinghouse criteria and not selected simply because they were received from the National Institute of Education, the Office of Education, or the ERIC Facility.

D. Short Documents

The problem of "short documents," which was discussed at the Director's meeting has improved considerably. We have received the following suggestion:

"...that documents of that length (1-5 pp) be reviewed by the Director of the appropriate clearinghouse and that the Director sign an appropriate place on the resume form to show that he has reviewed (and approved) it."

We would like to initiate this procedure on a trial basis.

E. NDN Input

A small sample of NDN input has indicated a relatively large rejection rate. We seem to be getting, among other things, somewhat informal materials like newspaper clippings and brochures. It may well be that in arranging to receive more of the NDN materials we have not made it clear to NDN people the kind of materials that ERIC accepts. We will be working with the NDN representatives to clarify any misunderstandings in this area. Meanwhile, we do not suggest that exceptions to ERIC's acceptance criteria be made for these documents.

It is my understanding that at present some Clearinghouses do give or have given feedback to individual authors concerning reasons for rejection of their documents. Especially where quality is an issue, this can be a touchy procedure. It is not a policy of the ERIC system to do so. In the future, we may be working with agencies, such as SEA's, that can act as collection points and we may be able to assist in acquisitions efforts by giving the agency some feedback that will help them better understand ERIC's criteria. However, in the meantime, giving reasons for rejection to individual NDN authors is not a system requirement.

...Bob Chesley

F. ERIC Facility Contract Renewed

A one-year continuation contract with ORI, Inc. has been signed for the operation of the ERIC Facility through November 15, 1979. The contract calls for the continuation of all existing basic functions associated with the production of the ERIC data base and its abstract journal *Resources in Education (RIE)*, assuming an input level of 16,000 documents. In addition, various special projects aimed at system improvement have been funded. The following is a summary of tasks to be performed:

- Acquisitions and document control
- Publication preparation and production
- Lexicography and authority list maintenance
- Data Entry
- Computer system operation, maintenance, and development
- User Services, e.g., reference and referral, annual users conference, *Interchange* newsletter, state technical assistance visits, etc.
- ERICTAPES/ERICTOOLS distribution
- System Improvement Projects, e.g., Vocabulary Improvement Project (VIP), Information Analysis Products Bibliography, History of ERIC, *ERIC Processing Manual* revision, Directory of RIE/ CIJE Subscribers, ERIC Administrative Bulletin, IAP flyer, Calendar of Meetings, Level III section of RIE, etc.

G. System Improvement Projects - Status Report

The following ERIC Facility projects are either completed or due to be completed shortly.

1. Direct Data Entry Experiment - Completed. Report available on request from the ERIC Facility.
2. State Technical Assistance - To date, six (6) states have been visited: Alabama, Colorado, Illinois, Kansas, Montana, and Nebraska. The following visits are scheduled for early 1979:
 - Minnesota - January 18-19, 1979
 - CEDL (Austin, Texas) - Late January
 - Wisconsin - February 15-16, 1979
3. RIE via Videocomp - Beginning with the February 1979 issue, RIE will be produced via the GPO Videocomp instead of the GPO Linotron. A 7 on 7 type size and leading will be used, which should be slightly more efficient in use of space without reducing readability. Because the tape delivered to GPO does not have to run through GPO's Master Typography Program (MTP), it is hoped that GPO turnaround time will improve.
4. Clearinghouse Scope of Interest Manual - This product has been considerably delayed by the process of circulating all drafts among all Clearinghouse for coordination. The last of the input has just been received by the Facility. Delivery of a text to Central ERIC is scheduled for January 15, 1979.
5. New ERIC Data Elements - Three new data elements have been approved and added to the ERIC tape files with the January 1979 RIE data, for use in computer searching. They are: Language, Geographic Origin, and Government Status.
6. Directory of ERIC Microfiche Collections - Completed. Nine hundred (900) copies were distributed to each Clearinghouse. Additional copies are available from the ERIC Facility.
7. ERIC Reference Manual - Material collected and draft being put together by the ERIC Facility. This Manual is to be distributed only to Clearinghouses.
8. Document Reproducibility Guidelines - Completed. This document is to be distributed to Clearinghouses and to a few other interested parties during December 1978. All distribution is controlled by Central ERIC.

Acts of God and weather permitting, the ERIC master computer tapes will be updated during the Spring of 1979. This will involve primarily the Identifier field (as a result of the Identifier Clean-Up Program),

some Descriptor changes due to Thesaurus revision, and conversion of specific prices for ERIC microfiche/hardcopy to price codes. Price codes will be translatable, via a table to be found in RIE and other ERIC materials, to specific dollars and cents.

...Jim Prevel

H. Answer Vans - New SOC's Only

Although the ERIC Clearinghouse on Counseling and Personnel Services will produce more Answer Vans next year, their distribution will have to be restricted to new Standing Order Customers (SOC's) only. There are plans to make available through CG some limited travel funds for the Clearinghouses nearest new SOC's to visit and explain the Answer Van's use. Guidelines will be forthcoming from CG.

...Kit Welsh

I. National and Regional ERIC Technical Meetings

The ERIC National Technical Meeting is tentatively planned for the Washington, D.C. area during the first week of May 1979. An appropriate location for the meeting has not yet been found and definite arrangements have not been made. When they are, Clearinghouses will be notified promptly so that attendees can adjust commitment schedules to allow for attendance.

The regional meetings in 1979 will be held in Washington, D.C., Urbana, Illinois, and Eugene, Oregon. The only date which is set at present is for the midwestern meeting, September 24-26, 1979.

...Frank Smardak

J. Attention VIP Coordinators

The publication of the first edition of the "Play Thesaurus" is predicated on your initial submission of changes under the VIP project. To date, the Facility has not received sufficient Clearinghouse input to warrant the publication of this tool. As soon as possible, please submit your initial input so that the first edition can be sent to the Clearinghouses by January 5.

The VIP Manual developed by Barbara Booth of the ERIC Clearinghouse on Junior Colleges is in its final stages of production and will be in the mail by December 15. Please see Jim Houston's submission to the EAB under "ERIC Facility Announcements."

...Pat Coulter

II. ERIC FACILITY ANNOUNCEMENTS

A. Orabelle Nuthall Retires

Orabelle Nuthall will retire from her long-held post as Chief Editor of *Resources in Education* on December 22, 1978. In a very real sense, Orabelle's decision to retire marks the end of an "era." The first issue of RIE was dated November 1966; with the November 1978 issue, RIE will have been in existence for twelve years. For nearly ten of those twelve years, with both North American Rockwell and ORI, Inc., Orabelle has been the principal person responsible for the overall consistency and accuracy of the data announced in RIE. Several generations of Clearinghouse personnel have experienced her dedicated and civilized editorship. We will miss her greatly.

B. ERIC Processing Manual Revision to Take Place

The *ERIC Processing Manual* received its last full-scale revision and updating in 1974. Many individual revision pages have been sent out since then, but inevitably a general aging takes place. The index falls behind. Certain revisions have secondary and tertiary impacts in parts of the manual that weren't noticed at the time the changes were originally made. The page numbering scheme gets awkward (with A, B, C pages, etc.) due to new and deleted pages.

Central ERIC has directed that a general revision take place during 1979 and the Facility intends to get an early start on this substantial task. Central ERIC will appoint a liaison person to work with the Facility on the task. At the Facility end the revision team will consist of Ted Brandhorst, Murray Howder, and Elizabeth Pugh, though other staff will be involved with the particular sections appropriate to their work. All revised text will receive the approval of Central ERIC before being distributed.

As a first step in the revision process, we would like to solicit input from the ERIC Clearinghouses. Here is your chance to significantly affect the content of one of the more complete and influential information center manuals in the business!

To enable us to process your suggestions in the most efficient manner, we would appreciate it if you could create one page per suggestion and number your suggestions. This "unitization" will permit us to sort all the suggestions together that deal with the same section or topic. We will thereby be able to take action more quickly and will be able to tell you exactly what happened to your suggestion, should you ask.

Please feel free to actually take a crack at re-writing the particular sentences, paragraphs, or sections you are addressing, when this is appropriate. Marked-up Xerox pages of the *EPM* would be fine. We have found that general criticisms are sometimes subject to variable interpretation. When you actually put the desired concepts into "operational terminology" it inevitably helps to clarify your point. It might also save us a lot of work at this end.

We can promise you that all suggestions will be read and given careful consideration by both Central ERIC and the Facility revision team. Should any clarification be needed we will call and discuss your suggestions with you.

You are strongly urged to participate in this activity. We need your help in order to do the job well. No final deadline on input will be adhered to, however, the first pass-through will work with all suggestions received by March 1, 1979. Send suggestions to the ERIC Facility, attention: EPM Revision Project.

...Ted Brandhorst

C. VIP "Play Thesaurus"

The principal working tool of the Vocabulary Improvement Project (VIP) is the *Play Thesaurus*, based on and developed from a duplicate record of the current *ERIC Thesaurus*. For the duration of the project, the *Play Thesaurus* will be used to record all Clearinghouse recommendations and lexicographic decisions and to disseminate proposed changes to all VIP participants.

The *Play Thesaurus* is scheduled to be run 12 times (about every three weeks) from December 1978 to September 1979. Facility implementation of approved recommendations therein will culminate in a new and approved *ERIC Thesaurus* by early 1980.

The first issue of the *Play Thesaurus* is currently scheduled for mid-December. As of the first week of December, however, a total of only twenty (20) input recommendations (DJF's) had been received at the Facility. If input continues at this slow pace, the first issue will not be warranted until mid-January or later. Clearinghouse Vocabulary Coordinators are requested to begin their input immediately so that the VIP can be kept on schedule. At least some input from each Clearinghouse should be included in the first *Play Thesaurus* issue.

...Jim Houston

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. Dr. Marla Peterson Elected to the Editorial and Publications Committee of the American Vocational Association

Dr. Marla Peterson, Director of the ERIC Clearinghouse on Adult, Career, and Vocational Education, has been elected to a three-year term on the Editorial and Publications Committee of the American Vocational Association. In addition to her regular committee duties, Dr. Peterson also edits the monthly "Research in Action" column in the *VocEd Journal*. The column reaches 50,000 readers each month and is based on documents that have been entered in the ERIC data base. The October issue of the *VocEd Journal* contained three "letters to the editor." which praised the content of the "Research in Action" column.

...Marla Peterson (CE)

B. Management Workshops for ERIC Standing Order Customers (SOC's)

The series of Management Workshops for ERIC Standing Order Customers (SOC's) is now fully underway. Three workshops have been conducted:

- Alexandria, Virginia;
- Ann Arbor, Michigan;
- Minneapolis/St. Paul, Minnesota.

Tentative plans have been made for nine additional workshops:

- St. Louis, Missouri;
- Richmond, Virginia;
- Raleigh, North Carolina;
- Oklahoma City, Oklahoma;
- New Orleans; Louisiana;
- Dallas, Texas;
- Houston (or Antonio), Texas;
- Jacksonville, Florida; and
- Columbia, South Carolina.

The advance information on these workshops was definitely appreciated. Information or plans about the remaining fourteen workshops should be forwarded to either Nevin Robbins or Celia Wright (ERIC/CE). Please remember that Planners are trying to spread the workshops out over the January-May period (southern workshops in the winter months, northern workshops in the spring).

Celia Wright will soon be in touch with all workshop coordinators, if she has not already. She is sending materials for use in the workshops and information about the agenda (as revised after the Alexandria meeting).

...Nevin Robbins (CE)

C. Dr. Wilhelm Bohrer, Director of Admissions at the University of Mannheim, West Germany Visits CG

During the visit of Dr. Wilhelm Bohrer, Director of Admissions at the University of Mannheim, West Germany, much information was exchanged. As an example, Dr. Bohrer, who was familiar with ERIC, had not realized that a full ERIC collection is located within twenty minutes of Mannheim. He shared with us the ways in which the structure of higher education in West Germany differs from that in the United States. For example, all institutions of higher learning in West Germany are public. The ERIC Clearinghouse on Counseling and Personnel Services enjoys visits from foreign educators and considers the exchange of information mutually beneficial.

...Carol Jaslow (CG)

D. ERIC-Sponsored Preconvention Seminar Proves Popular

An ERIC-sponsored preconvention seminar on minimum competency testing in English, co-chaired by Holly O'Donnell at the recent National Council of Teachers of English Convention in Kansas City, was filled to capacity several weeks before registration, indicating the continued interest in this topic.

...Mary K. Monteith (CS)

E. The Best of the Best of ERIC

The ERIC Clearinghouse on Educational Management will publish *The Best of the Best of ERIC - Volume 2* in January 1979. The volume compiles and updates issues twenty-one through forty of the Clearinghouse's annotated bibliography series *The Best of ERIC*. Volume 1, containing the first twenty issues, was published in 1977.

The Best of ERIC is the Clearinghouse's most widely disseminated series. Well over one million copies have been distributed to school practitioners across the country through the cooperation of several professional organizations. Currently more than 35,000 school administrators regularly receive copies.

The new volume contains summary-review of 307 reports and journal articles on topics ranging from advisory committees to teacher evaluation. About 40% of the entries were newly written for *The Best of the Best of ERIC*.

...Stu Smith (EA)

F. EC Processes 205 Conference Papers from the First World Congress on Future Special Education

The ERIC Clearinghouse on Handicapped and Gifted Children processed 205 conference papers from the First World Congress on Future Special Education for the December 1978 and January 1979 issues of RIE. Held at the University of Stirling, Stirling, Scotland, on June 25 to July 1, 1978, the Congress involved over 2,000 participants from 39 countries. Focus was on current practices and the state of the art, appraisal of prevalent assumptions, and future directions. The papers reflect these three areas of inquiry and additionally present diverse cultural and national considerations.

...Marion Cambel (EC)

G. Revised Set of Transparencies Developed at IR

A revised set of 20 transparencies on ERIC has been developed at the ERIC Clearinghouse on Information Resources. Featuring all new graphics on diazo, content includes information on the system as a whole, sample displays of ERIC tools, and an example of computer

search strategy. Statistics and graphics have been updated, and a flow chart of processing procedures for both RIE and CIJE has been added. The price for this set is \$125; however, a copy for each of the Clearinghouses is included in the ERIC/IR 1979 proposal. They will be sent out as soon as proposal approval is received.

Black and white 8½" x 11" copies of the transparencies have also been prepared to be used as Thermofax masters for the preparation of transparencies or ditto masters. The price will be \$5.00 per set from the Clearinghouse; however, complimentary copies will also be sent to all of the Clearinghouses.

Notes for possible uses for each transparency are being prepared and will accompany the sets.

H. A Glossary of ERIC Terminology

A Glossary of ERIC Terminology, compiled by Marilyn Laubacher, is currently at the printer's. Definitions in the 22-page booklet are oriented for the user who is completely unfamiliar with the jargon of either ERIC or information retrieval in general. It can be obtained as follows:

*Syracuse University Printing Services
125 College Place
Syracuse, New York 13210.*

The price is plus 10% of the total order for postage and handling, minimum; the order number is IR-28.

...Barbara Minor (IR)

I. Cataloging as a Graphic Art

Barbara Booth of the ERIC Clearinghouse for Junior Colleges has submitted for the EAB an item entitled "Cataloging as a Graphic Art." It is conceived as an aid in solving the most difficult cataloging problems and can be found as Attachment 2.

...Barbara Booth (JC)

J. Dr. Everett Edington to be on Sabbatical Leave

Dr. Everett D. Edington, Director of the ERIC Clearinghouse on Rural Education and Small Schools (RC) will be on sabbatical leave of absence from January 2, 1979 through May 5, 1979. During that time he will be at the University of Wisconsin working with the Wisconsin Vocational Studies Center, Department of Rural Sociology and the Department of Educational Administration. He will be dealing primarily with research programs on rural youth.

K. Dr. Everett Edington Appointed to the National Advisory Board of the Women's Educational Equity Communications Network

Dr. Everett D. Edington, Director of the ERIC Clearinghouse on Rural Education and Small Schools (RC) has been appointed to the National Advisory Board of the Women's Educational Equity Communications Network (WEECN). WEECN is operated for the U. S. Office of Education by the Far West Laboratory for Educational Research and Development under the auspices of the Women's Educational Equity Act.

L. National Chicano Research Network Invites Betty Rose Rios to Participate in an Organizational Meeting

The National Chicano Research Network has invited Betty Rose Rios, Assistant Director for Processing of the ERIC Clearinghouse on Rural Education and Small Schools, to participate in an organizational meeting to initiate a major national project on "Information Storage and Retrieval of Hispanic Materials." The project is a cooperative effort undertaken to combine the resources of hispanic libraries and indexing projects to make this hispanic information easily accessible on a national level. To do this most efficiently, the organizational group will develop a national hispanic information consortium that will produce a computerized data base on hispanic materials. The eleven-member organizational group, who were selected from research networks or libraries throughout the nation, will meet November 30 to December 1, 1979 in Los Angeles, California.

...Amelita Hill (RC)

M. ERIC/SMEAC Has Available New Publication Entitled Science Abstracts and Index from Resources in Education (RIE), 1976-77

The ERIC Clearinghouse for Science, Mathematics, and Environmental Education (SE) has available a new publication entitled, *Science Abstracts and Index from Resources in Education (RIE), 1976-77*. This publication contains abstracts of nearly all materials related to science education included in *Resources in Education (RIE) 1976-1977*. Subject and other indexes are provided to facilitate searching. This publication supplements, but does not replace earlier Science Education compilations, 1966-1972, and 1973-1975. The document may be purchased as follows:

Information Reference Center
1200 Chambers Road, Room 310
Columbus, Ohio 43212

The price of the publication is \$25.00. Any Clearinghouse wishing to receive a copy should notify Ms. Beverly Malcolm at ERIC/SMEAC.

N. ERIC Descriptor and Identifier Reports Available

The ERIC Descriptor and Identifier Usage Report - 1977 Supplement is available from the Information Reference Center. Each printout includes ED and EJ listings by descriptor and identifier. It's price is \$15.00. The ERIC Descriptor and Identifier Accumulated Totals - 1966-1977 is also available. These indexes enable a person to search the total ERIC data base. It's price is \$3.50. Both publications may be obtained from the following address:

Information Reference Center
1200 Chambers Road, Room 310
Columbus, Ohio 43212

O. Stanley L. Helgeson Gives Presentation

Stanley L. Helgeson, Associate Director for Science Education at the ERIC Clearinghouse for Science, Mathematics, and Environmental Education gave a presentation entitled "Two Decades of Science Education: 1955-1975" at the School Science and Mathematics Association Annual Meeting.

P. Patricia E. Blosser Participates in Meetings

Patricia E. Blosser, Research Associate in Science Education, participated in two meetings this month. She gave a presentation at a National Science Teachers Association and National Science Foundation Dissemination Project Meeting in New York entitled "How to Steal Legitimately From ERIC." Dr. Blosser also attended a regional meeting of the National Science Teachers Association in New Orleans where she had an ERIC display and gave a presentation on "Reading as a Survival Skill."

...Bev Malcolm (SE)

Q. ERIC Multiple Choice Test Used at Workshop

A copy of a multiple choice test on ERIC which was developed for use in a workshop is displayed as Attachment 3. Use of the test was quite successful in that it made ERIC "fun" and brought on good discussion. Using it as an opener to any workshop (such as the upcoming SOC's) helps to create the mood and setting for discussion about ERIC.

...June Ramos (SO)

R. TM Publishes Sex Bias in Testing: A Review with Policy Recommendations

The ERIC Clearinghouse on Tests, Measurement, and Evaluation, in cooperation with the Women's Educational Equity Communications

Network (WEECN) have recently published *Sex Bias in Testing: A Review with Policy Recommendations* by Carol Kehr Tittle.

Sex discrimination has been prohibited by law in educational institutions that receive federal support. Yet, there is still concern that many educational policies, procedures, and practices reinforce sex-role stereotypes and reflect prejudiced views of women's achievements, abilities, and interests. This monograph on equity for women in educational testing focuses on issues of sex bias in educational achievement tests, career interest inventories, and aptitude tests. Where each issue is raised and analyzed for implications of sex bias, needed policies and procedures have been suggested that are within the authority and responsibility of local and state educational administrators, teachers, counselors, parents, and students.

LIST OF ATTACHMENTS

- Attachment 1: Publicizing Information Analysis Products
- Attachment 2: Cataloging as a Graphic Art
- Attachment 3: Commonly Asked Questions About ERIC: A Multiple Choice Test
- Attachment 4: *ERIC Directory* Updates
- Attachment 5: Descriptor Justification Form (DJF) Status Report
- Attachment 6: Acquisitions Arrangements List Updates
- Attachment 7: New Information Analysis Products (IAP's)
- Attachment 8: Duplicates List for RUEDEC78
- Attachment 9: Standing Order Customers Subscribers - Additions and Cancellations
- Attachment 10: Microfiche of the Microfiche Inventory and Quality Control Check (1 per Clearinghouse)

NOTES:

The Microfiche Inventory and Quality Check has not been included as a regular attachment with this issue.

PUBLICIZING INFORMATION ANALYSIS PRODUCTS

ERIC Clearinghouse on Reading and Communication Skills - Ms. Mary K. Monteith

The ERIC Clearinghouse on Reading and Communication Skills co-publishes many of its publications with other professional organizations, such as the Speech Communication Association, the International Reading Association, and the National Council of Teachers of English. The major means of publishing its products are news releases and flyers. Announcements of publications are printed in yearly products lists, which are sent to all Standing Order Customers (SOC's) and in response to all requests. Publications are also displayed and distributed at exhibits at conventions and workshops.

ERIC Clearinghouse for Science, Mathematics and Environmental Education - Dr. Robert W. Howe

The ERIC Clearinghouse on Science, Mathematics, and Environmental Education is currently using a variety of approaches to develop awareness of its information analysis products. Sales this year will be over 30,000 documents; sales are continuing to increase. Some of the techniques that have been found to be effective are listed:

1. Mailing of a publication list to over 11,000 individuals and agencies. This has been a very effective mechanism. Most of the sales come from this procedure.
2. A sample publication is sent to all appropriate state supervisors. This results in some sales, but also in very heavy use of SE publications by the states in their own publications. SE knows of over 35,000 copies of books or monographs produced each year that have included substantial parts of SE publications. States such as Maryland, Florida, Pennsylvania, Indiana, and others have used several of SE publications in total or in part.
3. A complimentary copy of most of SE products is sent to each of the 100-200 largest school districts in the country. This has had a very similar result as "2" above; SE has obtained some sales, but have had even more requests for permission to include material from SE publications in theirs.
4. Several associations, such as the National Council for Teachers of Mathematics (NCTM) purchase materials at a discount for resale. They advertise the materials in their publications and handle sales.
5. Special prices for members of organizations on items produced in cooperation with them have been developed. Members order the materials through the Association. The Association sends pay out and the addresses of people to whom the materials should be sent to the Clearinghouse.
6. Displays of products at conventions and workshops consistently produce good results.

7. Materials are announced in journals and newsletters. These efforts have produced mixed results.
8. A list of libraries is maintained and publication lists are mailed to them annually. A substantial number of orders are received from them.

As funds are available from SE's rotary account, the Clearinghouse is increasing publicity and awareness of products. Current \$20 in sales are obtained for each \$1 spent on publicity and awareness of products.

CATALOGING AS A GRAPHIC ART

A little ingenuity can help solve some of the most difficult cataloging problems. Here is a recent example from the Clearinghouse for Junior Colleges.

COMMONLY ASKED QUESTIONS ABOUT ERIC: A MULTIPLE CHOICE TEST

Acquisitions/Regional Associates Network

NCSS Annual Meeting, Houston

November 23, 1978

INSTRUCTIONS:

Circle the most appropriate answer or answers to each of the following:

1. What is ERIC?
 - a. An educational data base containing over 300,000 resource materials.
 - b. A vanity publishing company.
 - c. An acronym which means Educational Resources Information Center.
 - d. A descendant of an old Viking, prominent in Danish beer commercials.
2. I am looking for goals and objectives to develop a Spanish bilingual program for elementary students. Where do I find this information?
 - a. Call all the elementary schools in the U.S. and ask the principals if they have a bilingual program with outlined goals and objectives.
 - b. Conduct a manual search of the ERIC indexes.
 - c. Look through all the microfiche cards and pull the appropriate ones
 - d. Have a computer search done on your topic.
 - e. Hire a graduate student to find the information for you.
3. What is RIE?
 - a. *Research in Education*, the monthly index of ERIC educational documents.
 - b. *Recent Innovations in Education*.
 - c. *Risky Innovational Education*.
 - d. An educational center in New York which offers curriculum instruction for a small fee.
 - e. *Resources in Education*.
4. I have a document which I would like to submit for inclusion in the ERIC files. What should I do?
 - a. Don't call us; we'll call you.
 - b. Send two legible copies of the document to any clearinghouse.
 - c. Send two legible copies of the document to the ERIC Facility in Bethesda, Maryland.
 - d. Send two legible copies of the document to the National Institute of Education.
 - e. Send two legible copies of the document to Macmillan Publishing Company, the publishers of the ERIC indexes.

ERIC MULTIPLE CHOICE TEST

-2-

5. What is EDRS?
- It is a professional organization in Washington, D.C., which deals with all aspects of the ERIC system, and stands for Educational Development Resource Services.
 - Educational Dissemination and Research in Sex.
 - It is the Educational Document Reproduction Service, which processes all orders for ERIC documents.
 - It doesn't stand for anything; you obviously made this one up.
6. How will I know if my document is accepted or rejected by ERIC?
- You will receive a person-to-person, collect phone call from the Washington offices.
 - You will receive a post card.
 - A copy of the microfiche of your document will be mailed to you.
 - Nothing is sent to you. You need to check the monthly issues of the ERIC indexes to see if your document is listed.
 - It's anyone's guess---ask an astrologer.
7. If I have a document which is available from ERIC, can I resubmit the paper for publication elsewhere?
- No. ERIC maintains all rights to your manuscript.
 - Yes. ERIC does not hold the copyright to any document.
 - Because ERIC actively disseminates information about its documents, there is no need to publish your paper elsewhere.
 - If you publish it elsewhere, ERIC receives a 10% commission.
8. I was told that most ERIC documents are available on MF and HC. What does that mean?
- Microfilm and hardcopy.
 - Microfiche and papercopy.
 - Micro-fish and huge-carp.
 - Microfiche and hardcopy.
9. What is a VIP?
- Obviously a very important personality.
 - It stands for vesicular infra-red production, the method used to make microfiche cards.
 - It stands for Vocabulary Improvement Project, which is the system-wide clearinghouse effort to clean-up the Thesaurus.
 - All persons connected with the ERIC operations.

ERIC MULTIPLE CHOICE TEST

-3-

10. How many descriptors are listed in the Thesaurus?
- a. Over 7,000.
 - b. Over 5,000.
 - c. Not enough.
 - d. Over 10,000.
 - e. Too many.
11. How many clearinghouses currently exist?
- a. 20
 - b. 23
 - c. One for each letter of the alphabet.
 - d. 16
 - e. 15
12. How do I find the nearest microfiche collection in my area?
- a. Call any clearinghouse. They will tell you.
 - b. Look it up in the Microfiche Directory.
 - c. Look in the yellow pages.
 - d. Ask your mother.
 - e. Go to a pond that stocks them.
13. What is a SOC?
- a. Systems Operations Contract, the sponsoring organization which holds the contract for an ERIC clearinghouse.
 - b. A warm, woolen covering for the feet.
 - c. A Standing Order Customer.
 - d. A Sitting Order Customer.
 - e. A library or resource center which houses the entire ERIC microfiche collection.
14. Who funds the ERIC system?
- a. The Office of Education.
 - b. The Office of Educational Management.
 - c. The National Institute of Education.
 - d. Money is raised annually through fund-raising dinners, bake sales, car washes, and private donations.
15. Who can use ERIC?
- a. Firefighters and police.
 - b. Librarians, teachers, and researchers.
 - c. Lawyers.
 - d. All of the above.
 - e. B and C.

I. CENTRAL EPIC ANNOUNCEMENTS

A. ERIC Administrative Bulletin (EAB) Input

Let me continue to encourage Clearinghouses to submit regularly material for the EAB. I am encouraged by the results so far and feel that the EAB should be a mechanism that can communicate between all elements of the system, not just from Central ERIC. One request--- please send your input to the Clearinghouse monitor, not directly to me.

B. Facility Request for Scope Note Assistance

Clearinghouse directors have recently received a memo from the ERIC Facility requesting assistance in ironing out remaining problems in Scope Note Statements. We need to get the Scope Notes in a uniform and final form. It has taken much time to get where we are---a significant step. There are still a few overlaps to be ironed out and a little more work to be done to make the descriptions consistent and comparable. Please give the Facility the help they have requested so that we can quickly complete this chore.

C. ERIC---The First 15 Years

A memo dated August 11, 1978, to all Clearinghouse Directors, asked for comments to a series of eleven discussion questions. Thus far only a couple of replies have been received. These questions are intended to elicit responses which could provide the background for an interesting discussion of attitudes, beliefs, points of view, which can only come from the Clearinghouses. Please send your replies, as soon as you can, to:

Del Trester
10312 Wilde Lake Terrace
Columbia, Maryland 21044

A copy of the memo is appended as Attachment 1.

D. HAPPENINGS AROUND NIE AND DIP

Reprints of *NIE News* and selected clippings describing DIP happenings are appended as Attachments 2 and 3. This may be a way we can help keep the Clearinghouses informed about some of the events around Central ERIC.

...Bob Chesley

E. National Federation of Abstracting and Indexing Services (NFAIS)

Central ERIC has renewed its membership as a Government affiliate in the National Federation of Abstracting and Indexing Services (NFAIS) for the twelve-month period from July 1978 to June 1979. The chief purpose of the Federation is to improve the extent and quality of the documentation and use of the world's literature, through research programs, publications, and educational seminars. NFAIS also serves as a communication forum for its members through meetings, workshops, committee activities, and informal publications.

Our membership entitles Central ERIC and the Clearinghouses to participate and benefit from a number of services and products of this professional association. Among these are receipt of the NFAIS bimonthly newsletter, reduced rates for conference and workshop attendance, and access to the NFAIS publications and statistical services. A copy of the newsletter and an announcement of the 1979 NFAIS Annual Conference is appended as Attachment 9 (one set per Clearinghouse).

...Pat Coulter

F. MAIL DELIVERY TO THE NATIONAL INSTITUTE OF EDUCATION

Central ERIC encounters various problems periodically in receiving its mail. A reminder is given here as to how mail should be addressed.

Normal Mailing Address

National Institute of Education
Washington, D.C. 20208

NOTE: The Zip Code 20208 is exclusively NIE.

United Parcel Post (UPS), Special Delivery Letters/Packages, and 24-Hour Express Mail Service

Addressee's Name
Central ERIC
Room Number
National Institute of Education
1200 Nineteenth Street, N.W.
Washington, D.C. 20208

As of a month ago, the NIE Contracts and Grants Division moved from the Riviera Building (formerly the Mars Building) to the Brown Building, where Central ERIC is located. Mail should be addressed to C&GMD as follows:

Vouchers, Grant Applications, Contract Renewals, Etc.

Contracts and Grants Management Division (C&GMD)
Room 808
National Institute of Education
1200 Nineteenth Street, N.W.
Washington, D.C. 20208

...Pat Coulter/Frank Smardak

G. ERIC DIRECTORS' MEETING

The next ERIC Directors' Meeting will be held March 1-2, 1979, at the Seminary Road Ramada Inn, Alexandria, Virginia. The Inn is located on Shirley Highway (Interstate 95), just a couple of miles south of the Sheraton National Inn, where the last two National Dissemination Forums were held.

Agendas and details concerning the meeting will be forwarded to the Clearinghouses at a later date. In the next week or so, Directors may expect to be called by their monitors concerning specific room reservation requirements. The reservations will be made by Central ERIC in a block booking.

H. ANNUAL NATIONAL TECHNICAL MEETING

The ERIC Annual Technical Meeting is scheduled for May 1-3, 1979. Reservations for the meeting have been made with the Center for Adult Education at the University of Maryland in College Park, Maryland for accommodations on the nights of April 30, May 1, and May 2.

Arrangements have also been made to hold a meeting of the Vocabulary Improvement Program coordinators the day immediately preceding the technical meeting (April 30th). The VIP-ers will also stay at the guest house at College Park and meet in the Adult Education Center. Prospective out-of-town attendees at this meeting should plan on arriving the evening before the meeting (April 29th).

Since hotel accommodations and meeting space are at a premium during the Spring season in Washington, it is necessary that we have early definite commitments for those individuals who will be coming to the VIP meeting and/or the tech conference. As in the past, Clearinghouses will be limited to two technical meeting representatives each over and above the VIP coordinators. Please phone or mail the names of your representatives as early as possible to your clearinghouse monitors (preferably by January 26th).

Details concerning the agenda, hotel rates, airport transportation, maps, etc., will be mailed directly to the designated attendees at a later date.

...Frank Smardak

I. RRS MEETINGS EXCHANGE

By this time you should have received from the ERIC Facility a copy of the *ERIC Conference Calendar, January 1979 to December 1979*. This calendar includes only those meetings which Clearinghouse staffs will be attending, or from which Clearinghouses will solicit papers.

A more extensive calendar has been developed by the Resource and Referral Service (RRS), which is part of the R&D Exchange. This is entitled *RRS Meetings Exchange* and is a listing of national and regional meetings on various topics of interest to educators. The current issue covers the 6-month period of January to June 1979; subsequent issues will list future meetings scheduled for the balance of the calendar year.

Arrangements have been made for Clearinghouses to receive a copy of the current issue and future issues of *RRS Meetings Exchange* as they are released. Since RRS is limited on the number of copies they can produce, they freely grant permission and encourage others to reproduce copies. They do, however, request that appropriate credit be given.

If any Clearinghouses wish to have their workshops, seminars, conferences, etc. included in a future issue of the calendar, please send the appropriate information for each meeting (see information items in the calendar) to:

Dr. John Peterson
Resource and Referral Service
Ohio State University
1960 Kenny Road
Columbus, Ohio 43210

...Mildred Thorne

J. NEW PUBLISHER FOR CIJE - ORYX PRESS

There is a new publisher of CIJE, as you have all been told by telephone. The new contract was awarded to the ORYX Press of Phoenix, Arizona. This is a women-owned company of which Phyllis B. Steckler is the President. Kaye E. Reed is her managing editor. Other members of the staff will be introduced to you later. ORYX has a subcontract with the San Mateo Educational Resources Center (SMERC) to process journal articles from the lists of journals not covered by the Clearinghouses. Kathy Clay of SMERC, whom you all know, will be in charge of this operation. We welcome ORYX to the ERIC network and look forward to a good mutual working relationship with everyone involved.

Until the proper OCR forms for CIJE input have been generated, everyone will continue to use the present journal article resume forms and log sheets and send shipments of materials to ORYX just as you have to Macmillan. Please use the following address:

The Oryx Press
3930 East Camelback Road
Suite 206
Phoenix, Arizona 85018

At this time we would like to recognize the work done by the Macmillan Publishing Company over the past ten years. They were the original publishers of CIJE and we wish to thank them for their important contribution they have made to ERIC during that time. Of course special recognition should go to David Biesel, Project Director and to Tom Wright, his able Editor.

...Catherine G. Welsh

II. ERIC FACILITY ANNOUNCEMENTS

A. ERIC Facility Editorial Department - Changing of the Guard

The ERIC Facility Editorial Department has historically been a very stable unit. With the retirement of Orabelle Nuthall (January 1979) and the departure of Sally Swan (transferred to WEECN), the Department is currently undergoing its first major reorganization in some years.

Assuming the mantle as head of the Department and the Facility's Chief Editor for *Resources in Education* (RIE) is Mrs. Leonora (Lee) Schreiber. Lee has been with the company for many years. She was associated for many years with the preparation of NASA's *Scientific and Technical Aerospace Reports* (STAR). She has worked with Orabelle on RIE since 1970 and richly deserves her promotion to Senior Editor. Assisting Lee will be two new additions to the Facility's staff: Mrs. Christine Taylor, for the past nine years associated with the Department of the Interior, Historic American Building Survey, and Julia Holladay, a recent graduate of Bucknell University.

ERIC Clearinghouse staff involved in RIE processing will come to learn the personalities behind these names as they receive calls and other contacts from them. Lee in particular will be heavily involved in the upcoming revision of the *ERIC Processing Manual*. Please do not hesitate to contact Lee on all matters relating to cataloging, indexing, and abstracting of material for announcement in RIE.

...Ted Brandhorst

B. VIP Input

Clearinghouse input to the *VIP Play Thesaurus* through January 10 totals 110 DJF's as follows:

CG - 20	PS - 5
EA - 11	RC - 1
FL - 10	SO - 33
HE - 8	SP - 7
JC - 15	

All of these have received lexicographic analysis and will be reflected in the first edition of the *Play Thesaurus*, to be run in mid-January. Processing of the VIP input was delayed until 116 January changes to the "real" *Thesaurus* were input to the file. Thus, the "real" *Thesaurus* as of January 1979 will serve as the base for all editions of the *Play Thesaurus*.

...Jim Houston

C. REMEDIAL ACTIONS FOR MAKING DOCUMENTS REPRODUCIBLE

The attention of document processors at the Clearinghouses is directed to pages 23-24 of the *ERIC Document Reproducibility Guidelines*. A number of remedies are provided for upgrading problem pages so that they can be reproduced satisfactorily. Clearinghouses are urged to use these and other means to bring substantive documents up to the point where they meet the physical criteria. For example, some Clearinghouses have regularly enhanced faint type on black and white pages by Xeroxing them, using the "light original" option. Use of this remedy and other innovative means are encouraged.

...Murray Howder

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. Dr. Peter Eddy Works With Others to Provide Information to the President's Commission on Foreign Language and International Studies

Dr. Peter Eddy, Director of the ERIC Clearinghouse on Languages and Linguistics, has been working with representatives of the American Council on the Teaching of Foreign Languages and the Modern Language Association to provide information to the staff of the new President's Commission on Foreign Language and International Studies. The recently formed Commission will attempt to formulate recommendations leading to fundamental changes in American attitudes toward international education and the study of foreign languages.

...Peter Eddy (FL)

B. Revised Set of ERIC Transparencies Developed by ERIC/IR Being Produced

The set of revised transparencies on ERIC developed by the ERIC Clearinghouse on Information Resources is currently being mass produced and notes to accompany each set have been completed. The supplier from whom looseleaf binders were ordered no longer makes them; however, a new source for appropriate binders is being sought. The ERIC/IR 1979 contract provides for a complimentary copy of the set for each Clearinghouse, and they will be sent out as soon as possible. (Note: The transparency locating the components of the ERIC system is being updated to show the latest change, and Clearinghouses that received pilot versions of the transparencies will receive a new overlay.)

Copies of the Thermofax masters for black and white transparencies or spirit masters will also be sent to each Clearinghouse together with general instructions for their use.

Additional orders should be prepaid (\$125 for the transparencies, \$5.50 for the Thermofax masters, both postpaid) and addressed as follows:

Mr. W. Bruce Clark
ERIC Clearinghouse on Information Resources
School of Education
Syracuse University
Syracuse, New York 13210

...Barb Minor (IR)

C. No Document, No Dough

A northern California professional association, NOR CAL Cooperative Institutional Research Group, will fund this year six research projects of \$500 each. In the letter to its membership announcing the grant opportunity, the following condition was made: *"Checks for all but \$100 of the grant will be mailed to the business office of the local college campus in the name of the project director. Upon submission of two camera-ready copies of the final written report to ERIC for publication, the final \$100 will be remitted."*

...Bonnie Sanchez (JC)

D. ERIC/ECE Staff Working with CDA Services and Resource Center

Staff members of the ERIC Clearinghouse on Early Childhood Education are working cooperatively with the staff of the CDA Services and Resource Center now located at the Clearinghouse. Part of a project funded by the Administration for Children, Youth, and Families (HEW), the CDA Center will be retrieving and disseminating information useful to persons involved in Child Development Associate Training, a competency-based program for training child care workers in Head Start, nursery, and day care programs. For more information contact:

Ms. Lela Jones
CDA Project Manager
ERIC Clearinghouse on Early Childhood Education
College of Education
University of Illinois
805 West Pennsylvania Avenue
Urbana, Illinois 61801

E. Microfiche of Popular IAP Planned

Last year the ERIC Clearinghouse on Early Childhood Education produced on microfiche an Information Analysis Product entitled "Parents as Teachers of Young Children: An Evaluative Review of Some Contemporary Concepts and Programs". A printed summary of the paper accompanied the microfiche. The demand for this IAP was greater than originally anticipated and another IAP in microfiche format is planned for this year.

...Linda Baskin (PS)

F. Directory of Early Childhood Training Programs in U.S. Colleges in Preparation

The ERIC Clearinghouse on Early Childhood Education is preparing a directory of early childhood training programs in U.S. colleges, (both 2-year and 4-year) universities, and technical schools. The directory will be published in 1979 by the National Association for the Education of Young Children.

...Dianne Rothenberg (PS)

G. ERIC/SMEAC Working on Energy and EPA Projects

The ERIC Clearinghouse for Science, Mathematics, and Environmental Education is working with the Energy and Education Action Center (US)E to develop question answering capacity and processing of documents related to energy education. Anyone with questions may contact Dr. Robert Howe.

The Clearinghouse is also working in cooperation with the ERIC Clearinghouse on Educational Management, on an energy publication for schools.

The Clearinghouse is also working with the ERIC Clearinghouse on Information Resources to help develop media guidelines for the EPA project.

H. New IAP Available

The ERIC Clearinghouse for Science, Mathematics, and Environmental Education has a new Information Analysis Product available entitled, *Multidisciplinary Wildlife Teaching Activities*. The price of this publication is \$3.00 and is available from:

SMEAC Information Reference Center
1200 Chambers Road, Room 310
Columbus, Ohio 43212

...Bev Malcolm (SE)

I. New ERIC/ChESS Publication

The second edition of the *Directory of Social Studies/Social Science Service Organizations* is now available. The first edition, published in 1975, contained descriptions of 111 organizations. The current edition describes 213 organizations closely related to social studies/social science education providing information related to types of services, grade levels, subject area, publications, purpose, and current projects. The *Directory* is cross-referenced by organization directors, geographic areas served, grade levels, services, and subject areas. Names and addresses of publishers of curriculum materials is also included.

...Regina McCormick (SO)

J. Ninth Annual AERA Paper Collection Activity

The ERIC Clearinghouse on Tests, Measurement, and Evaluation, in association with the American Education Research Association, will solicit all presentations at the annual meeting, April 8-12, 1979. Papers not in TM's scope will be transferred to the appropriate Clearinghouse, by the ERIC Facility, as in the past. We anticipate receipt of 1,000 papers for 1979. Last year's collection totaled 975 papers. The first solicitations will be mailed six weeks before the meeting, March 1st. Follow-up notices will go out three weeks later on March 25th.

...Barbara Hunt (TM)

K. UD Working with the Division of Practice Improvements at NIE

The ERIC Clearinghouse on Urban Education has been cooperating with the Division of Practice Improvements at the National Institute of Education in establishing an agenda for disseminating information for improving educational practice in urban schools. The staff has met with Ms. Marion Fahey, former school superintendent in Boston, Massachusetts, who is acting as consultant to NIE/DIP on this project.

L. UD Preparing Update of ERIC References on Urban and Minority Education

The ERIC Clearinghouse on Urban Education is currently preparing an annual update of *ERIC References on Urban and Minority Education*. In the past, Clearinghouse staff made all the selections of RIE input for citation in the bibliography. If, however, staff of other Clearinghouses feel that they have input particularly important documents, or the Clearinghouse itself has developed an IAP on urban and minority education, please send the citation(s) to Mr. Robert Vivolo at ERIC/UD. It will seriously be considered for inclusion.

...Erwin Flaxman (UD)

MEMORANDUM

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
NATIONAL INSTITUTE OF EDUCATION

TO : All Clearinghouse Directors and
Staff Members

DATE: AUG 11 1978

FROM : Del Trester *Del*
Central ERIC

SUBJECT: History of ERIC

There is a good possibility--although it has not been officially approved--that I will write the History of ERIC.

Can I get some help from you? You will immediately assume that some of the information I want already exists in Central ERIC. Uh huh. But even if some of the first portion of it does, I would like confirmation. And I'm sure I don't have all the specific dates.

Part one is relatively easy--at least for most clearinghouses. Not IR, not CE, not EA, and maybe not a few others:

1. Clearinghouse start-up date, including all changes and dates of host institutions;
2. Directors and their period of incumbency;
3. Clearinghouse name changes, with dates.

Part two is a kind of self interview--by a director or anyone else in the clearinghouse who wants to do it. This self interview--preferably written, but tape cassettes are OK--can be on any or all of the following points of discussion:

1. Attitudes, opinions, interests, of the host institutional representatives, through the years, toward ERIC and the ERIC clearinghouses;
2. Attitudes, impressions, of directors' meetings, technical meetings, and other special meetings, such as annual review sessions. The good and the bad, please;
3. Attitudes, impressions, toward Central ERIC (throughout the history of ERIC) or problems you've had with Central ERIC. (How can you pass up such a golden opportunity?)

4. Discuss the "field office syndrome." That is, what are your thoughts and attitudes as well as practical problems you've encountered in a decentralized information system?
5. What results, what problems, have you had trying to serve the information needs of your subject-interest clientele?
6. What are your impressions of professional organizations attitudes toward ERIC?
7. What is your one strongest criticism of ERIC? (In the history I can always say: "One director felt that . . .")
8. What is your one strongest plaudit for ERIC?
9. What would be one or two suggestions you have for the future direction of ERIC? To make it stronger, more effective?
10. Are there any inside jokes, stories, embarrassing situations, or other levities you would like to suggest for the history? This will be your opportunity to help people struggle through my prolixities!
11. Any other topic you'd like to discuss.

I should level with you and tell you the history will be primarily told from a Central ERIC, or system, point of view and emphasis. The reasons for that, I think, are obvious. I do not plan to relate the entire background, history, of each clearinghouse or contractor.

Please reply around September 30, (1978), and send your statements to:

Del Trester
10312 Wilde Lake Terrace
Columbia, Maryland 21044

DIP HAPPENINGS

The new publisher of *Current Index to Journals in Education* (CIJE) is Oryx Press of Phoenix, Arizona. The project director is Ms. Phyllis Steckler, President of Oryx Press. Kit Welsh knows everything else you want to know about them.

Tuesday, January 16, 11:00 a.m., Room 823 B, Dr. James Comer, Yale University will describe a practice improvement strategy being tested with promising results in Connecticut. It will involve joint activity between the University of Connecticut Education Administrative Program, a mental health team from his center at Yale, and elementary and junior high schools serving disadvantaged kids. Some of the development demonstration work has been supported through grants from the Minority Mental Health Center, NIMH.

February 26-28, 1979, Chase Park Plaza, St. Louis. Technical Assistance and Evaluation Feedback Workshop: State Capacity Building in Dissemination. For more information see John Egermeir or John Coulson.

Minorities and Women's grant review process commences with the reviewers' orientation, Sunday, evening, January 14, and runs through January 19. The week of January 22 will be spent on the evaluation of the top proposals. Reviewers for both weeks represent diverse ethnic and language groups. They come from all across the nation and are engaged in education at universities, foundations and other research-oriented organizations. A total of 163 proposals was received.

The indications of Equity in Dissemination conference is scheduled for February 22-23 at the Carnegie Center in Dupont Circle.

Dr. Ed DuCharme of the University of Vermont College of Education and Social Services visited NIE on January 3. He met with members of the REP staff to discuss issues related the IHE role in knowledge use for practice. Particularly, he focused on some of the actual new activities in Teacher education now engaged in by his faculty, which may have potential effects on practitioner use of research findings in the school improvement process. Dr. DuCharme is area chairperson for teacher training at the Vermont institution.

The contract for the minorities and Women programs evaluation was finally awarded. The contract is for one year at about 130K. Naida Bagenstos shepherded this one through both contracts and grants and the SBA (it went to Miranda and Associates, an 8A firm) amid much gnashing of teeth and painful delays. The first meeting was Wednesday. Congratulations Naida.

Mike Kane was in Thursday, January 5 at Abt's representative for the RDU evaluation contact and briefed REP and assorted others of us on the progress of that work. On Friday, January 6, he was here as the designee for the REP Assistant Director position. Mike will be on Board about January 25, at which time we'll publish more about him. Meanwhile, applause, applause for the magnificent job John Egermeier has done for these many months. John's staff and all of DIP are truly grateful. Thank you, Thank you, Thank you.

Marion Fahey has returned and is with us this week. She's been planning our urban involvement and just spent some time with Superintendent Hannon and his staff in Chicago. That meeting went very well, she says, and plans proceed apace to involve additional urban superintendents in a network to (excuse the expression) facilitate our interaction with urban districts. The Chicago folks were most enthusiastic about NIE's interest and the possibilities of our working together.

NIE NEWS

Volume 5 Number 1

January 10, 1979

WORKING GROUP COMPLETES PHASE ONE

Would you be surprised to hear that NIE's management information system (MIS) is in need of expansion and improvement? A special working group formed by the Management Committee thinks so, and has given NIE Director Pat Graham several recommendations about what should be done.

The group's primary recommendation is that an experienced consultant be hired to assist NIE staff in preparing detailed specifications for the development of a comprehensive, program-oriented MIS. Once those specifications are prepared, an RFP would be issued for a contractor to do the actual design, development and implementation work.

Because it may take two years to make the new system fully operational, the group also recommended a number of short-term improvements to the present system.

Since its formation last August, the working group has consulted with staff throughout the Institute to assess the various information needs, to determine the adequacy of the present system in meeting those needs, and to develop broad specifications for the new system. These

WORKING GROUP
COMPLETES PHASE ONE
(cont.)

specifications call for a Program Management Information System -- containing information on each program's plans, budgets, projects, and finances -- at the "heart" of the system. It is anticipated that several independent satellite systems will also be developed to provide mailing lists and information about consultants, travel plans, staffing, project outcomes, proposal tracking, and intramural research.

The working group plans to report back to senior management within three months on the results of the consultant's work. They wish to continue involving interested staff in the planning process, and would welcome additional reactions to their first report. Copies of the report may be obtained from the working group's chairperson, Jon Schaffarzick, in room 717-G.

DEPARTMENT OF
NATURAL HISTORY

Co-workers of EPO's Saul Yanofsky have long been aware that when it comes to raising plants, his spirit indeed is willing but his thumb is not green. However, they stopped laughing when he recently unveiled what he termed a real "horticultural triumph" -- a crop of exotic mushrooms he had cultivated in the carpet in his office. He hoped, he told them proudly, to harvest his crop in time to grace the EPO Christmas party.

Alas, it was not to be. Saul had to write the epitaph barely a week later: "The crack GSA fungicide unit deployed their resources and drowned my poor mushrooms in DDT."

Fortunately, the sad incident did not mar the Christmas festivities. And as for Saul, it's back to the old philodendron.

KING COMMEMORATION
TO BE HELD FRIDAY

The Third Annual Commemoration of the birthday of Martin Luther King, Jr. will be held Friday, January 12, 1979. Administrative leave will be authorized for all

employees who wish to attend the joint NIE-CSA program, which will be held in the Fine Arts Theater from 10:00 to noon.

Due to illness, Mrs. Rosa Parks will be unable to attend. She has been replaced as keynote speaker by Dr. James A. Joseph, Under Secretary of the Department of Interior. Dr. Joseph is the author of Modernizing the Liberal Arts and the co-author of Three Perspectives on Ethnicity. Dr. Joseph is also an ordained minister with the United Church of Christ. Delores Handy, news announcer for WTTG (Channel 5), will be the Mistress of Ceremonies.

There will be a reception in room 823 after the ceremony.

THE MICE ARE COMING!
THE MICE ARE COMING!

The poet Robert Burns once wrote that "the best laid schemes o' mice and men gang aft a-gley." He was obviously not acquainted with NIE's resident mice, whose plans to inhabit our building have not been going nearly as a-gley as they should. In fact, it appears they have taken to nesting in some of our couches. We are reminded once again that eating in the offices and keeping food in the desks only encourages this kind of thing. Meanwhile, watch where you sit. It could be occupied.

GOINGS-ON

Bill Spady of T&L's Teaching and Instruction unit has accepted a new position with the American Association of School Administrators (AASA) as an Associate Director of the Association and as Director of their National Center for the Improvement of Learning. Bill joined AASA on January 2. The best of luck to Bill in his new position.

NEW AWARDS

Project Title: The State of the Art in School Desegregation Research

Principal Investigator and Grantee: Willis D. Hawley, Center for
Education Policy, Duke University, Durham, NC

Project Officer and Office: Mary von Euler, Educational Policy and
Organization

Date: 01/01/79 to 09/30/79

Amount: \$15,600

Abstract: This project will develop two handbooks to provide judges, lawyers, journalists, educators, and others concerned with educational policy with a better understanding of what is known and now known about the effects of school desegregation. The volumes draw on the continuing work and expertise of the National Review Panel on School Desegregation Research. They will encourage the debunking of myths about desegregation that shape popular thinking and will foster more effective use of existing knowledge. In addition, these handbooks will provide important direction to research and will identify issues to which research might most profitably be addressed.

Project Title: The Learning of Discourse Rules by Culturally Different Children in First Grade Literacy Instruction

Principal Investigator(s) and Grantee: Johanna S. Deftefano and Harold B. Pepinsky, Ohio State University Research Foundation, Columbus, OH

Project Officer and Office: Marcia Whiteman, Teaching and Learning

Date: 01/01/79 to 06/30/80

Amount: \$59,865

Abstract: It is widely known that many children from minority and oral cultures have difficulty in becoming literate, a necessary set of skills for full participation in U.S. society. Consequently, they may become second class citizens. In order to find remedies to this unsuccessful acculturation and to ensure literacy, we need to research classroom language use during the first year of schooling, where foundations are laid for the subsequent fuller acquisition of literacy.

This study will investigate how children from various cultures in American society learn the rules of classroom discourse in literacy learning contexts. Video and audio tapes will be made of interactional language during literacy learning sessions in a first grade classroom in the Columbus, Ohio, public schools. Language data will be subjected to qualitative and quantitative discourse analysis. Independent measures of teacher attitudes and students' literacy learning will also be used.

From the results, we should be able to show how and to what extent minority culture children learn or fail to learn the rules of discourse important in literacy learning. Such findings would be of use to teachers who bear primary responsibility for helping these students become literate.

Project Title: A Review and Analysis of State and Local Minimum Competency Testing Programs

Principal Investigator and Grantee: William P. Gorth, National Evaluation System, Amherst, MA

Project Officer and Office: Judy Shoemaker, Teaching and Learning

Date: 12/15/78 to 12/14/79

Amount: \$193,704

Abstract: This study will review the status of State and local minimum competency testing programs, develop a typology of program types based

(continued)

-6-

on program characteristics, develop a series of program development guides using examples from the programs reviewed, and design an evaluation study of minimum competency testing programs. It will also provide information to help education decision-makers make informed choices about minimum competency testing and to provide some assistance to those who are faced with implementing such programs.

NIE NEWS is published by the Office of Publication Management and Administrative Services/Publication Branch for the NIE staff. If you would like to contribute information to the newsletter, call Diane Magarity on X45890.

I. CENTRAL ERIC ANNOUNCEMENTS

A. National Dissemination Forum

In response to several inquiries concerning the National Dissemination Forum, there are, at present, no plans to repeat this meeting this summer. However, there are some plans being made to hold local or regional meetings dealing with dissemination. Although the status of these plans is unknown, the RDx programs at SEDC and NWREL are involved in their areas. The Southeast and Northeast Consortiums are also a possibility, according to Ed Ellis. I suggest that Clearinghouses explore the activity in their areas and, to the extent possible, become involved in planning as well as conducting any regional dissemination meetings. We will let you know of more information as it becomes available.

B. Online ERIC Training Package

DIALOG File 201, a special training practice file for ERIC, is described briefly below. This file has been in existence for some time now, and we would appreciate knowing about Clearinghouse experience with using it. Someone may have some suggestions for the EAB concerning how to best use it.

ONTAP ERIC, special training and practice file

ONTAP (ONline Training And Practice) ERIC is a programmed instruction file, designed to provide an opportunity for low-cost training and practice in online searching. The 1975 ERIC database is the source of citations searchable in ONTAP ERIC. ONTAP ERIC allows the user to choose a practice search topic from 29 different questions ranging in complexity from simple to difficult. A special feature is provided by the use of the "EVAL" command, which produces an evaluation of the precision and recall of the search results obtained. If the evaluation indicates that more useful results can be obtained, the user can continue to modify the search until the desired level of precision and recall has been achieved.

\$1 per online connect hour, records not available
for printing offline **File 201**

C. EPA's ERIC

A number of Clearinghouses and individuals have called to our attention the Environmental Protection Agency's operation of the Environmental Research Information Center (ERIC) in Cincinnati. This "other ERIC" has caused some confusion among users.

Since ERIC has a registered trademark to protect us against such problems, we have been in touch with EPA through our Agency Council. We have been informed that EPA has instructed their ERIC to find another acronym. This action reinforces the importance of using the trademark symbol ® beside ERIC's block logo on all publications and stationary.

D. NIE Organization Charts, DIP Happenings, NIE News

Some information on NIE organization, as well as DIP personnel by program area, is presented in Attachment 1, DIP Happenings is Attachment 2; NIE News is Attachment 3.

...Bob Chesley

E. ERIC/EDRS Request for Proposal

The EDRS RFP was announced in the February 5 *Commerce Business Daily* with a bidders conference scheduled for February 21 and a closing date of March 5. The present EDRS contract ends on June 9.

...Jim Prevel

F. ERIC Directors Meeting

The ERIC Directors' Meeting will be held March 1-2, 1979 at the Seminary Road Ramada Inn, Alexandria, Virginia. Room reservations have been made for all out-of-town attendees. If for any reason it becomes necessary for you to change or cancel your reservation, please notify the hotel directly. The telephone number is (703) 751-4510.

...Frank Smardak

G. Michigan State Capacity Building Project

Central ERIC has learned that the Michigan State Capacity Building Project is working with the Michigan State Library to upgrade and expand the descriptors used for abstracts in *Educational Programs That Work*, since the current indexing is inadequate to permit the abstracts to be retrieved either manually or by computer. Because the Michigan people want to be able to include NDN resources in their Michigan Educational Resources Data Bank, they have undertaken the task of improving the indexing. The person directly responsible for this effort is Edith Jansen of the Michigan State Library.

You may recall that the Far West Laboratory for Educational Research and Development was planning to involve the ERIC Clearinghouses in the descriptor expansion effort. We understand that Far West has abandoned its plans after learning of the Michigan effort.

...Mildred Thorne

ii. Important CIJE Notice!

The Oryx Press announcement, which will appear in the February issue of RIE, is presented as Attachment 4. We hope you will make widespread use of it and the information it contains. The CIJE subscriber list is not available, so that it is impossible to notify those subscribers. They should request 1979 subscription money for March-December 1979 issues from: Macmillan Information, A Division of Macmillan Publishing Company, Inc., 866 Third Avenue, New York, New York 10022, Attention: Mr. David Biesel. At \$80 for 12 issues, the amount of the refund for 10 issues should be \$66.70. So that there will be no interruption in receiving CIJE, please resubscribe to: Oryx Press, 3930 Camelback Road, Phoenix, Arizona 85818, Attention: Ms. Phyllis Steckler.

Phyllis Steckler, President of Oryx Press, is sending notices to the 3,300 subscribers to RIE on how to resubscribe and to the approximately 900 Depository Libraries who get RIE directly from GPO. These should reach almost every CIJE subscriber. In addition we are depending on you, the 16 Clearinghouses, to include the information in all your appropriate publications or journal columns and to explain the matter at any workshops you hold. If you can think of any other ways to notify possible CIJE subscribers, please do. Also devise means, such as press-on labels, to cover Macmillan's name and substitute that of Oryx Press on all copies of *How To Use ERIC* that you distribute.

Macmillan has also notified Central ERIC that it intends to publish its own index to educational journals using the tape that is sold through the ERIC Facility, and that it will have the same format and appearance that it has had in the past. We believe that this can only cause confusion and difficulties for all concerned. Such a periodical would necessarily not be the same as CIJE in name, content, or time of publication. Current and potential subscribers should be made aware of this. It is imperative that we all make it as clearly and widely known as possible that CIJE, as published by Oryx Press, under contract with NIE is the official CIJE. It is the only journal which will contain all the information it has in the past such as a current Source Journal Index and the latest New Thesaurus Terms.

Let me know if you have questions about all this or if you receive some which you don't know how to answer.

...Kit Welsh

II. ERIC FACILITY ANNOUNCEMENTS

A. RIE Schedule for 1979

A detailed *RIE Master Schedule* for 1979 has been prepared and was distributed February 23. Some Clearinghouses have requested that

a short summary version be prepared as well. This has been done and a copy of the summary schedule for 1979 is reproduced here as Attachment 3.

B. ERIC Clearinghouse Columns in Professional Journals

Central ERIC has long encouraged the Clearinghouses to contribute regular information-oriented columns to professional journals, as one important way of reaching the user community. Clearinghouses have responded well to this admonition, but not much publicity has ever been given to the results. A recent survey has revealed that ERIC columns appear in some 60 journals. Attachment 6 is a display of this information organized alphabetically by Clearinghouse.

...Ted Brandhorst

C. Play Thesaurus/VIP Input

The first edition of the *Play Thesaurus (PT)* covers all VIP input through January 12. This includes 114 Clearinghouse DJF's, plus 45 from the Facility. Program problems encountered in processing these data delayed production until February 5. An excessively long USE reference (over 50 characters) and several extremely long messages in the new COMMENT field caused both the *Thesaurus* release system and the output program to "bomb." A programming modification has now been made to accommodate longer COMMENT field messages. However, the 50-character term limitation in the *Thesaurus* program cannot be by-passed for the PT, and longer terms in future PT input will have to be abbreviated.

The Facility wishes to thank all Clearinghouses for patience in awaiting the first *Play Thesaurus*. Barring other unforeseen technical problems, subsequent editions should be produced on schedule at regular 3-week intervals.

We wish to thank the Clearinghouses as well, for the steady flow of VIP input to date. This input through February totals 379 DJF's as follows:

CLEARINGHOUSE	INPUT	CLEARINGHOUSE	INPUT
CE	0	JC	48
CG	77	PS	15
CS	23	RC	10
EA	20	SE	8
EC	31	SO	48
FL	22	SP	29
HE	26	TM	5
IR	17	UD	0

...Jim Houston

D. Government (GOV) Status Field

Initial Clearinghouse input reveals a distressingly frequent misclassifying of contractor reports as Federal documents. Please note that contractor reports *per se* are *not* to be considered official Government documents. This field is intended to identify the *official* publications of Federal, state, and local government agencies; i.e., documents issued with the imprint of the agency involved. Contractor reports are usually issued by the contractor, not the sponsor, and they often contain specific notices disclaiming any official status. However, contractor reports of exceptional quality or interest may, on occasion, be published (or republished) under the agency imprint, in which case they should then (and only then) be considered government publications.

E. Repetitive Covers - Don't Throw Away Information

The RIE editors at the Facility have noticed that on occasion the Clearinghouses, in discarding a cover that may be repetitive of a Title Page, discard a cover that actually contains information not on the Title Page, e.g., contract data, report number data, sponsor data, etc.

Please remember that covers are only to be discarded if they are identical to title pages or if they contain a subset of the Title Page information. Do not throw them away if they contain additional information. The information lost in this way can sometimes be crucial in the decision relating to Government Status and Geographic origin, as well as to other cataloging data elements. If in doubt, simply "X" the page through, indicating you don't think it should be filmed. This provides flexibility without potential information loss.

F. Variety is Not Necessarily the Spice of Life

The documents heading for RIE come from sixteen different Clearinghouses. Within each Clearinghouse the data to be announced and stored on magnetic tape pass through many hands before they are complete. Variation seems to be one of the prices a decentralized network must pay.

The Facility editors attempt to keep this variation within bounds. On occasion in these pages, the editors intend to call your attention to recurring problems they have noticed, which, if avoided, would help reduce the editorial workload.

Personal Author Field

Incorrect: Smith, John, and Others
Smith, John, And others
Smith, John, and others.

Correct: Smith, John, And Others

Report Number Field

Incorrect: DHEW - Publication No. - (ADM) - 78 - 485

Correct: DHEW-ADM-78-485

Contract Number Field

Incorrect: NIE-400-78-0070

Correct: 400-78-0070

Geographic Source Field

Incorrect: U.S.; Washington, D.C.

Correct: U.S.; District of Columbia

Descriptive Note Field

Please note how other ED accession numbers should be written when they are referred to as "related documents."

Incorrect: ED140204
ED 140,204
ED-140-204.

Correct: ED 140 204

Do not list each number in a series of sequential numbers.

Incorrect: ED 140 204, 205, 206, 207, and 208

Correct: ED 140 204-208

...Lee Schreiber

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Receives Publicity from School Shop

School Shop magazine recently contained publicity in the Reader's Service section on the information analysis papers prepared by the ERIC Clearinghouse on Adult, Career, and Vocational Education. As a result, the reader merely circles a number to request additional information. Upon receipt of a reader's request, a self-addressed label is prepared at *School Shop* and

forwarded to ERIC/CE, all at no cost to the Clearinghouse. *School Shop* even provides a carbon of the label for ERIC/CE records.

ERIC/CE is carefully monitoring some of the marketing techniques used with the information analysis papers. Sales records are being observed preceding and following the mass mailing of newsletters.

...Marla Peterson (CE)

B. SOC Workshops

Information about participants at the first three ERIC workshops for standing order customers (SOC's) has just been compiled and analyzed. For the Alexandria, St. Paul, and Ann Arbor workshops, eighty-three SOC's were invited and fifty-two (62%) attended. The participation rate would have been higher if it were not for a snow storm in Ann Arbor.

Almost all (forty-eight) of the SOC representatives described their organizations on Workshop Guide forms. A profile of those SOC's was then developed from that information. The forty-eight SOC participants represented libraries at thirty-two colleges, six school systems, four state agencies, four federal agencies, and two other organizations.

Highlights of the SOC profile include:

1. Pre-Workshop Questions

SOC's frequently wanted to learn about developments at ERIC, materials for user training, improving searching, and document processing.

2. Suggestions for ERIC

SOC's frequently suggested that ERIC improve quality control with microfiche, provide dummy fiche for Level III documents, update the *Thesaurus* and use index terms consistently.

3. ERIC-Related Services

More than half of the SOC's provide reference assistance, manual or computer searching, duplication of microfiche, and circulation of microfiche.

4. Data Bases

In addition to ERIC, SOC's most frequently searched *Psychological Abstracts* and *Exceptional Child Abstracts*.

5. ERIC Users

The SOC's estimated an average of 7,900 ERIC users per year per SOC. Half of the users were college students.

6. User Orientation

The SOC's prepared approximately 860 persons per year per SOC to use ERIC materials, primarily through general library orientation, one-on-one training, and class presentations.

7. Workshop Evaluation

The most *positively* perceived aspects of the workshop were:

- a. Interactions with others in similar jobs.
- b. Information on ERIC and especially Clearinghouse services.
- c. Knowledgeable and friendly workshop staff.
- d. Handout materials.

The most *negatively* perceived aspects of the workshop were:

- a. Too little time or opportunity for discussion.
- b. Overly general or basic presentations.

A progress report on the workshops will be presented at the ERIC Directors' Meeting to aid Clearinghouses in their preparation for forthcoming workshops.

...Nevin Robbins (CE)

C. CG Announces the Counselor Renewal System (CRS)

Newly available from the ERIC Clearinghouse on Counseling and Personnel Services is the Counselor Renewal System (CRS) developed by CAPS in collaboration with the American School Counselor Association (ASCA) and targeted to practicing counselors. Intended to help them update old skills or develop new ones, CRS can be used by an individual working alone, in small self-directed groups, or in structured groups with a facilitator.

The first part of CRS contains a Needs Prioritization Instrument (NPI) through which a counselor can ascertain areas in which more information would prove helpful. The second part contains an extensive ERIC reference section, keyed to topical areas covered

by the NPI. CRS includes, additionally, a cross-index to the documents, sections on Continuing the Renewal Process, Accessioning ERIC, a bibliography of the materials cited, and finally The Microfiche File, containing fifty-four ERIC documents.

CRS is a "one-stop" renewal program, in loose-leaf form, designed as a versatile, transportable, desk-top reference, ready to go wherever it is needed. It is anticipated that this valuable tool can be used in all K-12 school settings. It will be on sale from CAPS.

...Carol Jaslow (CG)

D. Coordinator of User Services Asked to Present Session

In December 1978, the Coordinator of User Services was asked to present a session on computer assisted information retrieval and evaluation and use of information at a workshop in information resources for educators sponsored by the Appalachian Educational Laboratory Regional Exchange.

E. State File Development and Resource Center Management Conference

A two-day conference on State File Development and Resource Center Management, sponsored by the ERIC Clearinghouse on Reading and Communication Skills, the ERIC Clearinghouse on Early Childhood Education, and the Regional Exchange at CEMRL was held at the University Inn in Champaign-Urbana, Illinois.

Some of the session topics included:

- Proliferation and Duplication of Files;
- Starting up a State File;
- Budgeting Concerns;
- Staffing Concerns;
- Building Interpersonal Relationships;
- Newsletter Design and Development;
- Copyright Law and Dissemination Centers;
- What Goes into an Information Packet;
- Whether or Not to Automate Files;
- Comparisons of Search Strategies; and
- Workshop Design and Development.

While the snowy weather prevented full attendance of state department of education heads, state capacity building directors, regional exchanges, and other resource center personnel, the workshop still had an attendance of forty. Session presenters included: Chuck Hoover, Wayne Pyron, Kathy Clay, John Peterson, Loretta Harmatuck, Mary Jo Bruett, Dick Brickley, Carol Reisinger, Maxine Fitzgerald, and others.

...Holly O'Donnell (CS)

F. Promoting The Best of the Best of ERIC is Big Business

Of the information analysis products produced by the ERIC Clearinghouse on Educational Management, none takes more time, money, and energy than *The Best of the Best of ERIC*. The creation of one of these volumes is a major investment. Volume 2, published in January 1979, consumed nearly 1,000 hours for writing, editing, and typesetting and cost nearly \$4,000 to print.

We want to realize the benefits of this investment by making sure the book is widely distributed. This requires promotion---lots of it.

To begin with, we printed 80,000 flyers. The bulk of these (70,000) were shipped to four professional associations that had agreed to include the flyers in bulk mailings to their members. All but one of these organizations provided this service without cost to the Clearinghouse, because we supply them with copies of *The Best of ERIC* or other publications.

Another 2,500 flyers together with cover letters were sent to three categories of potential buyers---purchasers of Volume 1 (published in 1977), ERIC data base users, and a special mailing list of individuals who have shown interest in *The Best of ERIC*.

Flyers and cover letters were also sent to a select list of editors of professional journals that have cooperated with us in the past by announcing our publications to their readers. Similarly, letters and flyers were sent to the editors of state associations of elementary and secondary school principals and school boards.

A comparable promotional effort two years ago made the first volume of *The Best of the Best of ERIC* a financial success. We've raised our sights---and increased our printing run---for volume 2, and we do not expect to be disappointed.

...Stu Smith (EA)

G. EC Convenes Invisible College on Disruptive Youth

Eleven individuals, representing various disciplines and considered to be on the "cutting edge of knowledge," convened in Carmel, California on January 8 and 9, 1979. They constituted the Invisible College on Education's Responsibility for Disruptive, Alienated, and Incarcerated Youth.

Two major Clearinghouse publications (IAP's) will be produced based on the presentations and discussions. One will be a tape album containing six 60" cassettes of edited excerpts from the presentations and discussions recorded on site. The other will be a book with chapters based on the individual topics presented by the College participants, but revised and further developed for a print publication.

Dr. Rosemary C. Sarri, Professor, Social Work, University of Michigan, opened the Conference with her "State of the Art---The Contemporary Situation and Assessment of Where We Are." Other topic areas included:

- education for self-reliance;
- a perspective or view "from the inside;"
- youth rights and responsibilities;
- differential approaches to adolescent males and females;
- roles of basic, vocational, and special education;
- interventions with families;
- school based treatment programs in urban and rural areas;
- bilingual, bicultural programs; and
- alternative programs that transcend traditional programs for incarcerated youth.

These Clearinghouse products, edited by June B. Jordan and M. Angele Thomas, are scheduled for an August 1979 delivery. They will be published and distributed by The Council for Exceptional Children.

...June B. Jordan (EC)

H. FL Best Sellers

According to the latest figures from EDRS, more than 100 hardcopy issues of the following information analysis products from the ERIC Clearinghouse on Languages and Linguistics have been sold:

INFORMATION ANALYSIS PRODUCT	ED NUMBER	NUMBER OF COPIES SOLD
1. <i>Preparing and Using Self-Teaching Units for Foreign Languages</i> , by Gerald E. Logan	ED 098 808	369
2. <i>A Selected List of Instructional Materials for English as a Second Language: Secondary Level</i> , by Maybelle D. Marckwardt	ED 105 754	186
3. <i>A Selected List of Instructional Materials for English as a Second Language: Elementary Level</i> , by Maybelle D. Marckwardt	ED 105 753	182
4. <i>A Selected Bibliography on Bilingual/Bicultural Education</i> , by James W. Ney and Donella K. Eberle	ED 098 813	144

INFORMATION ANALYSIS PRODUCT	ED NUMBER	NUMBER OF COPIES SOLD
5. <i>Error Analysis in the Classroom</i> , by Patricia B. Powell	ED 104 161	131
6. <i>A Selected Bibliography on Language Teaching and Learning</i> , by Sophia Behrens and Kathleen McLane	ED 100 189	115
7. <i>Research with Cloze Procedure in Measuring the Proficiency of Non-Native Speakers of English</i> , by John W. Oller, Jr.	ED 104 154	102

In our new Language in Education series, which is sold by the Center for Applied Linguistics, our most popular products are:

INFORMATION ANALYSIS PRODUCT	ED NUMBER	NUMBER OF COPIES SOLD
1. <i>Current Approaches to the Teaching of Grammar in English as a Second Language</i> , by David M. Davidson	ED 154 620	1,335
2. <i>Directory of Foreign Language Service Organizations</i> , by Sophia Behrens	ED 153 503	647
3. <i>Code Switching and the Classroom Teacher</i> , by Guadalupe Valdes-Fallis	ED 153 506	297

I. ERIC/CLL Staff News

An article that was submitted to the *Modern Language Journal* under the auspices of the ERIC Clearinghouse on Languages and Linguistics has just received the Stephen A. Freeman Award. The award, given each year by the Northeast Conference for the best journal article geared to the practical needs of foreign language teachers, was won by Alice C. Omaggio, Associate Director of ERIC/CLL and Diane Birckbichler of the University of Illinois, for their article entitled "Diagnosing and Responding to Individual Learner Needs (number 60 in the CAL ERIC/CLL Series on Languages and Linguistics). The article appeared in the November 1978 issue of the *Modern Language Journal*.

...Sophia Behrens (FL)

J. IR at AECT Convention

A team from the ERIC Clearinghouse on Information Resources will present a series of workshops in New Orleans, Louisiana on March 5, 1979 at the annual meeting of the Association for Educational Communications and Technology (AECT). The team will take the ERIC display (with Caramate) and will use a new IR-produced three minute promotional slide/tape.

In addition to sessions on computerized information retrieval (with special reference to ERIC) and tutorials for ERIC users on both manual and computer searching, a final session will be devoted to specific problems ERIC users have encountered. Discussion, input from other participants, and the computer will be used in a group effort to locate some of those "needles in the haystack" that seem to elude normal search procedures.

K. New IAP from IR

In *Elementary and Secondary Teachers Use ERIC*, a new Information Analysis Product from the ERIC Clearinghouse on Information Resources, access to and users of the data base are described for three different types of public school systems: Dale Brown reports from Alexandria, Virginia; Patricia Mautino from the Oswego County BOCES in Mexico, New York; and Lewis Saks from East Detroit. The 42-page publication may be ordered prepaid as IR-29 (\$2.00 plus \$.50 or 10% of the total order for postage) from:

Syracuse University Printing Services
125 College Place
Syracuse, New York 13210

...Barb Minor (IR)

L. Major Speech

On February 3, 1979, Art Cohen spoke at the 65th Annual Meeting of the Association of American Colleges held in Washington, D.C. The topic of his speech was "The Humanities in the 80's: A Renewed Vision."

...Bonnie Sanchez (JC)

M. Multiple Data Base IAP

The ERIC Clearinghouse on Early Childhood Education has prepared an information analysis product that explores the process of searching multiple data bases. The topic, "Attachment and Children" was searched in seven data bases using the same free text strategy. The data bases were:

- ERIC,
- Exceptional Child Education Resources,
- MEDLINE,
- Psychological Abstracts,
- Sociological Abstracts,
- Social Science Citation Index, and
- AGRICOLA.

The IAP lists each citation and the data base(s) in which it appeared, giving the reader an idea of the overlap between data bases and of the kinds of materials in each.

The Introduction discusses some of the problems and considerations that arise in searching multiple data bases.

...Linda Baskin (PS)

N. ERIC Promotion

The ERIC Clearinghouse on Rural Education and Small Schools recently received a letter from the Association of Experimental Education that was extremely complimentary of ERIC promotional materials.

"There is a lot of information in the little brochure you sent me...Your ERIC literature is MUCH improved over the material I've seen and used heretofore. It's been totally re-vamped. I'd like to send packets on what you sent to me to each new AEE member. Perhaps this is too much to ask. The publication lists and the brochure on submitting documents to ERIC would be the most vital."

We didn't think it was "too much to ask"! We are now letting the AEE Office disseminate our promotional materials for us. Included in the packets sent to the office were the following:

- a role sheet,
- a general publications list for ERIC/CRESS,
- a poster, describing ERIC and ERIC/CRESS,
- a scope sheet,
- the "Submitting Documents to ERIC" brochure,
- a mail list subscription form, and
- an Outdoor Mini Bib.

...Judi Conrad (RC)

O. Clearinghouse Visitor

Richard Chabran received a special introduction to the ERIC system, and the ERIC Clearinghouse on Rural Education and Small Schools in particular, the week of January 22-26, 1979. Mr. Chabran

is the project manager of the newly formed "Hispanic Information Project," which is sponsored by the National Chicano Network.

Mr. Chabran was provided a first-hand view of a decentralized information system at work. Mrs. Betty Rose Rios, who was a participant in the organizational meeting of the "Hispanic Information Project," provided training in acquisitions, selection, indexing, and abstracting.

Miss Manuela Quezada, Mexican American and Migrant Information Specialist at ERIC/CRESS and Mr. Chabran collaborated on the preparation of a search guide for Mexican American documents in the ERIC system. The retrieval guide project is well on its way to completion and should be ready for distribution later this spring.

...Amelita Hill (RC)

P. ChESS-Developed ERIC Posters

By now each Clearinghouse should have received copies of the ERIC posters developed by ChESS. So far, I have received a number of letters which were very favorable toward the posters. Any comments or suggestions for change by either your Clearinghouse staff or clients would be appreciated. If you need additional copies of the posters, please let me know.

Q. Proposals for ERIC Workshops Have Been Approved

Two ERIC workshop proposals have been approved for two social studies conferences:

- Southeast Regional Social Studies Conference (Nashville);
- Rocky Mountain Regional Social Studies Conference (Denver).

The workshops are entitled "ERIC: One Answer to Educational Problem Solving." In addition to providing a brief survey of ERIC services and products, the three-hour workshops show how ERIC can be used as one resource to solving problems. A computer terminal will be available to search selected resources on each participant's individual problem.

...June Ramos (SO)

R. Completed Information Analysis Papers

A list of completed information analysis papers prepared by the ERIC Clearinghouse on Social Studies/Social Science Education is presented as part of Attachment 6.

...Frances Haley (SO)

S. SP Acquires Comprehensive Collection of Ralph W. Tyler Writings

A collection of approximately 500 documents (parts of books, monographs, journal articles, and unpublished papers) authored by Dr. Ralph W. Tyler has been acquired by the ERIC Clearinghouse on Teacher Education for consideration on an individual basis for RIE accession. In addition to use in RIE, the documents will be annotated and indexed to form one of the Clearinghouse Information Analysis Products. Dr. Tyler's half-century career in education has included roles in curriculum planning, evaluation, administration, and consulting. He is the author of *Basic Principles of Curriculum and Instruction*, the preeminent text in the field, is the former dean of the University of Chicago's Division of Social Sciences, and is director emeritus of the Center for Advanced Study in the Behavioral Sciences at Stanford, California.

T. SP Announces New Information Analysis Product

The ERIC Clearinghouse on Teacher Education announces a new Information Analysis Product entitled *Participant, Instructor, Planner: Perspectives on the Teacher's Role in Inservice Education*, by Iris M. Elfenbein. This information analysis product presents the personal observations of ten classroom teachers on inservice program models, incentives, planning and implementation, staffing, evaluating, research, and funding. The author augments these observations with supporting material from the literature and with summaries of the general thinking of the group on each topic. Suggestions drawn from the teachers and commentary indicate means by which inservice education can be made more relevant to the classroom teacher.

U. Bulletin Announcement Draws a Good Response

An announcement of free copies of the new "How To Use ERIC," made in the last ERIC/SP Quarterly Information Bulletin, resulted in a rush of orders which is still continuing. The announcement advised readers that up to ten copies were available free from the ERIC Clearinghouse on Teacher Education; for larger orders, they were referred to the ERIC Facility.

During the two-week period of January 17-30, sixty-four requests for the total of 550 copies were received. Most of the replies to the announcement came from higher education libraries (41) and heads of departments (13); smaller numbers of requests came from higher education faculty, staff support projects, teacher centers, and secondary school librarians.

...Mike Butler (SP)

V. TM Symposium

During the 1979 annual meeting of the National Council on Measurement in Education (NCME) in San Francisco, California (April 8-12, 1979), the ERIC Clearinghouse on Tests, Measurement, and Evaluation will sponsor a symposium called *Implications for Minority Groups of the Movement Toward Minimum-Competency Testing*. Participants will include:

- Robert A. Feldmesser
(Educational Testing Service,
Princeton, New Jersey);
- A. Graham Down
(Council for Basic Education,
Washington, D.C.);
- Ronald H. Lewis
(Plainfield School System,
Plainfield, New Jersey);
- M. Hayes Mizell
(American Friends Service Committee,
Washington, D.C.); and
- Hugh J. Scott
(Hunter College
New York, New York).

ERIC/TM will produce an Information Analysis Product on the issues raised during the symposium.

...Barbara Hunt (TM)

U. Urban Education Meets With Social Responsibilities Roundtable

During the midwinter meeting of the American Library Association (Washington, D.C., January 7-12, 1979), Dr. Jerome Wright, Assistant Director of the ERIC Clearinghouse on Urban Education, met with members of the Social Responsibilities Roundtable (SRRT) to orient them to the ways in which the ERIC system and UD can support SRRT objectives. SRRT is the arm of ALA most concerned with social issues and social action in the field of librarianship and library services.

...Erwin Flaxman (UD)

To the ERIC network:

My apologies for the lateness of this issue of the *ERIC Administrative Bulletin*, but its delay was attributable to a combination of my illness, the increased size of this issue, and Washington's "Blizzard of '79". I hope this hasn't caused you any inconvenience.

...Liz Pugh

NIE NEWS

LAB AND CENTER PANEL REPORT GOES TO CONGRESS

The final report of the Panel for the Review of Laboratory and Center Operations was forwarded to the Congress by NIE Director Pat Graham on Monday, January 15. The Congressionally mandated report -- "Research and Development Centers and Regional Educational Laboratories: Stabilizing and Strengthening a National Resource" -- presents the results of the panel's year-long examination of lab and center operations.

In her letter transmitting the report to the Congress, Pat praised panel members for their "dedication, care, and effort . . . Their analyses have been extremely helpful to the Institute in its work with the laboratories and centers."

The panel endorsed the concept of the labs and centers in its report and affirmed the importance of maintaining and improving the stability and quality of the existing institutions. The panel also endorsed the fundamental distinctions in purpose between labs and centers, attributed weaknesses in their work to be at least partially the result of Federal policies for their support, and commended NIE for its progress in developing new and responsive policies and procedures for these institutions.

The panel made specific recommendations about the continued support of each of the 17 labs and centers. Additionally, the panel put forth 21 recommendations concerning NIE's relationship with these institutions and the special importance of dissemination and equality of educational opportunity. These recommendations encompass, among other things, the nature and duration of NIE's financial commitment to

the labs and centers, the means of assuring accountability and quality, and the ways in which lab and center priorities are determined.

announce decisions

In her letter to the Congress, Pat said, she will announce decisions about the establishment of long-term agreements between NIE and the labs and centers on February 16. She also noted that NIE has already implemented "certain important policies and procedures dealing with management of NIE's relationship with the laboratories and centers," including creation of a coordinative staff unit in the Director's office and assignment of an institutional monitor for each lab and center.

The panel's next major activity will be the development of recommendations for the support of new labs and centers so as to provide nationwide coverage of R&D services. The report on this aspect of the panel's work, as well as further examination of the issues of dissemination and equality of educational opportunity, is to be completed by September 30, 1979.

Copies of the panel's final report will be available after March 1, in room 816W. For further information, contact Grady McGonagill on X45306.

VERA BROWN'S 3RD SEMINAR

Robert Wood, Superintendent of the Boston Public Schools, is the next speaker in the Vera Brown Memorial Seminar Series. Dr. Wood will discuss the role of the school superintendent in a major urban school system next Thursday (January 25) at 3:30 in room 823. NIE staff and their guests are welcome to attend.

NIE Form 206, "Cigarette Smoking Among Teenagers" was approved by the Office of Management and Budget (OMB) on January 3.

The form will be used by NIE and its contractor, Chilton Research Services, Inc., to conduct a two-part survey of smoking habits. The first part will encompass the smoking behavior, attitudes, and demographics of persons aged 12-19. The second part will be a retrospective survey of adolescents, who were surveyed in 1974 at ages 12-18, to determine their current smoking behavior and to correlate data on this with the earlier data collected.

For more information, contact Ann Milne on X4555.

Copies of Funding Opportunities at NIE, the booklet listing planned RFBs and grant competitions during the current fiscal year, have been distributed to each program office. Additional copies are available from Publications, room 676.

FY '80 BUDGET:
\$98.3 MILLION

The President's FY 1980 budget request includes \$98.3 million for NIE - a \$1.5 million increase over current appropriations for NIE and the recently transferred National Assessment of Educational Progress.

The proposed budget provides \$41.6 million for Teaching and Learning (including \$4 million for the National Assessment); \$25 million for Dissemination and Improvement of Practice; \$17.6 million for Educational Policy and Organization; and \$14.1 million for program direction and administration.

In a Tuesday morning briefing for more than 40 educational association leaders, NIE Director Pat Graham explained that the Institute will focus its efforts in 1980 on two central questions: "How do we best raise levels of literacy, and what makes a good school?" These themes, she said, are reflected throughout each program.

In FY 1980, Teaching and Learning will focus on literacy in its broadest sense - mastery of such fundamental skills as reading, writing, and mathematics. Because

literacy problems are particularly severe among the poor, Black, Hispanic, and other minority populations, this focus on literacy also addresses NIE's fundamental goal of increasing educational equity.

Dissemination and Improvement of Practice will concentrate on three primary areas: A regional grants program will fund the development of innovative approaches for applying research to regional problems; New ERIC files will be created that focus specifically on effective means of improving teaching and administrative practices; and the program to increase minority and women's involvement in educational research will be strengthened.

Educational Policy and Organization will initiate new work to identify successful practices in the organization and management of schools. It will also support research on: various aspects of desegregation, including effective school and classroom integration programs; the impact of legal and governmental decisions on education; the role of families and communities in education; and the management and organization of postsecondary institutions.

HIGHLIGHTS OF THE CIVIL SERVICE REFORM ACT

Public Law 95-454, better known as the "Civil Service Reform Act of 1978" became effective on January 11. This act should bring about some of the most comprehensive changes in the Federal Civil Service since the turn of the century.

Most of the provisions listed under the Civil Service Reform Act will become effective immediately. These include: creation of an Office of Personnel Management and a Merit Systems Protection Board to replace the Civil Service Commission; establishment of the Federal Labor Relations Authority to administer union-management relations programs; authorization for the Equal Employment Opportunity Commission to assume leadership and enforcement of provisions of the Civil Rights Act affecting

the Federal government; establishment by law of certain merit system principles and prohibited personnel practices; and changes in representation rights for unions and employees, additional benefits for disabled veterans, and changes in the Intergovernmental Mobility Program (IPA).

Other provisions of the act will be phased in over the next two years, including: establishment of a Senior Executive Service to replace "supergrade" positions; establishment of a new "merit pay" system for supervisors and managers in grades 13 through 15; introduction of a trial period for new managers and supervisors; and revisions to the employee appraisal system to make it more meaningful.

During the next several weeks, NIE's Personnel and Management Analysis Division will be conducting briefings on the provisions of the act. NIE staff will be notified regarding times and places.

The NIE-sponsored R&D Exchange has a new RRS Mini-List pamphlet. The small, colorful pamphlet describes a number of organizations that provide information and technical assistance on competency-based high school graduation requirements. Copies are available from Mildred Thorne in room 643.

* * *

Welcome aboard to . . .

Michael Kane, formerly with ABT Associates, Inc., has joined DIP as the Assistant Director for Research and Educational Practice.

**NAVY DRAFTS NIE IN
LITERACY EFFORT**

NIE Director Pat Graham and Department of the Navy officials last week signed a memorandum of understanding establishing a joint research and development project to assist new recruits in the transition from school to a career in the Navy. The action is an effort on the part of the Navy to help the 10 percent of its recruits who cannot read or compute well enough to enjoy a successful Navy career.

The NIE-Navy project will be based on NIE's Experience-Based Career Education (EBCE) Program. The project will assist recruits in developing an awareness of Navy life, and will include a computer-assisted basic skills program that teaches job-related literacy and mathematics skills. As part of the agreement, NIE will also be evaluating the Navy's entire training program, with a view to cutting costs, using the recruits' best capabilities, and encouraging them to remain in the Navy.

Project Title: Development of Handbooks for Response to Educational Needs Project

**Principal Investigator and Grantee: Rudolph V. Wiggins,
Lawrence Johnson
& Associates, Inc., Washington, DC**

Project Officer and Office: Cheryl G. Berry, Teaching and Learning

Date: 01/22/79 to 08/21/79

Amount: \$34,250

Abstract: This project will develop handbooks for the Response to Educational Needs Project (RENP) to provide users with information and guidance necessary to implement RENP. The documents are intended to: describe the purpose, goals, objectives, and underlying principles of RENP; discuss implementation issues and activities such as cost, benefits, potential problems, staffing requirements, methods of obtaining necessary cooperation from teachers and administrators, and formative evaluation requirements; set forth the underlying principles of the staff development approach, RENP staff development strategies, and training activities, for both reading and mathematics; provide guidelines, techniques, and procedures for involving parents and the community; identify and explain the management and administration of RENP; and disseminate this information about RENP to LEAs, SEAs, teacher/training institutions, and similar appropriate agencies or organizations.

DIP HAPPENINGS

This material has been excerpted and paraphrased from DIP Newsletters.

From the DIP Newsletter dated January 18, 1979

1. John Minor will react to a discussion of Urban Education for the 45 EPFP Fellows. Bernie Watson, Vice President of Temple University will be present. The meeting will be January 30, 12-2 at ESS Headquarters.
2. The next planning meeting of the Southeast Consortium will be in Montgomery, Alabama on January 19. The keynote speaker will be Alabama's new Governor, David Matthews, former secretary of HEW, who will deliver a major address. Wayne Teague is the principal investigator for the Consortia.

3. Important Meetings

January 24, 1979: Federal World of Education Research

Thomas Glennan, former Director, NIE, Gary McDaniels, BEH, USOE, and Jerry Roschwalb, Director, Government Relations for Higher Education, National Association of States Universities and Land-Grant Colleges.

10:30 - 12:00 - IEL, Conference Room

Contact Daina Jansons at 676-5940 to see if space is available.

January 25, 1979: How (or Do) Policymakers Use Education Research?

Chris Cross, Moderator, Mike Smith and Checker Finn.

2:15 - 3:30 - Gold Room 2168, Rayburn Bldg.

Part of WPS for AERA. If you are interested in attending, please contact Daina Jansons, 676-5940 to see if space is available.

January 25, 1979: Vera Brown Memorial Seminar Series, NIE

Robert Wood, Superintendent, Boston Schools

3:30 - 5:00 - Room 823, Brown Bldg., 1200 19th St., NW

It is my understanding that Fellows can attend the Seminar.

January 26, 1979: What's Ahead for NIE?

Patricia A. Graham, Director, NIE

10:45 - 11:45 - IEL, Conference Room.

Contact Daina Jansons at 676-5940 to see if space is available.

4. The Women's Research Team colloquia schedule is posted at FYI. The next session is on January 23. Dr. Constantina Safilios-Rothschild will speak on "Models of Sex Discrimination in Education."

5. As you know, the President announces his proposed budget for FY1980 this week. There will be a public briefing on the HEW budget at 12:00 noon on Saturday, January 20, to be followed by a briefing on the Education Division budget at 1:00. You are not required to attend these. NIE's briefing for the education associations will be at 10:00 on Tuesday morning, January 22.
6. The State Dissemination Leadership Program met very successfully at the Marriott last Friday. Their policy group agreed to begin to function as a way to inform States about total dissemination activities, not just isolated programs. For more information, call John Coulson (4-6507) of the Regional Program staff.
7. Regional Programs is having a two-day retreat and massive planning at the Shoreham Americana. The facilitator for the meeting is Bob Chin. Field participants include J. Schmink, Skip McCann, Virginia Cutter, and Martha Smith. Regional Programs staff and REP staff are to be congratulated on the thousands of hours of work that went into planning this meeting and in planning the future of Regional Programs. Congratulations also for Ed Ellis, Dick Elemdorf, Nancy Moore, John Egermeier, Ward Mason, Naida Bagenstos, Bob Ho, and Jacques Nacson, as well as other staff.
8. On January 25 Carol Reisinger (Illinois), Virginia Cutter (Texas, and Jackie Walsh (Alabama) conducted a session for our project managers. This session will be held in Room 823 from 9-1. This could be an exemplary example of field input and feed forward and reflects DIP's new attitude of recognizing how much we can learn from people out in the field with real life experience doing what we talk about.
9. The National Urban Coalition is sponsoring a conference with the theme "Restoring Confidence in Public Education." The conference will be held at the Sheraton and International Conference Center in Reston on January 24-26. The fee, no including room fee of \$85. Fees for one day attendees are \$30 for Wednesday, \$45 for Thursday, and \$30 for Friday. For more information, call Ms. Evelyn Armstrong at the Urban Coalition at 331-2400.

From the DIP Newsletter dated January 24, 1979

1. NIE Director, Patricia Albjerg Graham, held a briefing on President Carter's 1981 budget on Tuesday in Room 823. The budget for DIP was 25.0, no change from FY1979. Her text about us is reprinted below.

Dissemination and Improvement of Practice

Work in the Program for Dissemination and Improvement of Practice will help teachers and administrators apply the knowledge gained from research on good schools. Examples of activities include support for:

---a regional grants program to encourage the development of innovative approaches for using and applying research knowledge to help solve problems selected by regional officials. For example, urban schools might develop exchanges of urban education information.

---the creation of new files that focus specifically on effective means of improving teaching and administration for the system that compiles and abstracts information to make it more accessible to practitioners.

---the NIE program increase the participation of women and minorities in education research.

2. Chuck Hoover was here Monday and we were all delighted to see him. He has now gone to Champaign-Urbana to a meeting of 35 people from 10 different SEA's interested in file building. Chuck is presenting the keynote address, as part of ERIC's Technical Assistance Team. The Team attempts assistance to facilitate decision-making by SEA's based on the knowledge and experience gained over 12 years. There are three thrusts to the Team's work: overall policy issues, management areas, possible directions and alternatives; technical details of a system of management processes and procedures; documenting processing activities including indexing, abstracting, and document management. The approach is non-directive and consultative: the team works in a collaborative mode and upon occasion acts as a catalyst in attempting to provide options and alternatives which meet SEA requirements within actual or implied constraints.
3. QAMB is thinking about a program of small grants to help minority and women owned firms establish a track record of dealing with the Federal government. The money set aside will be about \$100,000 and the grants awarded between seven and nine thousand dollars each. What they need right now and importantly are suggestions from program people about what kinds of projects would be suitable for this size grant. This clearly addresses the Institute's commitment to equity in a way that matters (i.e., money). Call Richard Werksman, Ext. 47924 with ideas.
4. DIP, in collaboration with Milt Goldberg and Pierce Hammond has begun a series of meetings with 14 agencies and organizations to establish a working relationship and solicit input as to how best we in DIP can serve the constituencies they represent. CAPE and NASBE were in this week, soon to come are AASA. NAESP, NASSP, AFT, NEA, CCSSO and others too numerous to mention initially.
5. Michael Kane will be sworn in Friday as Assistant Director for REP.
6. NIE and Mort Bachrach have under study what should be the Institute's copyright policy. Much of the discussion is being framed in terms of which copyright policy will insure the widest dissemination of the work. We are the Institute's experts on dissemination and our input may be crucial to the eventual decision. Mort will be circulating his latest thinking for staff comment and it is necessary that we do too.
7. Coming up, NTS will have an evaluation briefing workshop for the State Dissemination Capacity Grants participants in Saint Louis, Missouri on February 26-28.

8. Jim Prevel, EDRS Contract Monitor, says the ERIC Document Reproduction Service contract (responsible for the production of 18 million fiche per year and over 3 million pages of hard copy) will end in June. The RFP for this contract will go public this month. The contract represents the major ERIC dissemination method.

From the DIP Newsletter dated February 1, 1979

1. Assistant Director Appointed for Program on Research and Education Practice. One of the last remaining senior staff positions in the Institute was filled on January 26, 1979, when Michael Kane was sworn in as Assistant Director for the Program on Research and Educational Practice in the Program on Dissemination and Improvement of Practice.

Michael Kane came to NIE from Abt Associates where he spent nearly six years conducting policy research for Education Division Agencies. Most recently he has served as Project Director for NIE's Study of the Research and Development Utilization Program. Prior to that he was Acting Project Director for NIE's Study of the Rural Experimental Schools Program. He has also been involved with the National Evaluation of the Follow Through Program.

Dr. Kane holds a doctorate in Educational Administration and Organizational Analysis from Teachers College, Columbia University as well as two Master's Degrees from Teachers College and a BA in Political Science from New York University.

Dr. Kane brings to NIE a diverse background in both research and practice at several levels of the educational enterprise: including local schools universities, private research organizations and Federal agencies. He has served in USOE as a Washington Intern in Education, at Teachers College as coordinator of both a research program and a graduate educational leadership program. He has also been affiliated with private schools and community action groups as a teacher and administrator. Dr. Kane is the author of a widely disseminated book directed to school based educational practitioners entitled Minorities in Textbooks: A Study of Their Treatment in Social Studies Texts. The unofficial word is that we think he will do very well on the basis of a piercing interview conducted at the annex. Welcome, Mike.

2. REP will be sponsoring a conference concerned with Equity in Information Dissemination on February 22-23 at the Carnegie Center (Dupont Circle). Participants will grapple with the issues inherent in developing programs to deal with "equity audiences" and developing indicators of equity in dissemination. DIP staff is invited---further details will be forthcoming soon. Naida Bagenstos is coordinating the effort.

From the DIP Newsletter dated February 1979

1. Important Meetings

February 13-14

Directors of Regional Service Programs are meeting in Washington, D.C. with Ed Ellis, NIE and representatives of higher education, SEA's and local education agencies, to discuss regional service programs.

February 14-15

A Communication Skills workshop for 40-50 people in the Virginia State Department will be conducted by the AEL-Rx. The workshop, held in Richmond, will focus on both written and verbal skills. An initial training session will be held on February 14 with a small group who will then co-facilitate the February 15 workshop.

February 20-25

The Special Educational Resources Conference will be held in San Antonio, Texas.

February 21-22

A meeting of the AEL-Rx Advisory Committee will be held in Jacksonville, Florida.

2. Southeast Consortium: A planning grant to the ten southeastern States is laying the foundation for long-term operation of the Southeastern Regional Consortium. The consortium will focus upon collaborative research and development activities designed to strengthen the effectiveness of education as a part of the larger social, economic, political, and ecological systems of the region. Under the leadership of Dr. Wayne Teague, CSSO in Alabama, a steering committee, supported by planning boards in each state, has met five times to determine organizational arrangements and establish program procedures and priorities. A special meeting of the steering committee, along with CSSO's from the ten States will be held in Washington in February. Members of the Congress and their staffs, and the Director of NIE have been invited to join them for breakfast on February 27, 1979.
3. Sue Klein shares with us a final report: Potential Working Relationships Between ESA's and the R&D Exchange, by Rae M. Levis of Wayne County Intermediate School District, one copy of which you will find in the rack in the reception area. Sue strongly recommends the report as useful for educational dissemination planners because of the careful attention Dr.

Levis gives to underlying dissemination issues. There are other copies available from Dr. Levis ((313) 326-9300), and she solicits your comments because she is contemplating revising the report for wider distribution. Thanks to Sue for disseminating this to our attention.

4. On February 22-23, REP will be sponsoring a conference concerned with Equity Issues in Dissemination Programs. The Conference will be held at the Carnegie Center on Dupont Circle. Formal paper presentations and prepared reactions will be followed by general discussions of the issues raised.

Your RIE companion
to professional
literature for education.

CJJE

**The Current Index to Journals in Education is
now available from The Oryx Press.**

CJJE is the monthly reference guide to periodical literature indexed and abstracted by the ERIC Clearinghouses in over 16 major educational subject areas

Over 750 publications indexed.

An average of 1,650 articles are indexed in every monthly issue—each under from three to seven subject headings. That's 20,000 articles a year!

CJJE includes a main entry section with annotations, and is indexed by subject, author, and journal title

CJJE saves educators valuable time.

Each monthly issue of CJJE brings together all of the current articles written in your field of interest or study. The interpretive summaries provide a rapid means of identifying the literature of importance to you

The CJJE Service includes:

■ Monthly Index—12 issues	\$ 75 00*
■ Monthly Index with Semiannual Cumulations	\$140 00*
■ Semiannual Cumulations	\$ 75 00*
■ Thesaurus of ERIC Descriptors—Eighth Edition	\$ 11 95*
Tentative publication date is December 1979	
■ ERIC RIE Educational Documents	
Abstracts and Index (two volumes)	\$ 75 00*
Per volume, if ordered separately	\$ 45 00*
*All prices plus postage and handling	

Have all of the current literature in education at your fingertips today
Order your CJJE Service by writing to The Oryx Press

ORYX PRESS
3030 East Camelback Road
Phoenix, Arizona 85018
(602) 956-6233

CJJE is published monthly by The Oryx Press in cooperation with the Educational Resources Information Center (ERIC) under a contract with the National Institute of Education, United States Department of Health, Education, and Welfare

RIE MASTER SCHEDULE

(Summary Version)

YEAR	ISSUE	WEEKS IN ISSUE	FINAL SHIPPING DATE		
			MONTH	DAY	
1979	April	4	January	19	
	May	5	February	23	
	June	4	March	23	
	July	4	April	20	
	August	5	May	25	
	September	4	June	22	
	October	4	July	20	
	November	5	August	24	
	December	4	September	21	
	1980	January	4	October	19
		February	4	November	16
		March	5	December	21
		52			

This summary of final shipping dates for each RIE issue is based on the complete RIE Master Schedule and all dates conform to those in that more complete display. The schedule closely resembles those for prior years. The February 1980 issue, which the Facility outputs across the Christmas/New Year's holidays, has been changed from a 5 week issue to a 4 week issue. The March 1980 issue, which the Clearinghouses input to across December has been made a 5 week issue in order to maintain its size across a period of generally lowered volume due to vacations.

3. ERIC Clearinghouse on Social Studies/Social Science Information

- a. *Teaching About Social Issues in American History: Four Demonstration Lessons.* Allan O. Knowslar. #230

This publication is a valuable resource for incorporating social issues into an American history course. Four demonstration lessons of controversial issues---the Bakke case, the proposed Equal Rights Amendment, the David Marston case, and recent activities of the American Nazi party---are used as models to demonstrate the application of critical-thinking skills to social issues.

- b. *Teaching and Learning About Science and Social Policy.* Kenneth D. Benne and Max Birnbaum. #233

Developed as a practical resource for teaching about science-related social issues, this paper provides specific curriculum and teaching suggestions in four areas: (1) Introduction to Learning About Science and Social Policy; (2) The Past, Present, and Future of Nuclear Energy; (3) Electronic Technology and the "Information Revolution," and (4) Altering the Biological Heredity of Human Beings and Other Life Forms. Related reading in the ERIC system are included.

- c. *Social Studies Materials and Resources Data Book Volume IV.* Judith Hedstrom and Frances Haley, editors. #234

The annual update for the three-volume DATA BOOK has a new look. Now is a paperbound volume it can either supplement your three-volume set or stand alone as a resource for the most current publications in social studies. In addition to 60, two-page analyses of new and innovative K-12 materials, it contains 20 shorter abstracts of teacher resource materials, 20 ERIC abstracts of curriculum guides, and a listing

of all social studies materials published in 1978 organized by subject. Four indexes for grade level, title, publishers, and subject area are provided.

- d. *What Can Children Learn in Geography? A Review of Research.* Marion J. Rice and Russell L. Cobb. #235

This monograph is the result of a collaborative effort by ERIC/ChESS and the NCGE Task Force on Elementary and Secondary Education. In addition to major sections devoted to review of studies of map-skill mastery and conceptual and analytical processes in children's geographic learning, the paper describes five anecdotal accounts---two originating in work of the 1920's, two from the 1960's, and one from the 1970's---which represent optimistic views of what young children can learn. Summaries of the content and sequence of eleven selected geography curriculum projects are presented in appendices.

- e. *Social Studies Teacher Education: Practices, Problems, and Recommendations.* Jan L. Tucker and William W. Joyce. #237

This paper is the result of a survey questionnaire, administered to selected social studies teacher training throughout the country. Respondents commented on eight specific areas: "back to basics," the shrinking job market, new content in social studies, multicultural education, exceptional students, competition with other school subjects, and competency-based teacher education. Trends, issues, needs and promising practices in each of the areas is discussed. The respondents' comments will be of special interest to both teacher educators and local and state administrators.

4. ERIC Clearinghouse on Teacher Education

- a. *Participant, Instructor, Planner: Perspectives on the Teacher's Role in Inservice Education.* Iris M. Elfenbein.

DOCUMENT REPRODUCTION SERVICE

P.O. Box 190 ARLINGTON, VIRGINIA 22210 • (703)841-1212

OPERATED BY: COMPUTER MICROFILM INTERNATIONAL, CORP.

January 25, 1979

Mr. Jim Prevel
National Institute of Education
1832 M Street, N.W.
Washington, DC 20208

Dear Jim: .

We have reviewed the RIEAUG78 Microfiche Inventory and Quality Check and the following is submitted.

1. The following documents will be refilmed:

151 582 1/1	152 231 1/1	152 388 1/2, 2/2	152 619 1/4, 2/4
151 656 1/1	152 257 1/1	152 422 1/5, 2/5	152 654 1/2
151 802 1/1	152 258 1/1	152 427 1/4	152 739 1/2, 2/2
151 946 5/8	152 259 1/1	152 481 1/2	152 740 2/2
152 015 1/1	152 260 1/1	152 485 1/2	152 817 1/2
152 049 2/2	152 261 1/1	152 495 1/2	152 822 1/2, 2/2
152 057 1/3	152 262 1/1	152 500 1/1	152 837 1/1
152 122 1/3	152 263 1/1	152 539 1/2, 2/2	152 863 1/1
152 126 6/7	152 264 1/1	152 541 3/3	152 889 1/2
152 183 3/4	152 265 1/1	152 543 1/1	152 900 2/7, 3/7, 6/7
152 214 4/4	152 385 1/1	152 568 2/2	152 907 4/6
152 230 1/2			

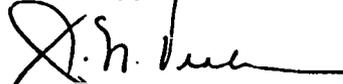

2. The following documents are not recommended for refilming:

<u>ED#</u>	<u>CLHSE.</u>	<u>LEVEL</u>	<u>RESUME NOTE</u>	<u>REASON FOR NOT REFILMING</u>
151 505	CE	1	None	Incomplete document was sent by Clearinghouse
151 569	CE	1	None	Document has thin, light and worn pages
151 579	CE	1	None	Document has thin characters, otherwise no problem found
151 742	CS	2	None	No problem found - page 49 does not overlap page 48
151 919	EA	2	None	Pages 2 and 3 are colored pages - disclaimer does show on each page
151 936	EA	2	Yes	Document has light and broken print on pages 84-88 and page 90
152 009	EC	1	Yes	Document is bad - pages 29/30, 31/32 and 33/34 were reproduced incorrectly
152 111	FL	2	Yes	Document is bad - pages 7, 27 and 29 were already cropped
152 301	IR	1	None	Document is bad - page 448 has light, broken, worn out print

2. (Cont.)

<u>ED#</u>	<u>CLHSE.</u>	<u>LEVEL</u>	<u>RESUME NOTE</u>	<u>REASON FOR NOT REFILMING</u>
152 768	SP	1	None	No problem found
152 873	UD	1	None	Document was hard to film - pages 3,4 and 5 are multicolored
152 888	UD	1	(Yes)	Document is bad - tables on pages 18/19, 20/21 are worn

Sincerely,

J. N. Veale
Director

ACTION ITEMS

As a result of the ERIC Directors' Meeting in Alexandria, Virginia on March 1-2, 1979, a new feature has been added to the *ERIC Administrative Bulletin*. So-called "Action Items," or items requiring special attention, will appear on the page following the Table of Contents to aid Clearinghouses in identifying those items which require special attention and/or action. When submitting articles for the EAB in the future, please indicate those items requiring special attention by the words ACTION ITEM at the top of the page. It is hoped this new page will be of value to you.

1. ERIC INFORMATION ANALYSIS PRODUCTS 1975-1977 (REMOVAL OF PAGE)

ERIC Information Analysis Products, 1975-1977 has been mailed to the ERIC Clearinghouses by the ERIC Facility in 210 copies each. This handsome publication is in the same format as RIE and should prove useful, informative, and easy to use. However, a page containing information about Macmillan publications was inadvertently included beside the CIJE announcement for Oryx Press and may prove confusing to users during this transitional period. Therefore, before distributing copies of this publication, please remove page 161-162. This action will also remove RIE subscription information, but because it appears each month in RIE and elsewhere, it is expendable. Thank you for making this extra effort.

...Kit Welsh (Central ERIC)

2. ERIC PROCESSING MANUAL REVISION

ERIC Clearinghouses were invited to make suggestions for revisions to the *ERIC Processing Manual* in the December issue of the *ERIC Administrative Bulletin*. Only two Clearinghouses responded by the date suggested (March 1). Clearinghouse input is needed for a thorough and orderly review of the present Manual. The response date has been, therefore, extended until April 9. Please address your suggestions to the ERIC Facility, Attention: Elizabeth Pugh.

...Jim Prevel (Central ERIC)

3. ANNOUNCEMENT OF INFORMATION ANALYSIS PRODUCTS IN THE EAB

The importance of Information Analysis Products (IAP's) was stressed at the ERIC Directors' Meeting in Alexandria, Virginia. Announcement of new IAP's is being made through the EAB. However, these announcements are arriving in a variety of formats. In order that each IAP receive uniform treatment, would you please submit your information either on the attached form (Attachment 1) or on a sheet of paper indicating title, author, price, date of publication, ED number, ordering instructions, and a short abstract.

...Elizabeth Pugh (ERIC Facility)

4. INCOMPLETE DOCUMENTS

Recently, several documents shipped by Clearinghouses for RIE announcement have been found to be incomplete as submitted. As part of document preparation, please be sure you have all the pages, including any continuations or separate

parts, the resultant defective microfiche often necessitates a great deal of nonproductive time and effort to correct.

...Murray Howder (ERIC Facility)

5. SOURCE CODES

During editing of the input for the March issue of *Resources in Education* (RIE), it was found that 64 (39%) of the 165 new organization names/codes requested by Clearinghouses already appeared in the *Source Directory* (or its supplements). Also, new names/codes cannot be generated when there is a lack of the necessary information about the source, its location, parent organization, etc. Please make an effort to supply as much of the available information as possible in order to ensure smooth production and to spare ERIC the expense and time often associated with ferreting out requisite organization name information.

...Julie Holladay (ERIC Facility)

6. CIJE OCR Forms

Oryx Press has observed, in the initial flow of CIJE OCR forms, two conditions which they have requested the Facility bring to the attention of all Clearinghouses:

- Annotations for journal articles sometimes seem to exceed the 50-word limit;
- Indexing for journal articles sometimes seems very heavy for relatively short articles.

...Phyllis Steckler (Oryx Press)

I. CENTRAL ERIC ANNOUNCEMENTS

A. Ed Gordon Resigns as Director of the UD Clearinghouse

Ed Gordon, Director of the ERIC Clearinghouse on Urban Education, announced his resignation at the ERIC Directors' Meeting in Alexandria, Virginia. He has accepted a professorship in Psychology at Yale University and will be leaving the Clearinghouse at the end of August. Ed Gordon has been Director of the Clearinghouse since its beginning at Yeshiva University in 1966. Over the years both the Clearinghouse and the ERIC system have benefited enormously from his wisdom and standards of excellence. We envy Yale its good fortune. We are pleased, however, that Ed will not be completely lost to us, as he wishes to keep a close connection with ERIC and will become a Senior Research Associate to Urban Education in the fall. We offer him our warmest thanks for his contributions to ERIC over the years and wish him further success in the future.

We are pleased that Erwin Flaxman, who has also been at the Clearinghouse since 1966, will become its new Director on September 1. Erwin began as an editor of RIE resumes and was a key author of the first abstracting and indexing guidelines. Following years of active

participation in all Clearinghouse functions and system developments, he became Ed's Associate Director in 1971. Under Ed's guidance, he has had the responsibility for day-to-day administration of the Clearinghouse. He is highly qualified for his post and we welcome him to his new and broader role ...B.C. (Central ERIC)

B. Copyrighted Segments of Larger Documents

An opinion by NIE Copyright Counsel Morton Bachrach concerning the question of whether or not to delete segments of a document which are copyrighted is presented in Attachment 2. It should be helpful in deciding what to do about copyrighted material embedded in larger documents...B.C. (Central ERIC)

C. Technical Assistance to State Education Agencies (SEA's)

In the past year, the ERIC Technical Assistance Team has visited eight State education agencies to help them with the issues involved in building computer files that are "compatible" with ERIC. We have found that this is an issue often misunderstood, and that compatibility comes in degrees, depending on numerous decisions that are made by the States involved. The program has been very well received by the States involved. A brief summary of the state education agencies that have been involved appears as Attachment 3. If you become aware of interest in this program (or technical needs) from SEA's you deal with, please put them in contact with Central ERIC ...B.C. (Central ERIC)

D. NIE Organization Charts

Recently approved Organization Charts for the following NIE components are displayed as Attachment 4.

- DHEW, Education Division, National Institute of Education
 - Office of the Director (ENA)
 - Program on Teaching and Learning (ENT)
 - Office of Administration, Management, and Budget (ENM)
 - Program on Educational Policy and Organization (ENQ)
 - Program on Dissemination and Improvement of Practice (ENS)
- ...B.C. (CERIC)

E. Deletion of NIE News and DIP Happenings from the EAB

NIE News and Dip Happenings are being omitted from the ERIC Administrative Bulletin, by popular demand.

...Bob Chesley (Central ERIC)

F. Automatic Distribution of NIE Publications to Clearinghouses

Central ERIC has arranged for Clearinghouses to be placed on automatic distribution for all NIE publications. Each Clearinghouse will receive one copy of every publication, as it is issued. Past publications, that are still in print, will be sent in one bulk shipment. Publications received through this distribution are for

information only, and should be circulated among all interested personnel. They are not to be processed for RIE. The ERIC Facility will continue to send candidates for RIE announcement to the appropriate Clearinghouse through the usual route and with the usual markings.

...Frank Bryars (Central ERIC)

G. Suggestions for System Improvement

Several standing order customers at the St. Louis workshop expressed a need for a wall poster, for display with ERIC materials, showing step-by-step instructions on how to use ERIC. This is only one of a number of suggestions for system improvement which have been made during the discussion sessions at the Standing Order Customer (SOC) workshops.

In order to ensure that these suggestions/recommendations are being captured for future consideration, please send them to either Marla Peterson (CE), who has administrative and reporting responsibility for the SOC workshops, or to John Waters (SP), who is chairman of the ERIC Steering Committee for Technical Operations (with a copy to Central ERIC).

...Mildred Thorne (Central ERIC)

H. OCR for CIJE Input

The ERIC Facility was able to generate appropriate OCR forms for RIE and CIJE input sooner than expected in January. Central ERIC would ordinarily have notified the Clearinghouses when to begin using these forms, but since it was important to Oryx Press to get the operation underway as quickly as possible, Clearinghouses were contacted by Oryx and by the ERIC Facility. This came somewhat to your surprise and consternation, particularly at the haste required. It is hoped that initial fears have been allayed and that the problems related to added use of the special OCR typewriter may not be as serious as first thought. We ask, and, as usual, expect your best efforts for the necessary transition period.

...Kit Welsh (Central ERIC)

I. Status Report on Knowledge Synthesis Papers

In December, Clearinghouse Directors received a memo from Bob Chesley with attachments from Linda Reed and Spencer Ward. The attachments summarized NIE planning for studies and processes of knowledge synthesis/interpretation and outlined a project to prepare commissioned papers. The papers are intended to lay out

some conceptual or theoretical issues about synthesis processes and to describe exemplary processes used to prepare syntheses. The papers are to provide useful information to persons performing synthesis and to help set directions for R&D to improve efforts at synthesis.

Information on the project was sent to over a hundred people who have an interest in doing or studying synthesis. About forty replies were received which led to additions to some papers and changes in others. Clearinghouse Directors will soon receive from Ms. Reed and Mr. Ward a revised plan with a list of persons to prepare each paper. They will keep you informed as the project proceeds.

...Spencer Ward (DIP/REP)

II. ERIC FACILITY ANNOUNCEMENTS

A. Play Thesaurus/VIP Input

The second edition of the *Play Thesaurus* will include VIP input through February 6, totaling 379 DJF's from the Clearinghouses and approximately 350 more from the Facility. (These Facility DJF's represent primarily reactions to Clearinghouse input: questions and suggestions in the new Comment Field; recommended alternatives to Clearinghouse Scope Notes; and a variety of transactions required to properly record all recommendations.) It is estimated that an average of 2.5 DJF's have been required for each term worked on so far, meaning that work on about 300 terms will be reflected in the second *Play Thesaurus*.

The Facility hopes to distribute the second *Play Thesaurus* in mid-March. The Facility Lexicographers are expecting to catch up by the third edition, which should cover a 4-6 week period. This should be possible because of a reasonably light February input: 215 DJF's (excluding 38 "OK as is" comments) as compared to 281 DJF's received in January.

Clearinghouse VIP input through March 12 totals 728 DJF's as follows:

CE - 32	JC - 50
CG - 156 (38--OK as is)	PS - 48
CS - 47	RC - 18
EA - 56	SE - 16
EC - 80	SO - 54
FL - 32	SP - 39
HE - 46	TM - 15
IR - 34	UD - 5

An instructional manual for *Play Thesaurus* input has been prepared, to replace the draft manual distributed at the regional technical meetings last fall. It is currently being printed.

...Jim Houston (ERIC Facility)

B. ERIC Facility Working with NAEP to Identify Publications

The Acquisitions Staff at the ERIC Facility is working with Dr. Ted Pratt at the National Assessment of Educational Progress (NAEP) to identify every NAEP publication in ERIC. Because of permutations of titles and because not all NAEP report numbers have been picked up in cataloging, the problem has been to determine which NAEP title goes with which ED number. When completed, the list will be available to any Clearinghouse requesting it ...G.S. (Facility)

C. NTIS Abstracts in Government Reports Announcements & Index

The National Technical Information System (NTIS) is listing between 25-30 RIE abstracts in each issue of *Government Reports Announcements & Index*. Most of these are in Field 5 - Behavioral and Social Sciences under the subheadings: Documentation and Information Technology, Man-Machine Relations, and Personnel Selection, Training, and Evaluation.

...Grace Sundstrom (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. Special Microfiche Package Distributed at Career Education Conference by ERIC/ACVE

In an effort to supply the 600 persons attending a recent career education conference with three information analysis papers relating to the topic of the sessions (Career Education for Exceptional Individuals), ERIC/ACVE (Adult, Career, and Vocational Education) decided not to bring the necessary 1,800 documents. Instead, the Clearinghouse produced the three papers in microfiche and packaged them in one attractive folder. It appeared to be one of the most popular handouts (Attachment 5).

The conference, held in St. Louis, Missouri on February 7-9, was sponsored by the Council for Exceptional Children. The three information analysis papers distributed were:

- "Career and Vocational Development of Handicapped Students" (Brolin and Kolstoe, 1978)

- "Career and Vocational Development of Handicapped Students: An Annotated Bibliography" (Bhaerman, 1978),
- "Vocational Education for the Handicapped: A Review" (Hull, 1977).

Only ten days elapsed from the time the idea to distribute these papers in this fashion was conceived to the time of their delivery to the conference. ERIC/ACVE believes this probably set some kind of record for speed of delivery, and that it was time and effort well spent.

A copy of the special microfiche package has been sent to each Clearinghouse.

...Bob Bhaerman (CE)

B. CAPS Introducing ERIC to New Users

The ERIC Clearinghouse on Counseling and Personnel Services has been heavily involved in introducing ERIC to new users.

On-Site: Three staffers presented five hours of instruction to a class in library science at the University of Michigan. Spread over three days, the sessions examined resources and data bases in general, and ERIC in particular, using it as an example of both a computer- and manual-searchable data base. Each class member developed a search question and strategy, and under the guidance of the CAPS staff actually ran his/her search. CAPS has been invited to participate in teaching library science classes for three years now, and we feel it is a valuable part of our outreach effort.

Off-Site: Two staff members traveled to California to present a special workshop on Adult Counseling before 150 attendees of the California Personnel and Guidance Association. Counseling adults is a current high-priority area of concern for members of the helping professions, and workshop participants evaluated very highly their experience at the session.

...Carol Jaslow (CG)

C. New RCS Ready Reference Packets

The ERIC Clearinghouse on Reading and Communication Skills has just completed four ready-reference packets on the subject of reading comprehension with the content areas, listening, spelling, and study skills for the Illinois Resources and Dissemination Network (IRDN). The packets contain selected bibliographies of references taken from searches of the ERIC data base, reproductions of several journal articles, sample documents on microfiche, appropriate newsletters, and copies of mini-bibliographies.

They will be distributed by IRDN to Program Service Teams (PST) members, the linking agents for the Illinois Office of Education. Workshops have been held with the PST's in order to re-review and evaluate these packets.

...Mary Monteith (CS)

D. Postscript to Cazenovia on Searching

At the Cazenovia meeting, Norma Howard told the group that it is possible in DIALOG for a person to ask for two words to be adjacent to each other in the abstract [useful (w) blivits] and get a document in which the first word appears at the beginning of the abstract and the second appears at the end. After much discussion of how this could be, we all muddled off in confusion.

It is possible! The counter in the DIALOG program does not go all the way to 200. After 128-130 words (the person I talked to wasn't quite clear on this) the counter starts over. So, positing that the counter stops at 130, this is one way you could get a weird hit: Useful is the 8th word in the abstract. Blivits is the 139th word. Since the counter starts over at 131 (which then is 1), the counter said that blivits is the 9th word. Ergo, useful and blivits are adjacent because they are words 8 and 9.

...Ian Templeton (EA)

Ed. Note: We will ask DIALOG for a rejoinder.

E. Pat Hurt-Ritenburg Joins VIP Effort at EC

Pat Hurt-Ritenburg, who has done abstracting and indexing for ERIC on a part-time basis in the past, has become involved in the VIP effort. She brings to the project an educational background in English and Education, and editorial experience in educational publishing.

F. Sharon Hudack Now Assists in User Services

In addition to her work as an abstractor/indexer, Sharon Hudack now assists the user services effort. (Jayne Miller is no longer with the Clearinghouse). Her work in cataloging is being absorbed by other staff members.

...Marion Cambel (EC)

G. HE Representatives Visit San Juan, Puerto Rico

Three members of the ERIC Clearinghouse on Higher Education visited with representatives of Puerto Rican colleges and universities in San Juan, Puerto Rico, December 11-14, 1978. Jonathan Fife, Marilyn Shorr, and Lynn Haupt, held workshops and made presentations to groups of administrators, faculty, librarians, and graduate students. Their visit was at the request

of the administration of the Inter American University of Puerto Rico, San Juan, which is coordinating efforts to set up an education information network throughout Puerto Rico.

...Marilyn Shorr (HE)

H. New Publications Recently Received by ERIC/IR

New publications recently received by the ERIC Clearinghouse on Information Resources include *A Style Manual for Citing Microform and Nonprint Media* by Eugene B. Fleishcher, published by the American Library Association, which suggests the following format for citing ERIC documents when the microform version is being cited:

(Footnote)

²⁸ *Women Workers Today*, ERIC Document ED 132 364, October, 1976
(Microfiche edition).

(Bibliography)

Women Workers Today, ERIC Document ED 132 364, October, 1976. Microfiche edition.

This differs somewhat from the format shown in the *Publication Manual of the American Psychological Association (Second edition)*:

(Bibliography only)

Norberg, K. D. *Iconic signs and symbols in audiovisual communication*.
Sacramento, Calif.: Sacramento State College, 1966. (ERIC Document
Reproduction Service No. ED 013 371)

...Barb Minor (IR)

1. SOC Workshops Held

Two Standing Order Customer Workshops were successfully held this month by the ERIC Clearinghouse for Science, Mathematics, and Environmental Education. The first was held at the Clearinghouse for customers in Ohio on February 16th, and the second was held at Indiana State Library, on February 23rd for Indiana customers. Both were conducted by Dr. Stanley Helgeson.

J. Dr. Stanley Helgeson is Presidential Nominee for NARST

Dr. Stanley Helgeson, Associate Director for Science Education, is a presidential nominee for the National Association for Research in Science Teaching (NARST). Running against Dr. Helgeson is Dr. Richard Sagness, a former ERIC/SMEAC employee. ...B.M. (SE)

K. Dr. Brown and Dr. Lucas Holding Positions in AETS and ASERA

Two former ERIC/SMEAC employees, Dr. William Brown and Dr. Arthur Lucas, are currently holding positions in two important scientific education-related organizations. Dr. Brown is Executive Secretary of the Association for the Education of Teachers in Science (AETS), and Dr. Lucas is Executive Secretary of the Australian Science Education Research Association (ASERA).

...Beverly Malcolm (SE)

L. ERIC Intern at SP

In mid-March, Yvonne Graydon, librarian for the Jamaican Ministry of Education begins a three month internship with the ERIC Clearinghouse on Teacher Education. Ms. Graydon, born in Kingston, Jamaica, completed her formal secondary education in England, followed by positions with the Birmingham City Libraries, Islington Public Library System (England), and the Cologne City Libraries (Federal Republic of Germany). She earned her B.A. degree in librarianship at the Leeds Polytechnic (England).

Since working at the Jamaican Ministry of Education, she has re-established the previously closed library, and with Dr. Joost Yff (formerly Director of ERIC/SP), established the Education Information Analysis Center (EDIAC). EDIAC, operating since April 1978, has acquired RIE, CIJE, the ERIC Microfiche collection, and access to DIALOG. It has also established a document retrieval system following ERIC guidelines, but using Optical Coincidence Cards instead of a computer for document retrieval.

Ms. Graydon's objective in coming to an ERIC Clearinghouse is to gain experience to be applied in the expansion of information services at the Ministry. She will spend time working in each of the Clearinghouse functions. We look forward to working with her.

...John Waters (SP)

M. Special Libraries Association Conference 1980

Pauline Rothstein of the ERIC Clearinghouse on Urban Education is Chairman of the Education Division, Special Libraries Association, for the 1980 conference to be held in Washington, D.C.

At this time, program planning is starting for the conference panels. Any program suggestions would be welcome. Please send them to Pauline Rothstein at the UD Clearinghouse...E.F. (UD)

N. "News from ERIC" Column Needs Your News

"News from ERIC" is a regular feature column in *Education Libraries*, published three times a year by the Education Division of the Special Libraries Association. Pauline Rothstein of the ERIC Clearinghouse on Urban Education invites all Clearinghouses to send her information of interest to readers of the column. New Clearinghouse publications, especially bibliographies, would be of special interest. In addition, since each journal issue has a theme, at some time your Clearinghouse may be called upon to participate in a guest column. John Disinger, Associate Director, Environmental Education (SE), contributed to the Spring 1979 issue on environmental education.

Copyright Permissions for ERIC Input: One
Situation (Opinion by Morton Bachrach)

Sometimes an uncopyrighted document which is submitted to ERIC contains a segment taken from a different, but copyrighted, work. For example, an uncopyrighted research report might contain a quotation from a copyrighted newspaper or journal. Does the copyrighted segment have to be excised from the document before the document is placed in ERIC?

The copyrighted segment would have to be excised from the document before ERIC input unless (1) ERIC has permission from the segment copyright holder or (2) the segment is so small, in comparison with the overall document, that its use would be allowable as "fair use".

How does ERIC determine that the permission which the author of the document has received, from the author or publisher of the copyrighted segment, covers ERIC input? The best way to make that determination, of course, is to examine the permission language. If it is broad, i.e., not limited to a publisher other than ERIC, it can be assumed that the permission includes ERIC input.

Frequently it will not be possible to examine the permission language. In many cases the only indication will be a statement from the document author that he/she has received permission from the segment copyright holder to reprint the segment as part of the document. In that situation it will be necessary to surmise the scope of the permission based on the circumstances. If the document has not been published previously it should be assumed that the permission was intended to cover ERIC input. However, if the document has been published previously it is possible that the permission was limited to the previous publication. In that case, the copyrighted segment, except in the "fair use" situation, should be excised unless, upon further inquiry, it is determined that the permission is broad enough to include ERIC input.

The copyrighted segment need not be excised, even through no permission is available, if such use would constitute "fair use". As a general proposition such use would constitute "fair use" if the copyrighted segment is minor (no more than a few pages, perhaps) as compared with the remainder of the document, and if such use will not adversely affect the commercial market for the copyrighted work of which the copyrighted segment is a part.

Clearinghouse on Adult, Career, and Vocational Education

CAREER AND VOCATIONAL EDUCATION FOR HANDICAPPED LEARNERS

The ERIC Clearinghouse on Adult, Career, and Vocational Education (ERIC/CE) is very pleased to provide you with three microfiche copies of Information Analysis Papers dealing with various aspects of career and vocational education for exceptional students. One of the microfiche is from the 1977 series; two are from the 1978 series to be published shortly.

The Information Analysis Series of ERIC/CE includes state-of-the-art reviews; interpretations of research; analysis of programs, policies, trends, and issues; and the identification of resources in three areas: adult and continuing, career, and vocational technical education. These particular microfiche should be of interest to vocational and technical education teachers, supervisors, and administrators and to those involved in all aspects of career education.

The three papers are:

Vocational Education for the Handicapped: A Review
Marc E. Hull, Texas A & M University. (1977)

The Career and Vocational Development of Handicapped Learners
Donn E. Brolin, University of Missouri-Columbia
Oliver P. Kolstoe, University of North Colorado. (1978)

Career and Vocational Development of Handicapped Learners: A Bibliography
Robert D. Bhaerman, The Ohio State University, National Center for Research in Vocational Education.
(1978)

**THE NATIONAL CENTER
FOR RESEARCH IN VOCATIONAL EDUCATION**

The Ohio State University · 1000 Kenny Road · Columbus, Ohio 43210
Tel (614) 488 3995 Code CTVOCEDSU/Columbus, Ohio

The ERIC Clearinghouse on Adult, Career, and Vocational Education is sponsored by the National Institute of Education.

ABSTRACTS OF THE PAPERS

Vocational Education for the Handicapped: A Review. Marc E. Hull. (ED 149 188)

A review and synthesis of programming and techniques useful in providing vocational education to handicapped secondary and post-secondary school students is presented in this information analysis paper. Information and insights are given so that vocational administrators and supervisors can assess their efforts to provide equal opportunities for the handicapped to participate fully in all facets of vocational education including youth organizations, cooperative vocational education, vocational guidance services, and consumer education. Also, practical suggestions are included for effectively accommodating handicapped students through both regular and special instructional arrangements. Specific topics discussed include the following: Rationale for the participation of the handicapped in vocational education, barriers to participation, impact of legislation, identifying the handicapped, developing appropriate program alternatives for serving the handicapped, prevocational education, role of vocational education in comprehensive secondary programming for the academically handicapped, need for interagency cooperation, curriculum and instructional materials to assist in vocational training, personnel preparation, evaluation of students and programs, and professional organizations. The conclusion is made that emphasis of the future must be one of equal access and maximum accommodation. The appendix contains descriptions of information systems on the handicapped.

The Career and Vocational Development of Handicapped Learners. Donn E. Brolin and Oliver P. Kolstoe. (ED numbe. to be listed in a future issue of *Resources in Education*.)

The state of the art of career education for handicapped persons was reviewed beginning with the events and developments which have aided in the growth of career education for the handicapped since 1971. Specific career education needs of the handicapped were identified, and the concept of career education was clarified. The study examined relevant research on the roles of occupation, citizen, family, and avocation associated with persons who are deaf, hard-of-hearing, blind, partially sighted, crippled, health impaired, mentally retarded, emotionally disturbed, learning disabled, or multi-handicapped. Research conducted to evaluate the effectiveness of various curricular approaches in this field was also studied. Finally, research in the areas of teaching counseling methods and career assessment, exploration, and preparation for the handicapped was reviewed. The research indicated that only now are school systems beginning to retool and initiate a comprehensive array of services: infusion of total school resources, community participation, and family involvement. Based on past research and reviews of research in progress, ten generalizations were drawn. Three are as follows: (1) the majority of handicapped students who leave school are in danger of becoming either unemployed or underemployed in later life; (2) currently there is considerable curricula variability in scope and sequence for career education program implementation, but more definitive guidelines and procedures are necessary upon which to build curriculum; and (3) parents appear to have a significant influence on the handicapped person's career development.

Career and Vocational Development of Handicapped Learners: A Bibliography. Robert D. Bhaerman. (ED number to be listed in a future issue of *Resources in Education*.)

This selected bibliography on career and vocational development of handicapped learners contains 150 annotated citations divided into nine sections. The following list indicates the topics and the number of documents in each category: trends and general overviews (9); programs and projects (35); curriculum guides, activities, and resources (44); mainstreaming (10); personnel development (28); equipment and facilities (2); guidance and counseling (3); employment opportunities (7); and measurement and evaluation (12). All the citations are recent studies (conducted since 1975) and can be found in the ERIC data base. The items in each category are listed in order of recency of ED (ERIC document) number. There is some overlap in the categories; for example, aspects of measurement and evaluation are also found in reports of programs and projects. The category selections were made on the basis of the primary focus of each particular entry.

The ERIC Clearinghouse on Adult, Career, and Vocational Education offers a wide range of services including . . .

- Acquisition, selection, and preparation of documents for announcement in *Resources in Education*.
- Preparation of journal citations for announcement in *Current Index to Journals in Education*.
- Preparation of bibliographies and information analysis papers on current topics of interest and critical problems in the field.
- Question answering in response to user requests for information about ERIC services, document location, and referral to sources of information.
- Computer searches of the ERIC system for documents and journal articles relevant to specific problems.

Microfiche copies of these papers on handicapped learners are provided for your convenience. The complete list of Information Analysis Papers for 1977 and purchasing information are provided on the back page.

(Note: Printed and microfiche copies of the Brolin/Kolstoe paper and the Bhaerman annotated bibliography will be available after May 1, 1979 from National Center Publications and the ERIC Document Reproduction Service. Watch future issues of *Resources in Education* for ED order numbers.)

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC Clearinghouse on Information Resources

- a. *Media in the Library; A Selected, Annotated Bibliography*,
by Evelyn H. Daniel. Pages: 98, Price: \$4.50 plus \$.50 postage,
Order Number: IR-32.

Included are 496 citations arranged in seven subject categories: General Works, Selection of Materials and Equipment, Managing the Media Center, Operation and Production, Media in Context (by type of library and/or media), Media and Teaching, and Research and Special Issues. An author/title index provides alphabetical access to the entire collection.

- b. *Trends in the Study of Incidental Learning from Television Viewing*,
by George Comstock. Pages: 64, Price: \$3.50 plus \$.50 postage;
Order Number: IR-30.

This is a review of research on the effects of television on children in such areas as behavioral influence, cognitive and attitudinal effects, developmental factors, issues of authority, and mass media effects. A lengthy bibliography is included.

These publications are available from:

Syracuse University Printing Services
125 College Place
Syracuse, New York 13210

2. ERIC Clearinghouse on Science, Mathematics, and Environmental Education

- a. *Perspectives on Women and Mathematics*.
\$5.00
- b. *Energy Education---A Bibliography of Abstracts from Resources in Education (RIE) from 1966-1978*.
\$5.00
- c. *Science Education/Society: A Guide to Interaction and Influence, 1979 AETS Yearbook*.
\$7.50

These publications are available from:

SMEAC Information Reference Center
1200 Chambers Road, Room 310
Columbus, Ohio 43212

DOCUMENT REPRODUCTION SERVICE
P.O. Box 190 ARLINGTON, VIRGINIA 22210 • (703)841-1212

OPERATED BY: COMPUTER MICROFILM INTERNATIONAL, CORP.

March 2, 1979

Mr. Jim Prevel
National Institute of Education
1832 M Street, N.W.
Washington, DC 20208

Dear Jim:

We have reviewed the RIENOV78 Microfiche Inventory and Quality Check and the following is submitted.

1. The following documents will be refilmed:

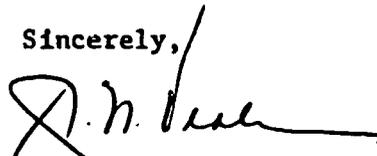

155 351 1/1	156 356 1/2	156 490 1/1
155 364 2/2	156 476 1/1	156 588 1/1
156 013 2/4	156 489 1/1	156 715 1/1

2. The following documents are not recommended for refilming:

<u>ED#</u>	<u>CLHSE</u>	<u>LEVEL</u>	<u>RESUME NOTE</u>	<u>REASON FOR NOT REFILMING</u>
155 458	CE	2	None	Pages are not cropped, pages are overlapped
155 539	CG	1	None	Filmed as received
155 956	HE	1*	Yes	Poor quality of pages furnished
155 967	HE	1	None	Filmed as received
156 001	HE	1	None	No problem found
156 357	PS	2	None	Filmed as received
156 530	SE	2	None	Green picture on brown background - will not be filmable
156 625	SP	2	None	Page 23 missing from document when received - worn out light blue print on light blue colored paper
156 687	TM	1*	None	Light, worn and broken print
156 751	UD	1*	None	Light print
156 811	UD	1*	Yes	Light print

3. It is recommended that the ED#'s showing asterisks (*) be changed from Level 1 to Level 2.
4. The Original Source Documents cited in paragraph 2 above are being returned to the ERIC Processing and Reference Facility for review.

Sincerely,

J. N. Veale
Director

ACTION ITEMS

1. CENTRAL SUPPLY OF ERIC BROCHURES

Over the past few years a requirement has arisen for a central supply of ERIC Clearinghouse brochures to be maintained for ready access by Central ERIC. The reasons for this central supply point are:

- ever-increasing requests for information concerning the operation of ERIC and the functions of specific Clearinghouses;
- numerous visitors, many from foreign countries, coming to NIE requesting Clearinghouse information;
- the need for Central ERIC to collaborate with other NIE offices in staffing NIE exhibits at national professional meetings, at which Clearinghouse brochures would prove a valuable resource; and
- to serve Clearinghouse needs in running exhibits at national meetings.

This central supply of ERIC Clearinghouse brochures will be maintained at the ERIC Facility. Each Clearinghouse should package and mail to the ERIC Facility 500 copies of the principal descriptive brochure which describes the location, function, scope, etc., of your unit.

Five hundred copies may be more than you can spare at the moment, however, please forward what you can without depleting your immediate supply and forward the balance when your supply has been replenished.

We anticipate that this will be a continuing annual requirement. We will try to keep you informed as to the amount required each year to maintain the established stock level. (B.C./Central ERIC)

2. INFORMATION BULLETIN MAILING LIST ADDITION

A great deal of emphasis is being placed on working with the Standing Order Customers (SOC's) and school librarians as links to teachers and administrators for awareness of and access to ERIC. Clearinghouses are requested to put the following name on their mailing lists for Information Bulletins.

Ms. Alice Fite
Executive Secretary
American Association of School Librarians
50 E. Huron Street
Chicago, Illinois 60611

...Bob Chesley (Central ERIC)

3. TARDY ADR SUBMISSIONS

A reminder that the *ERIC Processing Manual* instructions for the preparation and shipment of the ADR form state:

"On the last working day of every month the Clearinghouse should send to the Facility (separately and via Certified Mail) the Acquisitions Data Forms containing all the documents accessioned during that month." (Section 4.3.5, p. 121).

Recently, delays of several days beyond the end-of-month cutoff date have been experienced for two to four Clearinghouses (not the same ones each month). As a result, the Facility has had some difficulty in rushing in-house processing and printing sufficiently to make schedule. We would appreciate your taking whatever steps are necessary to correct these time slippages. We want to ensure delivery to you of this valuable duplicate checking tool by about the 21st of each month.

...Al Hill (ERIC Facility)

I. CENTRAL ERIC ANNOUNCEMENTS

A. DIRECTORY OF ERIC MICROFICHE COLLECTIONS

The suggestion has been made several times that reprints by state or region from the *Directory of ERIC Microfiche Collections* would be desirable for use in ERIC booths at regional meetings. Indeed they would. However, there are practical problems dealing with section selection, printing, and distribution. We suggest that Clearinghouses Xerox a supply of appropriate pages that can be distributed. For national meetings, there is still an adequate supply of printed directories available upon request from the Facility.

...B.C. (Central ERIC)

B. SUGGESTIONS WELCOME!

We have received a number of suggestions on ways of improving ERIC services, materials, and procedures. While it is not always possible to accommodate all suggestions, we have, in many cases, been able to move immediately to implement a good idea. Your suggestions serve to address needs that are felt in operating the system and are most welcome and appreciated. Keep'em coming!

...Bob Chesley (Central ERIC)

C. ERIC USERS CONFERENCE, MINNEAPOLIS, MINNESOTA (OCTOBER 14-15, 1979)

The ERIC Users Conference will be held in 1979 in conjunction with the Annual Meeting of the American Society for Information Science (ASIS).

Central ERIC is currently considering potential agenda items. A preliminary agenda must be prepared for ASIS by June.

Clearinghouses are invited to submit suggestions for sessions that they believe would be useful to and popular with the user community. The SOC workshops are a fertile source of such ideas. Please send any and all suggestions to Jim Prevel, Central ERIC.

...J.P. (Central ERIC)

D. ERIC FACTS AND FIGURES

Three summaries of ERIC information have recently been updated by the Facility:

- ERIC Product Summary;
- ERIC Accession Series (Ranges and Counts Per Issue); and the
- ERIC Fact Sheet.

Copies are included herewith as Attachments 1, 2, and 3 to the EAB, for your information and use. In addition, Central ERIC is planning to combine these summaries, with others under development, to create a handout for users. Your suggestions for other items to be included in such a handout would be welcome.

...Jim Prevel (Central ERIC)

E. ERIC NATIONAL TECHNICAL MEETING

The ERIC National Technical Meeting will be held at the University of Maryland Adult Education Center on May 1-3. In the recent letter to out-of-town attendees, information was provided concerning airport limousine service, emergency cancellation of reservations, etc. One important item was omitted, however, and that was the vital matter of credit. The University of Maryland accepts Master Charge and Visa credit cards only.

...Frank Smardak (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. COMPUTER-PRODUCED INDEXES FOR IAP BIBLIOGRAPHIES

The ERIC Facility can extract any subset of RIE or CIJE accessions and, treating the resultant records as a mini-RIE, can generate indexes for them.

As an experimental effort, Central ERIC has directed the ERIC Facility to produce three such indexes during 1979. The indexes are to apply to appropriate Information Analysis Products that either re, or that contain, significant bibliographies.

The only restrictions are that the bibliography should be large enough to warrant indexes and the indexes can accommodate only ED and EJ records.

In all cases, camera-ready copy of the indexes would be delivered to the Clearinghouses for inclusion in the overall publication. (Resume sections have not been included in this project).

Clearinghouses planning IAP's that might be candidates for such indexes are invited to submit their request to Central ERIC.

...W.T.B. (ERIC Facility)

B. PRICE CODES IN RIE (TO REPLACE SPECIFIC PRICES)

Sometime in mid-1979 the specific microfiche and hardcopy prices now appearing in RIE in each citation will give way to price codes. A table will be provided in each RIE issue which will permit the user to translate the price codes into dollars and cents. The form of the codes will be as follows:

"EDRS Price - MF01/PC05,"

with PC representing "Papercopy."

The rationale for going to price codes is that whenever the price structure changes, all previous explicit prices on the data base are rendered obsolete overnight, requiring a massive backfile update to maintain accuracy. A price code, on the other hand, could remain the same, with only the table interpreting the code being changed.

The changeover will await the establishment of new prices under the upcoming new EDRS contract. The purpose of this notice is to alert all ERIC components and all ERIC users that such a change is being planned.

...W.T.B. (ERIC Facility)

C. CIJE PRICES

The prices in the first Oryx flyer on CIJE and the more recent "Special Notice" vary. This variance is due to two factors. The flyer cites prices for 12 issues without postage. The notice cites prices for 10 issues with postage.

Despite this logical explanation, the difference is certain to be confusing to some users. This confusion can be perhaps be resolved with the use of the table on the following page:

PRODUCT	FIRST FLYER (PRICES WITHOUT POSTAGE)	"SPECIAL NOTICE" (PRICES WITH POSTAGE)
1. CIJE Monthly Subscription (12 issues)	\$ 75.00	---
2. CIJE Monthly Subscription (10 issues), (March - December)	---	\$ 66.70
3. CIJE Monthly Subscription (12 issues) and Semiannual Cumulations	\$140.00	---
4. CIJE Monthly Subscription (10 issues) and Semiannual Cumulations	---	\$136.70
5. CIJE Semiannual Cumulations only	\$ 75.00	\$ 80.00
6. Thesaurus	\$ 11.95	\$ 13.20
7. Educational Documents Abstracts (2 volumes)	\$ 75.00	\$ 80.00
8. Educational Documents Abstracts (separate volumes)	\$ 45.00	\$ 47.50

...W.T.B. (ERIC Facility)

D. PLAY THESAURUS

As you are all aware by this time, the software that produces the *Play Thesaurus* (containing input through February) has been having great difficulty recognizing varying numbers of asterisks. The Facility now believes they have solved the technical problems and that they will be able to transmit the *Play Thesaurus* to you during the week of April 16-20 (hopefully as early as the 18th) for perusal before the VIP meeting on April 30th. This product is the Facility's number one priority and has first call on all available resources.

...Ted Brandhorst (ERIC Facility)

E. ERIC CLEARINGHOUSE VIP INPUT FOR APRIL

ERIC Clearinghouse VIP input for April 4 totals 1,072 DJF's as follows:

CE - 32	JC - 84
CG - 222 (61 - OK as is)	PS - 66
CS - 51	RC - 28
EA - 87	SE - 27
EC - 117	SO - 54
FL - 49	SP - 53
HE - 74	TM - 65
IR - 42	UD - 21

...J.H. (ERIC Facility)

F. PLAY THESAURUS INPUT INSTRUCTIONS

The new VIP input manual, *Play Thesaurus Input Instructions*, was distributed to the Clearinghouse Vocabulary Coordinators on March 15, 1979. Guidelines for the selection of *Related Terms* were distributed on March 29.

...Jim Houston (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. CG PARTICIPATES IN AMERICAN PERSONNEL AND GUIDANCE ASSOCIATION MEETING

Garry Walz, Libby Benjamin, Carol Jaslow, and Carol Mills of the ERIC Clearinghouse on Counseling and Personnel Services participated in the national convention of the American Personnel and Guidance Association, held in Las Vegas, Nevada.

Garry Walz and Libby Benjamin presented two pre-convention workshops in which they generated interest in ERIC by focusing on resources and materials available through the system. Carol Jaslow and Carol Mills (the new Library Assistant at the Clearinghouse) manned an ERIC booth at which the ERIC display was featured. The convention attracted approximately 12,000 people. An estimated 700 visitors to the booth were spoken with by the CG representatives, and more than 1,000 assorted pieces of literature on ERIC and CAPS were distributed.

...Carol Jaslow (CG)

B. SEMINARS FOR ILLINOIS REGIONAL SUPERINTENDENTS

As part of a special project, the ERIC Clearinghouse on Reading and Communication Skills sponsored two seminars in March for Illinois regional educational superintendents on the topic of accessing the Illinois Resource and Dissemination Network (IRDN). Topics for the seminar were:

- training in search negotiation;
- searching the ERIC data base;
- demonstrating computer searching of ERIC and other data bases;
- explaining procedures for accessing IRDN.

The fifty-six superintendents and assistant superintendents who attended will now be able to call in search requests directly to IRDN.

...Mary K. Monteith (CS)

C. ERIC/RCS STAFF NAME AND POSITION CHANGE NOTICE

Gail Weaver is now Gail Taylor. Her position has been changed from research assistant to research associate.

...Mary K. Monteith (CS)

D. COVERAGE OF LAW JOURNAL LITERATURE EXPANDS

The ERIC Clearinghouse on Educational Management recently began a special effort to index journal articles on education law for announcement in CIJE. The project is the result of an NIE-funded study of the feasibility of expanding ERIC's coverage of education law and policy literature. The study identified over one hundred law reviews and journals, of which ERIC was designating only four for "cover-to-cover" or "selective" input. On the basis of its findings, the study recommended "that a more systematic effort should be taken" to expand coverage of this literature, and the EA Clearinghouse was chosen to do the work.

Early this year the Clearinghouse began its monitoring of the law reviews and journals cited in the study, with the result that numerous articles have been selected for processing. Articles dealing with higher education law are being brought to the attention of the Clearinghouse on Higher Education for it to process.

Clearinghouse Director Philip K. Piele is responsible for most of the work on the project. Dr. Piele is editor-in-chief of the *Yearbook of School Law* and has written extensively on school property and contract law.

...Stuart C. Smith (EA)

E. COUNCIL FOR EXCEPTIONAL CHILDREN CONVENTION TO BE HELD IN DALLAS

The 57th Annual International Convention of the Council for Exceptional Children (CEC), to be held in Dallas, April 22-27, 1979, will offer nearly 500 traditional professional sessions concerning specialized interests represented by the twelve divisions and the eleven standing committees of CEC.

Additional sessions will cover school psychology, regular education, parents, occupational and physical therapy, personal and residential settings, and state education agencies. Other features include two research forums, a film theatre, and exhibits. Papers by participants have come to the ERIC Clearinghouse on Handicapped and Gifted Children since February, however, the bulk of papers to be processed by ERIC/EC will be collected at the Convention by session chairpersons.

...M.C. (EC)

F. EC REPORTS HIGH INTEREST AT SOC WORKSHOP IN RALEIGH, NORTH CAROLINA

Thirty-one persons representing twenty-six institutions attended the SOC Workshop in Raleigh, North Carolina on April 4-5, 1979. Lynn Smarte and Sharon Hudack, of the ERIC Clearinghouse on Handicapped and Gifted Children, reported high interest on the part of attendees. Clearinghouses can anticipate a detailed account at the May 3 session (entitled "SOC Workshop Report") of the ERIC Technical Meeting at the Adult Education Center at the University of Maryland.

...M.C. (EC)

G. FACT SHEETS FREQUENTLY REQUESTED

Among Fact Sheets frequently requested from the ERIC Clearinghouse on Handicapped and Gifted Children are:

- *Parents of Handicapped Children* (a "best seller")
- *Child Find*, and
- *Children on Medication*.

A list of titles is available upon request.

...Marion Cambel (EC)

H. FL RECEIVES 1978 ONTERIS PUBLICATIONS

The ERIC Clearinghouse on Languages and Linguistics has received a complete set of the 1978 ONTERIS printed Indexes and Abstracts from the Ontario Ministry of Education in Toronto. ONTERIS (Ontario Educational Research Information System) is the Canadian equivalent to the ERIC system in the United States. Funded in 1977, ONTERIS parallels RIE in conceptualization and scope, and is searchable by computer through EISO (Educational Information System for Ontario).

The documents in ONTERIS include all Ministry-funded research in Canada, school board research in metropolitan Toronto, and various other research reports from a number of sources in Canada from 1959 to the present. Included in the set of materials are two volumes of abstracts and a subject/author index to those volumes. The system appears to be ERIC-compatible and should be of great interest to all Clearinghouses, as there seems to be quite a few possible acquisitions in virtually all scope areas.

All three volumes of ONTERIS materials are being processed at Level I by ERIC/CLL and will appear in the June 1979 issue of RIE (FL 010 063, FL 010 064, FL 010 065). Please alert Standing Order Customers (SOC's) and other dissemination and resource centers in your region about the availability of these materials and the existence of this data base. For further information about ONTERIS and its search services, please contact:

Search Analyst

...Alice Omaggio (FL)

I. IR IAP'S TO BE ORDERED FROM SYRACUSE UNIVERSITY PRINTING SERVICE

There seems to have been some confusion in a recent announcement about where to order Information Analysis Products produced by the ERIC Clearinghouse on Information Resources. These IAP's must be ordered from:

Syracuse University Printing Services
125 College Place
Syracuse, New York 13210.

They are not available from the Clearinghouse. An order form appears as Attachment 4 to the EAB.

...Barb Minor (IR)

J. VIP PUBLICITY

An article describing some of the problems associated with the early development of the *Thesaurus* and the objectives of the ERIC Vocabulary Improvement Project has been submitted to *ONLINE Magazine* for publication in its June issue. A case history of ERIC vocabulary development, including a description of the VIP, will also be presented at a three-day seminar, "Indexing in Perspective," sponsored by the National Federation of Abstracting & Indexing Services. The seminar will be held in San Francisco on May 9-11, 1979.

In early March, the seventy-two users who provided suggestions during last year's *Thesaurus Review* received an update report on the project status. Pat Coulter is preparing a similar announcement for *Interchange*.

...Barbara Booth (JC)

K. LILIAN G. KATZ APPOINTED DEPT. CHAIRPERSON AT THE UNIVERSITY OF ILLINOIS

Dr. Lilian G. Katz, Director of the ERIC Clearinghouse on Early Childhood Education since 1970, has been appointed Chairperson of the Department of Elementary and Early Childhood Education, College of Education, University of Illinois. The new assignment involves moving the ERIC Clearinghouse into the main building of the College at the Urbana Campus, making possible extensive interaction between

the Clearinghouse staff and the college staff, students, and visitors. Detailed information on the address change will be available in the near future. The effective date of the promotion is August 21, 1979. Dr. Katz will continue to act as the Director of the ERIC Clearinghouse.

...Mima Spencer (PS)

L. PUBLICIZING INFORMATION ANALYSIS PRODUCTS

The ERIC Clearinghouse on Early Childhood Education uses several methods to publicize and distribute Information Analysis Products (IAP's). In addition to conference displays, newsletter announcements, and mailings of review copies, the following are the chief methods used:

1. Under an arrangement with Ablex Publishing Company, many of our IAP's are published in a hardback book series entitled *Current Topics in Early Childhood Education*. Printing, promotion, and distribution are handled by the publisher.
2. Other IAP's are distributed through the College of Education/ University of Illinois. Annotated lists of all IAP's currently available from the College are prepared 3 or 4 times each year for inclusion in ERIC/ECE conference packets and replies to information requests. Also, a new list is enclosed with each publication order mailed from the College. About 12,000 lists are distributed annually.
3. The Clearinghouse user services brochure is used to announce current IAP's. Ten to twelve of the most recent titles are listed on the brochure's tear-off order form, which also includes free materials obtainable from ERIC/ECE. Since the brochure is updated three or four times a year, this mini-publication list can be kept current. About 21,000 copies of the brochure are distributed annually.

M. MIMA SPENCER ATTENDS MIDWEST REGIONAL EXCHANGE MEETING

Mima Spencer, Associate Director of the ERIC Clearinghouse on Early Childhood Education, attended the midyear meeting of the Midwest Regional Exchange in Detroit, Michigan on March 26, 1979.

...Charlotte Watkins (PS)

N. ERIC DIRECTORS' MEETING

The ERIC Directors' Meeting was held at the Ramada Inn in Alexandria, Virginia, March 1-2, 1979. Following are some of the highlights of that meeting.

Phyllis Steckler, President of Oryx Press, the new CIJE contractor, made her first acquaintance with ERIC directors. She described the history and activities of her company and participated in the discussions about how new CIJE subscriptions are to be handled.

Ellis, NIE Assistant Director for Regional Programs, described the current activities of his division and participated in a discussion on how ERIC personnel can cooperate with people from his program in regional activities. The Council of ERIC Directors will follow up with Ellis, in an effort to map plans for greater communication and possibly cooperative activities between ERIC and the Regional Programs. Apart from any such organized effort, Clearinghouses are encouraged to take initiative in working with the Regional Programs and other groups in the planning of regional dissemination efforts.

NIE Director Patricia Graham and Associate Director John Minor each addressed the meeting, reporting on current and future programmatic and budget concerns and prospects of NIE. In the current tight budgeting of the federal government small increases in the total NIE budget and the ERIC budget, while far below increases in the level of prices, are considered to be fairly satisfactory.

Reports on several special Clearinghouse projects were given. Don Melville reported on TM's project for identifying ERIC products for internal NIE use and for AERA journal columns. Garry Walz reported on CG's Answer Van project and the new project on "emerging educational issues." Marla Peterson (CE) reported on the progress of SOC workshops. Ed Gordon (UD) presented ideas on cooperative inter-Clearinghouse IAP's. Erwin Flaxman reported on UD's development of videotapes on uses of ERIC. Jim Davis reported on SO's special project on acquisition and selection guidelines.

Brief reports were given on a number of the new clearinghouse-type activities coming into being under the auspices of various government and private agencies. In many but not all cases, ERIC staff have been consulted about these clearinghouses and efforts are being made to make them ERIC-compatible, insofar as possible.

Chuck Hoover led an extensive discussion based on a planning document he had prepared, concerned with FY81 programs and emphases of the Information Resources division. Key emphases for FY81 are awareness of and access to educational information resources, including, but not limited to, ERIC.

The decision was made to have a second directors' meeting this year, in late September or October. Directors will be polled on suitable dates and on suggestions for program content and format.

...Irving Morrisett (SO)
Chairperson, Council of
ERIC Directors

O. ERIC POSTER

If you are aware of any Standing Order Customers (SOC's) that did not receive copies of the ERIC posters (and I understand there were some), please refer them to:

June Ramos
ERIC Clearinghouse for Social Studies/
Social Science Education
855 Broadway
Boulder, Colorado 80302

Extra copies are available, and will gladly be sent upon request.

...June Ramos (SO)

P. TM WORKING WITH CEDR

The ERIC Clearinghouse on Tests, Measurement, and Evaluation is working with William J. Gephart, Director of the Center on Evaluation, Development, and Research (CEDR) as Phi Delta Kappa to strengthen the ERIC data base in the area of school personnel evaluation. Dr. Gephart has enlisted the aid of seventy field agents throughout the country to identify and acquire documents on evaluation of professionals in education; especially those materials which describe policies and procedures. The ERIC Clearinghouse on Educational Management and the ERIC Clearinghouse on Teacher Education are also participating.

...Barbara Hunt (TM)

LIST OF ATTACHMENTS

- Attachment 1: ERIC Product Summary
- Attachment 2: ERIC Accession Series (Ranges and Counts Per Issue)
- Attachment 3: ERIC Fact Sheet
- Attachment 4: Order Form for Syracuse University Printing Services
- Attachment 5: Announcement of New Information Analysis Products
- Attachment 6: Descriptor Justification Form Status Report
- Attachment 7: Duplicates List for RIEAPR79
- Attachment 8: Standing Order Customers - Additions and Cancellations
- Attachment 9: Acquisitions Arrangements List
- Attachment 10: Microfiche Inventory and Quality Check Memo for RIEDEC78
- Attachment 11: Microfiche of Microfiche Inventory Log (Dec. 1978 & Jan. 1979)

NOTE: The *ERIC Directory* Update List was not issued separately because of only one submission at the cut-off time of this EAB. (See page 8, ERIC/RCS Staff Name and Position Change Notice).

The Microfiche Inventory and Quality Check Memo for RIEJAN79 was still in preparation at cut-off time for this EAB.

ERIC STATISTICS - RIE NOTES

- (1) Selected Documents on Higher Education are included in the microfiche collection, but do not appear in the tape files. An index to them is contained in ED-012110.
- (2) Selected Documents on the Disadvantaged are included in the microfiche collection and the tape files. A Number and Author Index is contained in ED-070484.
- (3) Keyed into the tape files in UPPER CASE ONLY.
- (4) These six documents are included in the microfiche collection on the Disadvantaged (see Note 2), but are not in the tape files.
- (5) OE Research Reports, 1956-1965 are included in both the tape files and the microfiche collection.
- (6) ED-010133 was never assigned and is not in the tape files.

ERIC FACT SHEET

I. ABSTRACT JOURNAL SERVICE

A. Resources in Education (RIE)

1. Subscriptions (including over 1,000 foreign)	5,000
2. Documents Announced in RIE	
a. Monthly (Average)	1,300
b. Annually (Average)	15,500
c. To date (1966 through December 1978)	150,941
3. Documents Evaluated Annually for Possible Announcement in RIE	(Approximately) 35,000

B. Current Index to Journals in Education (CIJE)

1. Subscriptions	2,000
2. Journals Covered	750
3. Journal Articles Announced in CIJE	
a. Monthly (Average)	1,650
b. Annually (Average)	20,000
c. To date (1969 through December 1978)	186,217

II. DOCUMENT REPRODUCTION SERVICES

A. ERIC Document Reproduction Service (EDRS)

1. Organizations Subscribing to Complete ERIC Microfiche Sets (including 51 foreign)	660
2. Titles Filmed (15.5% of all accessions in the file are copyrighted. Presently approximately 10% of document input is copyrighted).	
a. Monthly (per RIE issue)	1,300
b. Annually	15,000
3. Microfiche Cards Delivered Per Subscriber	
a. Monthly (per RIE issue)	1,800
b. Annually	21,000
4. Sales (Annually)*	
a. Microfiche Cards on Subscription (including back sets)	18,000,000
b. Microfiche Titles On-Demand	35,000
c. Hard Copy Titles On-Demand	48,000

*Total annual EDRS sales are approximately \$1,500.00.

III. DATA BASE SEARCHING SERVICES

A. Subscriptions to ERIC Magnetic Tapes (Via ERIC Facility) (including 10 foreign)	56
B. Software Systems Providing On-Line Access to ERIC Files (BRS, DIALOG, ORBIT, STAIRS, WISE-ONE, PIRETS)	6
C. Services Offering Computer Searches of ERIC Files	(Approximately) 500

IV. REFERENCE SERVICES (NON-COMPUTERIZED)

A. Inquiries/Questions Answered Annually	
1. ERIC Facility	10,000
2. Clearinghouses (53% practitioners; 26% students; 11% information specialists; 8% R&D specialists; 2% other)	100,000

V. PUBLISHING SERVICES

(Copies Sold)

A. GPO

1. <i>Resources in Education</i> (Subscriptions)	5,000
--	-------

B. CIJE CONTRACTOR

1. <i>Current Index to Journals in Education</i> (Subscriptions)	2,000
2. <i>Educational Documents Abstracts</i>	4,120
3. <i>Educational Documents Index</i>	5,707
4. <i>Thesaurus of ERIC Descriptors (7th Edition)</i>	2,813
5. <i>Special Bibliographies</i>	
a. <i>Information Analysis Products</i>	445
b. <i>Educational Finance</i>	678
c. <i>Library and Information Science</i>	895
d. <i>Reading</i>	566
e. <i>Early Childhood</i>	979
f. <i>Social Studies</i>	628
g. <i>Career Education</i>	1,260
h. <i>Institution Index</i>	431

C. Clearinghouses

From 1967 through 1977, the ERIC Clearinghouses produced a total of 3,116 separate and distinct information analysis products (bibliographies, literature reviews, state-of-the-art papers, evaluation summaries, etc.). Since many of these were made available without charge, it is not known how many total copies have been disseminated.

VI. MISCELLANEOUS STATISTICS

A. Thesaurus Descriptors

1. Main (Indexable) Terms	5,254
2. Synonyms	2,815
3. Total Terms	8,069

B. Organizations/Institutions Represented by Documents in ERIC Data Base (Source Directory)	20,655
--	--------

C. Professional Organizations Linked with Clearinghouses Representing Total Membership	283 4,000,000
---	------------------

D. Total Employees in ERIC System	250
--	-----

E. Estimated Dollars Spent By Users for ERIC Products and Services	\$4.6 million
---	---------------

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC Clearinghouse on Counseling and Personnel Services

- a. *Competency-Based Career Guidance Program Design: A 2-Day Training Workshop*, Garry R. Walz, Libby Benjamin, and Helen L. Mamarchev, 190 pages, 1978, CG 013 237. Available from: ERIC/CAPS Publications, 2108 School of Education, The University of Michigan, Ann Arbor, Michigan 48109. Price: \$11.00.

The workshop described in this document is a training program intended to teach participants the knowledge and skills required to design, develop, and evaluate competency-based career guidance programs. The emphasis is on accountability and flexibility. The workshop may be used in preservice or inservice training in a wide variety of settings. Detailed facilitators' instructions are included.

- b. *The Student Affairs Dean and the President: Trends in Higher Education*, David C. Tilley, Louis T. Benezet, Joseph Katz, William Shanteau, 84 pages; 1979, CG 013 421. Available from: ERIC/CAPS Publications, 2108 School of Education, The University of Michigan, Ann Arbor, Michigan 48109. Price: \$4.95.

This volume consists of 3 chapters describing growing pressures for accountability in higher education and the resulting demands on deans; the wide range of service appropriate for deans of today; and the need for extended dean/president communication.

NOTE: This publication was produced in collaboration with The National Association of Student Personnel Administrators.

- c. *Counseling Nonwhite Students in an Era of Integration*, Robert L. Clayton, 57 pages; 1979, CG 013 420. Available from: ERIC/CAPS Publications, 2108 School of Education; The University of Michigan, Ann Arbor, Michigan 48109. Price: \$5.00.

Written from the viewpoint that counselors can help American schools become integrated rather than interracial, this monograph examines specific programs and practices designed to respond to nonwhite student needs. The author also stresses the need for sharing and communication among counselors of minorities. An extensive bibliography is included.

- d. *School Disruption: Counselors Can Make a Difference*, Michael D. Marvin, 42 pages, 1979, CH 013 272. Available from: ERIC/CAPS Publications, 2108 School of Education, The University of Michigan, Ann Arbor, Michigan 48109. Price: \$5.00.

Part of the Counselor Renewal Series, this monograph offers practical guidelines and alternatives for dealing with disruption and improving the learning environment. It includes a definition of the problem, specific examples of programs developed, and a list of references.

- e. *Counselor Program Effectiveness: Gathering, Using, and Reporting the Evidence*, Anita M. Mitchell, 56 pages; 1979, CG 013 363. Available from: ERIC/CAPS Publications, 2108 School of Education, The University of Michigan, Ann Arbor, Michigan 48109. \$5.00.

This monograph, one in the Counselor Renewal Series, suggests a procedure for determining the effectiveness of counseling programs. The procedure described is systematic and self-correcting, in that progressive steps illuminate errors in previous steps, making it possible to modify the evaluation while it is in progress.

- f. *A Futuristic Perspective for Counselors*, Garry R. Walz and Libby Benjamin, 31 pages, 1979, CG 013 383. Available from: ERIC/CAPS Publications, 2108 School of Education, The University of Michigan, Ann Arbor, Michigan 48109. Price: \$5.00.

This publication examines the implications which literature on futurism has for the work of the counselor. The authors analyze alternative directions for counseling in the future and discuss challenges to which counselors must respond if they are to be a viable force in the educational process.

- g. *Making Change Happen: A Workshop for Developing Change Agent Skills*, Libby Benjamin and Garry R. Walz, 87 pages, 1979, CG 103 384, Available from: ERIC/CAPS Publications, 2108 School of Education, The University of Michigan, Ann Arbor, Michigan 48109. Price: \$11.00.

This volume is a workshop manual, containing materials for both facilitators and participants. The workshop is designed to train helping professionals in the art of change agency. This is accomplished through a 7-step model, including a simulation which leads to development of an individualized Action Plan.

- h. *New Imperatives for Guidance*, Garry R. Walz and Libby Benjamin, editors, 491 pages, 1978, CG 103 403. Available from: ERIC/CAPS Publications, 2108 School of Education, The University of Michigan, Ann Arbor, Michigan 48109. Price: \$8.50.

This volume consists of 13 essays dealing with different aspects of contemporary guidance, such as the use of computers in guidance, counseling minorities, and career resource centers. The authors are experts in their fields, and each essay is both theoretical and practical. The book is expected to be useful to supervisors and directors of guidance, counselor educators, and counselors themselves.

- i. *Striving for Excellence in Preservice and Inservice Training of Counselors*, Gordon M. Hart, 94 pages, 1979, CG 013 364. Available from: ERIC/CAPS Publications, 2108 School of Education, The University of Michigan, Ann Arbor, Michigan 48109. Price: \$6.00.

This monograph examines the content and quality of counselor education programs and considers which program components are most effective in developing needed counseling skills. The author presents theoretical training models, gives recommendations for innovative techniques, and offers suggestions to service deliverers for ways to coordinate professional efforts.

2. ERIC Clearinghouse on Early Childhood Education

- a. *Attachment and Children: Citations from Selected Data Bases*, Linda Baskin, compiler. Price: \$2.50.
- b. *Day Care Update: Programs, Policy, and Research: An ERIC Abstract Bibliography*, Charlotte Watkins, compiler. Price: \$3.00.

Resource Lists

1. Recent Research on Infants.
2. Recent Research on Parenting.
3. Recent Research on Policy Issues Concerning Children.
4. Recent Research on Basic Skills.

3. ERIC Clearinghouse on Handicapped and Gifted Children

- a. *Children on Medication - A Primer for School Personnel*, Dr. Kenneth D. Gadow, 112 pages, Stock #191, Available from: The Council for Exceptional Children. Price: \$7.75.

This "just off the press" book will be introduced at CEC's annual convention in Dallas, April 23-27 and will be displayed at the CEC Publications/ERIC Clearinghouse book in the main exhibit hall.

Teachers have many questions about how medication can help children, various side effects, whether or not drugs interfere with learning, proper dosages, what teachers should do in various situations, drug interactions, and what kinds of drugs are used for specific disorders. This primer answers many of these questions. In the first chapter, some of the fundamental concepts and terms relating to drug therapy are explained. Each of the following chapters covers the use of medication with regard to specific childhood disorders such as hyperactivity, convulsive disorders, mental retardation, school phobia, cerebral palsy, and childhood psychosis. When available, prevalence figures are reported for the given disorder and for the use of drug therapy in the general school population and in special education programs. Both therapeutic and side effects of the drugs are described, along with patterns of treatment.

The use of drug therapy in the management of childhood behavior disorders has received much attention in recent years. The use of medication in the management of learning, behavior, and convulsive disorders is of interest to school personnel for several reasons:

1. The very behaviors that are affected by drugs are often interrelated with the educational process.
2. Medication is of interest to teachers because the drugs used in the management of these disorders have a pronounced effect on behavior.

3. Studies have shown that relatively large numbers of school children are on medication for hyperactivity.
4. Studies of treatment procedures for hyperactive children have clearly demonstrated the importance of school participation in drug treatment.

An abstract for this publication is scheduled for the July issue of *Resources in Education*.

4. ERIC Clearinghouse on Higher Education

- a. "Alternatives to Tenure," by Thomas Linney.
- b. "Learning Styles: Their Impact on Teaching and Administration," by Charles Claxton and Yvonne Ralston.
- c. "Compliance with Federal Regulations: At What Cost?" by Carol Herrstadt Shulman
- d. "Interdisciplinarity: The Mutable Paradigm," by William Mayville.

5. ERIC Clearinghouse on Information Resources

- a. *Information in Social Gerontology*, by Marta L. Dosa and Stephanie Ardito-Kirkland. 52 Pages, Order Number: IR-31. Available from: Syracuse University Printing Services, 125 College Place, Syracuse, New York 13210. Price: \$3.50 plus \$.50 postage.

An essay indicating issues and trends in social gerontology is followed by a bibliography designed to assist information and library professionals to gain some insights into the major themes and issues. The focus is on the role of information and data in gerontological research, public policy and service delivery, and on information and library services to older persons.

6. ERIC Clearinghouse on Reading and Communication Skills

- a. *Oral Language: Expression of Thought*, Nicholas Anastasiow, 35 pages, March 1979, CS 204 727. Available from: International Reading Association, 800 Barksdale Road, Newark, Delaware 19711. Cost: not yet determined.

Updated version of an earlier edition concerning the role of oral language in a child's learning experience and suggesting teacher techniques and materials.

NOTE: After extended negotiations with the Education Commission of the States, the Facility has arranged for all ECS publications to come to the Facility through Gladys Mills at ECS, with the exception of the National Assessment of Educational Progress and the Education Finance Center who already have the Facility on their mailing lists.

At the request of ECS, if you would like to receive any particular ECS title, please submit this information to the Facility and we will request the document from ECS for you. We hope this arrangement will result in the systematic acquisition of ECS documents and expedite their processing into ERIC.

**DOCUMENT REPRODUCTION SERVICE**

P.O. Box 190 ARLINGTON, VIRGINIA 22210 • (703)841-1212

OPERATED BY: **COMPUTER MICROFILM INTERNATIONAL, CORP.**

April 9, 1979

Mr. Jim Prevel
National Institute of Education
1832 M Street, N.W.
Washington, DC 20208

Dear Jim:

We have reviewed the RIEDEC78 Microfiche Inventory and Quality Check and the following is submitted.

1. The following microfiche will be produced from the cited documents and distributed as post issue remakes:

156 881 1/1	157 493 1/1	157 681 1/2
156 970 1/1	157 499 1/1	157 703 1/1
157 032 1/2	157 504 1/1	157 888 2/2
157 242 1/2	157 535 6/6	157 933 1/3, 3/3
157 294 1/1	157 578 1/2	157 934 3/3
157 325 1/1	157 644 1/4, 2/4, 3/4, 4/4	157 935 1/2, 2/2
157 344 1/1	157 677	157 950
157 471 1/1		

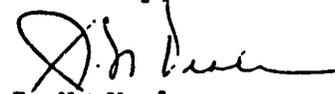

2. The following documents are not recommended for refilming:

<u>ACCESSION</u>	<u>CLHSE</u>	<u>LEVEL</u>	<u>RESUME NOTE</u>	<u>NOT RECOMMENDED FOR REFILMING DUE TO:</u>
156 863	CE	II	None	Thin, light print
156 865	CE	I*	Yes	Thin, light print
156 871	CE	I	None	Filed as received
156 909	CE	II	Yes	Quality of pages renders filming impossible
156 918	CE	II	None	Page 2D not received, neither were pages 2A, 2B or 2E received. Filmed as paginated
156 990	CG	I*	Yes	Document of poor quality and was filmed as received
156 991	CG	I	None	Filed as paginated
157 011	CS	I*	None	Small thin light italic print
157 058	CS	I	None	Document only has 27 pages, no problem found
157 078	CS	I*	Yes	Resume note is self-explanatory. Portions of pages vary too widely in density
157 081	CS	I*	None	Light page
157 089	CS	I*	None	Light thin print on blue paper

<u>ACCESSION</u>	<u>CLHSE</u>	<u>LEVEL</u>	<u>RESUME NOTE</u>	<u>NOT RECOMMENDED FOR REFILMING DUE TO:</u>
157 136	CS	I*	None	Page 11 readable, but has small, thin, light print. Pages contain various pasted portions of different density
157 447	HE	II	Yes	Small, very light print
157 448	HE	I*	None	Light, worn out print
157 462	HE	II	Yes	Small, light, thin print
157 470	HE	I*	Yes	Light, broken print
157 494	HE	I	None	No problem
157 497	IR	I*	None	Portions of pages 4 and 6 are out of focus on the original document
157 502	IR	I*	Yes	Light, thin print
157 520	IR	I*	None	Thin, light, broken print
157 535	IR	I	None	No problem found on pg. 303, sent new fiche to Facility
157 557	IR	II	Yes	Pgs. 14, 52, 65 - filmed as received, small print
157 601	PS	I*	Yes	Thin, light, broken print
157 677	RC	II	Yes	Small, thin, light print
157 756	SE	II	Yes	Smearred print
157 870	SP	I*	None	Broken, worn out print
157 882	SP	II	Yes	Small, thin, light, worn out print
157 888	SP	II	Yes	Thin, light, broken print
157 933	TM	I*	None	Light, worn out print
157 934	TM	II	None	Pg. 4 on dark blue background
157 936	TM	I*	None	Light thin print
157 941	TM	I	None	Filmed as received
157 973	UD	II	Yes	Weak, broken print

3. It is recommended that the ACCESSIONS showing asterisks (*) be changed from Level I to Level II.
4. It was noted during the review of the December Inventory that the ERIC Facility listed for possible refilming many accessions that had resume notes which stated that the original documents were of marginal legibility. Thus a considerable amount of time was expended by EDRS to confirm what was already a stated fact. It is recommended that future inventories take into consideration any notes concerning the quality of the original documents and that EDRS not be asked to consider possible refilming of documents known to be of marginal quality and designated as Level II documents.
5. It is noted that the 27 microfiche to be refilmed represents a remake rate of only 1.8% of the original microfiche created and only 2% of the documents filmed.
6. The Original Source Documents cited in paragraph 2 above are being returned to the ERIC Processing and Reference Facility for review.

Sincerely,

J. N. Veale
Director

- Attachment 9: Microfiche Inventory Quality Check for REIFEB79
- Attachment 10: Standing Order Customers - Additions and Cancellations
- Attachment 11: Descriptor Justification Status Report

ACTION ITEMS

1. SOC REDISTRIBUTION PLAN

At the ERIC Directors' Meeting on March 1-2, 1979, it was noted that several Clearinghouses are serving a disproportionate number of standing order customers as a result of the relocation of a couple of Clearinghouses, and that a SOC redistribution is in order. Before such a redistribution plan could be completed, however, it was suggested that each Clearinghouse submit to Central ERIC a list of their current SOC's by state, territory, or province (Canada). The intent of the new plan is to avoid unnecessarily disrupting any Clearinghouse-SOC relationships that have been established.

To date only two Clearinghouses have submitted lists. This is a reminder to the other Clearinghouses to send in their lists to Mildred Thorne at Central ERIC by June 1, so that the redistribution plan can be implemented by the summer of 1979. A belated thanks to the two Clearinghouses that were "on the ball."

...Mildred Thorne (Central ERIC)

2. SUBJECT INDEXING OF CIJE JOURNAL ARTICLES

At the present time, the *ERIC Processing Manual* still specifies an overall limit of ten (10) total Descriptors for CIJE accessions. This limitation was originally specified by Macmillan as a way of restricting file size. During Macmillan's last year, they agreed to lift this restriction and to have CIJE operate under the same indexing rules as RIE. Though agreed to at an ERIC Technical Meeting (1978), the related paperwork ran into the contract competition period and was never issued. Oryx has now requested that this change be formally accomplished. The rule for *both* RIE and CIJE will be as follows:

"At least one (1) major Descriptor must be assigned to a document or journal article; not more than five (5) major Descriptors are permitted for each item (six (6), if only one (1) major Identifier is used). There is, however, no upper limit on the total number of Descriptors that can be used to index a given item; the average for RIE is about eleven (11); the average for CIJE is around seven (7).

"There is no minimum requirement for Identifiers; no more than two (2) Identifiers should be designated as a major."

This will be incorporated into the *ERIC Processing Manual*.

...Ted Brandhorst (ERIC Facility)

3. PUBTYPE CLARIFICATIONS

At the National Technical Meeting, May 1-3, an hour session was devoted to the PUBTYPE data element and problems experienced by Clearinghouses to date in its application. The following clarifications were requested:

A. Code/Descriptor Relationship

A code for a broad category should be followed immediately by the Descriptors that apply to that code. This is true no matter how many broad categories may be assigned. In the PUBTYPE Index, Descriptors will be displayed indented beneath the code after which they were placed in the individual resume records. Under normal circumstances a given Descriptor will be associated with only one category (as indicated in the *ERIC Processing Manual* table listing applicable Descriptors).

B. Keying for OCR

Keying of this field for OCR should follow the routine conventions described in the *OCR Keying Manual*. In other words, the data should be keyed in run-on fashion following the appropriate identifying tag. An example of a PUBTYPE field with two categories would be as follows:

PUBTYPE:: 051; Classroom Materials; 030; Scripts

C. Necessity for Descriptors

A PUBTYPE code is mandatory. Descriptors are optional, but only because an appropriate Descriptor may not exist. If an appropriate Descriptor exists, it definitely should be used. This is true even if the Descriptor seems to be subsumed under the name of the broad category. If one Clearinghouse merely uses a code, e.g., "160" and another uses both the code and a Descriptor, e.g., "160; Questionnaires," then the titles will file in two close, but different, locations in the PUBTYPE Index, one directly under the category name, and the second under the Descriptor which is in turn under the category.

D. Limited Set of Descriptors (That Can Be Used in PUBTYPE Field)

A limited set of Descriptors, gleaned from a comprehensive search of the *Thesaurus*, will be arrived at for presentation at the next ERIC Regional Technical Meeting (September 1979). If approved, this set will be written into the PUBTYPE guidelines in the *ERIC Processing Manual*.

E. Overlapping Definitions

The 052 category (CLASSROOM USE MATERIALS FOR THE TEACHER) says that it includes "teaching tips, teaching techniques, How to Teach materials." The 141 (PROJECT/PROGRAM DESCRIPTORS) category says that it includes report of "This is how we did it" and "What I do in my class." The reference to "class" in both categories

was found to be confusing by some staff. One suggestion was that the 141 category scope note be revised so as not to compete with 052 for materials intended for teacher use. A second suggestion was that 052 be limited to the more formal classroom use materials (recognizing that "formal" is a difficult word to define). In the *ERIC Processing Manual* revision currently underway, both suggestions will be utilized.

F. Materials Without a Category

It was observed that there are many "Guides" intended for groups such as Parents or Lawmakers that presently don't qualify as "Practitioners." If the only place that Guides can be categorized is the 050-055 group, then there doesn't seem to be a pigeonhole for such items. It was suggested that the 050-055 definitions (particularly 055, which is "NON-CLASSROOM USE") be modified to create a home for such materials.

G. PUBTYPE Codes and CIJE

All journal articles, whether RIE or CIJE, should, at a minimum, be tagged with PUBTYPE Code 080. Since virtually all CIJE accessions should be so coded, however, Oryx Press has recently agreed to do this automatically, via the computer programs that create the data base. This automatic coding will obviate the need for the Clearinghouses to key "PUBTYPE:: 080" on each CIJE resume; it will also save Oryx the cost of scanning and checking this part of the record.

In coding CIJE accessions for PUBTYPE, therefore, *Clearinghouses need consider only those categories other than 080*, where appropriate.

This instruction will be incorporated into the *ERIC Processing Manual* (Section V).

...Ted Brandhorst (ERIC Facility)

I. CENTRAL ERIC ANNOUNCEMENTS

A. COPYRIGHT PERMISSIONS FOR ERIC INPUT: ONE SITUATION

Copyright permission for ERIC input was discussed in the March issue of the *ERIC Administrative Bulletin*. The conclusion was that, where the language of the original copyright permission is not readily available, certain assumptions can be made regarding the scope of the permission in order to determine whether copyrighted material within a document needs to be excised before the document is placed in ERIC. It was stated that, where the document had not been published previously, it could be assumed that the permission was broad enough to cover ERIC processing. However, if the document had been published previously, then that assumption would be dangerous.

Upon further reflection, we do now believe that such an assumption would not be dangerous, provided that there is no evidence that the permission was intended to be limited to the original publication. The reason for this is that ERIC should not be thought of as a second and different publication; rather, it should be thought of as an extension and further distribution of the original publication. Accordingly, the opinion has been revised and the revised version is included in this issue of the EAB as Attachment 1.

...Morton Bachrach (Copyright Attorney)

B. COPYRIGHT RELEASE STATEMENT

Since January 1, 1978, the ERIC system has been operating under the new copyright law and securing copyright release for the majority of the documents entered into the system. The release form used presently gives reproduction permission to ERIC and "users of the ERIC system."

In order to give EDRS protection from anyone that might systematically reproduce microfiche for standing order customers, it is necessary to tighten the language in the reproduction release. There will be two changes:

1. The sticker will be changed to delete the words: "*and users of the ERIC system.*"
2. The new release statement signed by authors will be changed to read:

"I hereby grant to the Educational Resources Information Center (ERIC) permission to reproduce this document as indicated above. Reproduction by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction of microfiche by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."

The ERIC Facility will be supplying Clearinghouses with new forms and stickers by June 1, 1979. For documents received back from authors after that date, new release statements do *not* have to be solicited. Send out the new forms after June 1, 1979.

...B.C. (Central ERIC)

C. NOTIFICATION OF SELECTION DECISION TO SEA'S

During the past year, ERIC technical assistance teams have visited eight State Education Agencies (SEA's) to help them understand the issues involved in constructing computer files that are "compatible" with ERIC. In the process of collecting documents for their own files, we have urged that they cooperate with ERIC by submitting appropriate documents for consideration. In general, they have offered to be state "collection centers" and to give us better coverage of state-produced documents than we have had in the past. The primary difficulty they have expressed to submitting such documents to ERIC is the length of time to find out if the document has been accepted or rejected. This information can become crucial in those situations where the state plans to process for its own file those documents not accepted by ERIC.

Because they can help significantly with the acquisition of documents, we have designed a postcard that SEA's can attach to documents for Clearinghouses to return *at the time the selection decision is made*. Illustrated below is a model Reply Card that the State Technical Assistance Project is prepared to provide to interested SEA's.

<u>Submitting State Education Agency</u>
<u>REPLY CARD</u>
Document Title: _____
Clearinghouse Temporary Accession # : _____
SEA Check One: <input type="checkbox"/> Reproduction Release Enclosed <input type="checkbox"/> ERIC has Blanket Reproduction Release on File
Check One: If not selected: <input type="checkbox"/> Return <input type="checkbox"/> Do Not Return
<i>(Please do not ask for return unless absolutely necessary.)</i>
<u>ERIC Disposition of Document :</u>
<input type="checkbox"/> Selected for RIE. Resume will appear in RIE in about 4 months. Copies cannot be ordered from EDRS before announcement in RIE.
<input type="checkbox"/> Not selected for RIE.
COMMENTS: _____
Clearinghouse Name: _____ Date: _____
HAVE YOU ENTERED YOUR CORRECT RETURN ADDRESS ON THE FRONT OF THIS CARD?

.. .C. (Central ERIC)

D. ERIC TECHNICAL STEERING COMMITTEE RECOMMENDATIONS

During the past year, suggestions and recommendations have been made at Regional Technical Meetings and referred to the ERIC Technical Steering Committee for further review. The Committee screened, considered, consolidated, and submitted the recommendations to Central ERIC. The recommendations and Central ERIC's response to each is contained in Attachment 2.

The Regional Technical Meetings and the work of the ERIC Steering Committee, chaired by John Waters of the ERIC Clearinghouse on Teacher Education, has provided a valuable and systematic process to deal with system concerns and suggestions. In addition, the Committee planned the recent National Technical Meeting. Numerous individuals have expressed appreciation for the good job they have done, and we add ours.

...B.C. (Central ERIC)

E. POLICIES AND GUIDELINES FOR FOREIGN DOCUMENTS

A committee of ERIC Clearinghouse Directors, chaired by Don Ely of the ERIC Clearinghouse on Information Resources, has developed and approved a statement of policy and guidelines for acquiring and selecting foreign documents. The policy statement was approved by the directors in their March meeting and referred to Central ERIC. The policy statement, which is now in effect, is contained in Attachment 3.

... B.C. (Central ERIC)

F. LOGO (STANDARDIZED VERSION)

At present, the existing ERIC logos being used by the ERIC network vary in boldness, distance between letters and the surrounding box, size and placement of the registered trademark symbol ®, etc. The ERIC logo should be uniform in appearance on all publications, stationary, and other printed materials.

The ERIC Facility has made two sets of the official ERIC logo in various sizes ranging from 2-7/8" to 5/8". These are included with this issue of the EAB. Please use them whenever it is necessary to use ERIC in a box, with the registered trademark symbol.

...Bob Chesley (Central ERIC)

G. VIP PROJECT COORDINATOR CHANGE

It is with regret that we announce that Barbara Booth of the ERIC Clearinghouse for Junior colleges will be leaving the ERIC system at the end of May. In addition to her Clearinghouse duties, Barbara has provided top quality leadership and creative guidance in her role as Vocabulary Improvement Program Coordinator. We thank Barbara for her efforts throughout the project's history and extend best wishes to her in her new position.

The duties of Coordinator of the Vocabulary Improvement Project will be assumed by Lynn Haupt of the ERIC Clearinghouse on Higher Education. This change will occur officially on July 1, 1979. Lynn will receive the full support of Central ERIC and, I am certain, all system components.

...Pat Coulter (Central ERIC)

H. DIRECTORY OF ERIC MICROFICHE COLLECTIONS; ON MICROFICHE

Two microfiche of the *Directory of ERIC Microfiche Collections* are enclosed with this issue of the EAB.

By using the microfiche with your reader-printer before and during meetings, conventions, etc., hardcopy prints can easily be made of those pages specific to any user's geographical interest.

This procedure can economize on entire issues of the *Directory*, when users are only interested in one or two pages of information.

...Jim Prevel (Central ERIC)

I. ERIC NATIONAL TECHNICAL MEETING

The ERIC National Technical Meeting was held at the University of Maryland's Adult Education Center on May 1-3 with seventy-two members of the ERIC family in attendance. The general consensus of the evaluations completed after the meeting was that it was an excellent meeting and that the ERIC Technical Steering Committee deserved high marks for planning such an interesting agenda. Particularly outstanding ratings were given Lynn Smarte and June Ramos for their brainstorming session on "Marketing ERIC Products;" to Lynn again for her great presentation on open workshop techniques; and to Frank Bryars, Lee Schreiber, and Barbara Booth for their presentation on document preparation.

The Vocabulary Improvement Project (VIP) session which preceded the general meeting concentrated most of its discussion on how to meet the program's target date of September 14 for completion of Clearinghouse input into the project.

It was generally agreed that the conference facilities were excellent and that the lodgings were great, particularly for the price, although there were few restaurants within walking or reasonable driving distance. The locale of the 1980 meeting place has not yet been selected, but the Maryland site will most likely be a candidate. Your comments and suggestions are solicited.

Following completion of the last agenda item at noon on Thursday, the ERIC Technical Steering Committee remained for the rest of the day to discuss future special projects and plans for the coming year. Kathleen McLane and Lynn Smarte participated as committee members for the last time. ERIC wants to publicly acknowledge the very great contribution both Kathleen and Lynn have made to the system through their work on the committee.

F.S. (Central ERIC)

J. ERIC CLEARINGHOUSE CHANGES NAME AND LOCATION

The ERIC Clearinghouse on Early Childhood Education has changed its name to the ERIC Clearinghouse on Elementary and Early Childhood Education. The Clearinghouse, which is located at the University of Illinois, is moving to the main building of the College of Education at the Urbana Campus, making possible extensive interaction between Clearinghouse staff and the college staff, students, and visitors.

The new address is:

ERIC Clearinghouse on Elementary and
Early Childhood Education
University of Illinois
College of Education
Urbana, Illinois 61801
(217) 333-1386

...Frank Smardak (Central ERIC)

K. CIJE COPYRIGHTED BY THE ORYX PRESS

The Oryx Press has requested and has officially received authorization from NIE to copyright both the magnetic tapes used in the preparation of CIJE and the contents of the journal. Under this arrangement, ORI, Inc. will receive "the exclusive license to reproduce and distribute, in accordance with ORI's ERIC Facility contract with NIE, the CIJE data base tapes." It is intended that the notice of copyright and of what use may be made of the tapes will appear on each one. Exception is made for ERIC to print indexes and for computer searchers to print abstracts "resulting from discrete computer searches of the CIJE data base."

...Kit Welsh (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. PLAY THESAURUS/VIP INPUT

Play Thesaurus (PT) 2, including all VIP input through February 7, was sent to the Clearinghouse VIP Coordinators on April 16. PT 3 (input through February 28) and the *VIP Two-Way Hierarchical Display* were ready as planned for the April 30 VIP Coordinators' Meeting.

With the problem of the asterisks apparently worked out of the PT software, the Facility should now be able to publish PT's at regular intervals through the remainder of the VIP Project. PT 4 is expected to be distributed on May 29, with PT 5 following on June 18. The final PT (#9) is scheduled for distribution in October 1979, including input through September 14.

VIP input totals through May 17 are as follows:

CE - 62	JC - 170 (38 - closure <u>PT</u> 1-3 work)
CG - 266 (97 - OK as is)	PS - 79
CS - 72	RC - 71
EA - 105	SE - 74 (9 - OK as is)
EC - 117	SO - 67
FL - 70	SP - 66
HE - 96	TM - 113
IR - 74	UD - 68

SUBTOTAL - 1,570

AA (Facility) - 753 (reactions to CH input, PT 1-4) **

GRAND TOTAL - 2,323

**NOTE: PT 4 includes 728 CH DJF's, cumulative input through March 13.

At the April 30 VIP Coordinators' Meeting, the Facility was asked to provide an "index of terms worked on" to accompany each edition of the PT. (Indexes for PT's 1-4 will be ready shortly.) The purpose is to facilitate Clearinghouse review of lexicographic decisions. These indexes will also allow the Facility to report numbers of terms worked on, rather than a simple DJF input count which doesn't accurately reflect VIP progress.

The VIP Meeting covered a variety of other topics, among which were new Descriptor Groups developed by Barbara Booth, Project Coordinator, and ways to deal with the *Thesaurus* form Descriptors in light of the new PUBTYPE scheme.

In addition, Barbara Booth reported that Clearinghouse VIP work is about 40% completed. With over one-half of the allotted time gone and evidence of trouble completing assignments, it was decided to reiterate the original VIP goals so that the most vital work can be completed. A special ad-hoc meeting of the Coordinators was called during the Wednesday interactive session of the National Technical Meeting. Three primary VIP goals were reviewed:

1. to remove/merge synonyms and ambiguous terminology;
2. to eliminate the Descriptors in one's subject-speciality area that are not being used; and
3. to write Scope Notes for any and all terms where the meaning is not clear or is subject to misinterpretation.

Achievement of closure on all work already submitted is also to be given top priority.

It was emphasized that the push should be to complete the above essential tasks and that, if necessary, work on cross-references (BT's, NT's, and RT's—not UF's) could be made a secondary priority. Barbara Booth has more fully documented the discussion in the May 7 edition of *VIP News*.

Barbara Booth announced that she will be leaving the VIP Project (and ERIC) on June 1, 1979. Barbara's knowledge of ERIC, value to the VIP, and general creative energies elicit superlatives. She will be greatly missed. Bob Chesley has announced that Lynn Haupt of the ERIC Clearinghouse on Higher Education, will be the VIP Coordinator.

...Jim Houston (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. CE DIRECTOR LEAVING

Dr. Maria Peterson has been promoted to the position of Associate Director for Resource Development at the National Center for Research in Vocational Education, Ohio State University, effective July 1, 1979. Peterson has been the Director of the ERIC Clearinghouse on Adult, Career, and Vocational Education since September 13, 1977.

The National Center is conducting a nationwide search for an ERIC Clearinghouse director with the university title of Senior Research Specialist. Qualifications include a doctoral degree; education and experience in adult, career, or vocational education; experience in program management; and evidence of professional writing and leadership. Interested individuals should refer to Position #A126 in an application letter, including professional resume, sent to:

Ms. Jill Holland
Manager, Personnel Services
National Center for Research
in Vocational Education
Ohio State University
1960 Kenny Road
Columbus, Ohio 43210

The National Center is an equal opportunity/affirmative action employer. Qualified women and minorities are encouraged to apply.

...(CE)

B. PAPERS EXAMINE IMPACT OF COURT DECISIONS ON SCHOOL POLICY

The courts' impact on schools was the focus of eight papers presented at a recent conference in Madison, Wisconsin. The conference, held April 26-27, was co-sponsored by the ERIC Clearinghouse on Educational Management and the University of Wisconsin-Madison, which also served as host.

In recent decades, judges' decisions have had a pronounced influence on school policy, particularly in the areas of desegregation, finance, and student rights and discipline. Analysis of the impact of these decisions is a task that requires the research skills and perspectives of several disciplines.

Appropriately, the conference was eclectic in both subject matter and attendance. Scholars from the fields of law, political science, sociology, and education, as well as school practitioners and attorneys, presented and discussed the papers, which examined different aspects of the courts' impact on education.

The first paper, "Approaches to the Study of Court Impact," by Malcolm M. Feeley, Department of Political Science, University of Wisconsin-Madison, considered how social scientists have studied the question of impact and the theoretical and methodological approaches they have used. Feeley also delineated which questions have been asked, which ones answered, and which remain.

"On Doing a Values Study of a High Court Decision" was the topic of a paper by Philip K. Piele, Department of Education Administration, at the University of Oregon. Piele's paper discussed the social and cultural assumptions made by courts, as well as the courts' views of children and of the proper social functions of schools.

David Bennett, Deputy Superintendent of the Milwaukee Public Schools, in "Defendants' View of Impact," considered the impact of protracted litigation on an urban school system. Bennett examined, among the other consequences of desegregation suits, how litigation has changed the job of administrators.

Thomas F. Pettigrew, Department of Sociology at Harvard University, presented a paper on "Tension Between the Law and Social Science: An Expert Witness' View." Pettigrew, the agent of the court in the Los Angeles desegregation case and a frequent expert witness, argued that adversary proceedings are not conducive to the use of social science evidence for answering complex educational and social questions.

The fifth paper considered the secondary consequences of court-ordered desegregation, using Boston as an example. Walter McCann, Graduate School of Education at Harvard University, in "Court Ordered Desegregation as a Vehicle for Education Innovation," looked particularly at the unanticipated impact of litigation on school personnel.

Jack Greenberg, Director-Counsel of the NAACP Legal Defense Fund, delivered an address entitled, "Twenty-five Years after Brown v. Board: Plaintiff's View of Impact." Greenberg, an attorney who participated in Brown and subsequent education cases, discussed the appropriate role of the courts in protecting minority rights and the strategies employed by those using the courts for this purpose.

In "Fiscal Equity," William H. Clune III, Law School at the University of Wisconsin-Madison, considered different conceptions of fairness in school finance and the different impacts on school systems of judicial decrees resulting from each conception. Clune compared and contrasted two finance decisions, Serrano v Priest and Robinson v Cahill.

The final paper, "Student Rights and Discipline," was presented by Ellen Jane Hollingsworth of the Center for Public Representation. Hollingsworth looked at the central arguments offered in Supreme Court student rights cases and examined the impact of these cases on the public schools, from both theoretical and observational standpoints.

The Clearinghouse commissioned the authors and is editing the papers for publication in a monograph series.

...Stuart Smith (EA)

C. EC CLEARINGHOUSE SUPPLIES REPORTS FOR CEC DIVISIONS' PUBLICATIONS

At this year's Annual Convention of the Council for Exceptional Children (CEC), editors of CEC Division journals met with the staff of the Clearinghouse and CEC Publications Unit. The meeting was intended to foster increased cooperation between editors at CEC's national headquarters and editors of journals and newsletters published by Divisions affiliated with CEC.

For several years, CEC has made ERIC document information available to the editors of its divisions' publications. CEC has 12 divisions, each focusing on a specific area of special education, e.g., Career Education, Education of Talented and Gifted Children, etc. four times a year selected abstracts are sent to each editor to be used at the editors' discretion. Two divisions are supplied with regular columns:

- CEC-ERIC's "The Now Way to Know," featured in *Education and Training of the Mentally Retarded*, the journal of the Division on Mental Retardation, which usually highlights emerging issues or perspectives in the field; and
- CEC/ERIC's "Views and Reviews," which appears twice yearly in *Behavioral Disorders*, the journal of The Council for Exceptional Children with Behavior Disorders, a topical column that reports significant research and programs from the ERIC file.

A similar approach will be initiated this coming year for the journal of the Teacher Education Division.

...Jean N. Nazzaro (EC)

D. IAP DIRECTORY FILLS NEED AS AN INSTRUCTIONAL TOOL AT WORKSHOPS

A long-felt need for a practical, usable, up-to-date instructional tool for workshops on how to use RIE has been filled by the Facility's latest directory of IAP's. We have been saying

for a long time how nice it would be to have enough copies of the same issue of RIE so that everyone could be looking at the same thing at the same time! Everything needed for instructional purposes is there, except samples of Level II and Level III documents, an omission which can be noted in passing.

The additional information on CIJE and EDRS, as well as the scope notes of all the Clearinghouses, will make this a very welcome and compact handout for participants. We also appreciate the fact that the smaller size will be easier to transport in bulk—and we hope that the Facility will appreciate the wider audience this use will enable them to reach. Whether this was inspiration or serendipity, we are grateful—thank you.

...Barb Minor (IR)

E. PS ASSISTING ALABAMA'S AIDS PROJECT IN DEVELOPING STATE FILE

The ERIC Clearinghouse on Elementary and Early Childhood Education is assisting the State Department of Alabama (AIDS) project in developing a state file by preparing machine-readable resumes of Alabama document resumes. The OCR resumes will then be transferred to magnetic tape at the ERIC Facility. This project is similar to one previously underway at the same Clearinghouse for the Kansas State Department of Education (KEDDS) file building project.

...M.S. (PS)

F. PS STAFF ATTENDS CLINIC ON LIBRARY APPLICATIONS OF DATA PROCESSING

Mima Spencer, Linda Baskin, and Dianne Rothenberg of the ERIC Clearinghouse on Elementary and Early Childhood Education recently attended a Clinic on Library Applications of Data Processing held at the University of Illinois. Among other papers presented were three particularly relevant to ERIC:

- Martha Williams discussed future directions for machine-readable data bases and their uses;
- Richard Roistacher considered prospects for electronic journals; and
- Murray Turoff and Starr Roxanne Hiltz reported on electronic information exchange and its impact on libraries.

...M.S. (PS)

G. ERIC/ECE NEWSLETTER NOW PUBLISHED SIX TIMES A YEAR IN NEW FORMAT

Readers of the *ERIC/ECE Newsletters* were introduced to a new look and to a new publication schedule with the April 1979 issue. The *Newsletter* will now provide timely information on upcoming conferences, workshops, and publications.

...Mima Spencer (PS)

H. A NEW INFORMATION RESOURCE ON EDUCATIONAL PRACTICES TO BE TESTED

The ERIC Clearinghouse for Science, Mathematics, and Environmental Education (ERIC/SMEAC) is participating as one of twelve sites in the country in a pilot test of a new information resource. This resource, to be known as the National Educational Practices File (PF), will contain information about programs, projects, practices and instructional materials used by teachers, principals, curriculum specialists, and others.

The Educational Practices File (PF) is a collection of abstracts and materials stored in a computer and retrievable through computer terminals in twelve locations. The File will operate much like the existing ERIC system, with a few added features to accommodate the information needs of school personnel.

The PF will contain information on projects participating in the National Diffusion Network, as well as exemplary programs developed by states and local school districts from around the country. Adequate referral information will be available to allow the user to locate materials and contact other people where appropriate. Content includes such areas as math, science, and environmental education.

A citation retrieved from the file contains indexing information on title, author, source of funding, and other major program characteristics. There are some items added to the citation that are not found in an ERIC abstract. At present the pilot file is a limited file and includes approximately 2,000 practices of projects gathered from the following sources:

- Nationally validated projects;
- State validated projects; and
- Locally developed projects and materials.

Sponsored by the National Institute of Education (NIE), in the Department of Health, Education, and Welfare, the design and development of the new file is being undertaken for NIE by Bibliographic Retrieval Services (BRS) of Scotia, New York. BRS staff consulted with educators from all over the country before designing the file. A national advisory group provides guidance to the project.

The new system is now being pilot tested in a dozen information centers located throughout the country. These centers will use the File to respond to requests for information submitted by their clients. School district and state department clients will be asked to test and evaluate the new File and suggest ways in which it might be improved. Once the pilot test is complete, BRS will be able to make recommendations to NIE regarding future developments of the File. A more extensive field test of an expanded File (both size and content scope) is planned for 1980.

Teachers, principals, administrators, and other educational practitioners seeking to improve their local school programs are invited to use the File. Interested educational practitioners can contact ERIC/SMEAC where staff conduct on-line searches of the data base and retrieve indexed information through a printout of abstracts. Results of the search consist of abstracted and referenced information from the source documents.

If you would like more information about the Educational Practices File, please contact:

Dr. James Kozlow
of
Mr. William Barner
ERIC/SMEAC
1200 Chambers Road, Room 310
Columbus, Ohio 43212

...B.M. (SE)

I. ELECTIONS TO PROFESSIONAL ORGANIZATIONS

Dr. Stanley Helgeson, Associate Director for Science Education, was elected President-elect at the National Association for Research in Science Teaching annual meeting.

Dr. John F. Disinger, Associate Director of Environmental Education, has been elected to Fellowship in the Ohio Academy of Science. Fellows of the Academy are members who are engaged in extensive scientific work or who have rendered special service to the Academy.

...Beverly Malcolm (SE)

Revised 4/5/79

Copyright Permissions for ERIC Input: One Situation

(Opinion by Morton W. Bachrach)

Sometimes a document which is submitted to ERIC contains a segment taken from a different, but copyrighted, work. For example, a research report or other document might contain a quotation from a copyrighted newspaper or journal. Does the copyrighted segment have to be excised from the document before the document is placed in ERIC?

The copyrighted segment would have to be excised from the document before ERIC input unless: (1) ERIC has permission from the segment copyright holder, or (2) the segment is so small, in comparison with the overall document, that its use would be allowable as "fair use."

How does ERIC determine that the permission which the author of the document has received, from the author or publisher of the copyrighted segment, covers ERIC input? The best way to make that determination, of course, is to examine the permission language. If it is broad, i.e., not limited to a publisher other than ERIC, it can be assumed that the permission includes ERIC input.

Frequently it will not be possible to examine the permission language. In many cases, the only indication will be a statement from the document author that he/she has received permission from the segment copyright holder and/or the document bears a notice to the effect that the segment was "reprinted by permission." In that situation, it might be necessary to surmise the scope of the permission based upon the circumstances. If the document has not been published previously, it can be assumed that the permission was intended to cover ERIC input. Even if the document has been published previously, it would appear reasonable to assume that the permission is broad enough to include ERIC input because that input is, in effect, an extension of the previous publication rather than a new publication.

Of course there could be special circumstances where these general principles would not apply. If there is some indication that the license was restricted, then the safer approach would be to inquire further or excise the copyrighted segment. Even if the permission is restrictive, the copyrighted segment need not be excised if its use is permissible under the "fair use" doctrine.

STEERING COMMITTEE RECOMMENDATION FORM

DATE March 6, 1979

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: That clarification be made as to the policy of searching
other data bases

SOURCE OF RECOMMENDATION: Regional Technical Meetings

COMMENTS:

Policy on Searching Other Data Bases

ERIC, important as it is as an educational data base, is not the only source for substantive material on many education topics. Data bases such as Psychological Abstracts, Sociological Abstracts, Dissertation Abstracts, NTIS, Agricola, etc., are examples of other such systems.

It is desired therefore, that all clearinghouse user services personnel be cognizant of which other national data bases contain significant literature which is related to the individual clearinghouse's scope. Familiarization with the specific subject matter of various related data bases can be readily obtained through examining brochures which are available from the pertinent data bases. Descriptions of contents of various data systems is also available in either of the following cited volumes:

Data Bases and Clearinghouses: Information Resources for Education, Info Series NO. 130, published by the Resource and Referral Service of ERIC, National Center for Research in Vocational Education, Ohio State University. (Copies of this volume have been distributed to each clearinghouse by the ERIC Clearinghouse on Adult, Career and Vocational Education.) Directory of On-Line Information Resources, 3rd Edition, March 1979, CSG Press, 6110 Executive Blvd., Rockville, Maryland, 20952

In addition, the System Development Corporation (SDC) has a service available through its Data Base Index (DBI) whereby search terms can be entered online and ranked listings of the best suited data bases obtained virtually instantaneously.

Please note that it is not intended that each clearinghouse become a world's authority on the contents of all educational data bases. Our stress on familiarization has a dual focus. First, with regard to preparation of information analysis papers which actually constitute state-of-the-studies: a search of ERIC alone would obviously not be sufficient. Second, with regard to outside users who present themselves at the clearinghouses indicating they desire all available literature on some particular subject: the sources of such information should be cited--but at the same time so should the fact that many of the other data bases are more expensive to search than ERIC.

One person at each clearinghouse should be knowledgeable about other subject data bases related to the clearinghouse scope and have some experience in running searches of such systems. Backup user service personnel should also have an awareness of the other available searching services but not necessarily any actual search experience. In summary, some searching of other data bases is encouraged, but budgetary considerations severely limit our ability to do so.

When special situations arise where additional knowledge is desired concerning specific data base's content, the ERIC Facility has access to employees on other ORI, Inc. contracts who have considerable experience in other data bases and can provide assistance on special problems.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: That there be an ERIC-wide annual report prepared
summarizing the year's Clearinghouse quarterly reports and CERIC
activities

SOURCE OF RECOMMENDATION: Regional Technical Meetings

COMMENTS:

The major thrust of this recommendation deals with communication between Central ERIC and the Clearinghouses concerning Central ERIC activities and those of the system as a whole. Several actions have already been taken which deal with these concerns. The ERIC Administrative Bulletin has become a vehicle for much more active dissemination of current information about Central ERIC and Clearinghouse activities. The March paper entitled "Dissemination of Educational Information Through ERIC," which was distributed to all clearinghouses, summarizes much of the collective clearinghouse activity. We do plan to resume continuation of quarterly report summarization.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: That there be a more equitable distribution of SOC's
among Clearinghouses

SOURCE OF RECOMMENDATION: Regional Technical Meetings

COMMENTS:

Central ERIC will develop a plan for an equitable redistribution of SOC's among Clearinghouses by August 15, 1979. To achieve equity in the new plan, Central ERIC will take into consideration: the total number of SOC's to be served by each Clearinghouse, the geographic distance of a SOC from the Clearinghouse, and minimal disruption of good relationships established between a Clearinghouse and its SOC's. The redistribution plan will be submitted to all Clearinghouses for review and comment before it is put into effect.

CLEARINGHOUSE ACTION: By June 1, 1979, each Clearinghouse should submit to Central ERIC (C/O Mildred Thorne) a current list of its SOC's by state.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: That there be a description of Identifiers included
in the printed edition of the Thesaurus

SOURCE OF RECOMMENDATION: Regional Technical Meetings

COMMENTS:

There will be a description of Identifiers, and how they are a part of indexing documents for RIE and journal articles for CIJE, in the 8th edition of the Thesaurus. This edition will be published in early 1980 after work on the VIP is completed.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: That working copies of the Rotated Display should
include UF terms on a continuing basis

SOURCE OF RECOMMENDATION: Regional Technical Meetings

COMMENTS:

This action has been taken and will continue.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: That Clearinghouses should share ways they are distributing
copies of microfiche to authors

SOURCE OF RECOMMENDATION: _____

COMMENTS:

We agree that it would be useful to share information among clearinghouses regarding techniques and process for distributing microfiche to authors. The National Technical Meeting is a natural forum, as well as brief, written descriptions in the ERIC Administrative Bulletin.

It appears that almost all clearinghouses are using the microfiche being received for this purpose. Considerable enthusiasm exists for the practice. So that individual authors can be informed that they will be receiving a microfiche copy, no matter what clearinghouse processes it, we plan to make it a standard system practice, to become effective on contract renewal, if it is not presently going on. The ERIC Processing Manual will be modified to reflect the change.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: That UMI pricing for CIJE articles be clarified

SOURCE OF RECOMMENDATION: Regional Technical Meetings

COMMENTS:

When the arrangements with U.M.I. to provide reprints of CIJE journal articles were first made with CERIC in the early summer of 1977, an agreement was reached to charge \$4.00 an article when it was identified by an EJ number. That price was to pertain from the time CIJE would first announce the reprint service as available in an issue of CIJE. However U.M.I. stipulated that the price of \$4.00 per article was "based on current CIJE article citations only and the regular price of \$6.00 per article would be continued for all retrospective materials," i.e. prior to the first announcement in CIJE.

There has been confusion about this since in the minds of those who have ordered reprints from U.M.I. and would one time be charged \$4.00 and another time \$6.00. Beside the above explanation it should be noted that unless an order specifically identifies CIJE as the source and cites an EJ number from or after the January 1978 issue of CIJE, the regular \$6.00 per article reprint will be charged by U.M.I.

So be sure to identify your order by CIJE, EJ number and date if possible.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: That the new standardized Document Transfer Form
be adopted by all Clearinghouses and included in Processing Manual

SOURCE OF RECOMMENDATION: Steering Committee

COMMENTS:

There is currently no formal method, with appropriate forms, for a clearinghouse to forward documents identified as relevant to the ERIC system to appropriate ERIC subject clearinghouses.

A document transfer form has been developed and will be circulated for comments before approved.

As a part of updating the ERIC Processing Manual, Section-4 Handling and Shipping can include a sample document transfer form and procedures for its use.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: FOR PROCESSING MANUAL: That consistent guidelines
be developed for handling publication series

SOURCE OF RECOMMENDATION: Regional Technical Meetings

COMMENTS:

The ERIC Processing Manual contains Section 2-Descriptive Cataloging, providing specific guidelines for cataloging a series title (page 163).

More specific information and recommendations are needed with regard to changes or clarification that is needed. We suggest a subcommittee may be able to deal with these recommendations this summer so that the changes can be incorporated in the revision of the processing manual which is in progress.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: ERIC

FROM: Steering Committee

RECOMMENDATION: That the possibilities for teleconferencing be investigated

SOURCE OF RECOMMENDATION: Regional Technical Meetings

COMMENTS:

This recommendation has implication for significant computer, line and personnel costs. Before proceeding further we are waiting for the recommendations of the National Bureau of Standards study concerning the use of technology in the ERIC system.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: The Steering Committee emphasizes the need for
consensus from all system components on Clearinghouse IAPs that represent
the system as a whole

SOURCE OF RECOMMENDATION: Steering Committee

COMMENTS:

In addressing this recommendation, Central ERIC would broaden it beyond IAP's to include any special project product (poster, film, brochure, document, etc.) that represents or has implications for the system as a whole. Review will be made by Central ERIC and an ad hoc group representing clearinghouse interests. Because consensus may not be possible, final decisions will be made by the responsible clearinghouse with approval by Central ERIC.

STEERING COMMITTEE RECOMMENDATION FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: That there be a summer seminar annually for different Clearinghouse concerns. The priority this year--the Steering Committee feels-- would be promoting and marketing IAPs and Clearinghouse products. A second choice would be a session on acquisitions.

SOURCE OF RECOMMENDATION: Regional Technical Meetings/Steering Committee

COMMENTS:

We recognize the usefulness to the system of meetings similar to the 1978 indexing/abstracting seminar.

Summer seminars could be considered in future years providing (1) concerns arise which have not been met by the national and regional technical meetings and (2) our budget permits the support of such meetings. In order for CERIC to consider summer seminars in future budget plans, we ask that the Technical Steering Committee furnish us with the priority topics for the next 3 years (1980-82). This information will permit us to move quickly should funds be available. Please submit these within the next two months as we will soon be involved in planning for 1980.

Acquisition and selection is the "topic of the year" for 1979. Although there are committee meetings to be held in connection with the activity, there is no system wide seminar that will be held in 1979.

STEERING COMMITTEE RECOMMENDATIONS FORM

DATE 3-6-79

TO: CERIC

FROM: Steering Committee

RECOMMENDATION: That a committee be formed composed of equal numbers of
of Directors and Technical staff to address ERIC marketing and promotion
possibilities

SOURCE OF RECOMMENDATION: Regional Technical Meetings

COMMENTS:

NIE has launched an experimental program to increase the participation of minority and women owned firms ("8(a) Program") in the Institute's procurement program. As a part of this program CERIC has proposed a project to market and promote ERIC services and products, including both the development of a systematic program as well as the production of graphics and other products.

Should this project be selected for funding, it will include support for a systemwide group to provide ideas and guidance on marketing and promotion of the system. If our bid for funding is unsuccessful, such input will still be necessary but, of necessity, will function at a much lower level of support. (Perhaps meet in conjunction with other ERIC meetings or at professional meetings.)

We agree that a small group, representative of all levels of CH operations, should be convened. The precise functions and mechanism for support must be deferred pending a decision on our "8(a)" proposal.

POLICIES AND GUIDELINES FOR ACQUIRING AND SELECTING FOREIGN DOCUMENTS FOR
THE ERIC SYSTEM

1. PURPOSE

To assist Clearinghouses in acquiring and selecting foreign documents; and to assist foreign nationals, international organizations, intergovernmental agencies, foreign ministries of education and other foreign government agencies in submitting documents to ERIC.

Rationale:

Acquisition of foreign documents is a cooperative venture between the Facility and the Clearinghouses. The Facility maintains agreements with foreign ministries of education and international organizations on behalf of the ERIC system. Selection is a Clearinghouse function. These policies and guidelines, together with those in the Processing Manual, should help to establish some consistency of foreign document input.

2. DEFINITION OF FOREIGN DOCUMENTS

Foreign documents are publications which are produced in a foreign country or by an international agency. Foreign documents may or may not be in a foreign language.

Rationale:

This definition is an attempt to differentiate between a foreign document and a foreign language document. Some foreign language documents are produced in the U.S. There are many foreign documents in English. The new GEO, GOV, and LANG data elements will help to promote acceptance of this definition.

3. LANGUAGE OF THE TEXT

When a document is not in English (whether it is foreign or domestic), it should be accompanied by a 1000-1500 word summary in English.

Rationale:

ERIC is an English language information system. In order to serve better the user population, a more complete summary of documents in foreign languages should be provided than that available in a 200 word abstract. Therefore, a 1000-1500 word English summary should accompany each foreign language document and the summary should be prepared by the individual or organization submitting the document as an integral part of the document. A 1000 word summary is often adequate to characterize the essential content of shorter documents received from foreign sources. Exceptions to the requirement of an English-language summary may be made when the potential users of the document are expected to be familiar with the language of the document; this would apply particularly to users of documents submitted by the Language and Linguistics Clearinghouse.

4. QUALITY OF CONTENT

Foreign documents should meet higher criteria of quality than those applied to domestic documents. Each Clearinghouse is encouraged to review its unique acquisition policies in regard to foreign documents and to develop its own priorities and special guidelines.

Rationale:

For there to be as little criticism as possible in regard to the inclusion of foreign documents, the significance and quality of foreign documents should be well above the level considered to be necessary for U.S. documents.

5. TECHNICAL REQUIREMENTS

All foreign documents should meet the technical standards required of all domestic documents. Such standards are concerned with reproducibility, physical quality, and page size. The ERIC Reproducibility Guidelines should be followed.

Rationale:

There is no reason to vary technical standards from those currently in force.

6. TYPES OF DOCUMENTS

Documents to be considered from foreign sources will be the same as those considered from domestic sources except for the following types which are not encouraged for submission: resource guides, legislation and regulations, brochures, and pamphlets. There will be exceptions but, as a general rule, those items which are easily dated, of highly specific local use, and which list resources generally available only in a foreign country should receive lower priorities.

Rationale:

Each Clearinghouse will ultimately make a selection decision but as a guideline to priorities there are certain documents, such as those mentioned above, which appear to be of lower priority than others.

7. LEVEL III DOCUMENTS

In general, Level III selections are not an option.

Levels I and II should be thoroughly explained to foreign contributors. The Level III option should never be used unless a reliable source of copies can be identified.

Rationale:

Foreign Level III documents should be discouraged even more than domestic Level III's. One way to do this is not to describe the option. However, there are rare times when foreign Level III documents should be included. This policy permits limited inclusion but strongly discourages solicitation of such documents.

Approved by the Council of ERIC
Directors 3/2/79

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC CLEARINGHOUSE ON INFORMATION RESOURCES

- a. *Elementary and Secondary Teachers Use ERIC*. Dale W. Brown, Patricia Mautino, and Lewis Saks. 42p. IR-29. \$2.00 plus postage.

Experiences with the ERIC system in three public school systems are profiled: Brown reports from Alexandria, Virginia; Mautino from Oswego County, New York; and Saks from East Detroit, Michigan. Topics include user interest surveys for selective dissemination of information; utilization in high school classes, professional and community groups, and planning committees, as well as in connection with coursework; ways in which teachers have access to ERIC; and types of materials and computer searches requested.

- b. *Trends in the Study of Incidental Learning from Television Viewing*. George Comstock. 57p. IR-30. \$3.50 plus postage.

Comstock provides an overview, as well as more detailed descriptions, of research findings in such areas as behavioral influence, cognitive and attitudinal effects, developmental factors, issues of authority, and the effects of mass media. An extensive bibliography is included.

- c. *Information in Social Gerontology*. Marta L. Dosa and Stephanie Ardito-Kirkland. 52p. IR-31. \$3.50 plus postage.

An essay indicating issues and trends in social gerontology is followed by a bibliography designed to assist information and library professionals to gain some insights into the major themes and issues. The focus is on the role of information and data in gerontological research, public policy and service delivery, and on information and library services to older persons.

- d. *Media in the Library: A Selected, Annotated Bibliography*. Evelyn Daniel with the assistance of Karen A. Stiles. 98p. IR-32. \$4.50 plus postage.

Almost 500 citations are listed in this comprehensive bibliography for the practicing librarian faced with problems of selection, acquisition, production, organization, and processing of nonprint materials and the provision of an integrated program of services. It would also be useful for library science students to use in conjunction with courses on nonprint media as well as for educational technologists working with libraries and librarians.

All orders should be prepaid and include 10% of the total order (\$.50 minimum) for postage and handling. Order from:

Syracuse University Printing Services
125 College Place
Syracuse, New York 13210

2. ERIC CLEARINGHOUSE FOR SCIENCE, MATHEMATICS, AND ENVIRONMENTAL EDUCATION

- a. *Abstracts of Presented Papers, NARST-1979.* \$3.50.

This publication contains abstracts of papers presented at the 52nd Annual meeting of the National Association for Research in Science Teaching (NARST), Atlanta, Georgia, March 21-23, 1979. Papers relate to science teacher education (preservice and inservice), cognitive development, learning, instruction, teacher and student behaviors, research design and other topics.

- b. *Research Reporting Sections, NCTM 57th Annual Meeting.* \$2.25.

This document provides abstracts of 20 research reports. Topics covered include: children's comprehension of simple story problems; field independence and group instruction; problem-solving competence and memory; spatial visualization and the use of manipulative materials; effects of games on mathematical skills; problem-solving ability and right hemisphere processing; effects of calculator use; effects of spatial instruction; conceptualization of subtraction; cognitive processes used in problem-solving; variables discriminating good and poor problem solvers; heuristic hints and the solution processes.

- c. *Current Issues in Environmental Education—IV.* \$5.00.

Included are 32 of the 73 papers presented at the 1978 conference of the National Association for Environmental Education. The papers are organized into seven sections. The first section contains a single paper on environmental ethics. The other six sections are on international environmental education, energy, systems, environmental studies, environmental education research, and environmental education programs.

- d. *Energy Education—A Bibliography of Citations from Current Index to Journals in Education (CIJE).* \$5.00.

These publications are available from:

SMEAC Information Reference Center
1200 Chambers Road, Room 310
Columbus, Ohio 43212

3. ERIC CLEARINGHOUSE ON TEACHER EDUCATION

- a. *The Supervision of Teachers: A Selected Annotated Bibliography*, BETS #10. Anne G. Nerenz and Constance K. Knop. 36p. February 1979. SP 013 796.

A concise reference source to texts and articles on current theoretical models and practical styles and techniques of supervision, this 36-page bibliography includes materials produced since 1965. Selections provide an overview to the historical development and current issues of teacher supervision. Citations are grouped under subject themes such as inservice supervision, self-analysis in supervision, roles and responsibilities of the college/university supervisor, and observation of teaching in the classroom.

Order from:

ERIC Clearinghouse on Teacher Education
One Dupont Circle, Suite 616
Washington, D.C. 20036

BETS #10. Single copy: \$2.00;
10-99 copies: \$1.80;
100+ copies: \$1.60.

- b. *Interpreting Research Results on Teaching. Commentary on Medley's Teacher Competence and Teacher Effectiveness: A Review of Process-Product Research*. Richard L. Turner, et al. 52p. January 1979. SP 013 682

Reactions to a 1977 review of process-product research by Donald M. Medley are presented by a number of education researchers and teacher educators. They comment on Medley's methodology and procedures, consider inferences and implications for teacher educators of the findings, and predict what the approach portends for the design of research and the selection of topics for investigation in teacher effectiveness. A summary of Medley's introduction to the 1977 monograph and a subsequent reappraisal by Medley are also included.

Available through EDRS - After processing.

- c. *Influencing Behavior Through Instruction: Methodology in Health Education*. Thomas J. Golaszewski. 32p. February 1979. SP 013 177.

In this 30-page document, the author briefly discusses the present status of health education in the United States, and provides a justification for the continued role of health education in the formal school structure. A review of three current health education strategies (Behavior Modification, Self-Management, and Activated Health Education) is presented, and salient elements from each are combined to form a composite behavior change model.

The composite model uses a multiphase approach with three steps: (a) student participation in appropriate laboratory experiences and behavioral evaluation procedures; (b) the supply of cognitive information to provide both a knowledge base for decision making and the development of "cognitive dissonance" (fear/anxiety arousal); and (c) values clarification leading to personalized action plans for behavior change. A sample unit outline on physical exercise is presented to illustrate details of the suggested model.

Closing comments discuss the aspect of teacher-as-role-model in health education; the author suggests that behavior change in pupils might most effectively be promoted by change in teacher behavior.

Available through EDRS - After Processing

4. ERIC CLEARINGHOUSE ON URBAN EDUCATION

- a. *Schooling in Haiti*. Michel Laguerre. 9p. Urban Diversity Series No. 60. \$5.00.
- b. *The Annotated Bibliography on Cross-Cultural Problems in Education. Volume II: Published Literature (Books)*. Cornelium Lee Grove. 66p. Urban Diversity Series No. 62. \$5.00.

Available from:

Institute for Urban and Minority Education
Box 40
Teachers College, Columbia University
New York, New York 10027

- c. *The Implications of Regents of California v. Bakke for University Admissions and Hiring*. Kent Greenawalt. 8p. *Equal Opportunity Review*. Spring 1979.

Available free from: ERIC/CUE.

P.O. Box 190 ARLINGTON, VIRGINIA 22210 • (703)841-1212

OPERATED BY: COMPUTER MICROFILM INTERNATIONAL, CORP.

May 10, 1979

Mr. Jim Prevel
National Institute of Education
1832 M Street, N.W.
Washington, D.C. 20208

Dear Jim:

We have reviewed the RIEFEB79 Microfiche Inventory and Quality Check and the following is submitted.

- The following microfiche will be produced from the cited documents and distributed as post issue remakes:

159 335 7/10-10/10	159 609 1/1	159 930 1/3
159 366 2/2	159 753 1/1	159 980 1/1
159 449 1/2	159 761 1/1	159 985 1/1
159 471 1/1	159 782 1/2, 2/2	160 137 1/3
159 515 1/1	159 876 1/1	160 235 2/5
159 529 1/4, 2/4	159 926 1/1	160 380 1/1

- The following documents are not recommended for refilming:

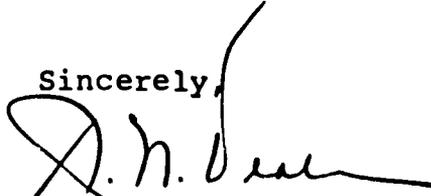

<u>ACCESSION</u>	<u>CLHSE</u>	<u>LEVEL</u>	<u>RESUME NOTE</u>	<u>REASON NOT RECOMMENDED FOR REFILMING</u>
159 320	CE	II	Yes	Thin, light print on blue background
159 322	CE	I*	Yes	Small, thin, light print
159 332	CE	II	Yes	Thin, light, small, worn print - No page VI in original document
159 362	CE	II	Yes	Small, thin, light print
159 366	CE	I*	No	Thin, light, print
159 370	CE	I*	No	Thin, light, broken print

I. CENTRAL ERIC ANNOUNCEMENTS

A. BIBLIOGRAPHY OF 1978 CLEARINGHOUSE PUBLICATIONS AND IAP'S

The ERIC Facility is in the process of preparing a new bibliography of Clearinghouse publications and IAP's covering 1978. They have encountered the problem that a number of the titles submitted by Clearinghouses have not yet been processed through the system and received ED numbers, which we have established as a prerequisite for inclusion. In checking on the reason for delay, Clearinghouse monitors have found that a number of holdups have occurred "at the publisher's."

It is important to announce in RIE the existence of these Clearinghouse publications in as timely a fashion as possible. It is also important to announce them quickly so they don't have to wait an extra year to appear in an annual bibliography of Clearinghouse publications. Where delays can be anticipated, or where timing is critical to announcement in the annual bibliography, these materials should be input in clean, manuscript form.

...B.C. (Central ERIC)

B. SEA DISSEMINATION REPRESENTATIVES AND CAPACITY BUILDING DIRECTORS

The names and addresses of SEA Dissemination Representatives and Capacity Building Project Directors are contained in Attachments 1 and 2. We ask any Clearinghouses that have not recently done so, to contact these SEA representatives, particularly in states with Capacity Building projects, and offer appropriate assistance. Where SEA's do not already have an acquisitions arrangement (Grace Sundstrom of the ERIC Facility can provide a current list of them), they should be encouraged to consider it. We need to develop more of this sort of regional linkage.

Where different individuals are named as Dissemination Representative and Capacity Building Director, the relationship is *usually* a close one in the SEA with the Capacity Building Director working under the Dissemination Representative.

...B.C. (Central ERIC)

C. NIE QUARTERLY REPORT

NIE has announced the initiation of an external newsletter called the *NIE Quarterly Report*. The first issue is due in June and each Clearinghouse will receive a copy. It may be that individual Clearinghouse activities may warrant submission of an article describing them. If you would like to consider such an article, after reviewing the first issue, please discuss it with your monitor. We would welcome such contributions

...B.C. (Central ERIC)

D. COMMITTEE PRINTS AND OTHER CONGRESSIONAL DOCUMENTS

From time to time Central ERIC receives copies of various Congressional reports and committee prints, which are forwarded to the ERIC Facility to be routed to an appropriate Clearinghouse for consideration to be entered into RIE. Some of these documents constitute very important educational material; others are peripherally related to education; and others are only remotely of interest to educators.

It has come to our attention that some Clearinghouse processing personnel are of the impression that because Central ERIC and the ERIC Facility are the channel through which these documents are forwarded that they are automatically mandated for input into RIE. Such is not the case. The Clearinghouses should subject these documents to the same selection criteria that is used for all other RIE documents. Particular care should be taken, if the documents are entered, that they be reproducible, at least at Level II. Unfortunately, there are often numerous appendices containing matter such as testimonial letters and other exhibits, most of which have been photo-reduced to such a size that they would be unreadable on microfiche. User frustration invariably results when a major portion of a document is illegible. It is, therefore, necessary to weigh decisions on such documents very carefully as to the value of the readable material. If the illegible material is not too great in relation to the importance of the content, the Note field in appropriate cases should state that reproducibility is a major problem, but that the readable material is considered valuable enough to warrant inclusion in RIE. (It is not intended that you phrase your remarks in exactly these words; individual cases will warrant specific remarks pertinent to the nature of the problem involved.)

...Bob Chesley (Central ERIC)

E. VIP SCHEDULE UPDATE

A schedule for the remaining work to be accomplished under the Vocabulary Improvement Project (VIP) is displayed as Attachment 3. Please note that September 14, 1979 is the final date for Clearinghouse input to the ERIC Facility. With two exceptions, this last submission will complete Clearinghouse activity in VIP. These exceptions are:

- some phone contacts may be required between the ERIC Facility and VIP coordinators to achieve closure on unresolved problems, and
- D.C. area VIP coordinators will be asked to participate in the Executive Committee Meeting at the end of October.

Please see Attachment 10 for Jim Houston's regular report on *Play Thesaurus/VIP Input*.

...Pat Coulter (Central ERIC)

F. NEW EDRS CONTRACT AWARDED

The present EDRS contractor, Computer Microfilm International, Corporation (CMIC) has been awarded a 1-year contract, with four 1-year options to renew.

This is the first time in ERIC history the incumbent EDRS contractor has won the award, allowing for a possible ten years of uninterrupted service to ERIC customers. Those of us familiar with ERIC since 1966 can remember the chaos and disruption of service resulting from past transitions from one contractor to another, some even with heated legal battles.

The new contract contains the following features:

1. Monthly SGC Subscription fiche (and back collections):

Vesicular	\$0.08*
Silver	\$0.18

2. Special Collection Fiche \$0.122

3. On Demand Fiche

Per Title up to 5 fiche	\$0.83
Each additional fiche	\$0.17

4. On Demand Paper Copy

Per title up to 25 pages	\$1.82
Each Additional 25 pages	\$1.50

*Reduction from present \$0.088.

By using new equipment, CMIC will be able to eliminate the long standing problem of split double frame pages that sometimes resulted in a document being classified as Level II, instead of the more desirable Level I. The new equipment will place the information previously contained on two pages on a single 8½" x 11" page. This system improvement will enhance paper copy documents and minimize user complaints.

Another user complaint has been the long turnaround time between ordering an EDRS document and receipt by the customer. A major factor causing this complaint was using 4th class mail. Under the present contract, EDRS will ship:

1. Microfiche (up to 32) fiche) by 1st class mail.
2. All other microfiche and paper copy shipments will go by UPS, unless otherwise specified by the customer.

Inhouse turnaround time will also be reduced.

A major national marketing and sales program involving CMIC and a major information company (to be chosen) will promote the sale of ERIC microfiche collections and other EDRS products. Salespersons will cover the United States, actually calling on libraries, information centers, and other related organizations, to improve awareness of the ERIC system and its products.

Although numerous special ERIC microfiche collections, such as monthly and annual RIE on fiche, cumulative indexes, IAP Bibliographies, and other products have been announced in 1979, a concentrated effort will be made as a part of this contract to identify and produce additional special products. ERIC Clearinghouses can be useful in presenting ideas to Central ERIC for various kinds of special new microfiche collections.

Both the ERIC system and users will benefit from this long term relationship with CMIC.

...Jim Prevel (Central ERIC)

G. 1979 REGIONAL TECHNICAL MEETINGS SCHEDULE

Dates and locations have been established for the various regional technical meetings to be held this fall. The following is a list of the three meetings and their coordinators:

REGION	CITY	DATE	COORDINATOR	CH
Eastern	Washington, D.C.	September 26-27	John Waters	SP
Midwestern	Urbana, Illinois	October 2-3	Diane Rothenberg Jane McClellan	PS CS
Western	Eugene, Oregon	October 24-25	Ian Templeton	EA

Clearinghouses will be contacted in the near future by meeting sponsors concerning recommendations for agenda topics.

...Frank Smardak (Central ERIC)

H. CIJE SCHEDULE STATUS REPORT

The March 1979 issue of CIJE will be the first issue produced by the Oryx Press and is due from the printers around mid-June. Copies should reach the Clearinghouses shortly thereafter. The April issue of CIJE is also at the printers and the May issue is on the verge of completion. The June CIJE will be the first which will contain material submitted by the Clearinghouses on OCR forms (along with some input keyed in the old way). Oryx hopes to be very close to schedule with the production of the July and August issues.

The latest count shows that Oryx has 900 subscribers with more coming in every day. There is a new brochure containing the latest information about ERIC-related products produced by Oryx. Each Clearinghouse will be sent 200 copies shortly.

My recent site visit to Oryx convinced me that CIJE processing, editing, and programming is in the hands of vigorous and capable people with whom I hope we all develop a close, cooperative relationship.

...Kit Welsh (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. WORD PROCESSING EQUIPMENT - BASIC SPECIFICATIONS REQUIRED TO ACHIEVE COMPATIBILITY AMONGST SUCH SYSTEMS IN THE ERIC NETWORK

At the ERIC Clearinghouse Directors' Meeting in March 1979, it was requested that the ERIC Facility draw up a set of basic specifications that any word processing equipment acquired by the ERIC Clearinghouses should meet.

The intent of such a document would not be to direct the Clearinghouses towards any particular manufacturer, but rather to ensure that, as word processors gradually come onto the scene at the Clearinghouses as routine office equipment, they are compatible with one another and can work together for data entry and other purposes.

The following list of specifications is directed at achieving this basic compatibility of word processing systems within ERIC;

1. The system should be a programmable, software-based system, rather than a hard-wired system. That is, the system functions (editing, indexing, pagination, communications, etc.) should be performed by programs as opposed to fixed hardware logic.
2. The system should have a communications option. The communications option available on many word processing systems is available at either 30 CPS or 120 CPS. Some word processing systems (AMTEXT) can be switched to select from the full range of baud rates (150 to 9600 baud), while other systems are hard-wired for either 15 CPS, 30 CPS, or 120 CPS. The word processing system currently in use at the ERIC Facility (NBI) is equipped with the 30 CPS communications option. Any Clearinghouse system should, therefore, provide for 30 CPS transmission.
3. The communication option should transmit asynchronously on a line-by-line basis, and not bisynchronously. Transmission of the data should be in ASCII code and not EBCDIC or Correspondence code.

Word processing systems with the required technical specifications are, to our present knowledge, supplied by the following companies: NBI, WANG, AMTEXT, XEROX, and LEXITRON. There may be others.

It should be noted that all systems used for data entry will have to have software tailored specifically for communicating with the Facility system (currently an NBI, System II).

...T.B. (ERIC Facility)

B. MORE ON PUBLICATION TYPE CODES

Several Clearinghouses have been repeating the same Descriptors in *both* the Descriptor and Publication Type fields. While sometimes valid, this should not be a routine practice.

One way of looking at it is to imagine developing a total set of all Descriptors that are needed to serve as access points for the document (just like you used to do before there was a PUBTYPE field). The total set is then divided into two camps: those that indicate subject content and those that indicate form. The first group are placed in the Descriptor field. The second group are placed in the Publication Type field. No access points are lost in this process and none are repeated (unless they perform both functions).

...T.B. (ERIC Facility)

C. WRONG-READING PAGES

Wrong-reading pages (text parallel to the long dimension) currently get filmed in a right-reading orientation on ERIC microfiche, as a convenience to microfiche users (so that they don't have to tilt their heads sideways to read the resultant image).

However, wrong-reading pages filmed in this way extend across two microfiche frames and blowback done on a frame-by-frame basis has created split pages and accompanying problems for hardcopy users. For this reason, documents with a large percentage of wrong-reading pages have been better off at Level II than at Level I and the *ERIC Processing Manual* gave this kind of advice (see page 181).

Beginning with their new contract, EDRS will reproduce all images so that they will be in the same orientation as they were in the original document. (It's easier to turn a document than your head).

This new development means that it is no longer necessary to process at Level II a document with a large percentage of wrong-reading pages. They can be processed just like any other document. EPM pages 181 and 183. will be revised.

...T.B. (ERIC Facility)

D. NON-CAPITALIZATION IN THE NOTE FIELD

Recently there have been some cases of the names of foreign countries in the NOTE field being keyed in all capital letters, e.g., CANADA. Please use upper/lower case letters for this purpose and not all upper case. The proper format, as specified in the *ERIC Processing Manual*, provides for separation by commas, but requires nothing more in the way of punctuation and capital letters.

Example of correct format:

NOTE:: Paper presented at Conference X (Montreal, Canada,
March 4-5, 1982)

...T.B. (ERIC Facility)

E. SAMPLE CIJE CITATION PREPARED BY ORYX PRESS

In response to numerous telephone calls from ERIC Clearinghouses, the Oryx Press has prepared a form letter displaying a model CIJE citation, as it should be prepared under existing guidelines and rules. This letter is reproduced as Attachment 4.

...Ted Brandhorst (ERIC Facility)

F. ACQUISITIONS DATA REPORT (ADR)

As the recent ERIC Technical Meeting held at the University of Maryland, several modifications to the *Acquisitions Data Report (ADR)* were proposed. One of these proposals was to add information to the "Preface" of the ADR concerning that point in the document processing schedule at which each Clearinghouse reports document for inclusion in the ADR, e.g.,

- upon receipt;
- after release and better copies have been secured;
- after selection; or
- at some other point in the processing.

This proposal has been accepted and each Clearinghouse is being asked herewith to submit this information to Grace Sundstrom at the ERIC Facility, being as specific as possible. Indicate exceptions to routine procedures, if any apply.

After Clearinghouse responses to this request have been received, the information will be incorporated into the "Preface" of the ADR, where it will provide additional, helpful information for its users.

...Grace Sundstrom (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC/CG'S SPECIAL WORKSHOPS

Dr. Garry Walz, Director, and Dr. Libby Benjamin, Associate Director, of the ERIC Clearinghouse on Counseling and Personnel Services, were invited as presenters at three major workshops in the Far East (Manila, Malaysia, and Hong Kong) as part of their May outreach activities. Focus of the presentations was on career development and the use of ERIC resources in information gathering. ERIC may gain a new Standing Order Customer as a result of these workshops.

Three staff members were invited to present an all-day ERIC workshop at the State Library Services offices in Lansing, Michigan. Participants were librarians from public school districts, community colleges, and state facilities. These participants had search needs but did not have ERIC collections; however, they were near SOC collections. Helen Mamarchev coordinated this outreach effort. Beverly Pritchett and Carol Jaslow supervised participants in running their own searches. This activity was highly worthwhile in illustrating the real value of ERIC.

...C.J. (CG)

B. APGA CONVENTION NEWS

Despite the efforts of the United Airlines strike to thwart our attendance at the national convention of the American Personnel and Guidance Association, we were able to host an ERIC booth at the Las Vegas meeting. Carol Jaslow and Carol Mills (our new cataloger and library assistant) visited with several hundred convention participants. We are pleased to find that, with each passing year, increasing numbers of people are already familiar with the system. The reaction has changed from, "ERIC? Who's ERIC" to "Do I know ERIC? It got me my Master's!"

...Carol Jaslow (CG)

C. ERIC/CG STAFFER WINS HONOR

Helen Mamarchev, Senior Information Specialist at the ERIC Clearinghouse on Counseling and Personnel Services, was recently elected Graduate Student Member-At-Large to the Executive Board of the National Association of Women Deans, Administrators and Counselors (NAWDAC). She began her two-year term by attending NAWDAC's annual convention on April 4-6, 1979 in Washington, D.C. She reports her ERIC-born expertise in information storage and retrieval enabled her to offer a different and useful perspective to NAWDAC members.

...Beverly Pritchett (CG)

D. CS PARTICIPATES IN IRA ANNUAL MEETING

The ERIC Clearinghouse on Reading and Communication Skills was well represented on the program at the International Reading Association (IRA) meeting held this year in Atlanta, Georgia, on April 24-28. Karl Koenke, Associate Director, spoke at a session on "Minimal Competency Testing in the United States: Status and Speculations," which Jane McClellan, Assistant Director, chaired. The session was well attended, indicating a continuing interest in the minimal competency issue.

Arthur Applebee, Associate Director, presented a paper on the "Concept of Story" at a pre-convention institute concerning research in the development of written language, and Mary K Monteith chaired a session on textbook readability and usage in the junior college. Demonstrations of computer searching at the ERIC exhibit during the week were also given. Over 15,000 people attended this year's IRA convention.

...Mary K Monteith (CS)

E. COMPARISON SHOPPING FOR COMPUTERIZED MAILING LISTS

When promoting an IAP, it is essential to reach the right audience. The Clearinghouse on Educational Management has been aided in this effort by professional organizations willing to distribute the Clearinghouse's promotional materials to their members. On several occasions, through this means, we have been able to get flyers into the hands of:

- 35,000 Secondary School Principals;
- 18,000 Superintendents;
- 15,000 California School Administrators;
- 1,800 Public Relations Directors.

Although this outreach is adequate for some products, it is not for others. To reach additional audiences, we sometimes purchase mailing labels from commercial mailing list vendors. These lists, when carefully selected, have been for us a cost-effective way to reach potential users of our products.

Over the years, our file containing the catalogs of these mailing list suppliers has grown appreciably thicker, evidencing a healthy competition. In the event other Clearinghouses may not be aware of these firms, services, the addresses of four firms specializing in educational mailing lists follows:

- Market Data Retrieval
Box 510
Westport, Connecticut 06880
(203) 226-7511
- Curriculum Information Center, Inc.
1726 Champa Street
Denver, Colorado 80202
(800) 525-3564

- College Marketing Group
6 Winchester Terrace
Winchester, Massachusetts 08190
(617) 729-7865
- Education Mailings Clearing House
Roxbury Building
Sweet Springs, Missouri 65351

It pays to shop around. Each firm offers a different selection of markets (teachers, principals, librarians, business managers, and so forth) and targeting options (for example, titles or personal names), and the prices vary widely. By far the least expensive supplier is the Education Mailings Clearing House, from which we recently purchased 5,813 cheshire labels for \$51.85. A comparable order from another supplier would have cost nearly three times as much.

...Stuart Smith (EA)

F. ERIC/EC REPORTS PROGRESS ON BOOKLET DESCRIBING HOW TO START AN ERIC COLLECTION

The ERIC Clearinghouse on Exceptional Children is producing a booklet entitled *How To Start An ERIC Collection*. Designed for libraries and other education information centers, the booklet will include guidelines for starting three types of collections:

- Minimum (RIE, CIJE, and the *Thesaurus*)
- Intermediate (Minimum, plus the Microfiche Collection)
- Complete (Intermediate, plus computer access)

Order forms for ERIC components will be included also. Camera-ready copy will be completed in August and will then go to the Government Printing Office for printing.

...Lynn Smarte (EC)

G. ERIC/HE ACTIVITIES

In March 1979, the ERIC Clearinghouse on Higher Education co-sponsored a conference with the University of Virginia, Center for the Study of Higher Education and the American Association of University Administrators. The topic was "Preventive Law in Academic Administration."

Over the past several months, the Clearinghouse has sponsored exhibits at the following conferences:

- American Association for Higher Education (AAHE);
- Association for the Study of Higher Education (ASHE);
- Association for Institutional Research (AIR).

Clearinghouse staff have made three presentations at recent meetings:

- Thomas Linney, Research Associate, participated on a panel at the AIR conference. The topic was "Student Aid".
- Carol Shulman, Research Associate, presented papers at two conferences:
 - Association for the Study of Higher Education (ASHE):
Title of paper: "The University: A Changing Workplace for Faculty".
 - Conference on Collective Bargaining in Higher Education.
Title of paper: "Compliance With Federal Regulations At What Cost?"

Bill Mayville, Research Associate, just returned from a trip to the Peoples Republic of China. The study mission, co-sponsored by the George Washington University International Education Division and the Government of China, examined schools at the elementary, secondary, and higher education level.

...Marilyn Shorr (HE)

H. ERIC/IR TO INCLUDE POSTAGE AND HANDLING CHARGES IN ITS IAP PRICES

The ERIC Clearinghouse on Information Resources will include postage and handling charges in pricing all future Information Analysis Products and other Clearinghouse publications. This method of recovering postage and handling costs will replace the separate charge based on percentage of total order, used heretofore. The new prices will go into effect on July 1, 1979. Please see the June issue of *ERIC/IR Update*, which is scheduled to appear the third week in June, for a complete list of IR publications available and their new prices.

...B.M. (IR)

I. ERIC/JC MISSING FROM ERIC MAPS

Each Clearinghouse was sent a set of 20 color transparencies, which were revisions by the present IR Clearinghouse of ones done by the IR Clearinghouse when it was located at Stanford, entitled "Overview of ERIC." It was discovered that the ERIC Clearinghouse for Junior Colleges is missing from at least one set of the maps showing the location of all ERIC Clearinghouses. It was clearly marked on the original art work for the diazo transparencies and on the black and white transparency masters. Please check your sets and, if anything is missing, mark it in with a fine-line, indelible marking pen.

...Barb Minor (IR)

J. ERIC/JC DIRECTOR ADDRESSES NIE PRIORITY ISSUE

Following up on the NIE priority area of Literacy, the Director of the ERIC Clearinghouse for Junior Colleges, Dr. Arthur M. Cohen, recently wrote an article entitled, "Shall We Segregate the Functionally Illiterate?" which appeared in the April 1979 issue of the *Community and Junior College Journal*. The article discusses the issue of whether community colleges should segregate those students who have not been prepared to cope with basic information and ideas. Copies of this article are available from the ERIC/JC Clearinghouse upon request without charge.

...Bonnie Sanchez (JC)

K. ERIC/SE ASSOCIATE DIRECTOR IN INDONESIA

Dr. John Higgins, ERIC/SE's Associate Director of Mathematics Education, is currently in Indonesia involved in working on mathematics teacher education.

...B.M. (SE)

L. ERIC/SE PARTICIPATES IN OEA WORKSHOPS

The ERIC Clearinghouse for Science, Mathematics, and Environmental Education was involved in two workshops with the Ohio Education Association (OEA) in May. Three hundred teachers attended the workshop, which dealt with the teaching of environmental education, science education, and the use of ERIC materials in teaching.

...Beverly Malcolm (SE)

M. DIANA BEER COORDINATING ERIC/SO INPUT INTO CIJE

Diana Beer will be coordinating ERIC/SO input into CIJE and would welcome any suggestions about journal SO might add to its review list.

...Charlotte J. Purvis (SO)

N. NEW ERIC/TM PUBLICATIONS

The ERIC Clearinghouse on Tests, Measurement, and Evaluation plans to begin distributing two new regular publications. The first issue of the new Clearinghouse newsletter, *ERIC/TM Notes* will be published in early June. *ERIC/TM Notes* will highlight significant ERIC documents, announce new Clearinghouse products and services, describe important system changes, report on conferences and meetings in measurement and evaluation, and contain articles on topics in testing and evaluation.

Within the next few weeks, TM will also introduce the new *ERIC/TM Highlights* series. This series of computer-generated bibliographies, each screened for relevance and quality, will focus on topics of current concern. Some of the bibliographies will be distributed without charge; others will be sold to recover the cost of printing and distribution.

...Barbara Hunt (TM)

O. ERIC/UD PARTICIPATION IN CONFERENCES

Dr. Jerry Wright, Assistant Director of the ERIC Clearinghouse on Urban Education, attended the Asian and Pacific American Education conference held in San Francisco, California on April 25-27, 1979. The papers from the conferences will be processed by ERIC/UD.

Dr. Wright also attended the Institute on Library Services for Ethnic Groups at Simmons College in Boston, Massachusetts on April 27-28, 1979. The Institute was co-sponsored by the Massachusetts Board of Library Commissioners and was designed to deal with the identification and analysis of ethnic groups in the community, assessment of information needs, planning of responsive services, location and acquisition of appropriate resources, and the development of effective outreach techniques.

He was also a discussant at the 7th Annual Conference on Ethnic and Minority Studies held at the University of Wisconsin-La Crosse. The topic of the presentation was "The Invisible Ethnic: Those who Refuse to Participate." The papers from this conference will be processed into ERIC by ERIC/UD.

....Jerry Wright (UD)

P. PAULINE ROTHSTEIN RETURNS TO ERIC/UD

After an extended absence, Pauline Rothstein has returned to her position as Processing Coordinator at the ERIC Clearinghouse on Urban Education. Soon after coming back from maternity leave (Lisa Rothstein was born on August 25, 1978), Pauline, unfortunately, experienced trouble with her eyes. We are happy to report that after successful surgery and convalescence she is back at work. From now on, any processing questions should be directed to her.

...G.C (UD)

Q. INTERNATIONAL VISITORS TO ERIC/UD

Mr. John E. Vaughan, Education Librarian of the University of Liverpool, England, visited the ERIC Clearinghouse on Urban Education in May, at the invitation of Ms. Georganne Chapin, whom he had met

Vocabulary Improvement Project
Schedule for Remainder of Project

- | | |
|-----------------------|--|
| May 25* (May 28)** | - 4th edition of Play Thesaurus (PT) with index (all future editions have index) |
| May 31 | - Revised Clearinghouse logs mailed to CERIC |
| June 15 (June 18) | - 5th edition of PT |
| July 6 (July 9) | - 6th edition of PT |
| July 27 (July 30) | - 7th edition of PT |
| August 17 (August 20) | - 8th edition of PT (closure on DJFs processed after 8th PT will be accomplished by phone rather than through the PT "Comment" field) |
| Sept. 7 (Sept. 10) | - 9th edition of PT (this issue has two purposes: to document Lex/CH phone discussions after 8th PT and to keep the PT up-to-date for the final work of the lexicographers) |
| Sept. 14 | - Clearinghouses mail final input for VIP (input postmarked after 9/14 not accepted) |
| Oct. 5 (Oct. 8) | - 10th and final edition of PT |
| Oct. 8-26 | - Lexicographers document unresolved problems, including known disagreements--Periodic phone contacts may be made by lexicographers to CH's to achieve closure, and by CH's to lexicographers to report issues that need the vote of Executive Comm. |
| Oct. 29-31 | - Executive Committee Meeting (Washington, D.C.) All problems in 10th edition of PT resolved (length of meeting dependent on number of items requiring Committee resolution) |
| Nov. 5 | - Incorporating all Executive Committee decisions, Facility begins generating transactions necessary to change both the Master Thesaurus File and the Master Resume File |
| Dec. 14 | - Working copy of Updated Master Thesaurus distributed to Clearinghouses. Beginning with the April '80 issue of RIE all indexing based on new Thesaurus |
| Jan. 4 | - New Thesaurus Tape sent to Oryx Press |
| Jan. 7 | - Work begins on writing "Introduction" for new Thesaurus |
| Jan. 11 | - Facility completes updates to Master Resume File |
| Feb. 15 | - "Introduction" completed and mailed to Oryx Press (for 8th ed. of Thesaurus) |

*Date of completion

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC Clearinghouse on Higher Education

- a. *Revamping Core Curricula.* Carol Herrnsstadt Shulman. 4p. May 1979.

The liberalizing of basic courses in general education requirements and a general societal discontent with results of a college education has caused a re-examination of the use of core curriculum. This Current reviews the model recently established by Harvard and identifies other schools that have made significant changes in their core curriculum.

- b. *Changing Values in Higher Education.* Thomas J. Linney. 4p. April 1979.

In the last two decades there has been a noticeable change in values and attitudes towards higher education by students and parents. This Current reviews what these changes are what implication they have for policy.

- c. *Women in Academe: Steps to Greater Equality.* Judith M. Gappa and Barbara S. Uehling. 89p. 1979

This paper examines facts and trends that determine directions to take and tactics to employ in efforts to promote equality for women in higher education. It reviews: institutional policies and practices, historical trends regarding women's participation; the current status of women within higher education; the legal rights of women, and effective approaches for increasing the participation of women in higher education.

- d. *Learning Styles: Their Impact on Teaching and Administration.* Charles S. Claxton and Yvonne Ralston. 68p.

This paper identifies major findings on learning styles suggests ways colleges and universities can design instructional programs that take into account ways students learn most effectively and discusses changes necessary in organizational procedures and administrative behavior for meaningful change to occur.

- e. *Budgeting in Higher Education.* J. Kent Caruthers and Melvin Orwig. 99p. 1979

In times of financial stress, it is of paramount importance to spend the finite resources as wisely as possible. This calls for sophisticated budgeting. However, college faculty budgeting is often misunderstood and seen as a threat to academic freedom. This report examines the various processes and systems used in budgeting, how they are applied, and what the faculty can do to insure reasonable allocation of funds.

- f. Old Expectations, New Realities: The Academic Profession Revisited:
Carol Herrnstadt Shulman. 51p. 1979.

Many conditions now exist that have caused changes in the academic working atmosphere of higher education institutions. Some of these changes are: financial exigency, decrease in research funding, demands for greater accountability by state legislatures, collective bargaining, increased number of older tenured faculty and an increased emphasis on career oriented programs. This report identifies the most important changes, examines how they affect the traditional faculty role, and lists specific ways faculty and their institutions are coping with these changes.

2. ERIC Clearinghouse for Junior Colleges

- a. *Balancing State and Local Control*, Searle Charles (Editor). Fall 1978.
b. *Responding to New Missions*, Myron Marty (Editor). Winter 1978.
c. *Shaping the Curriculum*, Arthur M. Cohen (Editor). Spring 1979

These IAP's are available from Jossey-Bass, Inc., in San Francisco, California as the *New Directions for Community Colleges* series. Price is \$5.95 or \$25 a year on a subscription basis.

- d. *The Humanities in Two-Year Colleges: What Affects the Program?*
Florence B. Brawer. Winter 1978.
e. *Community College Financing in the Post-Proposition 13 Era.*
John Lombardi. January 1979.
f. *Trends in Ethnic Enrollments.* Florence B. Brawer. February 1979.
g. *Four Phases of Developmental Education.* John Lombardi. March 1979.
h. *Using the Talents of Part-Time Faculty.* Jack Friedlander. December 1978.
i. *Academic Courses for the Health Programs.* Florence B. Brawer. December 1978.

Products d-i are available free from the ERIC Clearinghouse for Junior Colleges, as long as the supply lasts.

3. ERIC Clearinghouse on Reading and Communication Skills

- a. *Listening: Its Impact at All Levels on Reading and the Other Language Arts.* Sara W. Lundsteen. 170p. May 1979. NCTE Stock No. 29298.
Price: \$6.00; NCTE members: \$5.25. CS 204 762.

A revision and update of a popular 1971 survey of what teachers need to know, from reasearch and other sources, to provide for students' growth in listening ability. Sections are included on evaluating listening and using classroom materials that develop listening skills.

- b. *Teaching Reading Comprehension: Theory and Practice*. William D. Page and Gay Su Pinnell. 137p. April 1979. Stock No. 51906. Price: \$6.75; NCTE members: \$6.00. CS 004 728.

Surveys research and theory on reading comprehension and suggests ways the teacher can use the implications of these findings in the classroom. Analyzes 14 currently used instructional approaches, listing the advantages and disadvantages of each.

Available from: National Council of Teachers of English.
1111 Kenyon Road
Urbana, Illinois 61801

4. ERIC Clearinghouse for Rural Education and Small Schools

- a. *National Migrant Education Program Math Skills Information System*. Raul de la Rosa and Eugene deG. Hackett. 31p. 179. Stock No. EC-070. Price: \$3.50.

The educational background and issues which shaped the design of the National Migrant Education Program Math Skills Information System are explained in this report, along with a full description of the features of the system and its operation. It discusses the variety of math skills information used to permit teachers to input and receive math skills information about migrant students in order to insure continuity of education.

- b. *How Communities and American Indian Parents Can Identify and Remove Culturally Biased Books from Schools*. Rebecca Robbins. 21p. 1979. Stock No. EC-071. Price: \$4.00.

Removal from the schools of educational materials objectionable to American Indians is a matter of concern to teachers, parents, Indian communities and organizations, educational decision makers. To appeal to a wider market, publishers often produce materials favoring the interests of the predominant society. Thus, textbooks and other curricular materials too often portray Indian people and institutions in an inaccurate, limited, and unfair manner, thus perpetuating a distorted historical view. Indian youth and adults must attempt to eradicate such historical and cultural misinformation and bias in instructional materials. Several ways to identify and evaluate educational materials are provided.

- c. *Time and Resource Management for Small Schools*. Don Miller and Barbara Miller, editors. 68p. 1979. Stock No. EC-072. Price: \$6.25.

This document is a collection of materials by practitioners on managing time and resources. The first section, which is devoted to time management, presents papers on time management for administrators and teacher-managers, team management, time management in the elementary school, student scheduling, and independent study. The section on resource management deals with people management, community schools, group guide counseling, volunteer aides, facility development, planning, curriculum review and change, the relationship of the brain/mind and implications for education, and implementing Public Law 94-142.

- d. *The Teacher and the Reading Skills Report for Migrant Students.* Richard Bove, 20p. 1979. Stock No. EC-073. Price: \$4.50.

There are approximately 500,000 migrant farmworkers' children in the United States whose reading development is recorded in the data bank of the Migrant Student Record Transfer System (MSRTS). The procedure contained within this paper was developed in response to the need to report the progress of these children.

- e. *Outdoor Education: Community Studies Through Field Experiences.* Malcolm D. Swann. 67p. Stock No. EC-074. Price: \$6.50.

Field experiences in which high school students work away from the classroom to study their own communities are often considered to be the most valuable aspect of an educational program. However, the educator who seeks to provide field experiences for students must plan and organize this program carefully. This document is intended to encourage and guide teachers interested in community studies.

- f. *Impacts of the Rural Turnaround on Rural Education.* Peggy J. Ross and Bernal L. Green. 49p. 1979. Stock No. EC-075. Price: \$4.25.

Facilities and staff, financing, administration, and social/behavioral problems are four areas of the educational systems of rural schools impacted by the rapid population growth resulting from the urban-to-rural migration begun in the 1970's and expected to last several decades. Overcrowding of facilities is a short-range problem for communities with economic and public support, but a long-range problem for those unable to initiate a satisfactory solution. Greater local revenues result from greater population, yet there may be rural resistance to the ideas of urban newcomers. The extent to which rural community leaders should and can anticipate and respond to population growth and its resultant changes is discussed in this study.

- g. *Imaginary Gardens? Real Problems: An Analysis of Federal Information Sources on Rural Education.* Gail Parks and Jonathan Sher. 44p. Price: \$6.00.

Comprehension of the current condition of rural education is essential to national education policy and program considerations, yet rural schools go unnoticed at the federal level because of a paucity of national rural data. The changing nature of the rural population, the national mandate for equal educational opportunity, and the need for a timely concept of rural development are all justifications for an expanded rural education data base. Recommendations include providing for systematic collection of rural data, merging of agency data, and creating a National Center for Rural Education Studies.

- h. *How to Search ERIC for American Indian Materials.* Ramona Tecumseh Sandoval, compiler. 97p. 1979. Stock No. EC-077. Price: \$8.00.

A wide variety of educational materials regarding American Indians has been collected by the Educational Resources Information Center (ERIC) system; this guide was prepared to help anyone who is seeking that information to find it. Procedure is given for conducting both computer

and manual searches of the data base with detailed descriptions devoted to the use of the descriptor and identifier retrieval terms under which all documents are indexed. A listing of the commonly used American Indian descriptors and identifiers is given. Use of the ERIC reference books, including the *Thesaurus*, the monthly abstract journals, *Resources in Education* and *Current Index to Journals in Education* is also explored.

Available from: National Educational Laboratory Publishers, Inc.
813 Airport Boulevard
Austin, Texas 78702

5. ERIC Clearinghouse for Science, Mathematics, and Environmental Education

- a. *Environmental Education: A Bibliography of Abstracts from Resources in Education (RIE)*. John F. Disinger, Robert W. Howe, and James M. Kozlow. 1976-77. 286p. Price: 12.00 (without binder); \$15.00 (with binder).

This publication contains abstracts and indexes to selected documents announced in *Resources in Education* from 1976 to 1977. Documents indexed include instructional materials, research reports, teaching guides, and other items. The compilation is designed to serve as an effective tool to assist teachers, researchers, curriculum developers, librarians, administrators, concerned citizens, and others concerned with environmental entries; in the remaining sections the abstracts are indexed by subject, identifier, author, and institutional author. Supplements will be issued periodically.

- b. *Resources for Teaching Mathematics in Bilingual Classroom*. James C. Lovett and Ted Snyder. 56p. Price: \$1.75.

A substantial resource is provided for those concerned with mathematics teaching in bilingual programs. Part I provides a concise overview of the issues and problems involved in the teaching of mathematics in bilingual classrooms. It begins with a brief description of the field of bilingual education and then considers the role of mathematics teaching with respect to the language of instruction, cultural referents, and certain psychological factors. Part II consists of an annotated bibliography of materials for teaching mathematics in Spanish/English programs. A list of suppliers of bilingual mathematics materials, a list of references to general bilingual materials, and a phrase list are appended.

- c. *Environmental Education in Action-III: Case Studies of Public Involvement*. Clay Schoenfeld and John Disinger, co-editors. December 1978. 202p. Price: \$5.50.

Presented here are 27 case studies of public involvement in environmental policy. These are examples of environmental education or communications programs developed by local, state, regional or national environmental action groups. The reports tell how the groups have successfully, or unsuccessfully, mobilized public opinion in favor of beneficial land use of recycling of wastes, or against a potential plant site in favor of pollution control legislation, or towards incorporating environmental studies more effectively in school curricula.

- d. *Alliance Affiliate Activities: Non-Governmental Organization in Environmental Education.* John F. Disinger, editor. December 1978. 159p. Price: \$3.50.

Short descriptions of organizational structure and goals and descriptions of environmental education interests, activities, and priorities are presented for 32 nongovernmental organizations affiliated with the Alliance for Environmental Education. The organizations included are listed in the table of contents. The groups included represent a variety of age groups and interests. Among the reports are those for the American Association of State Colleges and Universities, American Federation of Teachers, American Forest Institute, Boy Scouts of America, Girl Scouts, League of Women Voters, National Education Association, United Autoworkers, and Zero Population Growth.

DESCRIPTOR JUSTIFICATION FORMS/PLAY THESAURUS/VIP INPUT

Other than for the VIP, there were no DJF submittals in May 1979. As there is no new information to report, it was decided not to prepare the *Descriptor Justification Form Status Report* for this issue of the EAB. See the *DJF Report* in the May 1979 EAB for the latest information on approved new *Thesaurus* terms.

Play Thesaurus 4 was distributed on May 29 on schedule. An index of terms worked on in *PT 4* was included. Indexes for *PT's 1, 2, and 3* were distributed on May 31. Each subsequent *PT* will have its own index.

PT 4 included 1,479 DJF's (the cumulative VIP input through March 13). Work on 838 terms is reflected in this issue. This total is 25% of the approximately 3,400 terms expected to be worked on in the VIP.

There should be a total of 10 issues of the *Play Thesaurus*, one more than earlier reported. According to our most recent schedule, mailing dates for the remaining issues are:

PT 5 - June 18	PT 8 - August 20
PT 6 - July 9	PT 9 - September 10
PT 7 - July 30	PT 10 - October 8

VIP input totals through June 8 are as follows:

CE - 78	JC - 240 (38 - closure)
CG - 333 (120 - OK as is; 41 - closure)	PS - 125 (20 - closure)
CS - 87	RC - 97
EA - 140 (10 - closure)	SE - 94 (11 - OK as is)
EC - 124	SO - 67
FL - 83 (5 - closure)	SP - 86
HE - 134	TM - 159
IR - 185 (3 - OK as is)	UD - 131

SUBTOTAL - 2,163

AA (Facility) - 1,069 (reactions to CH input, *PT's 1-5*)**

GRAND TOTAL - 3,232

**NOTE: *PT 5* includes 1,128 CH DJF's, cumulative input through April 13.

...Jim Houston (ERIC Facility)

ACTION ITEMS

1. LIAISON WITH REGIONAL PROGRAMS

Lists of Capacity Building Projects and State Dissemination Representatives were included as attachments to the June *ERIC Administrative Bulletin*. These activities are funded by the Regional Program Division within DIP.

Peter Eddy (representing ERIC Clearinghouse directors), Chuck Hoover, and I, have recently met with Ed Ellis to discuss ways in which ERIC and Regional Programs can collaborate. In addition to providing ERIC materials to Regional Program contractors, to make them more aware of ERIC services and products, I am asking Clearinghouses to become familiar with Regional Program activities and to make appropriate contacts in your regions. As supplements to the June EAB, lists of Regional Programs contracts (with names of project directors) are contained herein in Attachments 1, 2, and 3. The additional programs represented are:

- Research and Development Exchange (RDx);
- Regional Services;
- R&D Utilization Program.

To help increase awareness of ERIC activities, we would also like to ask that Clearinghouses put these Regional Program Directors on mailing lists for Clearinghouse information bulletins.

...Bob Chesley (Central ERIC)

2. CATALOGING ERRORS

Clearinghouse input to RIE during recent months has exhibited an unusual quantity of cataloging errors. In particular, it seems as if many catalogers have little or no understanding of the interrelationships between sponsoring agencies (invariably Governmental), contracts/grants, and contractors (the institutions doing the work). We would like to take this opportunity to list some of the kinds of errors to which we refer (errors which initially got by the Facility editors, but which have been detected on subsequent review). Please review this list (Attachment 4) with your catalogers with the objective of improving future quality control in this area. In many cases bad cataloging can affect both manual indexes and computer retrieval. ERIC is known for a good quality file. Let's keep it that way!

...Ted Brandhorst (ERIC Facility)

I. CENTRAL ERIC ANNOUNCEMENTS

A. VIP ONLINE ARTICLE

The July issue of *Online* carries an article by Barbara Booth on the Vocabulary Improvement Project. The article describes the role of the *ERIC Thesaurus* in the ERIC system and the VIP program in particular:

Booth, Barbara. "A 'New' *ERIC Thesaurus* Fine-Tuned for Searching." *ONLINE*. v3, n3, p20-29, July 1979.

...Pat Coulter (Central ERIC)

B. RELATING TO CIJE

The handsome editions of *CIJE* for March and April 1979 have been sent to the ERIC Clearinghouses and to the approximately 1,000 subscribers Oryx Press now has. The May issue came off the press on July 9 and will soon be in your hands.

SMERC has done a masterful job with a heavy backlog of assorted material received from Macmillan. If you were to count, you would find over 170 well-annotated and indexed entries from them for March and 158 for April. We are pleased with the excellent work being done by our friends at SMERC during this startup period and welcome them as full-fledged members in the ERIC family.

...Kit Welsh (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. EDRS DEVELOPS MINI-FILE OF MICROFICHE FOR ERIC IAP'S

EDRS has announced a new product—a mini-file of microfiche covering the ERIC information analysis products (IAP's) announced in the last IAP bibliography (covering 1975-1977).

The mini-file is attractively packaged with both microfiche and bibliography housed together in one box. All ERIC Clearinghouses are represented. A total of 574 IAP's are available in the collection, which is available from EDRS for \$98.50 plus \$1.00 postage.

EDRS has developed a flyer to advertise this new product (see Attachment 5).

B. PLAY THESAURUS/VIP INPUT

PT 5 was distributed on June 20. This was 2 days later than scheduled as all copies had to be rerun because of very light print. PT 5 has 727 new transactions, including 400 Clearinghouse DJF's submitted between March 13 and April 13.

PT 6, scheduled for distribution on July 9, will also be about 2 days late. Its delay was caused by an exceptionally heavy DJF input by the Lexicographers in the 3rd week of the issue's processing cycle, resulting in a significant backlog for the Facility's keying department. PT 6 had 927 new transactions, including 510 Clearinghouse DJF's submitted primarily between April 13 and May 13. Some received after May 13 are included in this issue—these are primarily JC's Scope Notes for the broadest terms.

The total number of terms worked on through PT 6 is 1,533. This total is 45% of the approximately 3,400 terms expected to be evaluated in the VIP.

The following list shows VIP input totals through July 6. It includes closures received in writing (DJF's or memoranda). Closures reached over the phone are not being logged and are not included in these totals.

CE - 109	JC - 247
CG - 379 (139 - OK as is)	PS - 185
CS - 114	RC - 144
EA - 184	SE - 148 (20 - OK as is)
EC - 171	SO - 87
FL - 102	SP - 107
HE - 17 ^a	TM - 170
IR - 318 (6 - OK as is)	UD - 196
SUBTOTAL - 2,839	
AA (Facility) - 1,486 (reactions to CH input, <u>PT's 1-6</u>)	
GRAND TOTAL - 4,325	

...Jim Houston (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. FAREWELL TO ERIC

On July 1, I will officially be leaving ERIC to begin my new duties as an Associate Director of the National Center for Research in Vocational Education at Ohio State University. During the time that I have been with ERIC, I have met many dedicated people who make the ERIC system a nationwide success. I will miss your spirit, but I will not be out of touch. My new responsibilities will still be within the organization that hosts ERIC/CE.

Please give the new director the same fine cooperation that you have given me. A nationwide search for the new director has been conducted. We received applications from many fine candidates and we plan to make the final selection within the next several weeks.

...*Marla Peterson (ERIC/CE)*

B. ERIC FUTURES PROJECT

The ERIC Futures Issues Component (EFIC), under the direction of Garry Walz and Jane Leu, has been developing linkages with each of the ERIC Clearinghouses, with other futures research organizations, and with professional associations. The EFIC collection of resources is growing, with continuing acquisition of books, articles, and subscriptions to futurist journals, newsletters, and literature. As relevant and interesting speeches and reports are noted, EFIC promotes their potential inclusion in ERIC.

The thoughtful responses by the EFIC liaisons and other staff members at the Clearinghouses to the initial EFIC survey will help in planning further project developments. Plans are underway for several articles, publications, and conference presentations. Thank you all for your contributions. Please contact Garry Walz or Jane Leu if you would like to be on the mailing list for the *EFIC Newsletter*.

...*Jane Leu (ERIC/CG)*

C. AUSTRALIAN VISITOR

The ERIC Clearinghouse on Counseling and Personnel Services was pleased to have, as a visitor, Al Steward, a senior counselor at the University of Queensland, Australia. On a one-year sabbatical, Mr. Stewart has been meeting with the counseling staffs at various universities and institutes in England, Switzerland, Canada, and the United States. His impression of ERIC is that "of an incredibly sophisticated information system," and he feels a "missionary zeal to spread the light" when he returns to Australia.

...*Carol Mills (ERIC/CG)*

D. WILLIAM E. GEER DIES

William C. Geer, Executive Director of The Council for Exceptional Children, and advocate of ERIC from its initial planning period, died on June 22, 1979, following complications of cardiac arrest. A public memorial service was held for Mr. Geer at CEC headquarters in Reston, Virginia, Sunday, July 1, 1979, eighteen years to the day of his assuming the leadership of that organization. The staff of the ERIC Clearinghouse on Handicapped and Gifted Children join with many other persons throughout the world to honor a man who contributed so much to the education of handicapped and gifted students. The family has requested that expressions of sympathy be made in the form of donations in the name of William C. Geer to the Foundation for Exceptional Children, 1920 Association Drive, Reston, Virginia 22091.

...Donald K. Erickson (ERIC/EC)

E. DESCRIPTORS AND IDENTIFIERS FOR JDRP PROGRAMS IN REVIEW

The ERIC Clearinghouse on Handicapped and Gifted Children is presently cooperating with the National Diffusion Network in reviewing the Far West Laboratory's assignment of Descriptors and Identifiers for the Joint Dissemination Review Panel's (JDRP) approved programs, as described in *Educational Programs That Work*. The indexing is being reviewed for conformity to ERIC indexing policy. The assigned Descriptors will be used for the subject index of future editions of *Educational Programs That Work* and for online access to program information via the Educational Practices File, a pilot project being conducted by Bibliographic Retrieval Services, Inc.

...Dorothy Block (ERIC/EC)

F. NEW ACQUISITIONS BROCHURE DEVELOPED

A new acquisitions brochure, which was developed by the ERIC Clearinghouse on Handicapped and Gifted Children to acquaint contributors with Clearinghouse scope and ERIC's content and technical criteria, has received a positive review from NIE. Copies of the brochure have been sent to each Clearinghouse for examination of format.

...Marion Cambel (ERIC/EC)

G. TWO WORKSHOPS FOR ON-LINE SEARCHERS SPONSORED

Sharon Hudack, information specialist at the ERIC Clearinghouse on Handicapped and Gifted Children, gave morning workshops on searching the ERIC and ECER data bases on May 30 and June 1, 1979 at the Northwest Regional Educational Laboratory. Twenty-seven people attended the workshops (16 and 11, respectively). Sharon

was joined at the Portland workshop by Ian Templeton, of the ERIC Clearinghouse on Educational Management, who gave an afternoon update session on the latest developments of the ERIC system.

...*Sharon Hudaek (ERIC/EC)*

H. CONFERENCE PARTICIPATION

The ERIC Clearinghouse on Information Resources participated in many meetings in June. B. J. Vaughn led off with a session on ERIC for the Education Division of the Special Libraries Association that lasted almost three hours, with many questions from the floor.

Bruce Clark, Marilyn Laubacher, and Barb Minor attended pre-convention activities of the American Library Association in Dallas, Texas. While in Dallas, Bruce attended the DIALOG Update, sponsored by Lockheed. Marilyn made a presentation at a workshop on action research for the American Association of School Librarians (AASL), backed up by Barb at the computer terminal. Bruce also made a presentation at the Research Forum of the AASL.

Barb Minor moderated a Delphi session for the Library and Information Technology Association (LITA), with Marilyn acting as score keeper.

They also attended a number of committee meetings. Arrangements have been made for a column in *School Media Quarterly*, instead of the previous SDI (selective dissemination of information) service. SDI services have been requested for *Public Libraries*, the quarterly publication of the Public Library Association.

...*Barb Minor (ERIC/IR)*

I. AWARD GOES TO FORMER ERIC EMPLOYEE

Dr. Roberta Lee, a former user services specialist at the ERIC Clearinghouse for Junior Colleges, won the "Outstanding Dissertation of the Year" award from the Council of Universities and Colleges. Dr. Lee's thesis was on "Age-Related Adult Developmental Stages Among Two-Year College Faculty." The national award, including a check for \$500, was presented to Dr. Lee at the Association's annual convention in Chicago in May 1979.

...*Bonnie Sanchez (ERIC/JC)*

J. CONFERENCE PARTICIPATION

Manuela Quezada, information specialist, attended and distributed ERIC materials at the National Association of Bilingual Education annual meeting in Seattle, Washington and at the National State Directors of Migrant Education meeting in Virginia Beach, Virginia.

Judi Conrad, information specialist, gave an ERIC presentation at the Oregon Small Schools Association's summer institute entitled "Outdoor/Indoor: Expanding the Classroom in Small Schools."

Judi Conrad was also invited to an ERIC presentation at the "American Wilderness Leadership School," a teacher workshop sponsored by the Safari International Conservation Fund.

A.H. (ERIC/RC)

K. INRYR PLANS FIFTH WORLD CONGRESS IN MEXICO CITY IN AUGUST 1980

For the past three years the ERIC Clearinghouse on Rural Education and Small Schools has served as the headquarters for the International Network of Rural Youth Researchers (INRYR). INRYR's major purpose is to provide a linking network for researchers working with problems of rural youth. Originally established at the Fourth Congress for Rural Sociology at Torun, Poland in 1976, INRYR now has over 250 members from 35 countries. INRYR is planning the rural youth section of the Fifth World Congress, which will be held in Mexico City in August 1980.

...A.H. (ERIC/RC)

L. SPECIAL WORKSHOP

Betty Rose Rios presented a one-day ERIC workshop to the Faculty of Education, Kansas State University, Manhattan, Kansas on June 26, 1979.

...Amelita Hill (ERIC/RC)

M. BRAINSTORMING SESSION RESULTS

A brainstorming session designed to find innovative ways of marketing ERIC was held at the National Technical Meeting at the University of Maryland on May 1-3, 1979. A lengthy list of advertising/marketing ideas came out of that session and are presented as Attachment 6. With the help of a friend, June Ramos organized the results of this session into four major areas:

- Advertising and Communications;
- Products and Improvement of Products;
- Workshops and Training;
- Other.

Some ideas overlapped; however, most duplicates were eliminated. The results of this effort indicate that the group did a terrific job of coming up with new and inventive ways of marketing and improving ERIC. They are now being reviewed at Central ERIC.

...June Ramos (ERIC/SO)

N. MAJOR STAFF CHANGE

John Waters, Assistant Director of the ERIC Clearinghouse on Teacher Education, has announced his resignation, effective July 18, at the close of business. John has been with ERIC since May 1974, and during his years here has been involved with every facet of Clearinghouse operations. In addition to management of SP activities, John has been active over the past several years with the PUBTYPE Study, the ERIC Steering Committee, and the ERIC videotape series. His departure from the system will impress more firmly on all of us the services he has performed.

...Karl Massanari (ERIC/SP)

O. INTERN COMPLETES "TOUR OF DUTY"

Ms. Yvonne Graydon, Head Librarian for the Ministry of Education, Government of Jamaica, recently completed her internship with the ERIC Clearinghouse on Teacher Education. During her stay, Ms. Graydon studied the operations of the Clearinghouse in document acquisitions and processing, aided the User Services Specialist in computer searching and workshop presentations, and in the development of a future information analysis product (IAP) on teacher access to information resources. Ms. Graydon also studied the organization of government and specialized libraries in the Washington area, and visited ERIC Clearinghouses and libraries in the New York/New England areas. This internship in the Clearinghouse was arranged in cooperation with the American Association of Colleges for Teacher Education's Administrative Intern Program, under the direction of Ms. Marilyn Sheahan, Assistant Director.

...M.B. (ERIC/SP)

P. LINCOLN STAFF DEVELOPMENT PROJECT

Stage One of a special staff development project of the Lincoln (Nebraska) Public School System (LPSS) and the ERIC Clearinghouse on Teacher Education has been completed. This project involved full day workshops with representatives from each of LPSS's 47 buildings and consisted of an overview of the system, manual searching on group topics and on individually designed questions, and computer searching.

Seventy-eight staff members, including principals, media specialists, central office staff, and classroom teachers, were involved. Use of ERIC over the next six months in solving local problems will be monitored and the effectiveness of the indepth workshop techniques on a district-wide basis will be evaluated.

Stage Two of the project will consist of workshops for all building administrators, to be conducted in September, and Stage Three will consist of a final report and evaluation.

...Mike Butler (ERIC/SF)

Q. ERIC PRESENTATIONS

Barbara Hunt conducted an orientation for thirty members of the Society for the Advancement of Continuing Education for the Ministry on June 12 at Newton Center, Massachusetts. As part of the Society's annual meeting, the session was designed to familiarize the members with the ERIC system, the types of material which would be relevant to their needs, and the relative ease of accessibility.

Also on June 12, in Boston, Massachusetts, Barbara Wildemuth, the former User Services Representative from the ERIC Clearinghouse on Tests, Measurement, and Evaluation, presented a part of the agenda on "Resources in Testing," and sessions on ERIC and the Educational Testing Service's Test Collection to participants at the Northeast Conference on Testing and Instruction.

...Barbara Hunt (ERIC/TM)

R. SPREADING THE ERIC WORD

During a recent visit to England, Dr. Erwin Flaxman, Associate Director of the ERIC Clearinghouse on Urban Education, met with a number of representatives of universities, information centers, and governmental and private organizations, to discuss establishing acquisitions and user services linkages, and to explain the nature of the ERIC system.

Discussions were held with representatives of the:

- London Schools Council, responsible for multiracial curriculum development;
- Centre for Learning Resources of the Inner London Education Authority;
- London Commission on Racial Equality;
- Lending Division of the British Library, Boston Spa, West Yorkshire;

- Bradford Teacher Centre, West Yorkshire;
- Centre for Research and Advice on Educational Disadvantage, Manchester;
- British Library Project on Experimental Information Services, Lancaster;
- Center for Advanced Studies in Education, Birmingham; and others.

ERIC awareness workshops were conducted for a seminar of faculty planners at Bradford College, and for the information and technical assistance staffs of the Centre for Research and Advice on Educational Disadvantage.

...Stella Torgoff (ERIC/UD)

DEADLINE NEWS.....

Effective July 23, 1979, the FTS number for the ERIC Clearinghouse on Elementary and Early Childhood Education (PS) will be: 398-5542.

CATALOGING ERRORS

TYPE OF ERROR	COMMENT	EXAMPLES (RIEMAY79)
1. Documents cataloged with neither Personal Author nor Corporate Author (i.e., Institution).	It is a rare document that is missing both of these elements. Generally what is happening is that the Clearinghouses are failing to record corporate authors detectable from the document.	ED 163 886 (HE)
2. Documents cataloged with Contract or Grant Numbers, but no Sponsoring Agency.	A contract or Grant implies a Sponsor. On rare occasions it is impossible to determine the sponsor. Generally what is happening is that the Clearinghouses are failing to record a Sponsor detectable from the document.	ED 163 731 (EC)
3. Documents cataloged with a Sponsor (funder), but no Institution (doer).	A Sponsor implies a "doer." The Clearinghouses are too often confusing the two roles or failing to record a detectable Institution.	ED 163 337 (CG)
4. Punctuation other than parentheses in the Identifier field.	Only parentheses are permitted.	ED 163 920 (IR)
5. Non-preferred Identifier forms.	"Canada (British Columbia)" instead of simply "British Columbia."	ED 163 225 (CE)
6. Congressional documents (e.g., hearings) cataloged under the entire House or Senate, rather than the specific Committee responsible.	If a particular House or Senate Committee is responsible for a document, then it should be so cataloged.	ED 163 301 (CG)
7. Conference dates not included in either the Title field or Note field.	Where and when a conference was held is essential cataloging information and should <i>always</i> be included in the citation.	ED 164 483 (SP)
8. Titles altered to begin with "A" or "The" even though the words do not appear on the document.	Titles should be recorded as is. Do not "improve" them.	ED 163 726 (EC)
9. The author of the first paper in a collection cited as the author of the entire document, when an Editor or Compiler of the collection exists.	Collections containing many separate papers should cite the Editor or Compiler in the Author field.	ED 164 432 (SO)
10. Subtitles used as Titles	In the case in point, an entire journal issue was being input. The cataloger did not use the Journal name as the Title, as would have been correct.	ED 163 454 (CS)
11. Sponsoring Agencies relegated to the Note or Abstract field, but not cataloged in the Sponsoring Agency field.	If something has its own pigeonhole, put it there.	ED 163 581 (EA)

ANNOUNCES . . .

A MINI-FILE COLLECTION of the most recent INFORMATION ANALYSIS PRODUCTS 1975-1977 on MICROFICHE . . .

The MINI-FILE contains all of the DOCUMENTS available from EDRS in MICROFICHE FORMAT . . . together with a paper copy of the BIBLIOGRAPHY that lists DOCUMENTS in accession number order, with ED accessions (from RIE). Three indexes are provided: SUBJECT, PERSONAL AUTHOR, and INSTITUTION.

The MINI-FILE covers 574 INFORMATION ANALYSIS PRODUCTS (IAPs) developed by the sixteen (16) ERIC CLEARINGHOUSES. The information is synthesized into research reviews, bibliographies, state of the art studies, interpretive studies on topics of high current interest, and similar documents designed to meet the information needs of users.

INCLUDED ARE TYPICAL TITLES OF CURRENT INTEREST:

- Recent Trends in Bilingual Education
- Cheating: An Annotated Bibliography
- Women's Athletics
- Teaching Local History
- Assertiveness Training
- Children and Television
- Translation as a Career Option for Foreign Language Majors
- Intercultural Communication
- Energy Investigation for the Classroom
- Alternative Tuition Systems
- Strengthening the Small Rural School
- Adult Learning: Issues and Innovation
- Alternatives to Suspension

BRAINSTORM FROM NATIONAL TECHNICAL MEETING

ADVERTISING AND COMMUNICATION:

1. Systematic press releases
2. TV spots/public TV, radio
3. Ads in educational journals
4. Ads in library journals
5. Mass mailing to teachers, professors, graduating teachers about ERIC
6. Send out products, etc. to state linkers, teachers' colleges
7. ERIC calendar
8. T-shirts
9. Traveling ERIC show
10. Movies for high schools, colleges/audiovisual component to ERIC
11. Introduce ERIC into public schools
12. ERIC visit school assemblies
13. ERIC week
14. Send ERIC collection to every library
15. Publicize ERIC in campus papers
16. 24-hour hotline (800 number)
17. Coupons in journals
18. Add ERIC to free materials lists in journals
19. ERIC game
20. Send ERIC booth display to ALL educational conferences
21. ERIC flag
22. Hire merchandising director/marketing consultant
23. Phone-in service for documents
24. Displays in bookstores
25. Direct mail ads -- buy mailing lists (promote RIE/CIJE subscriptions)
26. RIE -- front pages -- "highlight" section
27. ERIC contact people on college campuses (promote among faculty and students, connect people to librarians)
28. Combined book exhibit
29. Interview show on TV
30. Program to increase RIE/CIJE subscriptions
31. Develop a central place/method to order information about ERIC
32. Develop more contact with schools of library science/schools of education
33. Use catchy language
34. Distribute curriculum (handouts, etc.) to teach ERIC
35. Special summer conference on promotion/marketing
36. Slogan
37. Change names of RIE, CIJE, IAP's, etc.
38. Fund a marketing person for each Clearinghouse
39. Liaison person with public school system
40. On-line ordering of all IAP's
41. Congressional lobby
42. International coverage -- conference with EEC, etc.
43. Complimentary copy of RIE/CIJE to graduate students
44. Mascot -- unicorn, oryx, kangaroo, tiger, owl? -- which can be sold as stuffed animal
45. Same stationery for all Clearinghouses
46. Courses on ERIC for credit for teachers (TV, correspondence, etc.)
47. National contest -- IAP products
48. ERIC inserts for conferences
49. Inserts for 1st-year graduate students -- services products
50. Newsletters for all teacher centers and SOC's

BRAINSTORM

Advertising and communications, cont.

51. Conferences for overseas persons
52. ERIC-mobile
53. Develop copy for search vendor newsletters
54. Testimonials from users
55. Contest from users for ERIC improvements
56. Document of the month (w/ author photo)

PRODUCTS AND IMPROVEMENTS OF PRODUCTS:

1. Develop a system-wide user services brochure that relates specifically to the user services function of ERIC
2. Develop a "standard ERIC packet"
3. Slicker/fine quality brochures
4. Slick catalog of ERIC tools, publications
5. More money for publications -- color, photos, etc.
6. Create phonograph records
7. Mini-editions of ERIC products
8. Fund a Clearinghouse on arts and humanities
9. Develop a thesaurus in a more flexible format

WORKSHOPS/TRAINING:

1. Give more assistance to libraries to train about ERIC
2. Develop an ERIC curriculum for use in graduate/undergraduate courses
3. Free workshops
4. More workshops -- focus on "in's and out's" of ERIC data base
5. ERIC-sponsored tours -- to Clearinghouse's facility
6. Free search demonstrations
7. Public speaking training for workshop givers
8. On-line searcher workshops sponsored by ERIC
9. More participation in NFALS
10. Introduce everyone to microfiche readers
11. Provide money for computer training
12. Workshops for NON-SOCS
13. Money for teaching secondary schools about ERIC
14. Cover more (or all) conferences of professional associations
15. Visits to other Clearinghouses
16. Job-specific retreats
17. Training programs: librarians, college of education faculty

OTHER:

1. Subsidize short-term internships
2. Use credit cards to buy information
3. ERIC vehicle
4. Travel money to go to university libraries, exhibit
5. Summer internship
6. Search scholarships - matching funds
7. Cut-rates for certain searchers
8. Bonuses for signing up new SOC's
9. More money to visit SOC's

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC Clearinghouse on Elementary and Early Childhood Education

- a. *Parent Involvement in Education: A Bibliography*. Michael L. Henninger. 29p. May 1979. Catalog Number 184. Price: \$5.00.

This comprehensive bibliography on parent involvement in education includes published materials on this topic from January 1970 through October 1978. References were gathered from the following sources: *Current Index to Journals in Education*, *Education Index*, *Reader's Guide to Periodical Literature*, and *Books In Print*. The bibliography is organized into the following subcategories: Benefits, Goals, Rationale for Involvement; Books on Parent Involvement; Communicating With Parents; Evaluation of Involvement; Ideas for Involvement; Parents As Decision-Makers; Parents As Teachers; Parents Involvement Programs; Parents' Rights and Responsibilities; and Suggestions to Parents for Involvement.

Available from: ERIC/EECE
805 W. Pennsylvania Avenue
Urbana, Illinois 61801

2. ERIC Clearinghouse on Information Resources

- a. *A Practitioner's Guide to Concepts and Measures of Motivation*. John M. Keller, Edward F. Kelly, and Bernard J. Dodge. 111p. 1978.

Brief explanations are provided of six concepts, or approaches, that are particularly relevant to the understanding of motivation in education, together with a summary of principles for each, some suggestions for application, and descriptions of selected measurement instruments.

3. ERIC Clearinghouse on Languages and Linguistics

- a. *Games and Simulations in the Foreign Language Classroom*. Alice C. Omaggio. 60pp. May 1979. Price: \$5.95.

Materials are organized in terms of their usefulness for reaching specific instructional objectives. Sample games are provided in English, French, German, Russian, Spanish, Chinese, and Italian.

- b. *Problems and Teaching Strategies in ESL Composition*. Ann Raimos. 22pp. May 1979. Price: \$2.95.

Problems covered include sentence structure and grammar; rhetorical structure and organization; reading; vocabulary, spelling, and idiom; content; and attitude toward English.

- c. *Graduate Theses and Dissertations in English as a Second Language: 1977-1978.* Stephen Cooper. 20pp. May 1979. Price: \$2.95.

Most entries include summaries of abstracts provided by the author of the thesis.

- d. *Foreign Languages, English as a Second/Foreign Language, and the U.S. Multinational Corporation.* Marianne Inman. 38pp. May 1979. Price: \$4.95.

Examines the position of language and language training in the international corporate environment.

4. ERIC Clearinghouse for Junior Colleges

- a. *Changing Administrative Relations Under Collective Bargaining.* John Lombardi. June 1979.

This product is available free from the Clearinghouse for as long as the supply lasts.

4. ERIC Clearinghouse on Reading and Communication Skills

- a. *ERIC First Analysis: U.S. Foreign Policy - 1979-80. National High School Debate Resolutions.* Bill Henderson. 87p. June 1979. CS 502 509. Price: \$2.25. Non-members: \$2.50.

Intended as a resource for students in their study of the issues and arguments pertinent to the 1979-80 National High School Debate Resolution. Sections include discussion of the problem area and the debate resolutions, the trade resolutions, the arms resolutions, the aid resolutions, and debate plans.

- b. *Communication with the Elderly: Shattering Stereotypes.* Vicki S. Freimuth and Kathleen Jamieson. 38p. June 1979. CS 502 543.

A section on theory discusses breaking barriers to communications between generations and is designed for use by secondary classroom teachers who desire to sensitize their students to the ways in which language reveals hidden judgments about elders and aging into the ways in which media reinforce stereotypes about elders and aging. The practice section suggests several exercises and activities that may be used in a unit on communication and the elderly.

- c. *Listening Instruction.* Andrew D. Woldvin and Carolyn Gwynn Coakley. 42p. June 1979. CS 502 544.

Discusses appreciative listening, discriminative listening, comprehensive listening, therapeutic listening, and critical listening, and suggests practical exercises to assist in developing listening awareness and guiding listening skills.

Available from: Speech Communication Association
5205 Leesburg Pike
Falls Church, Virginia 22041

5. ERIC Clearinghouse on Teacher Education

- a. *The Teacher's World*. Eveleen Lorton, Jack Coffland, Mary Jo Brazelton, Sara West, and Nancy Kirsner. 49p. 1979.

This 40-page monograph spotlights an important human relations dimension of the current education scene: classroom teachers' perceptions of their role in the teaching profession. The responses of nearly one thousand teachers in an urban school system are analyzed for teacher opinions in nine areas of concern: career selection and satisfaction, staff development, discipline, problem, student academic difficulties, administrative concerns, parent relations, school finance, job characteristics, and characteristics of teaching. The responses have relevance for the education profession because they not only represent a hard look at the state of the art, but also because they lend vision for the times ahead.

- b. *Perspectives on Graduate Programs in Education*. Richard J. Clark, Jr.; and Others. 120p. April 1979.

Fourteen educators consider the current state of graduate programs in education in terms of the pressures, problems, dilemmas, and opportunities facing their individual institutions, and project directions and options for the future. An introduction and final essay by Kevin Ryan set the stage for critical thinking by readers concerned with the development of new, powerful, and more effective graduate programs for teachers.

ACTION ITEM

1. WORK WITH SCHOOL LIBRARIANS

Later in the year Central ERIC will be requesting a summary of activities and ways (e.g., workshops) in which Clearinghouses have worked with school librarians/media specialists. Please begin collecting this information now so it can be quickly pulled together.

...Bob Chesley (Central ERIC)

I. CENTRAL ERIC ANNOUNCEMENTS

A. POETIC RESPONSE TO FRUSTRATION

A poem from a user (and supporter) of ERIC, who tried to Xerox the orange flyer advertising the IAP minilibrary of microfiche, is displayed as Attachment 1. She points out, with a touch of irony, that others don't like colored paper either. If only all users were this talented!

There has been a delay in the availability of the minilibrary, but Clearinghouses will receive a set.

...Bob Chesley (Central ERIC)

B. CHANGES IN CLEARINGHOUSE FTS NUMBERS

The FTS numbers of the following Clearinghouses have been changed as indicated:

- Reading and Communication Skills 958-5545
- Elementary and Early Childhood Education 958-5542

The change is effective immediately. Please correct your directories accordingly.

...Frank Smardak (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. DIALOG'S SUPERSELECT SEARCH COMMAND AND TERMS WITH EMBEDDED BOOLEAN OPERATORS

It has recently come to our attention that ERIC users may be having problems with DIALOG's SuperSELECT search command (announced in the March 1979 issue of *Chronolog*) as it relates to those multiword ERIC Descriptors and Identifiers that contain Boolean operators or other DIALOG command words (e.g., "AND," "OR," "NOT," etc.). If the user is dealing with a descriptor like RESEARCH AND DEVELOPMENT CENTERS, then either the entire descriptor or the Boolean operator within it must now be enclosed within single or double quotation marks to indicate to the DIALOG system that the expression should be taken as is. The following examples show various retrieval results using SuperSELECT and illustrates the effect of using such quotation marks:

? S RESEARCH AND DEVELOPMENT CENTERS

1 103371 RESEARCH
0 DEVELOPMENT CENTERS
0 RESEARCH AND DEVELOPMENT CENTERS

? S "RESEARCH AND DEVELOPMENT CENTERS"

2 871 RESEARCH AND DEVELOPMENT CENTERS

? S 'RESEARCH AND DEVELOPMENT CENTERS'

3 871 RESEARCH AND DEVELOPMENT CENTERS

? S RESEARCH "AND" DEVELOPMENT CENTERS

4 871 RESEARCH AND DEVELOPMENT CENTERS

? S RESEARCH 'AND' DEVELOPMENT CENTERS

5 871 RESEARCH AND DEVELOPMENT CENTERS

Note that when the Boolean operator is enclosed within quotes, it must also be set off by a space on either side. For example:

? S RESEARCH"AND" DEVELOPMENT CENTERS

6 0 RESEARCHAND DEVELOPMENT CENTERS

Further information on SuperSELECT appears in the June 1979 issue of *Chronolog*.

...Meg Block (ERIC Facility)

B. PLAY THESAURUS/VIP INPUT

PT6 was distributed on July 13. This was 4 days later than scheduled. A heavy lexicographic input to the Facility's keying department delayed production of the camera-ready copy by two days. This, in turn, threw Xerox off schedule resulting in another delay of 1 day. Additionally, 6 faulty pages had to be recopied causing another 1 day delay. *PT6* had 927 new transactions, including 510 Clearinghouse DJF's submitted between April 13 and May 13.

PT7, covering input through May 29, was distributed as scheduled on July 30. This issue had 681 new transactions, including 359 Clearinghouse DJF's.

The total number of terms worked on through *PT7* is 1,780. This total is 52% of the approximately 3,400 terms expected to be evaluated in the VIP.

PT8 is currently scheduled for mailing on August 20, but, because lexicographic analysis is running behind schedule, it is expected to be about a week late. It will include about 800 new transactions.

The following list shows VIP input totals through August 9. It includes closures received in writing (DJF's or memoranda). Closures reached over the phone are not being logged and are not included in these totals.

CE - 133	JC - 286
CG - 447 (159 - OK as is)	PS - 290 (39 - OK as is)
CS - 162	RC - 162
EA - 225	SE - 198 (27 - OK as is)
EC - 238	SO - 135
FL - 128	SP - 185
HE - 424	TM - 280
IR - 623 (6 - OK as is)	UD - 266

SUBTOTAL - 4,182

AA (Facility) - 1,808 (reactions to CH input, *PT's* 1-7)

GRAND TOTAL - 5,990

...Jim Houston (ERIC Facility)

C. SO SCOPE OF INTEREST STATEMENT—REVISION

The SO scope of interest statement has been revised to add "COMPARATIVE EDUCATION K-12)." Please note the new "Notes" that specify *"Documents concerned with comparative education in general, as well as at the K-12 level, are processed by SO. Documents concerned with comparative education at the higher education level are processed by HE."*

With this notice we are using the EAB for the first time to send out revision pages to an independent product (see Attachment 2). Please let us know if you feel this means is effective.

...E.P. (ERIC Facility)

D. NEW EDRS ORDER FORM

A copy of the new EDRS Order Form (revised June 1979) is displayed as Attachment 3. Copies of this form may be obtained by contacting EDRS.

The form contains the new EDRS prices and incorporates the new Price Codes that will appear for the first time in the August 1979 RIE. Any stock of the old form still retained by the Clearinghouses should be discarded and replaced with this new form.

...Elizabeth Pugh (ERIC Facility)

E. "PAPER COPY" REPLACES "HARD COPY"

Beginning with the August 1979 issue of RIE, the phrase "Paper Copy" will replace the phrase "Hard Copy," wherever it appears in the RIE front matter.

In order to maintain consistency, Clearinghouses should also begin to use the phrase "Paper Copy," whenever they construct cataloging notes that refer to full-size copies reproduced from microfiche.

...Lee Schreiber (ERIC Facility)

III. EDRS ANNOUNCEMENTS

A. SALES LEAD FOR EDRS

The ERIC Document Reproduction Service (EDRS) would like to secure names and addresses of any organizations expressing interest in acquiring the ERIC Standing Order Microfiche Collection. A prompt followup to prospective subscribers by EDRS with comprehensive information would increase the possibility of expanding the SOC base.

...J.V. (EDRS)

B. EDRS ON DEMAND SALES STATISTICS

ERIC Clearinghouses may order quarterly reports from EDRS on their on-demand sales orders by ED number. This statistical reference tool, which is on microfiche, allows each Clearinghouse to determine the popularity of the documents submitted for RIE.

Requests should be made to James Prevel at Central ERIC.

...Jack Veale (EDRS)

IV. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. SUCCESS FOR "ERIC—A SOURCE"

The ERIC Clearinghouse on Counseling and Personnel Services was well-represented in Research Week, sponsored by the University of Michigan School of Education for faculty members. Garry Walz, Director of CAPS, gave a full address on "ERIC—A Source," which brainstormed ways in which ERIC could be of specific use to research-oriented educators. Additional small-group sessions, held throughout the week offered participants the opportunity to learn more about ERIC and how to strategize searches. At least three-fourths of the School of Education faculty joined these sessions. Interest in ERIC was stimulated to the point that, at the suggestion of the Dean, free ERIC search time was made available to faculty participants to help them meet their own research needs.

...Carol Jaslow (CG)

B. WORKSHOP PARTICIPATION

In its continuing efforts to work with school media specialists and other librarians, the ERIC Clearinghouse on Reading and Communication Skills participated in an Affiliate Workshop for Public Libraries at the

Lincoln Trail Libraries System on July 12. Holly O'Donnell provided the group with a brief presentation on ERIC, the Clearinghouse, and the NCTE special library. From this workshop a *Directory of Affiliate Libraries* (including the ERIC Clearinghouses on Reading and Communication Skills and on Elementary and Early Childhood Education) will be prepared and disseminated regionally.

...M.K.M. (CS)

C. PRICING FLYER DEVELOPED FOR CS MINIBIBLIOGRAPHIES

The ERIC Clearinghouse on Reading and Communication Skills has developed a flyer giving current price information for users of its minibibliographies. When the new series of minibibliographies is published early this fall with price codes, complete ordering information will be available to send out in a format similar to the minibib format.

...M.K.M. (CS)

D. NCTE ACQUIRES ACCOUNT WITH DIALOG

Through the efforts and encouragement of the Clearinghouse, the National Council of Teachers of English recently acquired an account with DIALOG. Through this arrangement the Coordinator of Documents will regularly search the Newspaper Index for entries pertinent to the NCTE publication *Council-Grams*, which is published five times a year.

...Mary K Monteith (CS)

E. FOREIGN VISITOR

Mr. Kangni Azankpo Gbadoe, Secretary General, Ministry of Education and Scientific Research, Lome, Togo (West Africa), visited the Clearinghouse on May 18 during a tour of American educational institutions. He was a participant in the International Visitors Program of the International Communication Agency. While at the Clearinghouse, he spoke (through a Department of State interpreter) with Philip Piele about the ERIC system's services and watched a demonstration of the computer terminal by Ian Templeton. He was delighted when Ian's search retrieved a document Mr. Gbadoe had himself written.

...Stuart Smith (EA)

F. LYNN SMARTE REPORTS ON MARS WORKSHOP

Lynn Smarte, User Services Specialist at the ERIC Clearinghouse on Handicapped and Gifted Children, gave a workshop in Richmond,

Virginia for 50 participants at the Machine Assisted Reference Service (MARS) online user group organizational meeting. Participants were especially interested in ERIC indexing procedures, *Thesaurus* development, and the new publication type codes.

...Marion Cambel (EC)

G. ADMINISTRATOR UPDATE

The newest IAP series produced by the ERIC Clearinghouse on Higher Education is entitled *Administrator Update*. The Clearinghouse, in cooperation with the American Association of University Administrators, will publish three short reviews a year of issues relevant to university administrators.

...M.S. (HE)

H. CONFERENCE PARTICIPATION

The ERIC Clearinghouse on Higher Education recently co-sponsored a conference with several North Carolina universities, including North Carolina Central and the University of North Carolina. The conference, which was held in Raleigh, North Carolina, was entitled "The Impact of Desegregation on Higher Education." It drew local, state, and regional attention through newspaper and television coverage. Jon Fife, Lynn Haupt, and Thomas Linney participated. The Clearinghouse sponsored a display, conducted computer searches, and presented two workshops.

The Clearinghouse was also recently represented, by Jonathan Fife and Lynn Haupt, at the annual conference of the American Association of University Administrators, held in San Francisco, California. An ERIC display was sponsored and computer searches conducted.

...Marilyn Shorr (HE)

I. NOTE FROM DON ELY

The Director of the ERIC Clearinghouse on Information Resources, who will be returning early this month from a teaching stint in Indonesia, reports that the librarian had a copy of the *Thesaurus of ERIC Descriptors* (6th edition) out on the desk when he walked into the new library at the Educational Technology Center in Jakarta. He has had a busy schedule with little time for sightseeing, but the foods he has sampled sound exotic.

...Barb Minor (IR)

J. NEW PHONE SYSTEM AT IR

The ERIC Clearinghouse on Information Resources has installed a new telephone arrangement at the university. The Infoswitch long-distance phone-calling system went into effect on July 27, 1979. Each of the Clearinghouse personnel has a 5-digit code number to dial before being given lines to make calls. Problems with the new telephone system are being experienced and your patience is requested while adjustments are being made.

...Barb Minor (IR)

K. CHILDREN OF THE 80'S: PERSPECTIVES FOR ACTION

The ERIC Clearinghouse on Elementary and Early Childhood Education will host a conference in observance of the International Year of the Child entitled "Children of the 80's: Perspectives for Action" on November 5-7, 1979, in Champaign-Urbana, Illinois at the University Inn in Champaign.

This conference is designed to promote the exchange of ideas and information among people from the United States and other countries who are actively involved in education and training, research, social services, and policy-making related to young children and their families. Among the topics to be discussed by panelists are:

- curriculum implementation in different settings and cultures;
- provision of supportive services for children;
- use of the media for teaching parents and caregivers; and
- dissemination of information about child care and education.

Edith Grotberg, Director of the Research, Demonstration, and Evaluation Division of the Administration for Children, Youth, and Families, Washington, D.C., will be the keynote speaker. Lilian G. Katz, Director of the ERIC Clearinghouse on Elementary and Early Childhood Education, will give the welcoming address.

The conference is jointly sponsored by the National Institute of Education, ABLEX Press, and the University of Illinois Office of International Programs and Studies.

...Mary Glockner (PS)

L. INDIAN EDUCATION

The Walker River Paiute Tribe invited the ERIC Clearinghouse on Rural Education and Small Schools to participate in their workshop entitled "You and Indian Education" to be held in Schurz, Nevada on August 18-19, 1979. Amelita Hill, User Services Coordinator, will present a session on American Indian curriculum materials in the ERIC system.

...A.H. (RC)

M. RURALITY

Dr. Everett Edington and Ms. Betty Rose Rios, Information Specialists at the ERIC Clearinghouse on Rural Education and Small Schools, will be attending the Rural Sociological Society annual meeting in Burlington, Vermont on August 24-25, 1979. Dr. Edington will be chairing a session on "Rural Youth" at the meeting and Ms. Rios will be involved in the distribution of ERIC materials to the participants, as well as solicitation of papers to be included in the ERIC system.

...A.H. (RC)

N. REGIONAL DISSEMINATION FORUM

The ERIC Clearinghouse on Rural Education and Small Schools (ERIC/CRESS) and the Office of Education Programs, Region VI, Dallas, Texas, are co-sponsoring a Regional Dissemination Forum. The forum, with the theme "Building a Systematic Regional Dissemination Process," will be held in Dallas, Texas on August 22-23, 1979. USOE Region VI is comprised of Arkansas, Louisiana, parts of Mississippi, New Mexico, Oklahoma, and Texas. Representatives from these states will be coordinating dissemination efforts involving the elements of spread, or exchange, choice, and implementation of educational products, practices, and information.

...Amelita Hill (RC)

O. NEW ASSISTANT DIRECTOR AND USER SERVICES SPECIALIST AT SP

Michael Butler has recently been promoted to the position of Assistant Director of the ERIC Clearinghouse on Teacher Education, replacing John Waters. Michael has been with the Clearinghouse for three years and most recently served as the User Services Specialist.

The User Services position has been filled, in turn, by Dean Schwanke, formerly a full-time indexer/abstractor with the Clearinghouse.

...Dean Schwanke (SP)

P. SOC WORKSHOP IN ATLANTA, GEORGIA

The ERIC Clearinghouse on Teacher Education and the ERIC Clearinghouse on Higher Education participated in an ERIC Standing Order Customer (SOC) workshop in Atlanta, Georgia, on July 25-26, 1979. The 24 participants came from states as distant as Texas and Louisiana and were drawn from a list of those who could not attend previous workshops in the southern region. Two of the main comments on the evaluation sheets were:

- "Why not have these workshops more frequently?" and
- "We could have used more time to discuss the materials."

...M.B. (SP)

Q. ASSOCIATION OF TEACHER EDUCATORS WORKSHOP

The Assistant Director of the ERIC Clearinghouse on Teacher Education staffed an ERIC display booth at a 3-day workshop organized by the Association of Teacher Educators in Glenwood Spring, Colorado on August 6-8, 1979. Demonstrations were given on computer and manual searching of the ERIC data base in the areas of early field experience, student teaching, and professional growth (themes discussed at the workshop). Information packets containing citations drawn from the ERIC data base, *Submitting Documents to ERIC*, and other materials were distributed to the participants.

...M.B. (SP)

R. CLEARINGHOUSE ASSOCIATE TO ASSUME TEACHING/COACHING POSITION

Mr. Steven Barnett, Clearinghouse Associate for Health, Physical Education, and Recreation (HPER) has announced his resignation from the Clearinghouse staff effective August 13, 1979. The Associate provides guidance to all Clearinghouse staff in the HPER scope area and has task leadership responsibilities in requirements analysis and evaluation. The majority of the Associate's time is devoted to data base building and outreach activities. Mr. Barnett will assume a teaching/coaching position at Potsdam State University in New York at the beginning of the fall semester.

...Mike Butler (SP)

S. CONFERENCE PARTICIPATION

On July 11, the ERIC Clearinghouse on Urban Education and the Institute for Urban and Minority Education at Teachers College sponsored the morning session of the annual Superintendents Work Conference at Teachers College, Columbia University. Dr. Erwin Flaxman, Director (as of September 1) of the ERIC Clearinghouse on Urban Education moderated the session on information resources for education. Michael B. Kane, Assistant Director of the Research and Educational Practice Program at NIE addressed the group on "The Use of Educational R&D in Administrative Decision-Making: Past Practice and Current Opportunities." Gary Griffin, Director of the Division of Instruction at Teachers College, spoke on "How Do We Know What We Know: Research and Practice."

...P.R. (UD)

T. WORKSHOP FOR SCHOOL PARTICIPANTS

Forty school superintendents attending the annual Superintendents Work Conference at Teachers College participated in a workshop at the ERIC Clearinghouse on Urban Education during the afternoon of July 11. The workshop discussion on ERIC and non-ERIC information resources for education was led by Pauline Rothstein. Special emphasis was placed on materials and services available from the ERIC Clearinghouse on Educational Management. Packets of materials, including sample abstracts from EA, and information on other information data bases, clearinghouses, and networks were distributed.

In addition, a separate state dissemination leadership project was distributed. At the workshop Bob Vivolo did computer searches of the ERIC data base. These searches were displayed on television monitors so that Bob could explain the search procedures to the superintendents. Georganne Chapin did individual computer searches for superintendents who had submitted questions prior to the workshop. Computer searches for 25 superintendents were submitted by July 11. Searches not completed during the workshop were completed during the following week. Superintendents were sent printouts of up to 25 citations.

Ode On An Attempt to Xerox Info on the New Bibliography Micro Package

In spite of all our efforts
To make the system work
We're trapped in little ironies
And shades of grin and smirke.

For as our left hand doth instruct-
And tell us what to do
Our right hand marches down the path
And prints on darkest hue.

And as we try to spread the word
By xerox (mail's too s-l-o-w~)
To workshop folk and visitors
Who desp'rately want to know.

We realize that Murphy's law
Resides both near and far
And high and low and up and down
And in and out — by Gar!

SOCIAL STUDIES/SOCIAL SCIENCE EDUCATION (S0)

Scope of Interest:

All levels of social studies and social science education; social studies teachers; content of the social science disciplines; applications of learning theory, curriculum theory, child development theory and instructional theory to social science education; research and development projects, programs, and materials in social science education; the contributions of social science disciplines (anthropology, economics, geography, history, sociology, social psychology, psychology, political science) to knowledge and understanding of the educational process; education as a social science; comparative education (K-12); social studies curriculum materials and ideas on such subjects as ethnic heritage studies, bias and discrimination, aging, adoption, women's equity, and sex education. Documents in the humanities, including music and art education, are received and processed but not actively sought.

Notes:

Documents concerned with comparative education in general, as well as at the K-12 level, are processed by S0. Documents concerned with comparative education at the higher education level are processed by HE.

Brief Statement:

All levels of social studies and social science education; content of the social science disciplines; applications of learning theory, curriculum theory, child development theory, and instructional theory to social science education; research and development projects, programs, and materials in social science education; contributions of social science disciplines (anthropology, economics, geography, history, sociology, social psychology, political science); education as a social science; comparative education (K-12); curriculum materials and ideas on subjects such as ethnic studies, bias and discrimination, aging, adoption, women's equity, and sex education.

GENERAL INFORMATION

1. PRICE LIST

The prices set forth herein may be changed without notice, however, any price change will be subject to the approval of the National Institute of Education Contracting Officer

2. PAYMENT

The prices set forth do not include any sales, use, excise, or similar taxes which may be levied on the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMIC.

3. REPRODUCTION

Express permission to reproduce a copyrighted document provided the requester must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

CMIC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay (a) is due to events beyond the control of CMIC including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments, (b) is due to failures of performance of subcontractors beyond CMIC's control and without negligence on the part of CMIC, or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY

CMIC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMIC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

CMIC MAKES NO WARRANTY, EXPRESS OR IMPLIED AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. QUALITY

CMIC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMIC. Best available copy will be supplied.

8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMIC.

9. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with CMIC to pay any invoice when due or to accept any shipment as ordered, CMIC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of CMIC in exercising any right hereunder shall waive any rights of CMIC or modify this Agreement.

10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

11. DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of \$200.00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the actual cost and postage. A monthly statement of the account will be furnished.

12. STANDING ORDER ACCOUNTS

Customers who desire to receive microfiche copies of all ERIC reports announced in each issue of Resources in Education may do so by depositing \$2000.00 or submitting an executed purchase order. The cost of each issue and postage will be charged against the account. A monthly statement of the account will be furnished.

13. PAPER COPY (PC)

A paper copy (PC) is xerographic reproduction, on paper, of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

14. FOREIGN POSTAGE

Postage for all countries other than the United States is based on the international Postal Rates in effect at the time the order is shipped. To determine postage allow 75 microfiche or 75 PC pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

OTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

STANDING ORDERS

Subscription orders of microfiche copies of all ERIC reports announced in each issue of Resources in Education average \$150.00 per month.

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC Clearinghouse on Educational Management

- a. *Teacher Supervision. The Best of ERIC, Number 42.* ERIC Clearinghouse on Educational Management. 5 pages. January 1979. ED 166 770. Free.

Twelve annotations based on recent entries in the ERIC system concern supervision of teachers. Research studies cited deal with supervision of first-year teachers and student teachers, communications between supervisors and teachers and between supervisors and the community, and a history of developments in the field. Also included are suggestions for achieving better quality control, reducing teacher anxiety, using videotape techniques, and facilitating learning through effective supervision (Author/LD)

- b. *Student Retention vs. Social Promotion. The Best of ERIC, Number 43.* ERIC Clearinghouse on Educational Management. 5 pages. February 1979. ED 166 771. Free.

Ten annotations of literature in the ERIC system that discuss the pros and cons of grade retention for low-achieving students are presented in this booklet. (Author/MLF)

- c. *Merit Pay Programs. The Best of ERIC, Number 44.* ERIC Clearinghouse on Educational Management. 5 pages. March 1979. ED 168 128. Free.

The thirteen documents and journal articles annotated in this document discuss and describe merit pay programs for teachers and for administrators. (IRT)

- c. *Student Activities Programs. The Best of ERIC, Number 45.* ERIC Clearinghouse on Educational Management. 5 pages. April 1979. EA 011 440. Free.

This bibliography contains twelve annotations from the ERIC system that focus on practical aspects of student activities programs. Publications cited deal with planning, organizing, evaluating, and funding of such programs. The principal's function is highlighted. One publication presents findings of a national survey concerning student activities programs, while another presents a 450-item bibliography on the topic. Some entries discuss particular programs such as intramural sports, student councils, or student leadership classes, while others focus on general aspects such as group dynamics. (JM)

- d. *The Best of the Best of ERIC. Volume 2.* ERIC Clearinghouse on Educational Management. 123 pages. 1979. ED 163 620. Free.

Intended for use as a reference volume by elementary and secondary school administrators, this annotated bibliography is divided into 20 chapters, each containing summaries of from 11 to 18 documents and

journal articles (indexed in ERIC) on a topic of current interest to school administrators. The materials annotated were selected to give the reader a good idea of the major issues and proposed solutions in each of the 20 areas. (PKP)

2. ERIC Clearinghouse on Elementary and Early Childhood Education

- a. *The Visual Arts and Cognitive Development: An Annotated Bibliography.* Compiled by William Ives. 42 pages. July 1979. Catalog #185. Price: \$4.00.

This annotated bibliography provides more than 300 references to books, journal articles and conference papers concerned with the visual arts and cognition, particularly as related to children's development. Among the topics covered in the materials cited are: developmental theory, art education, art criticism, aesthetics; research on aspects of cognition (perception, imagery, spatial relations, symbolization, representation), children's conceptions of art, the development of artistic ability. Related areas of developmental research, such as creativity, play, fantasy and personality, are also included.

3. ERIC Clearinghouse on Higher Education

- a. *The Three "R's" of the Eighties: Reduction, Reallocation and Retrenchment.* Kenneth Mortimer and Michael Tierney. 84p. June 1979.

How are institutions handling lower enrollments, cutbacks in public financial support, increased percentage of tenured professors, and the other major factors that come into play in a contracting industry? Have these methods or procedures been successful? How have they been perceived by the members of the institutions? What effect have they had on curriculum? On the students? These questions are addressed in this report with several case studies discussed to give greater clarity to suggested remedies.

- b. *Administrative Evaluation.* Carolyn Winshell. 6p. June 1979.

Administrative evaluation is the latest "newcomer" to the scene of evaluation in higher education. This study provides a survey of the literature relevant to administrative evaluation in higher education. Consideration is given to reasons for the increasing importance of this type of evaluation, approaches to and components of an evaluation plan, some of the problems involved in the evaluation process and use of results.

4. ERIC Clearinghouse on Science, Mathematics, and Environmental Education

- a. *Science Education: Accomplishments and Needs. A Working Paper.* December 1978. 60p. Price: \$1.95.

This working paper contains a discussion of the status and future of science education as perceived by the National Science Teachers Association (NSTA). Part one focuses on the aims of science teaching. Part two considers the present situation in science teaching in the United States. Part three presents recommendations for coming years in the areas of curriculum development, improvement of teaching, encouragement of women and minority students in careers in science, and trends in federal support and their implications for science education.

- b. *Mathematics Education: A Bibliography of Abstracts from Resources in Education (RIE) from 1976-1977.* Jon L. Higgins, Robert W. Howe, and James M. Kozlow. 53lp. Price: \$15 (without binder); \$18 (with binder).

This publication contains abstracts and indexes to selected documents announced in *Resources in Education* from 1976 to 1977. Documents indexed include instructional materials, research reports, teaching guides, and other items. The compilation is designed to serve as an effective tool to assist teachers, researchers, curriculum developers, librarians, administrators, concerned citizens, and others concerned with mathematics entries; in the remaining sections the abstracts are indexed by subject, identifier, author, and institutional author. Supplements will be issued periodically.

- c. *Energy Activities for the Classroom, Volume II.* Herbert L. Coon and Mary Lynne Bowman. December 1978, 164p. Price: \$3.00

This sourcebook, designed for use in grades K-12, contains energy teaching activities related to energy resources, production, distribution and use. Each activity has been classified by the editors according to the most appropriate grade level, subject matter, and energy concept involved. Subject areas are science, mathematics, social studies, language arts, and fine arts. The references cited in specific activities could be useful to persons interested in obtaining more activities and ideas related to energy. Many of the activities are interdisciplinary in nature and were developed or suggested by public school teachers. This volume supplements, but does not replace *Energy Investigations for the Classroom* published in 1976.

Available from: SMEAC Information Reference Center
1200 Chambers Road, Room 310
Columbus, Ohio 43212

5. ERIC Clearinghouse on Urban Education

- a. *Classroom Culture and the Problem of Control*. Joseph C. Grannis. ERIC/CUE Urban Diversity Series Number 63. May 1979. 43p. Will be available from EDRS in microfiche and hard copy.

The author reviews the research and literature on the formal conditions of schooling and of classrooms, and concludes that far-reaching changes in such areas as pupil-teacher ratios, fixed time-frames, and academic testing may be needed in order to develop fundamentally different educational possibilities.

- b. *ERIC References on Urban and Minority Education*. Compiled by Robert L. Vivolo. *Equal Opportunity Review*. May 1979. 12p. Single copies available free from ERIC/CUE as long as the supply lasts.

This unannotated bibliography contains references cited in the January through December 1978 issues of *Resources in Education*, on such topics as bilingual education, compensatory education, school integration, the education of specific ethnic and racial groups, and problems of inner-city schools. Each citation is followed by an ERIC Document identification number. A subject index and ordering instructions are included.

DOCUMENT REPRODUCTION SERVICE

P.O. Box 190 ARLINGTON, VIRGINIA 22210 • (703)841-1212

OPERATED BY: COMPUTER MICROFILM INTERNATIONAL, CORP.

June 8, 1979

Mr. Jim Prevel
National Institute of Education
1832 M Street, N.W.
Washington, D.C. 20208

Dear Jim:

We have reviewed the RIEAPR79 Microfiche Inventory and Quality Check and the following is submitted.

- The following microfiche will be produced from the cited documents and distributed as post issue remakes:

162 156 2/8	162 744 1/1	163 097 1/1
162 562 1/1	162 911 2/3	163 104 1/1
162 698 1/2	163 086 1/1	

- The following documents are not recommended for refilming:

ACCESSION	CLHSE	LEVEL	RESUME NOTE	REASON NOT RECOMMENDED FOR REFILMING
162 066	CE	II	Yes	Filmed as received - Xeroxed wrong Very light print Page 27 filmed as received - page 122 just cut very close
162 091	CE	II	Yes	
162 128	CE	II	Yes	
162 213	CG	II	Yes	Light print
162 409	EA	II	None	Light, thin print
162 449	EC	I	Yes	The passage on page 860 is worn out, also page 860 is just cut very close, no information lost
162 549	HE	I*	None	Light worn out print
162 850	SE	II	None	Pages 2, 3 and 69 all have thin, small red print on a brown background
162 873	SE	I*	Yes	Light and broken print
162 878	SE	II	Yes	Pages 14-17 filmed as received
163 117	UD	I*	Yes	Light print

- It is recommended that the ACCESSION showing an asterisk (*) be evaluated for possible change from Level I to Level II.
- The eight (8) microfiche to be refilmed represent a remake rate of only 1/4 of 1% of the original microfiche created.

Sincerely,

J. N. Veale
Director

Mr. Jim Prevel
National Institute of Education
1832 M Street, N.W.
Washington, D.C. 20208

Dear Jim:

We have reviewed the RIEMAY79 Microfiche Inventory and Quality Check and the following is submitted.

- The following microfiche will be produced from the cited documents and distributed as post issue remakes:

** 163 166 2/2 163 808 1/1 164 693 3/4,4/4
163 220 5/6,6/6 164 593 1/1

- The following documents are not recommended for refilming:

ACCESSION	CLHSE	LEVEL	RESUME NOTE	REASON NOT RECOMMENDED FOR REFILMING
163 194	CE	II	Yes	Filmed as received
163 205	CE	I	Yes	No problem found - sent replacement fiche to Murray Howder
163 310	CG	J*	Yes	Thin, light blue print
163 319	CG	I*	Yes	Light print
163 382	CG	I*	None	Light type
163 686	EC	I	None	No problem found - sent replacement fiche to Murray Howder
163 718	EC	II	Yes	Pg. 40 filmed as received - light, broken type throughout document
163 720	EC	I*	None	Light print
163 737	EC	I*	None	Light, broken print
163 748	EC	I*	Yes	Filmed as received
163 890	IR	I*	None	Filmed as received
163 996	IR	I	None	No problem found - sent replacement fiche to Murray Howder
** 164 093	PS	II	Yes	Pg. 36 photograph - did not reproduce
164 155	RC	II	Yes	Dark orange colored paper
164 438	SP	I*	None	Filmed as received
164 467	SP	I*	None	Filmed as received
164 577	TM	II	Yes	Filmed as received
164 594	TM	I*	None	Worn out print
164 604	TM	I	None	No problem found - sent replacement fiche to Murray Howder
164 633	UD	II	Yes	Bad xeroxing
164 742	UD	II	Yes	Broken, worn out print

** These documents were not listed in Facility Letter

- It is recommended that the accession showing an asterisk be evaluated for possible change from Level I to Level II.
- The 7 microfiche to be refilmed represent a remake rate of only 3/10 of 1% of the original microfiche created.

Sincerely,

J.N. Veale, Director

ACTION ITEMS

1. GUIDELINES FOR PLACEMENT OF THE NIE LOGO ON ALL CONTRACT-PRODUCED PUBLICATIONS AND THE ERIC LOGO ON INFORMATION ANALYSIS PRODUCTS

The NIE Publications Committee has recently issued a policy statement concerning the use and placement of the NIE logo and funding/disclaimer statement on contract-produced publications. This policy has relevance for all publications produced by ERIC contractors.

The boxed graphic below is to be placed on the back of the title page, in the middle or lower third of the page. You will note that the NIE contract number of the publication's producer is to be inserted in the third line.

INSERT
APPROPRIATE
NUMBER

NIE This publication was prepared with funding from the National Institute of Education, U. S. Department of Health, Education, and Welfare under contract no. _____. The opinions expressed in this report do not necessarily reflect the positions or policies of NIE or HEW.

NIE will produce camera-ready examples of this statement for contractor use. However, if your publication schedule requires the logo's use before these copies are available, any artist may reproduce the logo. The typeface for the statement can be either Century (as in the sample) or one which corresponds to the typeface used in the publication itself.

Relative to this, it has been our concern for some time that Clearinghouse Information Analysis Products be identified as products of the ERIC system by ERIC users. Examples of users being unaware of the connection between a quality product, such as IAP's, and the Educational Resources Information Center (ERIC) are numerous. Consequently, the ERIC logo should be displayed on the covers of Information Analysis Products in a consistent manner. NIE's designer/artist has produced a guide entitled *Guidelines for Incorporating the ERIC Logo on Cover Design Motifs*. This guide, which is provided here as Attachment 1, displays several types of covers in order to exemplify the many problem situations an artist or designer may face.

Please comply with these policies for all publications developed with NIE/ERIC funds.

...Bob Chesley (Central ERIC)

2. ERIC DOCUMENT REPRODUCIBILITY GUIDELINES

Some months ago the *ERIC Document Reproducibility Guidelines* was distributed to all Clearinghouses. More than enough time has passed for Clearinghouses to read, use, and react to this publication.

Your comments about the actual daily use of the Guidelines would be appreciated. We would particularly like to know if any sections or features of the Guidelines have been especially helpful in making reproducibility or microfichability decisions. Please send comments directly to Jim Prevel at Central ERIC.

...Jim Prevel (Central ERIC)

I. CENTRAL ERIC ANNOUNCEMENTS

A. VIP Schedule Revision

On September 14, 1979, the ERIC Clearinghouses will have completed their input of changes, corrections, additions, etc., to the *Thesaurus of ERIC Descriptors* under the Vocabulary Improvement Project (VIP). The volume of VIP activity during the last ten months exceeded all expectations. We estimate that the final VIP input will include some 5,400 DJF's generated by the VIP Coordinators, with an additional 3,400 DJF's produced by the Facility lexicographers, Jim Houston and Meg Block.

VIP got off to a slow start, as indicated in the chart displayed as Attachment 2. Clearinghouse input grew during the middle months and skyrocketed towards the conclusion of the project. (More forms were received between June 15 and August 31 than in the previous seven months combined.) This uneven flow of work to the Facility, coupled with the enormous complexity of coordinating this type of effort within a decentralized system, has contributed to the development of a sizable backlog of work yet to be reviewed and acted upon by the lexicographers.

We have, therefore, found it necessary to revise the VIP schedule for the remainder of the project. (See Attachment 3 for the Revised Schedule.) In addition, a part-time lexicographer, John Rosenberg, has been hired for the remainder of the project.

Under the revised schedule, VIP Coordinators will receive three more editions of the *Play Thesaurus* (PT) (the 9-11th editions) over the next three months. After September 14, every effort will be made to achieve "closure" by telephone, rather than through the PT comment field. Thus, VIP Coordinators should expect periodic phone contacts with the lexicographers through December 21. Time spent on VIP review and closure should be considered as vocabulary/system improvement activity.

During the Fall we plan to summarize and document the activity of the project. Lynn Haupt will be in contact with VIP coordinators regarding this. (See Jim Houston's notice under "ERIC Facility Announcements" for further VIP information.)

We at Central ERIC wish to thank all ERIC staff who have contributed to the VIP project. We recognize that the level of effort expended exceeded that which we all anticipated; yet your enthusiasm and dedication to high quality input has been evident throughout. We, and more importantly the ERIC users, appreciate every effort made by those involved in the project. THANK YOU!

...Pat Coulter (Central ERIC)

B. CONTRACTS RENEWED: EC, HE, AND JC

The contracts to operate the ERIC Clearinghouse on Handicapped and Gifted Children (EC), the ERIC Clearinghouse on Higher Education (HE), and the ERIC Clearinghouse for Junior Colleges (JC), were all recently renewed with their incumbent institutions. In each case, the contract period begins September 1, 1979.

The following special projects are included:

● HE

Lynn Haupt will continue the Vocabulary Improvement Project (VIP) duties which she inherited in July when Barbara Booth left the JC Clearinghouse.

● JC

●● Descriptor Group Follow-Up

The ERIC Descriptor Groups will be reviewed and revised in light of the work and changes resulting from the Vocabulary Improvement Project.

●● Science Monographs

With cooperative support from NIE and the National Science Foundation (NSF), the Clearinghouse will publish and disseminate twelve monographs resulting from NSF-sponsored research in science education at two-year colleges. The project will enable widespread dissemination of the monographs to some 2,000 individuals, including the Chairpersons in each subject area at all U.S. two-year colleges, for use in planning science offerings.

●● Use of the Computer in Document Selection

This project is designed to test the feasibility of incorporating online statistical searches into Clearinghouse document selection procedures in order to provide document reviewers with objective data concerning representation in the data base of particular topics.

...Pat Coulter/Frank Smardak (Central ERIC)

C. ERIC DIRECTORS MEETING—COURTESY TRANSPORTATION FROM NATIONAL AIRPORT

Individuals attending the ERIC Directors Meeting (October 11-12, 1979) at the Alexandria Old Town Holiday Inn at 480 King Street, Alexandria, Virginia, who arrive from out-of-town at National Airport may, if they wish, take advantage of free Holiday Inn shuttle service to the motel. A courtesy phone located in the airport baggage area can be used to request such service. The motel is approximately ten minutes away from National Airport.

...Frank Smardak (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. Play Thesaurus/VIP Input

PT8 was distributed on August 27 in accordance with the revised VIP schedule. (See Pat Coulter's statement on this schedule under "Central ERIC Announcements".) *PT8* contained a total of 892 new transactions, including 446 Clearinghouse DJF's submitted between May 29 and June 13.

The total number of terms worked on through *PT8* is 2,085. This total is 61% of the approximately 3,400 terms expected to be evaluated in the VIP.

PT9 is expected to be distributed on September 24, according to the revised VIP schedule. It will have over 1,000 new transactions and will cover Clearinghouse input through approximately July 6.

The following list shows VIP input totals through September 10. It includes closures received in writing (DJF's or memoranda). Closures reached over the phone are not being logged and are not included in these totals.

CE - 192	JC - 308
CG - 507 (164 - OK as is)	PS - 324 (39 - OK as is)
CS - 214	RC - 167
EA - 301	SE - 200 (27 - OK as is)
EC - 238	SO - 154 (2 - OK as is)
FL - 154	SP - 237
HE - 473	TM - 488
IR - 685 (6 - OK as is)	UD - 330

SUBTOTAL - 4,972

AA (Facility) - 2,254 (reactions to CH input, *PT's* 1-8)

GRAND TOTAL - 7,226

...J.H. (ERIC Facility)

B. Thesaurus Working Copy

Although delayed because of VIP work, the June 1979 *Thesaurus Working Copy* will still be published and distributed. Production and printing of the alphabetical, rotated, and hierarchical displays are now underway. Barring unforeseen problems, the three displays should be mailed by mid-October. All terms marked "implemented" in the August 1979 *DJF Status Report* will be part of the June 1979 *Working Copy*.

As a reminder, Clearinghouses can immediately begin using as Descriptors those terms marked "implemented" in the *DJF Status Report*. It is unnecessary to wait for an updated *Thesaurus Working Copy*.

The December 1979 *Thesaurus Working Copy* will reflect all VIP changes. It is currently scheduled for distribution by February 29, 1980. (See revised VIP schedule, Attachment 3.) Should any Clearinghouse want to use as a Descriptor any approved new term in the *Play Thesaurus* before March 1980, simply construct the term's display from the most current *PT* using a regular DJF and submit the form to me. Your previously submitted VIP DJF's will contain accession numbers, authorities, and definition(s); therefore, those sections of the regular DJF may be left blank. On receiving such input, I will immediately input the Descriptor to the Master Thesaurus File and list the term as "implemented" in that month's *DJF Status Report*.

...Jim Houston (ERIC Facility)

C. BRS RELOADS ERIC FILE—SOME OBSERVATIONS

On September 10, 1979, Bibliographic Retrieval Services (BRS) made their newly reloaded ERIC data base available online. The most notable change was made to the Descriptor field, which is now searchable as either a controlled or free-text field. As a result of this change, the BRS ERIC data base, and associated retrieval procedures, now more closely resemble those available through Lockheed's DIALOG and SDC's ORBIT IV. There are still two significant differences, however, that need to be highlighted because of the complexity they create for searchers:

- First, BRS now has five paragraph designators that can be used to retrieve ERIC Descriptors. As before, "MJ" and "MN" are used to retrieve major or minor (respectively) single-word Descriptors or bound multi-word Descriptors. The new designators, "UJ" and "UN", are used to retrieve major or minor (respectively) unbound multi-word Descriptors. "UJ" and "UN" will not retrieve single-word Descriptors. "DE" is used to retrieve both major and minor single-word Descriptors and bound or unbound multi-word Descriptors. The following examples show various retrieval results using the different designators:

BRS - SEARCH MODE - ENTER QUERY

1_: GROUPS.DE.
RESULT 11793

2_: GROUPS.MJ;MN.
RESULT 279

3_: GROUPS.UJ;UN.
RESULT 11550

4_: 2 OR 3
RESULT 11793

5_: GROUPS.MJ;MN;UJ;UN.
RESULT 11793

- Second, now that the Descriptor field can be searched as either a controlled or free-text field, users can avoid hyphenating multi-word Descriptors. Note, however, that if hyphens are not used, the "ADJ" operator *must* be inserted between the words of the Descriptors instead. If no operator appears between two words, the search system automatically processes them in an "OR" relationship. The following examples show various retrieval results:

<p>BRS - SEARCH MODE - ENTER QUERY</p> <p>1_: EDUCATIONAL-PROGRAMS RESULT 7719</p> <p>2_: EDUCATIONAL-PROGRAMS.DE. RESULT 7719</p>	<p>Hyphen restricts search to the Descriptor field.</p>
<p>3_: EDUCATIONAL PROGRAMS RESULT 166684</p>	<p>If no operator is specified, the system processes the phrase as two words in an "OR" relationship. Note large number of postings.</p>
<p>4_: EDUCATIONAL ADJ PROGRAMS RESULT 9988</p>	<p>If designators are not specified, the system searches all fields.</p>

<p>5_: EDUCATIONAL ADJ PROGRAMS.MI.MN. RESULT 0</p> <p>6_: EDUCATIONAL.MI.MN. ADJ PROGRAMS RESULT 0</p> <p>7_: (EDUCATIONAL ADJ PROGRAMS'.MI.MN. RESULT 0</p>	<p>Either word in the phrase can be qualified. The system searches for "Programs" (in 5), "Educational" (in 6), and "Educational" and "Programs" (in 7) as major or minor single-word Descriptors. Again, unqualified words are searched for in all fields.</p>
<p>8_: EDUCATIONAL ADJ PROGRAMS.UI.UN. RESULT 7719</p> <p>9_: EDUCATIONAL.UI.UN. ADJ PROGRAMS RESULT 7719</p> <p>10_: (EDUCATIONAL ADJ PROGRAMS'.UI.UN. RESULT 7719</p>	<p>Here the system searches for "Programs" (in 8), "Educational" (in 9), and "Educational" and "Programs" (in 10) as major or minor unbound multi-word Descriptors.</p>
<p>11_: EDUCATIONAL ADJ PROGRAMS.DE. RESULT 7719</p> <p>12_: EDUCATIONAL.DE. ADJ PROGRAMS RESULT 7719</p> <p>13_: (EDUCATIONAL ADJ PROGRAMS'.DE. RESULT 7719</p>	<p>Here the system searches for "Programs" (in 11), "Educational" (in 12), and "Educational" and "Programs" (in 13) as major or minor single-word Descriptors and as bound or unbound multi-word Descriptors.</p>

...Meg Block (ERIC Facility)

III. ORYX PRESS ANNOUNCEMENTS

A. Oryx Change of Address

Effective September 25, 1979, Oryx Press will be moving to:

2214 North Central Avenue
Phoenix, Arizona 85004

...S.S. (Oryx Press)

B. CIJE Poster Available

A CIJE poster is now available from Oryx Press for use at workshops, exhibits, etc. It measures 18" x 24" and is printed in red and black on white. It describes the role of CIJE in the ERIC system.

...S.S. (Oryx Press)

C. CIJE Input By Clearinghouse

Beginning with this issue of the *ERIC Administrative Bulletin*, Oryx Press will begin submitting statistics by Clearinghouse for *Current Index to Journals in Education*. The information for the September 1979 issue of CIJE is presented as Attachment 4.

...Susan Slesinger (Oryx Press)

IV. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. CE Products Publicized

Most educators are familiar with the very impressive reference and resource books published annually by Marquis Academic Media. The ERIC Clearinghouse on Career Education recently learned that two of their Information Analysis papers in the 1977 series will be reprinted in their entirety and one will be reprinted in part.

Sex Fairness in Vocational Education, by John P. Schenck, and nearly all of the paper, *Sex Fairness in Career Education*, by Marla Peterson and Louise Vetter, will be included in the *Sourcebook of Equal Educational Opportunity* (3rd edition). The *Sourcebook* contains government and private statistics, evaluative studies, and related resource materials on the educational opportunities of women, ethnic minorities, and the disadvantaged.

Competency-Based Vocational Education: A Review, by William C. Knaak, will be included in the *Yearbook of Adult and Continuing Education, 1979-80* (5th edition). The *Yearbook* also contains government and private statistics and evaluative studies, as well as listings of associations and programs for adult education, continuing education, and career-related education.

...Joel Magisos (CE)

B. ERIC/CAPS CONDUCTS CLASSES

For the past five years, the ERIC Clearinghouse on Counseling and Personnel Services has conducted classes for library science students at the University of Michigan. The most recent demonstration course,

facilitated by Carol Jaslow, emphasized the use of ERIC through both manual and computer searching. In addition to a basic introductory session, students were given the opportunity to work online at the terminal with one of the CAPS searchers. Students prepared their search strategies prior to the "hands-on" experience and then ran their searches on the terminal while the CAPS searcher provided general information on the typing formats. Student evaluations of the class rated the course very highly, especially the opportunity for actual online searching.

...Helen Mamarchev (CG)

C. ERIC/CS PERSONNEL NOTES

Karl Koenke, Associate Director of the ERIC Clearinghouse on Reading and Communication Skills, has been working as a consultant on a job literacy program being conducted by Dr. Alden Moe of Purdue University. One of the purposes of the project is to identify the actual language needed to function in several entry-level jobs.

Kim Black has been promoted from User Services Secretary to User Services Assistant. Congratulations, Kim.

Anne Auten has joined the Clearinghouse staff as an abstractor/indexer. She replaces Mary Ann Isaacs who moved to St. Louis. Anne has experience as an English teacher and a production manager in a small publishing company, as well as degrees in English and in education.

...Mary K Monteith (CS)

D. AN EAGER EA CLIENT

We've never had this happen before! Murray A. Taylor, Executive Director of Washington's School Information and Research Service (SIRS), drove all the way from Seattle to pick up 200 copies of *The Best of the Best of ERIC*.

According to Mr. Taylor, SIRS bought the books so it could give a copy to every one of its member school districts as "the best introduction to ERIC" he has seen. Murray stated the information contained in *The Best of the Best of ERIC* is extremely useful to school administrators and is written in a language they can understand.

...Stuart Smith (EA)

E. ERIC/EC DIRECTOR PRESENTS WORKSHOP

Donald K. Erickson, Director of the ERIC Clearinghouse on Handicapped and Gifted Children, presented an intensive short term workshop on "Accessing Educational Information" in Snowbird, Utah,

on August 15, 1979. The participants in this workshop were representatives from twenty different state departments of education, many of whom were relatively new to those positions. It was an excellent opportunity to describe and promote ERIC. The week-long management seminar was sponsored by the National Association of State Directors of Special Education.

...M.C. (EC)

F. ERIC/NIE'S REGIONAL PROGRAMS MEETING

Donald K. Erickson (Director of the ERIC Clearinghouse on Handicapped and Gifted Children), Peter Eddy (Director of the ERIC Clearinghouse on Languages and Linguistics), and Robert E. Chesley (Head of ERIC) met on Tuesday, August 7, 1979 in a brief, but profitable, session with approximately 20 representatives of NIE's Regional Programs. This session took place at the invitation of Ed Ellis (Assistant Director, Regional Programs (DIP)), who expressed a strong commitment to enhancing cooperation between the Regional Programs of NIE and ERIC.

...M.C. (EC)

G. SEARCHING PRESENTATION GIVEN

Lynn Smarte, User Services Specialist at the ERIC Clearinghouse on Handicapped and Gifted Children, gave a presentation on searching ERIC and ECER at an online technical workshop on August 16, 1979. The workshop was sponsored by the Potomac Valley Chapter of ASIS, the On-Line Users Group of Washington, D.C., the College of Library and Information Sciences of the University of Maryland, and the Department of Library and Information Sciences of the Catholic University of America. Approximately 30 people attended Lynn's session.

...M.C. (EC)

H. FRANCES MARLAND (ERIC/EC) CONVALESCING AFTER SURGERY

Frances Marland, Acquisitions Clerk at the ERIC Clearinghouse for Handicapped and Gifted Children, is convalescing after major heart surgery on August 28, 1979.

...Marion Cambel (EC)

I. PERSONNEL CHANGES AT ERIC/FL

There have been several changes in the staff at the ERIC Clearinghouse for Languages and Linguistics over the past few months. Alice Omaggio left the Clearinghouse in July; her managerial duties

have been assumed by Kathleen McLane. Nancy Rhodes, who is now Processing Coordinator, is in charge of editing the RIE and CIJE shipments. John Brosseau is the new Acquisitions Coordinator. He is also involved in abstracting/indexing and in computer searching. In addition, we also have a new Administrative Secretary, Elizabeth Newman, a new Acquisitions/Processing Assistant (OCR typist), Tommie Blackwood, and a new User Services Assistant, Robin Ward.

...Kathleen McLane (FL)

J. ERIC/HE ACTIVITIES

Lynn Haupt and Marilyn Scutt Shorr of the ERIC Clearinghouse on Higher Education, and Mike Butler of the ERIC Clearinghouse on Teacher Education, conducted a summer SOC Workshop in Atlanta, Georgia.

The staff sponsored an ERIC exhibit at the annual American Political Science Association conference over the Labor Day Weekend.

... M.S.S. (HE)

K. PERSONNEL NOTES AT ERIC/HE

As of September 1, 1979, the ERIC Clearinghouse on Higher Education had several staff position changes. Marilyn Scutt Shorr became Associate Director and Lynn Haupt became Assistant Director.

Beginning in October, Margot Sanders Eddy will take a six-month maternity leave and come back on a part-time basis. Laura Chiarnello, a former teacher from Youngstown, Ohio, will fill Margot's full time position as User Services Specialist.

...Marilyn Scutt Shorr (HE)

L. PILOT PARENT EDUCATION PROJECT

The ERIC Clearinghouse on Elementary and Early Childhood Education is currently working with the University of Illinois Cooperative Extension Service and the Illinois Extension Federation on a pilot parent education project aimed at providing parents of young children with information related to child development, behavior, and early childhood education.

Extensive use will be made of mass media in the project: both radio and newspapers will be used to reach the target audience.

Twenty-four short (1 to 3 minutes) radio messages, 12 to be recorded by Lilian G. Katz, will be made available to radio stations throughout the state, using the Extension Service's already existing information network. Each of the taped messages will be preceded by an introduction noting that the service is provided by the University of Illinois Cooperative Extension Service and the ERIC

Clearinghouse on Elementary and Early Childhood Education. News releases and additional background material related to each of the tapes (including references to ERIC documents) will be distributed to the 102 country Extension Advisors throughout the state by means of the Extension Service's weekly advisor press service. Half of the news releases and information sheets will be prepared by ERIC staff members, who will also select ERIC references to be included on material prepared at the Extension office.

Background information sheets prepared for this project will get additional mileage through distribution by our user services department.

Among the topics to be explored in the parent education series are:

- consistency in discipline;
- talking with children;
- children and TV;
- sex role stereotyping;
- parents as role models; and
- the importance of peers.

Release of materials to advisors and radio stations is scheduled to begin in mid-September.

...Linda Baskin (PS)

M. USOE RURAL EDUCATION MEETINGS

Ten "Rural Roundtables" sponsored by the USOE Regional Offices of Education, will be held during the month of September. The ERIC Clearinghouse on Rural Education and Small Schools has developed a "rural education issues" information packet that will be distributed to approximately 1,000 participants who will attend these 10 regional rural roundtables.

The regional meetings will be held as follows:

REGION	CITY AND STATE	LOCATION	DATES
I	Bedford, Massachusetts	Sheraton Inn	9/28/79
II	Long Island, New York	University at Stonybrook	9/20/79
III	Newark, Delaware	University of Delaware	9/13/79
IV	Tuskegee, Alabama	Tuskegee Institute	9/18/79
V	Urbana, Ohio	Urbana College	9/11/79
VI	Austin, Texas	University of Texas	9/26/79
VII	Kansas City, Missouri	Holiday Inn (Airport)	9/25/79
VIII	Fort Collins, Colorado	Colorado State University	9/24/79
IX	Fresno, California	Holiday Inn (Airport)	9/19/79
X	Moscow, Idaho	Unknown	9/20/79

...A.H. (RC)

N. YEAR OF THE CHILD

The ERIC Clearinghouse on Rural Education and Small Schools will have a booth at the "International Year of the Child Festival" to be held on Loretto Mall, Las Cruces, New Mexico, Saturday, September 15, 1979, from 10 a.m. to 5 p.m. The Information Specialists from each scope area are preparing display materials which reflect the educational needs of children. The entire Clearinghouse staff will take turns at the ERIC/CRESS booth.

...Ameñita Hill (RC)

O. FOREIGN VISITORS AT ERIC/SP

The User Services Specialist at the ERIC Clearinghouse on Teacher Education conducted an orientation and performed a computer search on August 14 for Mr. E. Stanley Rensch, Deputy Director of the Ministry of Education and Community Development of Surinam. Mr. Rensch is currently involved in a multi-million dollar project designed to reorganize the elementary-secondary curriculum in Surinam.

Seven other foreign visitors participated in a workshop at the Clearinghouse on September 12. Representatives from the Somali Democratic Republic, Jamaica, Lesotho, and the Philippines were included.

...D.S. (SP)

P. WORKSHOP BY ERIC/SP FOR NEW SOC

The Assistant Director and User Services Specialist at the ERIC Clearinghouse on Teacher Education conducted an introductory workshop on August 27 for the library staff at Morgan State University, its newest SOC. Four librarians and two library assistants attended the session.

...Dean Schwanke (SP)

Q. ERIC/TM'S LOSS, ETS' GAIN

Effective September 1, 1979, Eleanor V. Horne will no longer be Associate Director of the ERIC Clearinghouse for Tests, Measurement, and Evaluation. She has accepted another position at the Educational Testing Service.

ERIC/TM is fortunate that its new associate director, replacing Eleanor, is already well acquainted with ERIC. Barbara Wildemuth, who previously held positions of User Services Representative and Indexer/Abstractor, has returned to ERIC. Barbara has spent the last year as Head of Test Collections at ETS.

...Barbara Hunt (TM)

R. ERIC: THE RIGHT WAY

Lynn Smarte (ERIC Clearinghouse on Handicapped and Gifted Children) and Marilyn Scutt Shorr (ERIC Clearinghouse on Higher Education) spent several days at the Teachers College Television Studios in August participating in the filming of the new ERIC videotape currently being produced under the direction of Erwin Flaxman (ERIC Clearinghouse on Urban Education).

The new tape, *ERIC: The Right Way* (an introduction to searching procedures) is the third in a five-part series of tapes describing the ERIC system and its use which is being developed by UD in cooperation with some Clearinghouses. The first two tapes in the series are *ERIC: It's That Easy* and *What the Clearinghouses Do*.

...Stella Torgoff (UD)

S. A NEW DIRECTOR AT ERIC/UD

Erwin Flaxman became the new Director of the ERIC Clearinghouse on Urban Education effective September 1, 1979. Edmund Gordon, who had been the Director of the Clearinghouse since its beginning in 1966, is now at Yale University as Professor of Psychology; however, he will continue his association with the Clearinghouse as Senior Research Associate. We wish Ed Gordon a happy and productive career at Yale, and look forward to seeing him often in the Clearinghouse. Our warmest welcome to Erwin Flaxman in his new role.

...UD Staff

LIST OF ATTACHMENTS

- Attachment 1: *Guidelines for Incorporating the ERIC Logo on Cover Design Motifs*
- Attachment 2: VIP DJF Input
- Attachment 3: Vocabulary Improvement Project - Revised Schedule
- Attachment 4: Acquisitions Arrangements List Updates
- Attachment 5: Duplicates List - RIESEP79
- Attachment 6: CIJE Input by Clearinghouse (CIJESEP79)
- Attachment 7: Microfiche Inventory and Quality Control Check
- Attachment 8: Descriptor Justification Forms (DJF) Status Report (August 1979)

GUIDELINES FOR INCORPORATING THE ERIC LOGO ON COVER DESIGN MOTIFS

The guidelines set forth here are not to restrict individual design motifs on publications, but instead are to assist the artist/designer of the proper placement of the logo to be incorporated into the design. Please note that the ERIC logo is a registered trademark, and it is essential that the ® is placed on the outside of the logo in the upper right hand corner. Under special circumstances (e.g., "drop-out" artwork) the ® may be inside the box.

The most important thing to keep in mind when designing a cover is to keep the design motif consistent. The ERIC logo should be at least 1-3/4 inches in length (on the cover). It should be as prominent as the heading copy and any other logo used on the cover. The ERIC logo should not be obstructed by a dark color of ink or any other art on the page.

EXAMPLES (attachments)

- A. If copy is centered, then the logo should also be centered and the source of the document (if applicable) should be centered underneath.
- B. If copy is flush right, the logo should also be flush right (preferably lower right) in line with the copy.
- C. If copy is flush left, the logo should also be flush left (preferably lower left).
- D. If a border is to be used in the design motif, the logo should be placed outside the border on the lower right. If copy is set outside of the border (example D1) centered, flush left or right, then the logo should be placed as covered in examples A, B, & C.
- E. If copy is neither totally flush left or flush right, but well designed into an alternating effect or broken into columns, the logo should be placed in line with the most prominent copy. (Note the additional logo on this example: it is smaller than the ERIC logo and in line with the secondary copy, although it might be of equal size.)
- F. When spine copy is necessary, the logo placement on the spine should follow the design motif set forth on the cover. The logo on the spine should line up with the bottom of the logo on the cover. In such cases where the spine is very narrow, the logo "type" (minus the border) may be used in the same manner of placement.

COLOR

If two or more colors are used in the design motif, the logo should be the same color as the heading copy.

REVERSALS OR "DROP-OUTS"

If copy is a reversal or "drop-out" to another color, the logo should also "drop-out" as shown in example B. The positive of the logo can also be cut into the art as shown in Example C (a good example of placement of the ® on the inside upper right of the logo).

We have tried to cover here the most common uses of the logo on a cover format, but should you at any time be unsure of the proper placement of the logo, please send a sketch or comprehensive to Central ERIC and assistance will be given you in incorporating the ERIC logo into your cover design.

VOCABULARY IMPROVEMENT PROJECT (VIP)**Revised Schedule**

DATES	NOTES
July 27* (July 30)**	7th edition of <i>Play Thesaurus</i> (PT).
August 24 (August 27)	8th edition of PT. (Attempts at closure—agreement between Clearinghouse and Facility Lexicographers—on DJF's processed after 8th PT will be accomplished by phone, rather than through the PT "Comment" field. Periodic phone contacts will be made between the lexicographers and Clearinghouses through December 21.)
September 14	Clearinghouses mail final input for VIP (input postmarked after September 14 will not be accepted).
September 21 (September 24)	9th edition of PT.
October 26 (October 29)	10th edition of PT.
November 26	Facility Lexicographers complete processing of last of the DJF's submitted by Clearinghouses.
December 7 (December 10)	11th edition of PT.
November 27- December 21	Facility Lexicographers complete attempts at closure on all DJF problems and document unresolved problems, including known disagreements, for Executive Committee work. Clearinghouses report issues to Lexicographers that need the vote of the Executive Committee.
January 8 (January 10)	12th edition of PT (will be used by the Executive Committee in final deliberations).
January 14- January 16	Executive Committee Meeting (Washington, D.C.). All problems in 12th edition of PT to be resolved (length of meeting dependent on number of terms requiring Committee resolution).
January 21	Facility begins generating transactions necessary to change both the Master Thesaurus File and the Master Resume File, incorporating all Executive Committee decisions.
February 29	Updated <i>Thesaurus</i> (working copy) distributed to Clearinghouses (beginning with the July 1980 issue of RIE, all indexing to be based on new <i>Thesaurus</i>).
March 21	New Thesaurus Tape sent to Oryx Press.
March 28	Facility completes updates to Master Resume File.
April 1- April 30	"Introduction" for new <i>Thesaurus</i> completed and mailed to Oryx Press (for 8th edition of <i>Thesaurus</i>).
Summer 1980	Publication of the New <i>Thesaurus</i> .

DOCUMENT REPRODUCTION SERVICE

P.O. Box 190 ARLINGTON, VIRGINIA 22210 • (703)841-1212

OPERATED BY: COMPUTER MICROFILM INTERNATIONAL, CORP.

September 10, 1979

Mr. Jim Prevel
National Institute of Education
1832 M Street, N.W.
Washington, D.C. 20208

Dear Jim:

We have reviewed the RIEJUN79 Microfiche Inventory and Quality Check and the following is submitted.

June 1979 - Inventory Report

- The following microfiche will be produced from the cited documents and distributed as post issue remakes:

164764 1/2	165816 1/2,2/2	166309 1/1
165365 2/2	166028 1/1	

- The following documents are not recommended for refilming:

ACCESSION	CLHSE	LEVEL	RESUME NOTE	REASON NOT RECOMMENDED FOR REFILMING
164 765	CE	I	Yes	Filmed as received
164 766	CE	I*	Yes	Light print.
164 774	CE	II	Yes	Green print on green background
165 397	EC	I*	No	Thin, light, worn out print & italics
165 400	EC	I*	No	Thin, light, broken print
165 401	EC	I*	No	Thin, light, broken print
165 402	EC	I*	No	Thin, light, broken print
165 408	EC	I*	Yes	Bad copies pages 73-76
165 607	HE	I	Yes	Filmed as received
165 644	HE	I	Yes	Filmed as received
165 756	IR	I*	Yes	Bad copies pages 21 & 26
165 872	PS	I	No	Red letters on black background
165 887	PS	II	Yes	Print is on dark background
165 993	SE	II	Yes	Filmed as received
166 223	TM	I*	No	Light, worn out print

- It is recommended that the ACCESSION showing an asterisk (*) be evaluated for possible change from Level I to Level II.
- The six (6) microfiche to be refilmed represent a remake rate of only 3/10 of 1% of the original 2127 microfiche created for the RIEJUN79.

Sincerely,

J. N. Veale
Director

LIST OF ATTACHMENTS

I. CENTRAL ERIC ANNOUNCEMENTS

A. New Central ERIC Staff Member and Assignments

The monitor position vacated by Del Trester last year has been filled. Cheryl Chase, presently Director of the Colorado State Capacity Building Project, will be joining the Central ERIC staff at the end of October.

Cheryl has had considerable experience with ERIC over the past ten years. Following several years of teaching experience, she worked at the Northern Colorado BOCES in Longmont, Colorado. There she was in charge of computer searching and created numerous knowledge synthesis products for classroom teachers and administrators. She has been with the Colorado State Department of Education for the past three years.

Cheryl will be assuming responsibility for monitoring Clearinghouses (EC, IR, and SP) as well as being ERIC's liaison with the Practice File development project.

One other shift in monitor assignment will be made. Pat Coulter will monitor FL.

...Bob Chesley (Central ERIC)

B. Lockheed Begins On-Line EDRS Ordering

Beginning on December 1, 1978, Lockheed's on-line users will be able to order microfiche and paper copy documents from EDRS directly from the computer terminal. (See Attachment 1.) This ordering feature has been used successfully by SDC and EDRS for the past year.

...Jim Prevel (Central ERIC)

C. Approval of SOC Redistribution Plan

All ERIC Clearinghouses and Central ERIC have approved the new redistribution plan for standing order customers. Several Clearinghouses suggested changes in the plan, which were subsequently agreed to by the Clearinghouses concerned and Central ERIC.

With one exception (New York), all SOC's within a state, Canadian province, or territory have been assigned to a single Clearinghouse. Thus, any new SOC's in the assigned areas will automatically be served by that Clearinghouse. New York state has been divided into Upstate and Downstate (a usual political dichotomy in that state, we are told); and UD and IR have agreed on the division of SOC's in those two areas.

The list of Clearinghouse assignments is displayed in Attachment 2. Clearinghouses will receive an up-to-date list of the SOC's in their assigned areas, and SOC's will be informed of the new assignments through an item in the next issue of *Interchange*. We know, however

that Clearinghouses will want to make personal contact* with both new and old SOC's in their area to establish or renew relationships with this important group of ERIC users.

...Mildred Thorne (Central ERIC)

D. Editors Alert

The sophisticated photographic techniques now in use at EDRS pick up editorial marks on documents made with the "official" blue pencil editors have long been assured will not photograph. It therefore follows that neither blue pencils, nor any other color pencil, should be used on documents which will be sent to EDRS for reproduction. The old order passeth...

...Kit Welsh (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. ERIC Users Conference

The ERIC Users Conference was held in conjunction with the ASIS Annual Conference in Minneapolis, Minnesota, October 13-14, 1979. In a "Two-for-One Workshop" format, ERIC shared the weekend with the ASIS Special Interest Group on Information Services to Education (SIG/ISE). SIG/ISE concentrated its agenda on Saturday; ERIC held its sessions on Sunday. The ASIS Conference began on Monday and had specifically requested a no-overlap arrangement this year.

Despite the weekend time slot and completion for the World Series, the meeting drew approximately 70 individuals. In addition to the main agenda, demonstrations were held of the PLATO system, the University of Pittsburgh On-Line Training Center, and the Strobe/Search system of Information Retrieval Services, Inc.

NOTE: Next year's meeting will be held on June 27-28, 1980. at the Annual Conference of the American Libraries Association (ALA). Make your travel plans now!

...Ted Brandhorst (ERIC Facility)

B. Play Thesaurus/VIP Input

PT9 contained a total of 1,109 new transactions. This included 489 Clearinghouse DJF's, input through approximately July 6. PT9 was distributed on September 26, 2 days later than scheduled. Problems in copy reproduction caused the delay.

The total number of terms worked on through PT9 is 2,371. This total is 70% of the approximately 3,400 terms expected to be evaluated in the VIP.

PT10 is expected to be distributed on October 29, on schedule. It will have over 1,500 new transactions and will cover Clearinghouse input through approximately August 3.

The following list shows VIP input totals to date. September 14 was the scheduled date for the cessation of Clearinghouse input. In the current input total, 253 DJF's were shipped after that date.

CH	NUMBER OF DJF'S	CH	NUMBER OF DJF'S
CE	232	JC	348
CG	527	PS	367
CS	305	RC	195
EA	322	SE	200
EC	359	SO	154
FL	160	SP	255
HE	527	TM	571
IR	685	UD	346
SUBTOTAL - 5,553			
AA (FACILITY) - 2,874 (reactions to CH input, <u>PT's 1-9</u>)			
GRAND TOTAL - 8,427			

...Jim Houston (ERIC Facility)

III. ORYX PRESS ANNOUNCEMENTS

A. Addition to Address and New Telephone Number

As reported in the last EAB, Oryx Press has moved from East Camelback Road to North Central Avenue. Since that time, they have added "at Encanto" to that address and have been given their new telephone number. Following is the new address and telephone number, which should be used when contacting Oryx.

Oryx Press
2214 North Central Avenue at Encanto
Phoenix, Arizona 85004
(602) 254-6156

...Susan Slesinger (Oryx Press)

IV. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. Dr. Karl Koenke Receives Award

Dr. Karl Koenke, Associate Director of the ERIC Clearinghouse on Reading and Communication Skills, recently received the International Reading Association's Certificate of Commendation at the Third Annual Dinner Meeting of the Vermillion Valley Reading Council. He was recognized as one of three people who had been instrumental in founding that council.

...MKM (CS)

B. Dr. Arthur Applebee Receives Grant from NIE

Dr. Arthur Applebee, Associate Director of the ERIC Clearinghouse on Reading and Communication Skills, has just received a grant from the National Institute of Education for a one-year study of writing in all subject areas of the secondary school. The study is entitled the National Study of Secondary School Writing and will be composed of two parts:

- The first phase of the study will involve intensive study of student writing gained through classroom observation and evaluation of writing samples.
- In the second phase of the study, a national sample of secondary school teachers will report on their attitudes toward writing and on writing tasks and related instruction.

The survey instrument will be designed to provide a context for relating the findings from the intensively studied schools to patterns of instruction in schools nationally.

...Mary K Monteith (CS)

C. Message from the ERIC Technical Steering Committee

A reminder: the ERIC Steering Committee operated for everyone in the system. When you have a technical issue, please forward it to one of the following people. A Recommendation Form (Attachment 3) is offered for your use.

NAME	LOCATION
Gail Conley	TM
Betty Rose Rios	RC
Marilyn Shorr	HE
Dorothy Slawsky	ERIC Facility
Janet Thorngate	CE

...MS (HE)

D. ERIC/HE Sponsors Florida Conference

The Florida state college and university system paid expenses for staff from the ERIC Clearinghouse on Higher Education to sponsor an exhibit at a statewide conference in Florida on October 3-4, 1979. Lynn Haupt and Marilyn Shorr staffed the ERIC exhibit, conducted computer searches, and attended portions of the conference. Participants in the conference, which was entitled "Women Moving Forward: Improving Florida's Economy through Leadership, Power, and Influence", included Florida's governor, many college and university presidents, state legislators, and state business people.

...Marilyn Shorr (HE)

E. ERIC/HE Staff Retreat

September 24, 1979 marked the first Annual Staff Retreat for the ERIC Clearinghouse on Higher Education. The day away from the office provided an opportunity for the staff to put aside everyday responsibilities and take a look at such topics as:

- How are we spending our work time?
- Who are our users?
- How are we serving our clientele?
- How can we do a better job?
- What other groups should we be serving?

...Marilyn Shorr (HE)

F. Bruce Clark Changes Position

W. Bruce Clark has been appointed Assistant Director of the ERIC Clearinghouse on Information Resources. The position of Administrative Assistant to the Director has been discontinued.

...BM (IR)

G. ERIC/IR Audio Visual Materials

A review of the current status of audiovisual materials on ERIC produced by the ERIC Clearinghouse on Information Resources shows that copies of the transparency set, *Overview of ERIC*, have now been mailed to all of the other Clearinghouses and the ERIC Facility, as well as to Central ERIC.

Still in production is *ERIC Basics*, which will be available as a color microfiche package with an audiotape cassette. A first master has been produced and is being field-tested; the second master incorporating any revisions is scheduled for completion by November 1, and distribution of the sets to the Clearinghouses is scheduled for mid-December. A slide/tape version of the package will also be distributed to the Clearinghouses at that time.

While the tape for the microfiche set has audible cues, the slide/tape set will have silent cues for synchronizing the slide projector to the tape.

...Barb Minor (IR)

H. MIDWEST REGIONAL TECHNICAL MEETING

The Midwest Regional Technical Meeting was held in Urbana, Illinois, on October 2-3, 1979. The meeting was co-hosted by the ERIC Clearinghouse on Elementary and Early Childhood Education and the ERIC Clearinghouse on Reading and Communication Skills. Ted Brandhorst (ERIC Facility) and Frank Smardak (Central ERIC), plus representatives from CE, CG, SE, and UD, and the two host Clearinghouses, attended and took part in the sessions.

...Dianne Rothenberg (PS)

I. Marilyn Suydam or ERIC/SE Nominated for NCTM Board of Directors

Dr. Marilyn Suydam is one of eight nominees for four positions on the National Council of Teachers of Mathematics (NCTM) Board of Directors. The Council has twelve directors who each serve three-year terms.

...BM (SE)

J. Demand for Spring Bulletin Exceeds Supply

The ERIC/SE's Spring information bulletin was sent to over 15,000 people and agencies. Additional requests have been received for over 40,000 copies. A limited number of copies for single copy requests is being printed. Multiple copies cannot be provided, but the bulletin can be duplicated as desired.

...BM (SE)

K. ERIC/SE to Continue to Assist the Energy and Education Action Center

ERIC/SE has agreed to continue under contract with the Energy Education Action Center. Activities will include producing information bulletins and newsletters, and to providing staff support for workshops and question answering.

...BM (SE)

L. EPA Information Dissemination Project at ERIC/SE to Continue and Expand

The EPA Information Dissemination Project has been continued for another year and expanded in operations. Among the activities added are:

- additional workshops for users and potential users;
- expansion of the user services activities;
- establishing direct contacts with several key user groups to provide assistance;
- adding appropriate journal articles to the IRS data base;
- producing information analysis products to assist users and reduce the need for searches.

...BM (SE)

M. IRIS Now On-Line with BRS

The instructional Resources Information System (IRIS) for Water Quality and Resources Education and Training has been placed on-line with Bibliographic Retrieval Services (BRS). The data base will be updated four times a year. About 1,800 documents were loaded this summer. The update in October or November will add over 500 additional items.

Materials listed include print and non-print materials. Some ERIC materials are also included in IRIS; many of these are available from EDRS.

A compilation of the resumes of the first 1,800 items (including author, institution, and subject indexes) are available free as long as the supply lasts.

Quarterly supplements can be ordered by subscription from the SMEAC Information Reference Center.

...Beverly Malcolm (SE)

N. June Ramos Leaves Network

The ERIC Clearinghouse for Social Studies/Social Science Education is sorry to see June Ramos, User Services Coordinator, leave the Clearinghouse after six years of service. June will be Public Affairs Specialist at Rockwell International's Rocky Flats plant in Boulder, Colorado. She will be, without question, truly missed.

...Charlotte J. Purvis (SO)

O. NIE Fellow Working in ERIC/UD

As of September 1, 1979, Dr. Raymond Giles will be associated with the ERIC Clearinghouse on Urban Education as a research fellow in the NIE-sponsored postdoctoral program for expanding opportunities for minorities and women in educational research and development. Dr. Giles is on partial leave from Smith College, where he is Chairperson and Professor of Afro-American Studies.

Dr. Giles is researching and studying information systems in education as a means of developing an International Centre on Multicultural Education in Birmingham, England. He is working with various members of the Clearinghouse staff as well as visiting information and service organizations with interests in multicultural education.

...Erwin Flaxman (UD)

DIALORDER™
The DIALOG* Online Ordering Service

The online ordering service of the DIALOG Information Retrieval Service allows direct online ordering of primary documents by transferring your request to a supplier of your choice. Called DIALORDER, this capability applies to documents located through searching any of the DIALOG bibliographic files, as well as documents not found online.

DIALORDER offers the following advantages:

- Capability of ordering from any DIALOG bibliographic file
- Choice of suppliers
- Ease of entry - only an accession number or set number and record number
- Ability to check order status online
- Ability to review contents of orders online
- Ability to order any other bibliographic item (i.e., even those not found in a database)
- Plus: Ability to order DIALOG publications
- No additional DIALOG charges other than connect time

DIALORDER will be ready on December 1.

DIALORDER can save you time by reducing your need to prepare document order forms and interlibrary borrowing requests. For some people, it will save on time-consuming trips to the local library. DIALORDER eliminates the need for verifying and typing full bibliographic citations because DIALOG does it for you; it transfers the bibliographic citation (for items from DIALOG files) automatically to the supplier. You don't even need to enter your name and address; DIALOG will provide the supplier with your "mail to" address. And, you can give special instructions such as "RUSH ORDER, SEND AIRMAIL" if you want.

A list of the suppliers will be sent to all DIALOG users with the November Chronolog. This list will be updated from time to time. Some suppliers, who are also database suppliers, will provide only those documents represented by entries in their respective databases; other suppliers will provide (or attempt to provide) any documents from any database. The particular terms and conditions of supply for each supplier are shown on the yellowsheets which will be provided for each supplier that is participating in the DIALORDER service.

The DIALORDER service is provided for your convenience and there are no additional DIALOG charges for use of the service other than the connect time associated with the file within which the order is prepared and issued. You will be billed directly by the supplier for your requests; DIALOG is only the message conveyor.

DIALORDER helps complete the process of online response to an information query: from request to references to complete documents right at your terminal. We hope you will find this new capability an exciting and useful complement to our Information Retrieval Service.

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC Clearinghouse on Higher Education

A. *Occupational Programs in Four Year Colleges.*

Andrew Korin and Dale Campbell. Price: \$4.00 per copy. 35 pages.
HE 011 724.

In an effort to attract new students, four year colleges are increasingly turning to offering occupational programs normally found at the associate degree level. This paper examines this phenomenon and covers topics such as:

- their development;
- the extent that they are comprehensive, open-door components within the four-year institution;
- models of governance, the integrity and autonomy of their programs, faculty interface and the available support services.

B. *Recycling Academic Calendars.*

Margot Sanders Eddy. Price: \$.40 per copy. 4 pages. HE 011 806.

In recent years, many colleges and universities have been changing or reassessing their academic calendars. This has occurred for several reasons:

- for more efficient use of energy and physical facilities;
- for more efficient class scheduling, to bring the school year in line with that of other institutions; and
- to provide scheduling flexibility for new or unusual program forms.

This literature review describes the different calendars in use or under consideration, and examines current trends in adoption of various kinds of calendars.

Available from: American Association for Higher Education
One Dupont Circle, Suite 740
Washington, D. C. 20036

2. ERIC Clearinghouse for Science, Mathematics, and Environmental Education

A. *Developmental Implications of Science Teaching: Early Adolescence.* Price: \$4.50. 128 pages. 1978.

This review analyzes and synthesizes the research related to developmental psychology and its relationship to science education. Major topics include:

- Historical Precedents of the Developmental Movement in Education;
- Piaget's Theory;
- Piaget and Education: Implications and Contradictions; and
- Recent Traditions in Instructional and Cognitive Psychology.

3. ERIC Clearinghouse on Urban Education

- A. *Pursuing Equal Educational Opportunity: School Politics and the New Activities*. Edith K. Mosher, Anne H. Hastings, and Jennings L. Wagoner, Jr. Price: \$5.00.

This paper describes and analyzes the emergence of newly aggressive claimants demanding an equitable share of the benefits of public schooling. These include the advocates for substantial groups of young people who are considered to have suffered serious discrimination and neglect in the past, most notably children from low-income districts, girls and women, non-English-speaking ethnic minorities, and the handicapped.

- Part I reviews the phenomenon from a historical and political perspective;
- Part II describes the federalization of the educational system in the past 20 years and reviews the events of the federalization of the educational system in the past 20 years and reviews the events of the 1970's;
- Part III presents four topical case studies; and
- Part IV offers some general observations and several alternative views about the future of the educational system.

- B. *Hispanic Migrations from the Caribbean and Latin America: Implications for Educational Policy, Planning, and Practice*. Price: \$5.00.

Proceedings of an invitational conference designed to provide a forum for leading Hispanic educators to address issues of mutual concern regarding the education of Hispanics, and to enable conference participants to express their concerns and develop recommendations for policy. Papers by José Hernández and Rafael Valdivieso present some facts about demographic patterns of Hispanic migrations and the implications of these for education, and review Federal policies on bilingual education.

- C. *Physical Education and Athletics: Strategies for Meeting Title IX Requirements*. Price: \$5.00.

Proceedings of a conference designed to assist education personnel in identifying and recognizing the problems and issues inherent in the implementation of Title IX and physical education and athletics.

- Marjorie Blaufarb explores the implications of Title IX for educational equity;
- Dorothy Harris summarizes the research on sex-related differences between males and females and discusses their relevance to Title IX requirements; and
- A. Mae Timer presents some innovative strategies for equality in physical education.

D. *Competency Testing and Equal Educational Opportunity*. Walt Haney and Kabiru Kinyanjui. Price: \$5.00.

A discussion of how competency testing will affect equality of educational opportunity, in particular the prospects of minority students. The authors examine the movement for competency testing in historical perspective, review the literature and litigation on testing, analyze the tests, and suggest some ways of looking at the relationship between competency testing and equal educational opportunity.

E. *School Crime and the Social Order of the School*. Francis A. J. Ianni and Elizabeth Reuss-Ianni. Price: \$1.00.

The authors summarize and review some of the data from the Safe School Study, conducted by the National Institute of Education, and other field research; present facts about the nature and extent of school crime; and conclude that emphasis on people rather than devices, and preventive disciplines rather than the presence of large numbers of security personnel, are the most successful means of keeping schools safe. A number of organizational changes and techniques are suggested for preventing school disorder and providing an atmosphere conducive to learning.

DOCUMENT REPRODUCTION SERVICE

P.O. Box 190 ARLINGTON, VIRGINIA 22210 • (703)841-1212

OPERATED BY: COMPUTER MICROFILM INTERNATIONAL, CORP.

September 10, 1979

Mr. Jim Prevel
National Institute of Education
1832 M Street, N.W.
Washington, D.C. 20208

Dear Jim:

We have reviewed the RIEJUN79 Microfiche Inventory and Quality Check and the following is submitted.

June 1979 - Inventory Report

- The following microfiche will be produced from the cited documents and distributed as post issue remakes:

164764 1/2	165816 1/2, 2/2	166309 1/1
165365 2/2	166028 1/1	

- The following documents are not recommended for refilming:

ACCESSION	CLHSE	LEVEL	RESUME NOTE	REASON NOT RECOMMENDED FOR REFILMING
164 765	CE	I	Yes	Filmed as received
164 766	CE	I*	Yes	Light print
164 774	CE	II	Yes	Green print on green background
165 397	EC	I*	No	Thin, light, worn out print & italics
165 400	EC	I*	No	Thin, light, broken print
165 401	EC	I*	No	Thin, light, broken print
165 402	EC	I*	No	Thin, light, broken print
165 408	EC	I*	Yes	Bad copies pages 73-76
165 607	HE	I	Yes	Filmed as received
165 644	HE	I	Yes	Filmed as received
165 756	IR	I*	Yes	Bad copies pages 21 & 26
165 872	PS	I	No	Red letters on black background
165 887	PS	II	Yes	Print is on dark background
165 993	SE	II	Yes	Filmed as received
166 223	TM	I*	No	Light, worn out print

- It is recommended that the ACCESSION showing an asterisk (*) be evaluated for possible change from Level I to Level II.
- The six (6) microfiche to be refilmed represent a remake rate of only 3/10 of 1% of the original 2127 microfiche created for the RIEJUN79.

Sincerely,

J. N. Veale
Director

I. CENTRAL ERIC ANNOUNCEMENTS

A. NFAIS Newsletter

The October 1979 issue of the *NFAIS Newsletter*, and membership service supplement, is enclosed with this issue of the *ERIC Administrative Bulletin*. ERIC is continuing its affiliate membership in NFAIS for the year ending June 30, 1980.

...Pat Coulter (Central ERIC)

B. CIJE Problems

Based on statistics received from Oryx Press, it appears that the word "Current" in CIJE's title is not entirely accurate, possibly even a misnomer. It comes as a surprise, not to say a shock, that some Clearinghouses were still inputting articles from Fall 1977 journal issues as late as August 1979. How can this be? How can such a backlog have developed? How can it be eliminated? How fast? Answers and solutions please!

In addition, all Clearinghouses are being asked to go over their lists of journals to reassess their quality, relevance to education, regularity of publication, and availability in libraries. This re-evaluation is necessary because there are now 783 journals being covered regularly. Central ERIC advises dropping (or not starting) subscriptions to journals of an esoteric nature, or those too narrow in focus to be generally available.

Perhaps even more worrisome is the unprecedented increase in "one shots" this year. Oryx reports 600 one-shots since it began publishing with the March issue. This must be reduced. This category has always been intended to be used on an exception basis, for the occasional important article from a non-education journal. It was not intended as a preliminary step toward inclusion of the journal on the regular journal list, as it has come to be recently. Perhaps a word to the wise is sufficient. I hope so, as we don't want to apply an arbitrary ceiling, but one a month is a guideline! (It should be noted that three Clearinghouses have put in none during the past nine months, but one has put in over 100.

Please note: A major reason for keeping the regular list near 750 and for keeping "one shots" down is to allow the publisher to keep subscription rates as reasonable and stable as possible.

...Kit Welsh (Central ERIC)

C. Exemplary Abstract

Included for your delectation (see Attachment 1), is an example of an informative abstract written in a clear, objective style. Please note the aptness of the major and minor descriptors. Credit for this delightful sample of abstracting and indexing goes to Jo Dirksen of the ERIC Clearinghouse on Teacher Education.

...Kit Welsh (Central ERIC)

D. RIE Available on COM Microfilm Via "Strobe Search" Equipment

Most Clearinghouse attendees at the ERIC Users Conference in Minneapolis had a chance to see a sample ERIC test on a newly introduced random access microfilm reader/printer manufactured by Informat Retrieval Services, Inc., under the name "Strobe Search".

The NIE Library has recently purchased a Strobe Search reader and a reader/printer for use in the Library and Education Reference Center.

In addition, NIE is financing the front end costs of developing software and COM microfilm output for these units for all issues of RIE from 1966 through 1979. Entries on the film will be prepared directly from the ERIC tapes and will appear exactly as each record appears in the monthly RIE.

Once the master microfilm roll is completed, duplicates will be available to any Clearinghouses at a relatively low cost.

The Strobe Search equipment is available to Clearinghouses at GSA prices. Understandably, in these tight money times, such equipment is not foremost in your minds, but the possibilities the equipment offers in saving employee time (not inexpensive) and increasing user satisfaction (also not easy to come by) should be considered.

Please let me know your thoughts and suggestions for other files to be converted to microfilm for use on this equipment.

...Jim Prevel (Central ERIC)

E. ERIC Facility Must Receive Copies of All Clearinghouse Publications

The ERIC Facility is charged under its contract with NIE to maintain a complete archival collection of all Clearinghouse Information Analysis Products (IAP's), newsletters, brochures, and other publications. Central ERIC relies on the completeness of this collection.

In order for the Facility to properly discharge this function, the Clearinghouses must maintain the Facility on their distribution lists. While this is generally done adequately, periodically there seems to be a falling off and the Facility fails to receive essential materials.

Please review your distribution lists and ensure that the ERIC Facility is recorded as a recipient of all Clearinghouse publications.

...Jim Prevel (Central ERIC)

F. EDRS Requests To Be Kept Informed By Clearinghouses

For EDRS to better keep up with the many activities occurring within the ERIC Clearinghouse arena, all Clearinghouses are requested to place EDRS on their mailing list to receive newsletters, news releases, announcements, brochures, etc.

...Jim Prevel (Central ERIC)

II. EDRS ANNOUNCEMENTS

A. CIJE Title Index on Microfiche? Comments Requested

EDRS asks for your comments...Lynn Haupt, of the ERIC Clearinghouse on Higher Education, has suggested a Title Index for CIJE on microfiche would be of substantial help both to ERIC staff people and Standing Order customers. We would like comments on this suggestion as to its potential use and value.

...Jack Veale (EDRS)

B. EDRS to Launch Quarterly "Communications Letter" for SOCS

EDRS will be publishing a quarterly "Communications Letter" in order to establish better communications between the ERIC microfiche users and EDRS.

In addition to highlighting EDRS operations and new products, the letter will identify problems encountered with users and offer solutions.

Clearinghouse comments and specific material to be included in this Communications Letter are welcome.

...Jack Veale (EDRS)

III. ERIC FACILITY ANNOUNCEMENTS

A. Audiovisual Materials for Teaching ERIC

A variety of audiovisual materials have been developed over the years for use in teaching users about the ERIC system and its products and services. Most have been developed by the ERIC Clearinghouses, but some few have been developed by other groups. ERIC has followed a policy, wherever feasible, of making such products available from the National Audiovisual Center (NAVC). However, because of system changes and the natural evolution of products, both in substance and graphic appearance, these teaching aids go out of date fairly rapidly.

The ERIC Facility has been directed to maintain an archival collection of these products, both past and present. The list that appears as Attachment 2 represents a selection of those products about which we currently have information. You are invited to help us add to this list. If you are aware of any publicly available A-V package

dealing with ERIC, that is not on our list, please send relevant information to the ERIC Facility, attention: Reference Librarian.

...Dorothy Slawsky (ERIC Facility)

B. Murray Howder Leaves ERIC Network

Murray Howder has left the ERIC Facility to assume the position of Manager of Information Services at the National Clearinghouse for Bilingual Education in Rosslyn, Virginia. We wish him success in his new endeavor.

...Ted Brandhorst (ERIC Facility)

C. Use of Postal Service Abbreviations for States When Cataloging Addresses

When cataloging addresses in the Availability and Descriptive Note fields, it is advisable to use the two-character abbreviations started by the U.S. Postal Service and now fairly standard for such applications throughout the United States.

The list of abbreviations, which appears below, has been extracted from the *National Zip Code Directory*. They can also be found cited in any number of other standard manuals, including the *GPO Style Manual* and the revised *COSATI Standard for Descriptive Cataloging*.

The revised *ERIC Processing Manual* will specify the use of these abbreviations. (See Attachment 3 for the list). Examples of their use in ERIC cataloging are as follows:

NOTE_Paper presented at the annual meeting of the Educational Research Association (San Francisco, CA, April 8-12, 1979)

AVAIL_National Assessment and Dissemination Center, 49 Washington Ave., Cambridge, MA 02140 (\$1.00)

...Lee Schreiber (ERIC Facility)

D. ERIC Clearinghouse Brochures—Centralized Stockpile at the Facility

In response to a request from Central ERIC, the Facility has now received 500 copies of the principal brochures of each of the ERIC Clearinghouses.

If you have a need for such brochures, a single request to the Facility can be made in lieu of sixteen separate requests. Please restrict your requests to those situations where you need materials

from more than one Clearinghouse. Requests for materials from one Clearinghouse, or requests for bulk quantities, should still be made directly to the relevant Clearinghouse(s).

...Al Hill (ERIC Facility)

IV. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. Workshop for School Librarians Held By CG

In collaboration with the Michigan State Department of Education, the ERIC Clearinghouse on Counseling and Personnel Services presented a 3-hour ERIC workshop at the Annual Meeting of the Michigan Association for Media in Education (MAME), held for school librarians in October at Boyne Mountain. Carol Mills and Carol Jaslow offered intensive instruction on the capability and use of ERIC, including a session on computer searching. This liaison with school librarians has great potential for bringing the enormous reservoir of potential teaching aids to classroom teachers and school administrators (one of the audiences for whom ERIC was designed).

...CKJ (CG)

B. Garry Walz (CG) Keynote Speaker at ACES Regional Meeting

Garry Walz, Director, and Libby Benjamin, Associate Director, of the ERIC Clearinghouse on Counseling and Personnel Services, attended the annual North Atlantic Regional Meeting of the Association for Counselor Education and Supervision (ACES), held in late October in Newark, New Jersey. Dr. Walz, a past President of ACES, a division of the American Personnel and Guidance Association, offered the keynote address.

...Carol K. Jaslow (CG)

C. ERIC T-Shirts Available!

ERIC T-Shirts (reading "ERIC IS FOR LEARNERS") are available from Alexanders Sporting Goods, Team Division, 1212 N. Cunningham, Urbana, Illinois 61820 (Telephone: (217) 384-2901). The price for orders of one to five shirts is \$3.70 each. Bulk orders of six or more receive a discount price of \$3.50 each. (Colors in bulk orders may be mixed, if desired.) Postage is an additional cost. Since postage costs cannot be determined until the orders are ready for mailing, Alexanders has indicated that they will mail a bill to the addressee once the order is put together. Shipment will be made when payment is received.

...MKM (CS)

D. Excerpt from CS Publication Reprinted by NEA

"Developing Purposes for Reading", a chapter from one of CS's new publications, *Teaching Reading Comprehension*, by William D. Page and Gay Su Pinnell, was recently reprinted in the November-December 1979 issue of *Today's Education* (the journal of the National Education Association), in a special feature on reading.

...MKM (CS)

E. Koenke (CS) Interviewed on TV; Presents Paper

Karl Koenke, Associate Director of CS, was recently interviewed on local television in conjunction with the kickoff of a local "Reading is Fundamental" book distribution program. He also gave a paper at the North Central Reading Association Conference in Kalamazoo, Michigan on October 26.

...MKM (CS)

F. CS Participates in Forum

Several CS staff members participated in the Midwest School Improvement Forum on Dissemination and Basic Skills, which was held October 23-25 in Milwaukee, Wisconsin. It was sponsored by USOE Regions V and VII and CEMREL and cosponsored by ERIC and the Technical Assistance Base of NDN. Arthur Applebee presented a review of research and current trends in teaching written communication. Jane McClellan and Holly O'Donnell simulated the development of a Clearinghouse project on reading and oral written communication with a state education network.

...MKM (CS)

G. New CS Associate Director Attends NIE-Sponsored Meeting

Carolyn Del Polito, the new Associate Director for the Speech Module of the ERIC Clearinghouse on Reading and Communication Skills, recently attended the Basic Skills Synthesis Project Planning Meeting sponsored by NIE, September 4 and 5.

...Mary K Monteith (CS)

H. Directory Aids User Services

When we say the *Directory of Organizations and Personnel in Educational Management* is a user services product, we aren't just being arbitrary. The *Directory*, which lists the subject areas, publications, and services of 162 organizations and the subject areas of 520 researchers, has turned out to be an invaluable tool for answering users' questions.

One satisfying experience in which the *Directory* came to our aid happened just recently. Diane Gay, from the Office of Planning and Budget at the Office of Education, called for our help after a search failed to turn up adequate information for a client. The topic in question was the evaluation of the relationship between improving managerial skills of principals or administrators and learning skills of students.

Using the *Directory*, we were able to refer her to an organization (Education Development Center, Inc. of Newton, Massachusetts) that had listed "learning needs and leadership methods of school principals" as one of their subject areas. Index entries also led to the names of two researchers, one specializing in "administrative behavior of the school principal in relation to student achievement" and the other dealing with the "effect of administrative and leadership style on teacher and student motivation and performance". Diane felt these leads sounded promising; she was optimistic about being able to provide the requested information.

We telephoned her several days later to see if the leads paid off. She said she had talked with a staff member of EDC who was currently involved with ongoing research on this subject; the staff member was able to supply enough information so that she felt it unnecessary to contact the other researchers. She characterized her conversation with the center as "excellent, logical, and knowledgeable". Diane says she is sure to be calling us again for help. We've got our fingers crossed and the *Directory* handy.

...Ellen Rice (EA)

I. SSIE Publishes Article on EA

The Smithsonian Science Information Exchange (SSIE) published an article on the ERIC Clearinghouse on Educational Management in its June/July 1979 *Science Newsletter*.

The article, by EA's Stuart Smith, describes the Clearinghouse's three principal tasks: "Acquisition, selection, and processing of documents and journal articles; preparation of information analysis products; and execution of user services and workshops."

According to Dr. Donald A. Elliot, SSIE's vice president for scientific affairs, the newsletter was sent to 2,846 regular subscribers and 1,024 persons in SSIE's educational management data base. One hundred complimentary copies were given to the EA Clearinghouse.

The article was solicited by SSIE.

J. EC Conducts Workshop on ERIC

On October 4, 1979, during the Mid-Atlantic Regional Library Conference at Host Farms in Lancaster, Pennsylvania, Sharon Hudack, of the ERIC Clearinghouse on Handicapped and Gifted Children, conducted an evening workshop on the ERIC network. Approximately twenty persons, including librarians, library administrators, and information specialists, attended.

...M.C. (EC)

K. EC Exhibits at National Association for Gifted Children (NAGC)

Lynn Smarte, Sharon Hudack, and Dorothy Bloch, from the ERIC Clearinghouse on Handicapped and Gifted Children, took an ERIC exhibit to the National Association for Gifted Children Convention, at the Baltimore-Washington International Airport on October 18-20, 1979. Approximately 100 convention participants took advantage of the free "mini-computer searches" offered. We were especially pleased to note how many of the professionals in attendance were already familiar with ERIC.

...Marion Cambel (EC)

L. Two FL Articles Honored by ICA Reprints

Two articles from the *ERIC/CLL News Bulletin* have been chosen for a particular honor: they have been reprinted by the English Teaching Division of the International Communication Agency for distribution to overseas teachers of English as a foreign language. The articles are:

- "Language Tests: Some Answers From ERIC."
Anne Marie Harnett.
June 1979 issue of the *News Bulletin*.
- "Successful Language Learners: What Do We Know About Them?"
Alice C. Omaggio.
May 1978 issue of the *News Bulletin*.

...kathleen McLane (FL)

M. A New Baby!

Kendall Sanders Eddy, the first child born to Margot Sanders Eddy, of the ERIC Clearinghouse on Higher Education, and Peter Armes Eddy, of the ERIC Clearinghouse on Languages and Linguistics, arrived October 10, 1979. He weighed 5 lbs., 14 oz. and was 20½ inches long. Congratulations Margot and Peter!

...Marilyn Shorr (HE)

N. Foreign Visitors To RC

A group of fifteen Venezuelan educators visited the RC Clearinghouse during the week beginning August 10, 1979. The group was attending a two-week seminar held on the UCLA campus and was interested in many facets of postsecondary education. Through an interpreter, the ERIC system and its services were explained. Great interest was shown in several of the Clearinghouse IAP's. Other visits have since been received by postsecondary educators from Great Britain, Egypt, Norway, Australia, and New Zealand.

...B.S. (JC)

O. JC Journal Column Receives Favorable Review

The Chronicle of Higher Education recently featured a favorable review of an ERIC journal column which appeared in *Community College Review* entitled "Developmental Education: A Rapidly Expanding Function." Our inhouse author, John Lombardi, focused on the growth in developmental education enrollments and its role in the two-year college curriculum.

...Bonnie Sanchez (JC)

P. Edington Invited to Participate in Interamerican Congress on Educational Administration

Dr. Everett D. Edington, Director of the ERIC Clearinghouse on Rural Education and Small Schools, has been invited to present a paper on "Rural Education Policy" at the First Interamerican Congress on Educational Administration. The Congress, which will initiate an Interamerican Consortium on Educational Administration, having as its purpose the comparative study and practice of educational administration, will be held in Brasilia, Brasil, the week of December 9-14, 1979.

...A.H. (RC)

Q. Edington Chairs Rural Education Meetings

Dr. Everett D. Edington, Director of the ERIC Clearinghouse on Rural Education and Small Schools, recently chaired sessions at the following rural education meetings:

- USOE Region VI Rural Roundtable
Austin, Texas
September 26, 1979
- Rural Education Conference
Manhattan, Kansas
October 4-5, 1979
- Rural Regional Education Association Annual Meeting
Madison, Wisconsin
October 6-9, 1979

...Amelita Hill (RC)

R. Board Appointment for John Disinger

Dr. John F. Disinger of the SE staff has been selected to serve on the Board of Directors for the National Association for Environmental Education (NAEE) for the period 1979-1983.

...Beverly Malcolm (SE)

S. Personnel Changes at SP

Lana Pipes has resigned her position as Clearinghouse Editor, effective September 7, and has accepted a new position as Associate Editor for the journal *Audiovisual Instruction*. Lana has been with the Clearinghouse for three years, and she will be missed.

Sharon Boardman, formerly the Associate Editor of the *Journal of Teacher Education*, will be the new Editor as of September 19.

Two other SP positions have already recently been filled. Lisa Harvey assumed her full-time duties as indexer/abstractor, and Laurie Priest began her part-time position as Associate for Health, Physical Education, and Recreation.

...Dean Schwanke (SP)

T. TM Outreach

On October 9, 1979, Barbara Hunt presented an ERIC orientation for those graduate students at Princeton Theological Seminary who are enrolled in the Social and Educational Research and Statistics courses. The courses, taught by Educational Testing Service (ETS) personnel, include the ERIC orientation in each semester.

Marilyn Halpern conducted an ERIC workshop for a graduate class in vocational and technical education at Rutgers University on October 4. Both manual and computer searching were demonstrated.

TM hosted a meeting of the Education Libraries of Greater Philadelphia on October 24. The 17 individuals representing public, special, and academic librarians from the area were given a tour of the reference division of ETS, which includes the Library, Test Collection, and the ERIC Clearinghouse. After a luncheon, the group was taken on a walking tour of ETS. The day was much enjoyed both by the visitors and the staff of the Clearinghouse.

During the annual meeting of the National Association of Academic Affairs Administrators - Northeast Region, which was held at Trenton State College, Marilyn Halpern presented an ERIC Workshop (October 25). Although for the most part unfamiliar with the ERIC system, the group proved to be a very receptive audience when told how ERIC could help them.

On October 30, Barbara Hunt presented a series of ERIC workshops to the staff and faculty of West Chester State College, West Chester, Pennsylvania. Emphasis was on getting material into ERIC and the fundamentals of computer searching.

The 40th Educational Testing Service invitational conference was held October 27 at the New York Hilton, with this year's theme, "Measuring Achievement Over a Decade". A cartoon, created by Charles Myers (TM indexer) was used by one of the speakers as the focus of his paper on "Test Design and Analysis for the Measurement of Educational Achievement". Barbara Wildemuth and Charles Mayer represented the Clearinghouse.

TM is massing a campaign to acquire material from over 120 university educational testing departments. This is the first time any solicitation has been made of these sources of material. The request letter will be accompanied by TM brochures and publication catalogs. The list was generated from the *Graduate Programs and Admission Manual* and *Peterson's Guides to Graduate Studies*.

...Barbara Hunt (TM)

U. Ed Gordon Elected to Prestigious Academy of Education (NAE)

Edmund W. Gordon, former Director and currently Senior Research Associate at the ERIC Clearinghouse on Urban Education, has been elected to the National Academy of Education. The Academy was founded in 1965 to promote scholarly inquiry and discussion concerning education. Membership is limited to 75 persons whose writings on education are judged outstanding.

This document (author unknown) is the history of a nomadic tribe of shepherds. These people, although not unusually bloodthirsty for their time, were inclined to be quarrelsome, and frequent difficulties with other tribes more settled than they, led to a number of forced moves from one locale to another. Their government was not highly structured and was formed in a fairly loose hierarchy— for the most part headed by a male of one of the several more prominent or prolific tribal families. In their years of traveling they encountered many difficulties, which the author appears to attribute to the penchant of their leaders for listening to voices. The book closes with a description of a singularly fierce battle in which the tribe regained possession of a city they founded. A sequel to this history was written at a later date. (JD)

Elite (12-pitch) typewriters stop at marks

AUDIO-VISUAL MATERIALS FOR TEACHING ERIC

1. Title: ERIC Basics

Description: A self-instructional package being developed by ERIC/IR. Designed to explain the use of the ERIC indexes and the Thesaurus. It consists of a color microfiche (59 frames) with an accompanying 20-minute tape cassette.

Publication Date: January 1, 1980 (Projected)

Availability: ERIC Clearinghouse on Information Resources

Price: To be determined.

2. Title: Overview of ERIC

Description: Set of 20 color transparencies, packaged in a loose-leaf binder with notes for narration. Includes information on the components and overall organization of the ERIC system, sample displays of ERIC tools, and an example of computer search strategy. In addition there are statistics, graphics, and a flow chart of processing procedures for both RIE and CIJE.

Publication Date: June 1979

Availability: ERIC Clearinghouse on Information Resources

Price: (1) Color Version: \$125.00
(2) Black and White Paper Version for use in making transparencies: \$5.50

3. Title: ERIC: Many Things to Many People

Description: Set of 21 color slides with tape cassette. A 4-minute slide/tape presentation providing a brief introduction to ERIC. It emphasizes the kinds of information the system can provide for the user.

Publication Date: June 1979

Availability: ERIC Clearinghouse on Information Resources

Price: \$25.00

4. Title: ERIC: It's That Easy

Description: A 3/4 inch video cassette in color. A dramatization providing an introduction to the ERIC system. Names and describes the basic ERIC products and tools, and tells how to undertake a manual search. Running time: 14.5 minutes.

Publication Date: 1978

Developer: ERIC Clearinghouse on Urban Education

Availability: National Audiovisual Center, Order Section, General Services Administration, Washington, D.C. 20409. Order No. A01 306.

Price: \$80.00

5. Title: ERIC: What the Clearinghouses Do

Description: A 3/4 inch video cassette in color. Dramatization describing the way the Clearinghouses create the ERIC data base. Covers the areas of acquisition, selection, bibliographic elements, abstracting, and indexing. Includes explanation of Descriptors and Identifiers and the main elements of the resume. Running time: 20 minutes.

Publication Date: January 1980 (Projected)

Developer: ERIC Clearinghouse on Urban Education

Availability: National Audiovisual Center

Price: To be determined.

6. Title: ERIC: The Right Way

Description: A 3/4 inch video cassette in color. Dramatization describing procedure for manually searching ERIC. Explains the formulation of search strategies for computer searching. Running time: 30 minutes.

Publication Date: January 1980 (Projected)

Developer: ERIC Clearinghouse on Urban Education

Availability: National Audiovisual Center

Price: To be determined.

7. Title: ERIC: Knowing More about Searching

Description: A 3/4 inch video cassette in color. Dramatization emphasizing computer searching and formulation of search strategy. Running time: 20 minutes.

Publication Date: March 1980 (Projected)

Developer: ERIC Clearinghouse on Urban Education

Availability: National Audiovisual Center

Price: To be determined.

8. Title: ERIC: Information Analysis Products and Bibliographies

Description: A 3/4 inch video cassette in color. Dramatization providing a description of the types of information analysis products prepared by the Clearinghouses. Describes dissemination procedures and how the products can be obtained. Running time: 20 minutes.

Publication Date: Summer 1980 (Projected)

Developer: ERIC Clearinghouse on Urban Education

Availability: National Audiovisual Center

Price: To be determined.

9. Title: ERIC: What It Is, How to Use It

Description: A multimedia kit (cassette and film strip) on the use of the ERIC system. Its primary objective is to introduce ERIC to a variety of users by actively involving them in learning about ERIC and its search tools. Running time: 38 minutes.

Publication Date: 1974

Developer: ERIC Clearinghouse for Social Studies/Social Science Education

Availability: National Audiovisual Center

Price: \$43.50

10. Title: All About ERIC

Description: A multimedia kit (slide and cassette) on using the ERIC system. Describes a manual search as well as batch and on-line searching. Running time: 14 minutes.

Publication Date: 1972

Developer: Robyn C. Baugham

Availability: Photo Lab, Inc., 3825 Georgia Avenue, N.W.,
Washington, D.C. 20011

Price: \$40.00

11. Title: (No Title Given)

Description: Slide tape instructional program. Describes ERIC processing and the function of the Thesaurus. Covers RIE and CIJE in depth through examination of their indexes. Running time: 15 minutes.

Publication Date: 1979

Developer: Project LOEX, Eastern Michigan University,
Ypsilanti, Michigan 48197

Availability: Dr. Joseph Hagaman, Communications Center,
University of Wisconsin-Stout
Menomonie, Wisconsin 54751

NEW INFORMATION ANALYSIS PRODUCTS (IAP's)

1. ERIC Clearinghouse on Higher Education

- A. *Academic Advising in Higher Education*. Thomas Grites. \$4.00. 67 pages. HE 011 953.

This report examines the interrelationships of the Academic Advising process and other areas of higher education: admissions, registration, academic administration, and student personnel administration.

- B. *Evaluation and Development of Administrators*. Robert C. Norduall. \$4.00. 60 pages. HE 011 908.

This report presents theories of administrator evaluation and development, summarizes programs that utilize these theories, examines their success and draws conclusions about various types of programs in different organizational settings.

- C. *Reauthorizing the Higher Education Act of 1965*. Carol Herrnstadt Shulman. \$4.00. 4 pages. HE 011 952.

The Higher Education Act of 1965 is due to be reviewed in 1979. This paper reviews what changes occurred in the 1972 and 1976 amendments and discussed implications of the proposed 1979 amendments.

Available from: American Association for Higher Education
One Dupont Circle, Suite 780
Washington, D.C. 20036

2. ERIC Clearinghouse for Junior Colleges

- A. *Advancing International Education*. Maxwell King and Robert Breuder (Eds.), Summer 1979.

- B. *Serving New Populations*. Patricia Ann Walsh (Ed.), Fall 1979.

Available from: Jossey-Bass, Inc.
San Francisco, California

These 10 publications are available as the *New Directions for Community Colleges* series. The price is \$5.95 each or \$25 a year on a subscription basis.

- C. *Science and Social Science in Two-Year Colleges*. Florence B. Brawer and Jack Friedlander. July 1979.

- D. *Counting the Transfer Students*. Arthur M. Cohen. July 1979.

- E. *Developing Mathematics*. Jack Friedlander. August 1979.

These last three products are available at no charge from the ERIC Clearinghouse for Junior Colleges for as long as the supply lasts.

3. ERIC Clearinghouse on Languages and Linguistics

- A. *Testing Oral Communication in the Foreign Language Classroom.* Walter H. Bartz. 26 pages. \$2.95. FL 010 824.

Discusses test theory, construction, administration, and scoring and provides several sample tests.

- B. *Intensive Foreign Language Courses.* David P. Benseler and Renate A. Schulz. 56 pages. \$4.95. FL 010 821.

Defines components of intensive instruction, discusses its advantages and problems, offers guidelines for program implementation, and provides a 315-item bibliography.

- C. *Evaluating a Second Language Program.* Gilbert A. Jarvis and Shirley J. Adams. 38 pages. \$2.95. FL 010 823.

Outlines evaluation theory, procedures, and data analysis as they related to second language problems.

- D. *Reading a Second Language.* G. Truett Cates and Janet K. Swaffar. 34 pages. \$2.95. FL 010 822.

In the light of learning sequence theory, the authors suggest fundamental changes by teachers in their selection and classroom treatment of reading material.

- E. *Chicano English.* Allan A. Metcalf. 32 pages. \$2.95. FL 010 825.

Analyzes the phonological, morphological, lexical, and syntactic characteristics of this distinctive variety of English, as well as its social and educational implications.

- F. *Adult Vocational ESL.* Jo Ann Crandal. 52 pages. \$5.95. FL 010 826.

Describes program characteristics and available materials, and indicates the psycholinguistic, sociolinguistic, and pedagogical insights these reflect.

DOCUMENT REPRODUCTION SERVICE

ACTION ITEMS

1. LENGTH OF NOTE FIELD ENTRIES

Frank Bryars has done an informal analysis of the Note field of recent RIE entries. He finds that there is a significant amount of redundant information, unnecessary information, as well as over-long statements, that contribute to the increase in size of RIE. (The Facility recently determined that the average size of RIE entries has been steadily increasing.) For example:

Original

NOTE_ Some of the figures and some of the tables in part C, will not reproduce well due to small and broken type.

Suggested Improvement

NOTE_ Several pages in part C may be marginally legible.

OR

Several pages in part C will not reproduce clearly.

Original

NOTE_ Paper presented at the Annual Forum of the Association for Institutional Research (19th, San Diego, California, May 13-17, 1979); Figure 3, page 13 (Sample: Student Station Utilization Chart) and Figure 4, page 14 (Sample Data: Student Station Utilization) may not reproduce well due to marginal legibility of original.

Suggested Improvement

NOTE_ Paper presented at the Annual Forum of the Association for Institutional Research (19th, San Diego, California, May 13-17, 1979); Several figures may not reproduce well due to marginal legibility.

Necessary information cannot always be confined to a single line in the Note field, but editors should be sensitive to this problem.

...B.C. (Central ERIC)

2. CONFERENCE CALENDARS

Clearinghouse acquisition personnel are reminded to check ERIC participation in the *Conference Calendar*, prepared by the ERIC Facility, before soliciting materials or proceedings from any conference!

...B.C. (Central ERIC)

3. STANDING ORDER CUSTOMERS AND THE IAP BIBLIOGRAPHIES

All Standing Order Customers have been sent copies of the *Bibliography of Information Analysis Products, 1975-1977*. They will soon be receiving the 1978 bibliography. In routine contacts with SOC's, we suggest you mention the existence of these IAP bibliographies and the fact that additional copies are available from the Facility at no cost. The bibliographies are not always being received by the right person or recognized for their utility. We also hope you will make a special effort to publicize this important ERIC tool and the special mini-collection of microfiche which can be ordered from EDRS for \$99.50.

...Bob Chesley (Central ERIC)

4. CLEARINGHOUSE QUARTERLY REPORTS—NEW REPORTING REQUIREMENTS

Now that Clearinghouse activity on the Vocabulary Improvement Project is near completion, we would like to continue to monitor, on a systemwide basis, our vocabulary improvement effort. Beginning with the next Clearinghouse quarterly reports (January-March 1980), a section should be added to reflect vocabulary improvement activity.

This new item should be included in the "Input Section" following the item "Journal Inventory." We suggest that this section appear as follows:

<u>VOCABULARY ACTIVITY</u>	
Terms Added:	_____
Terms Deleted:	_____
Terms Changed:	_____
Scope Notes Added or Changed to Existing Terms:	_____
Other Significant Activity:	_____

...Pat Coulter (Central ERIC)

5. NEW ERIC MICROFICHE INDEXES

Within the next two weeks, each Clearinghouse will receive two copies of the following new ERIC search tools on microfiche. The period covered is from 1966 through June 1979.

- | | | | |
|----|------|-----------------------------|------------|
| 1. | RIE | Descriptor/Identifier Index | (56 fiche) |
| | CIJE | Descriptor/Identifier Index | (50 fiche) |
| 2. | RIE | Title Index | (55 fiche) |
| 3. | RIE | Author Index | (37 fiche) |

These easy-to-use cumulative indexes will prove indispensable for the ERIC searcher.

Your comments on these products and your suggestions on any other ERIC products you would like to see developed would be appreciated.

...Jim Prevel (Central ERIC)

6. NATIONAL TECHNICAL MEETING 1980

ERIC's next National Technical Meeting will be held from May 6 to May 8, 1980 at the Ramada Inn, on Seminary Road and I-95, in Alexandria, Virginia. The meeting will focus on the implications of implementing the vocabulary improvement program and its effect on:

1. ERIC indexers/abstractors
2. ERIC users;
3. On-line vendors;
4. Standing Order Customers.

Attendees this year will be restricted to two per Clearinghouse, one of whom should be the Clearinghouse person most knowledgeable about on-line searching, and the other either the indexing/abstracting supervisor or the individual who performed most of the Clearinghouse work on the VIP. (In many cases, this will be the same person.) Nominations of the prospective attendees should be forwarded to Central ERIC, c/o Frank Smardak, no later than January 22, 1980.

The ERIC Technical Steering Committee will be responsible for setting up the agenda of the meeting and will be working closely with Central ERIC, the VIP Steering Group, and the Clearinghouses during the next few months. Your suggestions for items you consider urgent should be forwarded to Marilyn Shorr at the Higher Education Clearinghouse as early as possible, preferably not later than January 22, 1980.

...Frank Smardak (Central ERIC)

I. CENTRAL ERIC ANNOUNCEMENTS

A. Carroll Hall Leaves ERIC

Carroll Hall, the most senior member of the ERIC system, has announced that he will be leaving the ERIC Clearinghouse on Rural Education and Small Schools to assume a full time teaching position at New Mexico State University. Carroll has been with ERIC since its inception in 1966. For the past 9 years he has been Associate Director of the RC Clearinghouse. He has served on numerous systemwide committees and had considerable influence on the development of ERIC. We shall miss his contribution.

...Bob Chesley (Central ERIC)

B. ERIC Facility Contract Renewed

The ERIC Facility contract has been renewed for the fifth year of its five-year contract with ORI, Inc. The following System Improvements will be performed:

1. Continuing

- a. State Technical Assistance Visits (5)
(to promote compatibility with ERIC files)
- b. *ERIC Administrative Bulletin* (12 issues)
- c. Production of the *Directory of ERIC Microfiche Collections*
- d. Production of the *Directory of ERIC Search Services*
- e. Production of the 1979 *ERIC Information Analysis Products Bibliography*, and accompanying brochure
- f. Vocabulary Improvement Project -
completion according to new schedule
- g. Identifier Authority List Maintenance
- h. Public Inquiry Responses (processing and answering of all reference and public inquiries received by NIE's Office of Public Affairs, funded by the Office of Public Affairs).

2. New

a. RIE Highlights Section

Clearinghouses will be asked to identify on a monthly basis those RIE entries of superior quality and broadest appeal. Selected items will be listed in a special "Highlights" page appearing in the front of RIE. This technique should pique user interest and stimulate EDRS sales of the items involved, as well as providing the Clearinghouses with an easy method for calling attention to particularly significant input for that issue.

b. RIE Subscription-Increasing Program

Brochure, advertisement, and direct mail approach to school librarians.

c. Remote User Access to ERIC

Participation in development of a television program for remote users to be broadcast via educational satellite.

...Jim Prevel (Central ERIC)

C. Availability of ERIC Publications Printed By Macmillan

All semiannual cumulations of CIJE through 1978 are available from Macmillan, with the exception of 1974 and 1975. January and February 1979 individual issues of CIJE are also available, for \$10.00 each. All annual cumulations of RIE through 1977 are available, with the exception of 1975 Abstracts and 1972 Indexes and Abstracts. Prices are the same as listed in the December 1978 RIE. The 1978 Indexes and Abstracts will be available by December 17, 1979. The price of the Abstracts (2 volumes) is \$90.00; the Index (1 volume) is \$60.00.

To order, contact Macmillan Customer Service:

Macmillan Publishing Company, Inc.
Front and Brown Streets
Riverside, New Jersey 98370
(Telephone: (609) 461-6500)

Macmillan suggests that customers call before placing orders, since some volumes are in limited supply, and they will not go to press again. For RIE, you may call Connie Winkelspecht on extension 360; for CIJE, call Marian Colonno on extension 352.

Macmillan also has the seventh edition of the *Thesaurus* available. The price is \$9.95.

...Frank Bryars/Kit Welsh (Central ERIC)

D. ERIC Steering Committee Recommendations and Resulting Actions

The following is a summary of Central ERIC actions taken on suggestions emanating from members of ERIC during and since the National ERIC Technical Meeting at the University of Maryland.

Suggestion 1:

When the Identifier cleanup is finished, that an authority list be published and made available to users as well as Clearinghouses.

Action:

The Facility will print about 50 extra copies over and above Clearinghouse needs. These will be made available to users. The cost, however, is likely to be high because of the size of the volume, so extensive sales are not anticipated. Consideration is being given to EDRS reproducing the tape onto microfiche by means of COM and distributing it to SOC's, etc.

Suggestion 2:

That an ad hoc committee on abstracting be formed. The purpose would be for the group to examine the sufficiency of the present abstracting guidelines with a view to suggested revisions or amplifications, particularly with regard to use of the mixed abstract mode. Jane McClellan (CS), Norma Howard (PS), Carol Jaslow (CG), and Janet Thorngate (CE), were nominated by the Steering Committee to serve on this committee.

Action:

Central ERIC approved both the suggestion and the committee nominations.

Suggestion 3:

That the annual *Educational Documents Index* (now containing major/minor descriptors, author, and institution indexes) be expanded to include an Identifier index. Monthly RIE's and CIJE's include Identifiers in the subject indexes, but these are lost when the cumulative annuals are printed.

Action:

This is considered to be a good idea. However, since the Oryx Press' current contract does not include any provision for including such an index, the 1979 cumulative index will have the same specifications as in previous years. The suggestion, however, will be discussed with Oryx as a possible inclusion in future contracts.

Suggestion 4:

That *Interchange*, currently published with a primary orientation toward tape users, be revamped to serve as well the needs of ERIC Standing Order Customers.

Action:

Revamping of Interchange will be undertaken. Suggestions from ERIC Clearinghouses on this subject will be welcomed. They should be forwarded to Ted Brandhorst at the ERIC Facility.

...Frank Smardak (Central ERIC)

E. ERIC Marketing Plan Under Development

Contemporary Associates, Inc., the firm responsible for developing a marketing plan for ERIC products, wishes to express its appreciation to the sixteen ERIC Clearinghouses and to ED&S for the hospitality shown to its staff members during the recent brief visits to study current marketing procedures. Site visits will be completed soon, and letters have been mailed to two sample ERIC user groups inviting orders on selected IAP's and the mini-file collection of IAP microfiche. The marketing plan is scheduled for delivery to Central ERIC on June 30, 1980.

...M.T. (Central ERIC)

F. New CE Director Appointed

ERIC welcomes Dr. Juliet Miller as the new Director of the ERIC Clearinghouse on Adult, Career, and Vocational Education. Dr. Miller, formerly with the University of Michigan, brings to the position a rich background in counseling and guidance, career education, vocational rehabilitation, and vocational education. She is currently a candidate for president-elect of the National Vocational Guidance Association, of which she has been a trustee for several years. Some will remember Dr. Miller as an assistant director of the ERIC Clearinghouse on Counseling and Personnel Services in the 1960's. Dr. Miller officially begins her directorship on January 7, 1980. We all look forward to her rejoining the ERIC family.

...Mildred Thorne (Central ERIC)

II. ERIC STEERING COMMITTEE ANNOUNCEMENT

A. PUBTYPE Problems and Solutions

Inconsistencies have arisen in the application of the new Publication Type scheme, resulting in user dissatisfaction and frustration. This was a topic of discussion at each of the regional technical meetings.

The ERIC Steering Committee has reviewed the technical meeting reports and recommendations, and in consultation with the Facility and Oryx Press has developed a plan of action that it is hoped will resolve the present inconsistencies in indexing and searching the PUBTYPE field.

The plan of action, which has been approved by Central ERIC, consists of the following:

1. discontinuing assignment of Descriptors in the PUBTYPE field;
2. using numeric PUBTYPE codes only;
3. using the Descriptor field (as before) for all Descriptors, including those that express the form of the document, *except when the Descriptor is exactly the same as the PUBTYPE category headings* (e.g., Speeches, Books, Bibliographies).

(However, such Descriptors may, of course, be used at any time when they represent the *subject matter* of the document.);

4. including in the new *Thesaurus* instructions for the use of those Descriptors that are exactly the same as the PUBTYPE category headings.
5. changing the resume master file for the period RIEJUN79 through RIEAPR80 to relocate all Descriptors now in the Publication Type field back to the Descriptor field.

The plan will be implemented with input for the May 1980 issues of RIE (input starting January 25, 1980) and CIJE (input starting about February 7, 1980). A draft of new pages for the *ERIC Processing Manual*, consisting of the revised Publication/Document Types and Codes, and supporting instructions, will be mailed to Clearinghouses by the Facility by the end of December.

Because of implications for the VIP Project, Lynn Haupt has been designated to receive your comments and questions concerning the revised procedures. Please communicate *in writing* to her by January 14, 1980, so that all comments and questions can be considered by the Steering Committee, the ERIC Facility, and Central ERIC, before issuing the final version of the EPM guidelines.

...Steering Committee for
Technical Operations

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Adult, Career, and Vocational Education

1. Standing Order Customer Workshops

The series of resource management workshops for ERIC standing order customers (SOC's) has now been completed. The workshops brought representatives together from ERIC Clearinghouses and the organizations which maintain ERIC microfiche collections to discuss how ERIC resources might be managed for better service to patrons.

SOC representatives were supportive and often enthusiastic about the quality of the workshops. Most felt that the topics, presentations, and activities were important and useful. Many participants provided extensive comments on their perception of ERIC resources and services. The workshops proved to be a valuable experience for all.

During the 1978-1979 period, 82% (555) of the 677 invited SOC's participated in the workshops. Virtually all of them (545) represented United States organizations. The extent of service by ERIC to its constituency was made possible only by the cooperative efforts of many staff at all ERIC Clearinghouses. Approximately 60 ERIC Clearinghouse staff members contributed their time and energy to conducting the 26 workshops. Their involvement and assistance is gratefully acknowledged.

Two reports on the project have been prepared by CE:

- ERIC Resource Management Workshops:
Final Report on Workshops for Standing Order Customers
- ERIC Resources Management Workshops:
Special Report on School System Standing Order Customers

Copies of both reports have been distributed to all ERIC Clearinghouse directors. Additional copies are available upon request while the supply lasts.

...Nevin Robbins (CE)

B. ERIC Clearinghouse on Counseling and Guidance

1. Answer Van Goes Traveling

The newest Michigan SOC, Macomb Intermediate School District, was visited on November 5 by Helen Mamarchev, who brought the ERIC Answer Van to the professional library staff. The Macomb facility, located in Mt. Clemens, offers manual and computer searching of ERIC for school district educational personnel as well as inservice and preservice training sessions for teachers and media specialists. Many favorable (and unsolicited!) comments were made by librarians regarding the value of ERIC for their patrons.

...Helen Mamarchev (CG)

C. ERIC Clearinghouse on Elementary and Early Childhood Education

1. PS Workshops

Mima Spencer, Associate Director, traveled to Montgomery, Alabama in December to participate in a linker workshop sponsored by the Alabama Information and Development System (AIDS). She participated as a resource consultant on ERIC and other educational topics.

Linda Baskin will be presenting two ERIC workshops to faculty of the University of Wisconsin at Oshkosh in January. The presentations will be particularly concerned with the uses of ERIC for faculty in departments other than education, such as social work and psychology.

...Linda Baskin (PS)

D. ERIC Clearinghouse on Handicapped and Gifted Children

1. Directory of the Department of Information at the Centre International de l'Enfance Visits EC

On Friday, November 16, the ERIC Clearinghouse on Handicapped and Gifted Children was host for the day to Madame Denise Parise,

Director of the Department of Information at the Centre International de l'Enfance, Paris. Madame Parise was a very informed and informative guest who was not at all a stranger to the ERIC system.

...M.C. (EC)

2. Catalogs of Information on Handicapped Children Available from NICSEM

Donald K. Erickson, Director of the ERIC Clearinghouse on Handicapped and Gifted Children, met with the Advisory Board of the National Information Center for Special Education Materials (NICSEM) in Los Angeles, October 15-17, 1979. This project has produced a number of materials reference catalogs, including the two-volume Master Catalog of *NIMIS/NICSEM Special Education Information*, four *Indexes to Media and Materials* for variously handicapped populations, and a *Catalog of Instructional Materials for the Handicapped Learner* (1979). A new catalog listing materials for parents will be available from NICSEM in 1980.

...M.C. (EC)

3. EC Organizes Fact Sheets for Placement in RIE

For several years, the ERIC Clearinghouse on Handicapped and Gifted Children has provided free one-page Fact Sheets and Spot Bibliographies to answer some of the most frequently asked questions. These items have proven to be especially popular with parents, regular class teachers, and other persons not specifically trained in special education. Presently, ERIC/EC has 90 titles available, in groups of five (5) titles for \$1.00. One or two titles will continue to be sent free as answers to requests. Copies of the order form and a few samples will be sent to all Clearinghouses.

Also, the Fact Sheets have been grouped by the year in which they were produced and will appear in the February or March issue of RIE under the following titles:

- Fact Sheets from the ERIC Clearinghouse on Handicapped and Gifted Children. 1977 Series.
- Fact Sheets from the ERIC Clearinghouse on Handicapped and Gifted Children 1978 Series.
- Fact Sheets from the ERIC Clearinghouse on Handicapped and Gifted Children. 1979 Series.

The Series above focus mainly on handicapped children. Another Series, funded by the Office of Gifted and Talented, also should appear in the February or March RIE with the title:

- Fact Sheets on the Gifted and Talented.

...Marion Cambel (EC)

E. ERIC Clearinghouse on Higher Education

1. ERIC Steering Committee News

The Steering Committee met December 4-5, 1979. About fifty recommendations were considered and eleven will be forwarded to Central ERIC for their decision.

In addition, the Committee met with Ted Brandhorst and Lynn Haupt to discuss Clearinghouse to Clearinghouse inconsistencies in applying the PUBTYPE scheme. An article entitled "PUBTYPE Problems and Solutions" appears in this issue of the EAB on page 7 and discusses this issue.

...M.S. (HE)

2. American Association of State Colleges and Universities

Connections, a monthly newsletter, sponsored by the American Association of State Colleges and Universities, has incorporated a monthly column that highlights selected ERIC documents. Lynn Haupt is coordinating HE's responsibility for this column.

...M.S. (HE)

3. Fife and Shorr Attend Reception for New Secretary of Education

Jonathan Fife and Marilyn Shorr attended a reception for Shirley Hufstедler, the new Secretary of Education, following her swearing-in ceremony on December 6, 1979.

...M.S. (HE)

4. HE Sponsors Exhibit at National Association of State Universities and Land-Grant Colleges

The staff sponsored an exhibit at the annual meeting of the National Association of State Universities and Land-Grant Colleges, held in Washington, D.C., November 25-27, 1979.

...M.S. (HE)

5. HE Conducts Workshop for Washington, D.C.-Based Higher Education Associations

The ERIC Clearinghouse on Higher Education presented a workshop on December 3, 1979 for 25 representatives of Washington, D.C.-based higher education associations. The meeting provided an introduction to ERIC and computer searching demonstrations, and focused on specific resources available through the Clearinghouse.

...Marilyn Shorr (HE)

F. ERIC Clearinghouse on Information Resources

1. SSIE Publishes Article on IR

The August 1979 *SSIE Science Newsletter* included an article on ERIC/IR's scope, document processing, journal coverage, workshops, user groups, responses to users, and publications programs. The article was solicited by SSIE (the Smithsonian Science Information Exchange), and written by Barbara B. Minor.

...M.L. (IR)

2. IR Workshop Activities

On October 10, 1979, Marilyn Laubacher visited a new Standing Order Customer at Nazareth College in Rochester, New York, and an *Answer Van*, which was enthusiastically received. While in Rochester, she also conducted a class on ERIC and computer searching at the Rochester Institute of Technology, for former IR Assistant Director, Ann Wiley.

IR staff members conducted workshops at five library schools as part of their colloquia series:

- State University of New York at Albany and Buffalo
- Drexel University
- Florida State University
- University of Pittsburgh

Tailored to individual needs, sessions included an overview, manual searching, reference class sessions, and computer search negotiations and strategy formulation (complete with role playing and group participation—there is acting potential on the IR staff!).

At the request of a former IR Standing Order Customer (now TM's), Marilyn Laubacher visited Westfield State College in Massachusetts and held four one-hour orientation sessions for faculty, students, and librarians. Approximately 150 people attended—a library with a good public relations program!

...Marilyn Laubacher (IR)

3. ERIC Slide Tape Available

ERIC—Many Things to Many People, a four minute slide-tape presentation which has been well received by a variety of audiences, has been developed by the ERIC Clearinghouse on Information Resources. It is available for \$25 from:

Information Resources Publications
Syracuse University
School of Education
130 Huntington Hall
Syracuse, New York 13210

This product contains two slides which are specific to the IR Clearinghouse and would need to be changed before use in a different Clearinghouse. One slide lists IAP's developed by IR. The second slide contains the name and address of IR. Clearinghouses which order this slide tape presentation will be granted permission to make substitutions for the two slides described above.

...Bruce Clark (IR)

G. ERIC Clearinghouse on Reading and Communication Skills

1. Dissertation Abstracts Bibliographies: CS

For a number of years, doctoral dissertations related to reading and communication skills have been briefly abstracted and announced in RIE by CS. The number of dissertations entered in this way eventually became too large and the service was discontinued with the February 1977 issue of *Dissertation Abstracts International*.

In its place, a new series of bibliographies of titles focused on specific topics is being carried out. Each bibliography contains abstracts of approximately 18 to 24 dissertations announced in *Dissertation Abstracts International* during six-month time periods (January-June and July-December), and includes the DAI abstract and ordering information. Special permission was given to the Clearinghouse by University Microfilms International to reproduce their abstracts so that users can read the original author abstract on microfiche.

At present, we have prepared bibliographies in twenty-three categories including "Teaching of Writing," "Mass Communication," "Reading and Study Skills: Secondary," and "Testing and Evaluation in Reading and Communication Skills." Each bibliography is indexed and abstracted for entry into the ERIC system, thus providing users of ERIC with access to information on recent dissertations without flooding the system with unavailable documents. To see a sample Dissertation Abstracts bibliography consult ED 159 652, "Reading Success and Failure."

...Mary K Monteith (CS)

H. ERIC Clearinghouse on Teacher Education

1. SP Conferences and Workshops

The Federal Teacher Centers Conference was held on November 5-6, 1979 in Washington, D.C., and the Clearinghouse on Teacher Education exhibited materials and answered questions for the several hundred attendees. In addition, Mike Butler of SP, together with Jim Davis of SO and Chuck Hoover of NIE, conducted a session that focused on ERIC.

A workshop was also conducted for 33 ph.D. students from the University of Maryland on November 8. Mike Butler and Dean Schwanke directed the two evening sessions.

...Dean Schwanke (SP)

J. ERIC Clearinghouse on Tests, Measurement, and Evaluation

1. Barbara Hunt Gives Introduction to ERIC

On November 30, 1979, Barbara Hunt gave an introduction to ERIC for members of the Central New Jersey Urban Schools Improvement Council. Emphasis was placed on securing information on urban education and urban schools. The IAP's of UD were displayed.

...B.H. (TM)

2. New Personnel at TM

Cindi Post replaced Judy Gray (Clerical Assistant, OCR Typist, Publications). Sandra Fike (Clerical Assistant, Acquisitions) has left the Clearinghouse.

...Barbara Hunt (TM)

K. ERIC Clearinghouse on Urban Education

1. Foreign Visitors at UD

Dr. Blanka Burg, Ministry of Education and Culture, Jerusalem, visited the Clearinghouse on November 9. She found the UD collection so useful that she has decided to do the major portion of her research (on patterns of mental abilities in children of diverse cultural backgrounds) at the Clearinghouse library. She plans to be in the United States through June 1980.

Professor Kenichi Hirata, Associate Professor of Educational Technology at the Aichi University of Education, Japan, visited the Clearinghouse in October. Dr. Hirata is a visiting scholar at Teachers College for the 1979-1980 academic year. He met with Erwin Flaxman and Jerome Wright, who explained the ERIC system and conducted a short training session on ERIC procedures.

...Stella Torgott (UD)

2. Staff Changes at UD

Jerome Wright, who has been with the UD Clearinghouse since October 1978 as Assistant Director, has become Associate Director. He will be developing Information Analysis Products and representing the Clearinghouse nationally, as well as participating in technical activities within the Clearinghouse.

Stella Torgoff, formerly Administrative Associate, has been named Assistant Director. She has been with the Clearinghouse since October 1977. In her new role, she will supervise the technical activities of the Clearinghouse.

...Erwin Flaxman (UD)

I. CENTRAL ERIC ANNOUNCEMENTS

A. ERIC Technical Steering Committee Recommendations

The recommendations received from the ERIC Technical Steering Committee in December, and Central ERIC's responses, are contained in Attachment 1. Although not all recommendations can be responded to favorably, they have been carefully considered in light of available resources and system priorities. The mechanism of utilizing regional technical meetings and the Steering Committee continues to be an effective means of surfacing problems, ideas, and solutions. We appreciate the work of all involved.

...B.C. (Central ERIC)

B. ERIC - The First 15 Years - A History

Del Trester has finished the first draft of *ERIC - The First Fifteen Years*. Although there is still some review, revision, and indexing work to be done, the volume is only a few months away from being ready for some form of publication. It is possible that Central ERIC might publish it through the GPO. However, there might be some other more preferable publication method. If Clearinghouses have suggestions for alternative publication procedures, please let me know.

...Bob Chesley (Central ERIC)

C. Procedure for Handling New Journals To Be Covered By CIJE

The question has arisen as to how new journals that are candidates for CIJE coverage should be handled. Central ERIC has made the following decisions:

1. New journals should be nominated by the Clearinghouse responsible for the subject area concerned. If a journal does not fall into a well-defined subject area, it may be nominated by any component of the ERIC system.
2. If non-Clearinghouse components (e.g., Oryx, EDRS, Central ERIC, ERIC Facility) learn of new candidate journals, they should transmit the information to the appropriate Clearinghouse. If the original recipient cannot determine the appropriate Clearinghouse, the material should be sent to the ERIC Facility's Acquisitions Department (Grace Sundstrom) for this decision.
3. Journals that fall clearly into the general or mixed category and that cannot be assigned to any one Clearinghouse, will be assigned for consideration to Oryx (and its subcontractor SMERC).

4. Given the large number of journals covered in CIJE at the present time, Clearinghouses should generally attempt to delete a marginal journal (e.g., less valuable content or erratic publication schedule) in order to add a significant new journal. The responsibility for making this decision belongs to the individual Clearinghouse. If, however, it becomes necessary in the opinion of the Clearinghouse to add one or more journals and not to delete any, justification should be submitted to Kit Welsh at Central ERIC who, in consultation with Oryx Press, will make a decision in the matter.

...Kit Welsh/Jim Prevel
(Central ERIC)

D. Contract Renewals (CG, IR, TM, and Oryx Press)

NIE has exercised the government's option to renew contracts for the operation of the Clearinghouses on Counseling and Personnel Services (CG); Information Resources (IR); Tests, Measurement, and Evaluation (TM); and for Oryx Press. (Reports on the renewal of EA, SE, and SO will be in next month's EAB.)

● ERIC Clearinghouse on Counseling and Personnel Services

At a necessarily reduced funding rate, CG will continue to expand its Special Project, the ERIC Futures Issues Component (EFIC). Liaison with the other Clearinghouses has been established, as well as with several futures research and professional organizations. It is hoped the networking which began in 1979 can be expanded in 1980 with priorities set for educational resources development in the futures field. CG will also continue, as a Special Project, the compilation and distribution of the Answer Van. This will be the third year of the present contract.

● ERIC Clearinghouse on Information Resources

During this contract year, IR will undertake the following special projects:

- The distribution of 80 copies of the *ERIC Instructional Module for Professional Education Programs in Library and Information Science*, one of each accredited library school in the United States, one to each ERIC Clearinghouse, and one to the ERIC Facility.
- The development of a 4-minute, 20-frame slide/sound presentation on the new Thesaurus to be distributed to ERIC Clearinghouses, Central ERIC, and the ERIC Facility.

This marks the fourth year of the contract (January 1, 1980 to December 31, 1980).

- ERIC Clearinghouse on Tests, Measurement, and Evaluation

TM's Special Projects will continue the coordination of each Clearinghouse's monthly submissions for the American Educational Research Journal and the running of ERIC searches to identify current significant research of interest to NIE. This will be the third year of the present contract.

- Oryx Press

Oryx Press has been awarded the first renewal of its contract with NIE for the calendar year of 1980. Oryx, and its subcontractors Datagraphics and SMERC, have successfully completed their beginning year publishing CIJE. They are to be congratulated on the hard and exacting work they have done during this start-up period.

...Catherine G. Welsh and
Cheryl Chase (Central ERIC)

E. GPO Now Accepts Visa and Master Charge Credit Cards

The Superintendent of Documents, U.S. Government Printing Office, has announced a new service to its customers. GPO will now accept Visa and Master Charge credit cards from users in payment for documents. Customers wishing to order documents using one of these credit cards should:

- furnish GPO with the credit card number and date of expiration;
- furnish Interbank number, if using Master Charge.

Credit card purchases will be accepted in all GPO bookstores and on mail order to the central office in Washington, D.C. Telephone orders may also be placed at any bookstore or by calling the Order Desk in Washington, D.C., (8:00 a.m. to 4:30 p.m., Monday through Friday (except holidays) at (202) 783-3238.

The minimum charge for mail orders is \$1.00. A sample order form is displayed as Attachment 2.

...Frank Bryars (Central ERIC)

F. Federally-Funded Dissertations - Processing Guidelines Being Developed

A number of people at Central ERIC and the Clearinghouses have recently asked for clarification on the inclusion of federally-funded dissertations in RIE. (The *ERIC Processing Manual* does not presently make a distinction between federally-funded and non-federally-funded dissertations.)

ERIC STEERING COMMITTEE RECOMMENDATIONS AND RESULTING ACTIONS

The following is a summary of Central ERIC actions on suggestions which had originated at the Fall Regional Technical Meeting, have been reviewed and approved by the ERIC Technical Steering Committee and forwarded to Central ERIC for consideration.

Suggestion #1

That the EDRS order form which currently appears in the back part of each monthly RIE and several other system publications be revised to exclude "SAMPLE." Although the word was added to remedy the problem of users ripping out the order form pages from copies of RIE, it has tended to confuse the public. It is suggested that a statement be added across the top of the order form that suggests photocopying or drawing up ordering instructions which do not appear as a form.

Action:

This is in a state of "fait accompli." The word "SAMPLE" has been removed from the EDRS order form in the January 1980 issue and the Semiannual Index, July-December 1979. Instead there now appears on the same page the following notice:

"PLEASE DO NOT REMOVE. THIS FORM MAY BE PHOTOCOPIED
OR ADDITIONAL COPIES OBTAINED FROM EDRS."

Suggestion #2

That the addresses of one-shot CIJE journal entries be placed in the Availability field in order to keep the abstract free for annotations.

Action:

This suggestion was approved. The Facility will shortly be distributing instructions to all Clearinghouses on how to list journal addresses for one-shot entries in the Availability field.

Suggestion #3

That the system undertake a study of the problems in indexing "methodological techniques." The Pubtype scheme does not address this indexing problem. This topic should be considered after Pubtype indexing issues have been resolved.

Action:

Action is being deferred on this suggestion pending receipt of additional information concerning the magnitude of the problem of "methodological techniques" and the type of study which is contemplated to address the problem.

Suggestion #4

That a national 800 telephone line be established for ERIC so that potential users can call a single number to receive information on ERIC.

Action:

This suggestion has cropped up repeatedly over the past ten years. Our answer is much the same as it was when it was first proposed. The high costs associated with line charges, staffing the phones, and responding to the queries preclude any favorable consideration at this time. It is estimated that total costs for initiating the 800 line would amount to over \$80,000 a year (line charges alone add up to \$21,600 a year). Reducing Clearinghouse budgets an average of \$5,000 each during each contract year is the only possible way of funding the project, and that is not considered feasible during these years of tight budgets. The proposal, incidentally, has been on Central ERIC's "wish list" for at least three years, but it does not have a high priority due to the cost.

Suggestion #5

That in the future all data base changes of a substantive nature be tested by the Clearinghouses before they are implemented. Otherwise, confusion to the user usually results and in some cases bad publicity occurs for ERIC as a system.

Action:

In the past, there have been studies and tests of a number of the system changes that have been adopted (and not adopted). However, not all changes lend themselves to tests beforehand. To require a test in all cases would decrease our ability to make needed changes. Nonetheless, we agree with the implied intent of the recommendation and will take the concern into consideration.

Suggestion #6

That Pubtypes (except for O80) be printed in CIJE and that a Publication Type Index be added to the journal. Under the current policy of printing this information only in RIE, the visibility of Pubtypes is "wiped out" of half the ERIC data base.

Action:

This suggestion was disapproved for several reasons. First, the Pubtype was meant to be a mechanism for searchers to delimit the RIE file and since CIJE carries only journal articles further delimiting can be done via Descriptors and Identifiers. Second, the inclusion of Pubtypes and an index would substantially increase the size of each issue of CIJE, and would necessitate an increase in subscription prices. Such an increase is not considered in the best interests of the system or CIJE subscribers at the present time.

SUGGESTION #7

That OCR keying, and other technical processing, be the same for CIJE and RIE (to the greatest extent possible), so that one set of processing instructions will cover both publications. All changes in instructions and guidelines should be processed through the Facility so that a single set of "official" instructions exists for the system.

Action:

This recommendation is currently being implemented by the Facility, and is due to be completed in draft by the end of February 1980.

SUGGESTION #8

That the Identifier Authority List be published containing both an alphabetical and a group list of identifiers.

Action:

This suggestion was not accepted. Because of the large size, high cost, and limited sales market, only a limited number of Identifier Authority Lists in group format will be published. These will be for internal use only.

SUGGESTION #9

That when changes/updates occur for the *ERIC Processing Manual* they be announced in the EAB with actual EPM revised pages attached. This would provide an effective mechanism for insuring that everyone affected receives a copy of the change(s).

Action:

This suggestion was approved. In the future, ERIC Processing Manual changes will be attached to the EAB in which they are announced (or, in the following EAB where time is a problem and it is important to announce the change immediately). Clearinghouses will be expected to insert the revisions directly into their their manuals.

SUGGESTION #10

That the introductory sections in both RIE and CIJE include instructions to users on how to cite ERIC-indexed materials in bibliographies and reports.

Action:

Decision on this recommendation had to be deferred since agreement needs to be reached on what these instructions should be. Also whether RIE and CIJE are the appropriate vehicles for such information. Attention is invited to ED 095 905 which deals with the subject of transforming ERIC citations into accepted format for bibliographic entries. No brief instructions are likely to be sufficient. Central ERIC will ask the Technical Steering Committee to discuss possible instructions or alternative approaches.

Educational Resources Information Center, National Institute of Education, Washington, D.C. 20208

I. CENTRAL ERIC ANNOUNCEMENTS

A. ERIC Technical Steering Committee Recommendations

The recommendations received from the ERIC Technical Steering Committee in December, and Central ERIC's responses, are contained in Attachment 1. Although not all recommendations can be responded to favorably, they have been carefully considered in light of available resources and system priorities. The mechanism of utilizing regional technical meetings and the Steering Committee continues to be an effective means of surfacing problems, ideas, and solutions. We appreciate the work of all involved.

...B.C. (Central ERIC)

B. ERIC - The First 15 Years - A History

Del Trester has finished the first draft of *ERIC - The First Fifteen Years*. Although there is still some review, revision, and indexing work to be done, the volume is only a few months away from being ready for some form of publication. It is possible that Central ERIC might publish it through the GPO. However, there might be some other more preferable publication method. If Clearinghouses have suggestions for alternative publication procedures, please let me know.

...Bob Chesley (Central ERIC)

C. Procedure for Handling New Journals To Be Covered By CIJE

The question has arisen as to how new journals that are candidates for CIJE coverage should be handled. Central ERIC has made the following decisions:

1. New journals should be nominated by the Clearinghouse responsible for the subject area concerned. If a journal does not fall into a well-defined subject area, it may be nominated by any component of the ERIC system.
2. Requests for coverage should be sent from the Clearinghouse to Central ERIC (Kit Welsh) for approval. The request should be accompanied by a written justification (and a copy of the journal, if practical). Central ERIC will return the material to the Clearinghouse with a decision to cover or not to cover.
3. If non-Clearinghouse components (e.g., Oryx, EDRS, Central ERIC, ERIC Facility) learn of new candidate journals, they should transmit the information to the appropriate Clearinghouse. If the original recipient cannot determine the appropriate Clearinghouse the material should be sent to the ERIC Facility's Acquisitions Department (Grace Sundstrom) for this decision.

4. Journals that fall clearly into the general or mixed category and that cannot be assigned to any one Clearinghouse, will be assigned to Oryx (and its subcontractor SMERC).

Given the large number of journals covered at the present time, it may be necessary to delete a marginal journal in order to add a significant new journal. Requests for deletion must also be approved by Central ERIC.

...Jim Prevel (Central ERIC)

D. Contract Renewals (CG, IR, TM, and Oryx Press)

NIE has exercised the government's option to renew contracts for the operation of the Clearinghouses on Counseling and Personnel Services (CG); Information Resources (IR); Tests, Measurement, and Evaluation (TM); and for Oryx Press. (Reports on the renewal of EA, SE, and SO will be in next month's EAB.)

- ERIC Clearinghouse on Counseling and Personnel Services

At a necessarily reduced funding rate, CG will continue to expand its Special Project, the ERIC Futures Issues Component (EFIC). Liaison with the other Clearinghouses has been established, as well as with several futures research and professional organizations. It is hoped the networking which began in 1979 can be expanded in 1980 with priorities set for educational resources development in the futures field. CG will also continue, as a Special Project, the compilation and distribution of the Answer Van. This will be the third year of the present contract.

- ERIC Clearinghouse on Information Resources

During this contract year, IR will undertake the following special projects:

- The distribution of 80 copies of the *ERIC Instructional Module for Professional Education Programs in Library and Information Science*, one of each accredited library school in the United States, one to each ERIC Clearinghouse, and one to the ERIC Facility.
- The development of a 4-minutes, 20-frame slide/sound presentation on the new Thesaurus to be distributed to ERIC Clearinghouses, Central ERIC, and the ERIC Facility.

This marks the fourth year of the contract (January 1, 1980 to December 31, 1980).

- ERIC Clearinghouse on Tests, Measurement, and Evaluation

TM's Special Projects will continue the coordination of each Clearinghouse's monthly submissions for the American Educational Research Journal and the running of ERIC searches to identify current significant research of interest to NIE. This will be the third year of the present contract.

- Oryx Press

Oryx Press has been awarded the first renewal of its contract with NIE for the calendar year of 1980. Oryx, and its subcontractors Datagraphics and SMERC, have successfully completed their beginning year publishing CIJE. They are to be congratulated on the hard and exacting work they have done during this start-up period.

...Catherine G. Welsh and
Cheryl Chase (Central ERIC)

E. GPO Now Accepts Visa and Master Charge Credit Cards

The Superintendent of Documents, U.S. Government Printing Office, has announced a new service to its customers. GPO will now accept Visa and Master Charge credit cards from users in payment for documents. Customers wishing to order documents using one of these credit cards should:

- furnish GPO with the credit card number and date of expiration;
- furnish Interbank number, if using Master Charge.

Credit card purchases will be accepted in all GPO bookstores and on mail order to the central office in Washington, D.C. Telephone orders may also be placed at any bookstore or by calling the Order Desk in Washington, D.C., (8:00 a.m. to 4:30 p.m., Monday through Friday (except holidays) at (202) 783-3238.

The minimum charge for mail orders is \$1.00. A sample order form is displayed as Attachment 2.

...Frank Bryars (Central ERIC)

F. Federally-Funded Dissertations - Processing Guidelines Being Developed

A number of people at Central ERIC and the Clearinghouses have recently asked for clarification on the inclusion of federally-funded dissertations in RIE. (The *ERIC Processing Manual* does not presently make a distinction between federally-funded and non-federally-funded dissertations.)

Central ERIC is currently working with the Copyright Office at NIE to develop a set of guidelines in this area. Within the next few weeks, Central ERIC will ask a few Clearinghouses to review the guidelines and suggest appropriate modifications.

If staff at any of the Clearinghouses would like to raise particular problems, or have suggestions for guidelines on federally-funded dissertations, please contact Cheryl Chase. All input would be greatly appreciated.

...Cheryl Chase (Central ERIC)

G. Currency of CIJE

As mentioned in the November 1979 EAB, some real concern has developed over how current CIJE really is. Following the publication of A. Sward's article in *Database*, December 1979 in which she stated, "Education Index is about six to ten months more current than CIJE," Barbara Wildemuth of the ERIC Clearinghouse on Tests, Measurement, and Small Schools, did a small comparative study (see Attachment 3).

It is cool comfort to find that in Wildemuth's sampling it appears that CIJE is only 2-4 months behind EI in its announcements. So little are we consoled by this apparently smaller difference that Central ERIC would like the Clearinghouses to take a serious look at how long it takes them to process articles and to take whatever steps are possible to shorten that time. Perhaps discussion of the problems and how it is being solved could be discussed at the next National Technical Meeting.

...Kit Welsh (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. Directory of ERIC Search Services—1980 Revision Effort Seeks New Sources

The ERIC Facility is in the process of revising and updating the *Directory of ERIC Search Services*. The 1978 edition listed 341 service points. Because of the explosive growth in online searching, it is believed that the 1980 edition should be substantially larger.

The Clearinghouses can help in identifying new sources by including notices and announcements in your respective newsletters and columns. Your assistance in making the 1980 *Directory* as complete as possible is requested. Similar requests are being made directly to the online vendors and it is anticipated that information solicitations will appear in their user newsletters.

A copy of the questionnaire being used is displayed as Attachment 4. We believe that all the information and text you will need to create appropriate notices will be found in this questionnaire. Please use the following address:

ERIC Processing and Reference Facility
Directory of ERIC Search Services Project
4833 Rugby Avenue, Suite 303
Bethesda, Maryland 20014
(301) 656-9723

...T.B. (ERIC Facility)

B. ERIC Processing Manual - Revision Pages For The Publication Type Data Element

The ERIC Technical Steering Committee has suggested that when changes to the *ERIC Processing Manual* occur, a copy be published in the EAB, in addition to the copies routinely printed and sent to the Clearinghouses (see Attachment 1, Suggestion #9).

A draft of new instructions for the Publication Type data element was recently prepared and sent to the Clearinghouses on January 11 (see Attachment 5). These new instructions are being reviewed (particularly by the VIP staff) and are scheduled to take effect with input for RIEJUN80 (one month later than originally announced). The principal change has been to eliminate the Descriptor component of this field.

...T.B. (ERIC Facility)

C. Recent Journal Articles About ERIC

The following major journal articles are being added to the Facility's "running" bibliography of publications about ERIC:

1. Sward, Andrea J.
"Searching For The Answer To Two Questions: Do You Need Supplementary *Education Index* Searches? Can You Save Money By Skipping Full Format Output?" *Database*, v. 2, n. 4, p. 22-27, December 1979.
2. Chesley, Robert E.
"The Educational Resources Information Center," *Exceptional Children*, v. 46, no. 3, p. 194-199.
3. Clay, Katherine
"Searching ERIC on DIALOG: The Times They Are A'Changing," *Database*, v. 2, no. 3, p. 46-67, September 1979.

...Ted Brandhorst (ERIC Facility)

D. ERIC Acquisitions Arrangements List

The *ERIC Acquisitions Arrangements List*, due in November, has been delayed. It is now scheduled to be shipped to Clearinghouses the first week in February. This delay is regretted and should not reoccur as the complete list is being keyed on a word processor so that updates will be a comparatively easy process.

If you wish more than two copies for your Clearinghouse, please advise the Acquisitions Department and we will supply additional copies, otherwise, each Clearinghouse will receive the regular two copies.

...Grace Sundstrom (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Counseling and Personnel Services

1. Canada Comes to CAPS

On December 12, 1979, the ERIC Clearinghouse on Counseling and Personnel Services hosted a Canadian visitor, George Repar, Director of Student Services at Niagara College, Welland, Ontario. Mr. Repar is involved in helping Ontario school districts and communities establish career resource centers which will be readily accessible to, and easy to use by, adults (those who are unemployed as well as those interested in making a career change). Since Canada does not have a federal education coordinating agency, Mr. Repar finds it difficult to locate adaptable programs from other parts of the country; once the resource centers are established, however, he anticipates that information/program sharing will be considerably improved, and that the need to reinvent the wheel will virtually disappear.

...Carol Jaslow (CG)

B. ERIC Clearinghouse on Educational Management

1. EA Participates in the First Oregon Dissemination Conference

The first Oregon Dissemination Conference was held in Eugene, Oregon, on October 25-26, 1979. The conference was organized primarily by the Oregon Department of Education and the Northwest Regional Educational Laboratory. It was intended to be a forum in which all those in the state who are involved in the dissemination of education materials could get together for the following objectives:

- to define essential terms in the area;
- to create a map of existing services and programs;
- to create a statewide communication linkage system;
- to identify needs for training, resources, and services; and
- to plan for the future.

The meeting included representatives from the following organizations:

- Central ERIC;
- ERIC Clearinghouses in the Western region;
- Oregon Department of Education;

- intermediate service districts;
- Region X of the Office of Education;
- University of Oregon; and
- local school districts.

...Ian Templeton (EA)

C. ERIC Clearinghouse on Elementary and Early Childhood Education

1. Dr. Katz to Speak at the International Congress on Early Childhood Education in Tel Aviv

Dr. Lilian Katz will be one of the scheduled speakers at the International Congress on Early Childhood Education in Tel Aviv, Israel, in January 1980. During her travels, she will also be speaking at Haifa, Israel, as well as Briston, England, at the Hennemore Teachers Center and at University College, Dublin, Ireland. Her presentation will focus on inservice education of teachers and teacher education.

...Dianne Rothenberg (PS)

2. Staff Changes At PS

Mary Glockner, Senior Editor and Publications Coordinator at the ERIC Clearinghouse on Elementary and Early Childhood Education, has left the staff to accept an editorial position with the Illinois State Geological Survey. Her writing and editing abilities and her knowledge of the literature in early childhood education were a great asset to the staff during her twelve years at the Clearinghouse. We will miss her.

Charlotte Watkins, Editor/Writer at the Clearinghouse for the past four years, has assumed Mary's duties. Charlotte will be assisted by a new member of the editorial staff, Moral A. Quest. Prior to working at the Clearinghouse, Moral was an English teacher at the high school and college levels and an educational consultant and curriculum specialist at University Microfilms International.

...Charlotte Watkins (PS)

D. ERIC Clearinghouse on Information Resources

1. White House Conference on Libraries and Information Services (WHCLIS)

Don Ely, Director of the ERIC Clearinghouse on Information Resources, attended the White House Conference on Libraries and Information Services on November 15-19, 1979 in Washington, D.C. He has prepared a summary of this conference and has submitted it as Attachment 6 to this EAB.

...Don Ely (IR)

2. Selective Dissemination of Information (SDI) For Journals

School Media Quarterly, which has received selected abstracts from IR's monthly input in the almost three years that this Selective Dissemination of Information (SDI) service has been offered by the Clearinghouse on Information Resources, has now requested a formal column to appear in each issue as a regular feature.

The SDI service is currently furnished free of charge to thirteen agencies and/or publications which provide a multiplier effect by including selected abstracts in their publications. Copies of the complete set go to *Information Science Abstracts*, National Technical Information Service (NTIS), and Science Associates/International, Inc. (*Information Reports and Bibliographies; Information Hotline*).

Selected abstracts are sent to:

- *College & Research Libraries*
- *Educational Media Yearbook*
- *Educator's Guide to Media Lists*
- *Information Retrieval and Library Automation*
- *R&D Management Digest*
- *Journal of Computer Based Instruction*
- *LAMA Newsletter*
- *Public Libraries*
- *Research & Development Exchange*
- *Visual Literacy Newsletter*
- *Newsletter on Education and Training Programmes for Specialized Information Personnel* (most recent addition to the list; published by the International Federation for Documentation (FDI) under a Unesco contract)

...Barb Minor (IR)

E. ERIC Clearinghouse on Languages and Linguistics

1. News About IAP's

Jo Ann Crandall, author of *Adult Vocational ESL*, (CAL-ERIC/CLL Language in Education Series, #22), has been informed that the California State Department of Education (largely on the basis of our IAP) has put aside \$250,000 for programs in the area of vocational ESL, and that the product is required reading for a statewide conference on adult education.

The International Communication Agency (ICA) is planning to reprint our IAP #68, *Diagnosing and Responding to Individual Learner Needs*, by Diane Birchkbichler and Alice Omaggio, for distribution to English teachers overseas.

...K.M. (FL)

2. Cooperation with Bilingual Clearinghouse

In December 1979, FL's acquisitions information exchange with the National Clearinghouse for Bilingual Education was expanded with the first of what will be monthly visits between our Clearinghouse and theirs. On December 14, John Brosseau visited NCBE to look over their December acquisitions and to discuss the NCBE data base and its relationship to ERIC. On December 17, Murray Howder and Judy Kirsch of NCBE visited FL to look over our December acquisitions.

...Kathleen McLane (FL)

F. ERIC Clearinghouse on Reading and Communication Skills

1. CS Staff Attends National Council of Teachers of English Convention

Several staff members from the ERIC Clearinghouse on Reading and Communication Skills attended the National Council of Teachers of English convention in San Francisco. Holly O'Donnell chaired a preconvention institute for the second year in a row on minimal competency testing (that was filled to capacity) and conducted sample computer searches at the exhibit. Jane McClellan chaired an ERIC/RCS sponsored session on contemporary realistic fiction. Arthur Applebee gave a presentation entitled "Children's Narratives."

...Mary K Monteith (CS)

G. ERIC Clearinghouse on Teacher Education

1. SP Makes A Little Splash

SP was delighted to note that the Clearinghouse on Teacher Education and its most recent publication, *Simulations and Games: An ERIC Bibliography*, were mentioned in the December 9, 1979 Sunday edition (p. 92) of the *New York Times*. Free and unsolicited publicity is always welcome, and we've already developed a backlog of orders.

...Dean Schwanke (SP)

ERIC STEERING COMMITTEE RECOMMENDATIONS AND RESULTING ACTIONS

The following is a summary of Central ERIC actions on suggestions which had originated at the Fall Regional Technical Meeting, have been reviewed and approved by the ERIC Technical Steering Committee and forwarded to Central ERIC for consideration.

Suggestion #1

That the EDRS order form which currently appears in the back part of each monthly RIE and several other system publications be revised to exclude "SAMPLE." Although the word was added to remedy the problem of users ripping out the order form pages from copies of RIE, it has tended to confuse the public. It is suggested that a statement be added across the top of the order form that suggests photocopying or drawing up ordering instructions which do not appear as a form.

Action:

This is in a state of "fait accompli." The word "SAMPLE" has been removed from the EDRS order form in the January 1980 issue and the Semiannual Index, July-December 1979. Instead there now appears on the same page the following notice:

"PLEASE DO NOT REMOVE. THIS FORM MAY BE PHOTOCOPIED OR ADDITIONAL COPIES OBTAINED FROM EDRS."

Suggestion #2

That the addresses of one-shot CIJE journal entries be placed in the Availability field in order to keep the abstract free for annotations.

Action:

This suggestion was approved. The Facility will shortly be distributing instructions to all Clearinghouses on how to list journal addresses for one-shot entries in the Availability field.

Suggestion #3

That the system undertake a study of the problems in indexing "methodological techniques." The Pubtype scheme does not address this indexing problem. This topic should be considered after Pubtype indexing issues have been resolved.

Action:

Action is being deferred on this suggestion pending receipt of additional information concerning the magnitude of the problem of "methodological techniques" and the type of study which is contemplated to address the problem.

Suggestion #4

That a national 800 telephone line be established for ERIC so that potential users can call a single number to receive information on ERIC.

Action:

This suggestion has cropped up repeatedly over the past ten years. Our answer is much the same as it was when it was first proposed. The high costs associated with line charges, staffing the phones, and responding to the queries preclude any favorable consideration at this time. It is estimated that total costs for initiating the 800 line would amount to over \$80,000 a year (line charges alone add up to \$21,600 a year). Reducing Clearinghouse budgets an average of \$25,000 each during each contract year is the only possible way of funding the project, and that is not considered feasible during these years of tight budgets. The proposal, incidentally, has been on Central ERIC's "wish list" for at least three years, but it does not have a high priority due to the cost.

Suggestion #5

That in the future all data base changes of a substantive nature be tested by the Clearinghouses before they are implemented. Otherwise, confusion to the user usually results and in some cases bad publicity occurs for ERIC as a system.

Action:

In the past, there have been studies and tests of a number of the system changes that have been adopted (and not adopted). However, not all changes lend themselves to tests beforehand. To require a test in all cases would decrease our ability to make needed changes. Nonetheless, we agree with the implied intent of the recommendation and will take the concern into consideration.

Suggestion #6

That Pubtypes (except for (80)) be printed in CIJE and that a Publication Type Index be added to the journal. Under the current policy of printing this information only in RIE, the visibility of Pubtypes is "wiped out" of half the ERIC data base.

Action:

This suggestion was disapproved for several reasons. First, the Pubtype was meant to be a mechanism for searchers to delimit the RIE file and since CIJE carries only journal articles further delimiting can be done via Descriptors and Identifiers. Second, the inclusion of Pubtypes and an index would substantially increase the size of each issue of CIJE, and would necessitate an increase in subscription prices. Such an increase is not considered in the best interests of the system or CIJE subscribers at the present time.

SUGGESTION #7

That OCR keying, and other technical processing, be the same for CIJE and RIE (to the greatest extent possible), so that one set of processing instructions will cover both publications. All changes in instructions and guidelines should be processed through the Facility so that a single set of "official" instructions exists for the system.

Action:

This recommendation is currently being implemented by the Facility and is due to be completed in draft by the end of February 1980.

SUGGESTION #8

That the Identifier Authority List be published containing both an alphabetical and a group list of identifiers.

Action:

This suggestion was not accepted. Because of the large size, high cost, and limited sales market, only a limited number of Identifier Authority Lists in group format will be published. These will be for internal use only.

SUGGESTION #9

That when changes/updates occur for the *ERIC Processing Manual* they be announced in the EAB with actual EPM revised pages attached. This would provide an effective mechanism for insuring that everyone affected receives a copy of the change(s).

Action:

This suggestion was approved. In the future, ERIC Processing Manual changes will be attached to the EAB in which they are announced (or, in the following EAB where time is a problem and it is important to announce the change immediately). Clearinghouses will be expected to insert the revisions directly into their their manuals.

SUGGESTION #10

That the introductory sections in both RIE and CIJE include instructions to users on how to cite ERIC-indexed materials in bibliographies and reports.

Action:

Decision on this recommendation had to be deferred since agreement needs to be reached on what these instructions should be. Also whether RIE and CIJE are the appropriate vehicles for such information. Attention is invited to ED 095 902 which deals with the subject of transforming ERIC citations into accepted format for bibliographic entries. No brief instructions are likely to be sufficient. Central ERIC will ask the Technical Steering Committee to discuss possible instructions or alternative approaches.

INFORMATION CONCERNING YOUR ORDER OR INQUIRY

Thank you for your interest in U.S. Government publications. If you have made a written inquiry, it is returned herewith for your reference. We have indicated the prices of publications currently available, or have provided the information requested to the best of our ability. Unless otherwise noted, prices are for single copies.

There is no free distribution by this Office. Regulations require remittance in advance of shipment of publications, either by check or money order payable to the Superintendent of Documents. Do not send currency (bills or coins) or postage stamps.

With the exception of specially priced publications, a discount of 25 percent is allowed on quantity purchases (100 or more copies of a single publication). The same discount applies to orders from a bookdealer (any quantity) when the publications are mailed to the dealer's normal place of business. No discount will be allowed when publications are mailed to a third party (unless in quantities of 100 or more per title).

NON U.S. CUSTOMERS-International mailing regulations require special handling for which we charge an additional 25 percent of the total cost of your order. Remittance is required in advance of shipping by draft on a United States or Canadian Bank, by UNESCO coupons or by International Postal Money Order made payable to the Superintendent of Documents. These orders are mailed via surface mail unless funds are sent to cover airmail postage. Foreign currency or checks will not be accepted. All orders must be in English.

TO ORDER, USE FORM ON REVERSE SIDE. FOLLOW INSTRUCTIONS BELOW

1. Enter your complete name and address, your order number (if any) and date in the proper places at the top of this form. Enter stock number, unit of issue*, quantity, title and price of desired publication(s) and total enclosed. There is a \$1.00 minimum for mail orders; this is not a surcharge. Enter destination name and address and your order number on mailing label at bottom of form.

*Unit of Issue

Explanation

PK	Package containing multiple copies
EA	Each-single copy
PD	Pod containing multiple sheets
SE	Set of multiple items
KT	Kit of multiple items in a special container

2. Mail yellow copy to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Retain customer's copy (green) for your records.
3. If a shipment is incorrect, return the shipping document with your request for adjustment. **DO NOT RETURN PUBLICATIONS UNTIL NOTIFIED TO DO SO.** All claims must be submitted within one year from date of your order.

A Brief Report on Three Studies
of the Currency of Education Index and
Current Index to Journals in Education

Introduction. In the December 1979 issue of Database, Sward considered the need for a manual search of Education Index (EI) to supplement an online search of Current Index to Journals in Education (CIJE). In the course of her discussion, she makes several comparisons between CIJE and EI. One of these concerned the relative currency of data in the two indexes. She stated that "Education Index is about six to ten months more current than CIJE."

Because the ERIC system strives for currency, and because Sward provides no data to substantiate her statement, three studies were undertaken to compare the currency of the two indexes.

Study I. The first study was based on data from the June 1979 issue of EI. A random sample of 20 pages was examined. From each author citation on those pages, the journal issue information was recorded. From the entire sample, only the latest issue of each journal was retained for the study. This resulted in a sample of 187 journal issues. Thirty-three of these were eliminated because they are not indexed in CIJE, leaving a sample of 154 issues.

A search was done to determine when each of these issues was indexed in CIJE. In this study, 112 of the 154 issues were announced in CIJE by November 1979. The remaining data were estimated based on the CIJE announcement of the previous issue of the journal in question. Based on these data, EI is, on the average 2.6 months more current than CIJE.

Study II. In order to determine if recent changes in ERIC had impacted on the currency of CIJE, the first study was replicated, using data from the November 1979 issue of EI.

From an original sample of 100 journal issues, 16 were eliminated because they are not indexed in CIJE, leaving a sample of 84 issues.

In this study, only three of the 84 issues were announced in CIJE by November 1979. The remaining data were estimated, replicating the method of Study I.

Based on these data, EI is 3.3 months more current CIJE.

Study III. In order to replicate Study I with minimum amounts of estimated data, a sample was drawn from the January 1979 issue of EI.

From an original sample of 72 journal issues, 17 were eliminated because they are not indexed by CIJE, leaving a sample of 55 issues.

In this study, only two data points were estimated, replicating the method used in Study I.

Based on these data, EI is 3.4 months more current than CIJE.

Summary. Based on these three studies, EI is 2-4 months more current than CIJE. (See Summary Table.) Though these results do not substantiate Sward's criticism, they do indicate that ERIC must put more emphasis on the currency of CIJE.

Summary Table

	<u>EI Issue</u>	<u>n</u>	<u>Mean</u>	<u>% of Estimated Data</u>
Study I	June 1979	154	2.6 months	27
Study II	November 1979	84	3.3 months	96
Study III	January 1979	55	3.4 months	4

DIRECTORY OF

SEARCH SERVICES

Publication Type (PUBTYPE)

The Publication Type field is designed to carry up to three 3-digit numeric codes, each designating a broad category or type of document or literature. It is emphasized that the purpose of the field is to describe the form of the document itself, not the subject of the document.

The numeric codes, and the categories they represent, are displayed in two tables. Table 5-6A is a summary listing of the codes and their meanings. Table 5-6B provides detailed Scope Notes and examples of documents of each type. In addition, Table 5-6C is an alphabetical index leading the cataloger from various publication types to the most appropriate category (or categories).

This is a mandatory data element and is to be included in the cataloging for both RIE and CIJE.

Basic Concept of Form Tagging

The Categories that appear in this list are intended to describe the organization or form of a document, as contrasted to the subject content of a document. For example, a bibliography, a directory, a dissertation, a regulation, a test, a teacher guide, are all particular ways in which information on a topic may be arranged, organized, presented, displayed, etc., for the user. Knowing that an item is expressed in one of these forms may tell the user something about the uses to which it can be put, but tells the user nothing about the discipline, science, research/ problem area, or social concern that is being dealt with.

Some categories are more abstract than others. The categories "Books," "Journal Articles," and "Speeches" are virtually "empty containers" in which anything might reside and in which any topic (or other form, for that matter) can be found. The categories "Dissertations" and "Tests," on the other hand, are not so "empty" and communicate much more information about the organization and structure the user will find in such an item. Nonetheless, the information communicated still pertains strictly to the organization/display/array/layout/treatment/structure/form of the material and not to any subject matter that it may address.

The different levels of form categories create a complex situation. A given item may be a "Journal Article," but it may also be a "Research Report." A "Book" may also be a compilation of "Numerical/Quantitative Data." In order to resolve this problem, it is necessary to permit the cataloger to make multiple category assignments. Up to three form assignments are permitted.

Revised December 1979

It is crucial, however, for the cataloger to keep in mind that Publication/Document Type deals with form and not content. To assign the category "Bibliographies" is to say that an item is organized as a bibliography; it is not necessarily about bibliographies. To assign an item the category "Legal/Legislative" is to say that it is either wholly or substantially a legal or legislative document; it is not necessarily about legislation.

Virtually all of the categories have the potential of referring to content. For example, it is possible to conceive of a research report the subject of which is the bibliometry of journal articles. For this reason, most of the categories can also be found to exist as Descriptors in the ERIC Thesaurus, or authorized Identifiers in the "Identifier Authority List."

Application

The present Publication Type categorization scheme is designed to supplement Descriptor indexing, not to replace it. Descriptors assigned to a document identify a variety of useful information about the item (e.g., subject content, audience addressed, educational level dealt with, age level dealt with, validation status, research methodology employed, tests utilized, form of document, etc.). However, the function that each Descriptor is actually performing is not noted in ERIC or in most Descriptor indexing systems (systems employing "roles" are the exception).

Descriptors (keywords, index terms, subject headings, etc.) have become the most common way of accessing the literature, and retrieval systems are generally designed to rapidly manipulate these small units of language. Retrieval problems can arise when the user wishes to distinguish documents about a topic e.g., Tests, from those that actually are Tests. The Publication Type code is intended to provide a means for the user to make this distinction, while at the same time not interfering with the assignment of the useful word tags (i.e., Descriptors) on which most retrieval operations are based.

The Publication Type categories provide for the partition of the file into 30 broad segments. Every document must be assigned a Pubtype code. In many cases, one category will be sufficient, however, in cases of complex documents, up to three categories may be assigned.

The following are some examples of how the new Pubtype field might look for different documents:

Example 1: A bibliography

PUBTYPE:: 131

(Code 131 = Reference Works - Bibliographies)

Example 2: A script for use in a dramatics class

PUBTYPE:: 030; 051

(Code 030 = Creative Works)

(Code 051 = Instructional Materials)

Example 3: A paper presented at the annual meeting of the X Society, reporting on research and containing a copy of a measurement instrument sent to 5,000 scientists. |

PUBTYPE:: 150; 143; 160

(Code 150 = Papers presented at...)

(Code 143 = Research Reports)

(Code 160 = Questionnaires)

Revised December 1979

TABLE 5-6A

PUBLICATION/DOCUMENT TYPES AND CODES

CODE	PUBLICATION/DOCUMENT TYPES
010	BOOKS
	COLLECTED WORKS
020	—General
021	—Proceedings
022	—Serials
030	CREATIVE WORKS (LITERARY AND DRAMATIC)
040	DISSERTATIONS/THESES
	GUIDES/METHODS/TECHNIQUES (FOR PRACTITIONERS)
050	—General
	—Classroom Use
051	—Instructional Materials (For Learner)
052	—Teaching Guides (For Teacher)
055	—Non-Classroom Use (For <u>Administrative and Support Staff, and for Teachers, Parents, Clergy, etc. in Non-Classroom Situations</u>)
060	HISTORICAL MATERIALS
070	INFORMATION ANALYSES/STATE-OF-THE-ART MATERIALS
071	—ERIC Information Analysis Products
080	JOURNAL ARTICLES
090	LEGAL/LEGISLATIVE/REGULATORY MATERIALS
100	NON-PRINT MEDIA
110	NUMERICAL/QUANTITATIVE DATA
120	OPINIONS/PERSONAL VIEWPOINTS/POSITION PAPERS/ESSAYS
	REFERENCE MATERIALS
130	—General
131	—Bibliographies
132	—Directories/Catalogs
133	—Geographic Materials
134	—Vocabularies/Classifications
	REPORTS
140	—General
141	—Descriptive (Program/Project Descriptions)
142	—Evaluative/Feasibility
143	—Research/Technical
150	SPEECHES, CONFERENCE REPORTS/PAPERS, "PAPERS PRESENTED AT..."
160	TESTS, QUESTIONNAIRES, EVALUATION INSTRUMENTS
170	TRANSLATIONS
999	OTHER/MISCELLANEOUS (NOT CLASSIFIABLE ELSEWHERE) (Avoid use of this category, if at all possible)

TABLE 5-6B
Page 1 of 2

PUBLICATION TYPE CATEGORIES AND THEIR DEFINITIONS

CODE	TYPE/CATEGORY	SCOPE/DEFINITION	CODE	TYPE/CATEGORY	SCOPE/DEFINITION
010	BOOKS	Pure form or "empty container" Should also be categorized elsewhere when possible.	060	HISTORICAL MATERIALS	History, historical reviews, historical accounts, oral history, historical source materials and documentation
020	COLLECTED WORKS - General	Collections of separate works, composite works, materials of mixed or diverse character or multiple focus.	070	INFORMATION ANALYSES/ STATE-OF-THE-ART MATERIALS	State-of-the-art summaries (comprehensive treatments, overviews), trend analyses, "What research says" "What we presently know in a given area" Information analyses and syntheses, focusing on findings and not simply on bibliographic citations, summarizing the substance of the literature and drawing conclusions from it Literature reviews of a fully "informative" nature, as distinct from the "indicative" approach, e.g., annotated bibliographies NOTE See also BIBLIOGRAPHIES (131)
021	- Proceedings	Records/minutes/proceedings of conferences, meetings, colloquia, symposia, seminars, workshops, congresses, etc. Intended for documents representing entire conferences. Should also be categorized elsewhere when possible.	071	ERIC INFORMATION ANALYSIS PRODUCTS (IAP's)	Information Analysis Products Prepared by the ERIC Clearinghouses for any other component of the ERIC System)
022	- Serials	Serials (entire), periodicals, bulletins, newsletters, newspapers, collections of articles, sections of journals. Does not include numbers in a monographic series. For individual journal articles use JOURNAL ARTICLES (080).	080	JOURNAL ARTICLES	Pure form or "empty container" Should also be categorized elsewhere when possible NOTE: For entire Journal issues use SERIALS (022)
030	CREATIVE WORKS	Poetry, literary works, essays, novels, short stories, children's books, satire and humor, anecdotes, fairy tales, children's stories, fiction, proverbs, fables, quotations, maxims, belle lettres, correspondence, etc. Performing arts materials, dramas, plays, scenarios (movies, TV), scripts, theatre pieces, musical scores, ballets. If specially intended as instructional materials, use also INSTRUCTIONAL MATERIALS (051).	090	LEGAL/LEGISLATIVE/REGULATORY MATERIALS	Legislation, legislative hearings and testimony, legislative reports, congressional documents, state legislative documents, laws, summaries of legislative action, lobbying position papers. Court cases, courtroom testimony, court decisions, legal decisions, legal interpretations having the force of law. Regulations, regulatory agency materials (directed at regulation). Codes, administrative codes, codes of student behavior, agreements, rules, policy statements, master plans, contracts (model), collective bargaining agreements, and other materials governing the behavior of various groups. Standards (e.g., ANSI, ISO, FIPS) Specifications Accreditation standards. Professional standards Executive Orders, Federal Register pronouncements
040	DISSERTATIONS/ THESES	Dissertations, theses, practicum papers. Include both doctoral and master's materials. NOTE: Since dissertations are by definition research, it is not necessary to categorize them also under RESEARCH (143).	100	NON-PRINT MEDIA	Non-print media, audiovisual aids, films, tapes, recordings, cassettes, phonodisks, videotapes, slides, illustrations, portraits, caricatures, cartoons, photographs, posters, models, flip charts, engineering drawings, computer programs, flow charts, designs, plans, etc. Graphic/pictorial and other non-print representations, conveying meaning primarily through symbols other than words: <i>us jolly appear in ERIC only as supporting or collateral material to a basic printed document</i>
050	GUIDES/ METHODS/ TECHNIQUES (FOR PRACTITIONERS) - General	Materials designed for immediate and practical use by either student, teacher, administrative or support personnel. These practitioner-oriented materials are subdivided into those intended for classroom use and those not intended for classroom use. Use the general category only when the document does not fall in one of the subcategories below or when it is of a mixed nature.	110	NUMERICAL/ QUANTITATIVE DATA	Numerical data quantitative data, statistics, statistical computations, data aggregations, tables. CAUTION: <i>Do not overuse. Use only when quantitative data is present in large aggregations, e.g., as in NCES documents. The routine presence of quantitative data in Research Reports is not sufficient to categorize here</i>
051	- Classroom Use: Instructional Materials (For Learner)	Instructional materials, readings, programmed texts, manuals, laboratory manuals, outlines, texts, workbooks, syllabi, study guides, orientation materials, textbooks, handbooks, exercises, learning modules, problems, resource guides. Materials intended for direct instruction of the learner; materials presenting the substantive information that forms the content of instruction.	120	OPINIONS/ PERSONAL VIEWPOINTS/ POSITION PAPERS	Opinion papers, points of view, position papers, testimony, recommendations, "Blueprints" for proposed action. Debates, interviews, panel discussions, questions and answers, dialogues, transcripts Essays, short expository/speculative papers, "think" pieces, philosophical pieces, criticism, interpretation, editorials, pros and cons NOTE: Testimony for legislative purposes should be categorized under LEGAL/LEGISLATIVE/REGULATORY MATERIALS (090)
052	- Classroom Use: Teaching Guides (For Teacher)	Curriculum guides, course outlines, units of study, lesson plans, teaching guides, leader guides, statements of behavioral objectives. Include Resource Guides (teacher-oriented), even if a combination of other types, e.g., Directories, Bibliographies. Materials intended as guides for the teacher—they may contain instructional materials, sample examinations, suggested learning activities, etc. Includes teaching tips, teaching techniques, "How to Teach" materials.	130	REFERENCE MATERIALS - General	Materials designed for reference use, as contrasted to materials designed for cover-to-cover reading and study <i>(Continued)</i>
055	- Non-Classroom Use (For Administrative & Support Staff, and For Teachers, Parents, Clergy, Counselors, etc. in Non-Classroom Situations)	Techniques for support and administration, e.g., how to conduct teacher evaluation; how to conduct inservice programs, etc. Manuals, guides/guidelines, handbooks—intended to provide substantive information on "What exists" or "How to do it" for the educational support population. Booklets, pamphlets, brochures, circulars, notices treating or explaining various factual matters within the educational community, e.g., types of jobs available. Guides intended for teachers, but not directly related to instruction, e.g., tips for better parent conferences.			

PUBLICATION TYPE CATEGORIES AND THEIR DEFINITIONS
(Continued)

COOE	TYPE/CATEGORY	SCOPE/DEFINITION
130 (Cont)	REFERENCE MATERIALS - General (Cont)	<i>(Continued)</i> Four special kinds of reference materials have been individually established as subcategories and should be used when appropriate. Use the general category only when the document does not fall in one of the subcategories below or when it is of a mixed nature.
131	- Bibliographies	Bibliographies, filmographies, discographies, annotated bibliographies, book catalogs, book lists, abstracts (collections of), indexes (locators) to bibliographic materials, topical listings of various media materials. Include bibliographic essays, literature reviews (with a bibliographic focus), literature searches (output of), guides to or descriptions of the literature in a field, state-of-the-art reviews based on non-analytical summaries of the literature, documents following a more "indicative" approach than an "informative" approach. NOTE: For literature reviews analyzing the substance of the literature use INFORMATION ANALYSES (070). NOTE: Reviews of books, tests, etc., should deal with multiple items to qualify for this category.
132	- Directories/ Catalogs	Directories of persons, organizations, institutions, etc. Membership lists. Tables of Contents Include reference works dealing with organizations/institutions. Catalogs of products, lists and arrays of "things," e.g., pseudonyms, job descriptions, sources, acronyms, abbreviations, etc. For bibliographic catalogs, use BIBLIOGRAPHIES (131). Selection criteria will eliminate most catalogs.
133	- Geographic Materials	Atlases, gazetteers, geographic charts, cartographic materials, maps, zoning charts, school district maps.
134	- Vocabularies/ Classifications	Dictionaries, vocabularies, nomenclature, terminology, glossaries, thesauri, word/term lists, phrase books. Taxonomies, classification schemes.
140	REPORTS - General	Three specific kinds of reports have been individually established as subcategories and should be used when appropriate. Use the general category only when the report does not fall in one of the subcategories below or when it is of a mixed nature.
141	- Descriptive	Project descriptions, program descriptions, reports of organizational activities, "This is how we do it . . .," "What I do in my class." Descriptions of systems, procedures, or practices in actual cases. <i>(Continued)</i>

COOE	TYPE/CATEGORY	SCOPE/DEFINITION
141 (Cont)	- Descriptive (Cont)	<i>(Continued)</i> Descriptions of significant events, personal narratives/experiences, journalistic accounts of actual activities and occurrences Descriptive works of various types Includes annual reports (of organizations), yearbooks. Prefer REPORTS - RESEARCH (143) if study contains original research.
142	- Evaluative/ Feasibility	Studies evaluating research, alternative courses of action, or the merits of a particular product, process, or program. Studies of feasibility of a given course of action. Evaluation of programs. Studies oriented toward decision-making and concerned with judgments rather than generalizations. Prefer REPORTS - RESEARCH (143) if study contains original research.
143	- Research/ Technical	Original research, technical research, reports, studies, empirical results, experimental/statistical studies, surveys, case studies, theory testing, systematic investigations, seeking facts and/or generalizable principles. Emphasis on materials utilizing a formal research design, but may include informal reports and verbal presentations of such efforts. Include documents dealing with research methodology and proposals for needed research. Do not include dissertations, which are by definition research.
150	SPEECHES, CONFERENCE PAPERS, "PAPERS PRE- SENTED AT . . ."	Addresses, Lectures. Pure form or "empty container." Should also be categorized elsewhere when possible. NOTE: Reserved for single papers. For entire conference PROCEEDINGS use 021.
160	TESTS, QUESTION- NAIRES, EVALUATION INSTRUMENTS	Questionnaires, tests, examinations, evaluation and measurement devices, test specifications, compilations of tests, opinion polls (instruments), assessment tools, reporting booklets. CAUTION: Do not overuse. Use only when significant test or similar instrument is actually present in document.
170	TRANSLATIONS	To be applied to any document translated into English from an original non-English language text.
999	OTHER/ MISCELLANEOUS (Not Classifiable Elsewhere)	Items not classifiable into the other categories. e.g., vitae, puzzles, etc.

TABLE 5-6C

FOOTNOTES:

1 All terms in this list have been selected from the seventh edition (1978) of the ERIC *Thesaurus*.¹

2 Conventions: A or B = one or the other category is appropriate, depending on item

A and B = two categories are appropriate

A (B) = a second category might be appropriate, depending on item.

* = category and term are synonymous. Term should be used in descriptor field only when it denotes subject matter

SUMMARY OF THE WHITE HOUSE CONFERENCE ON LIBRARIES AND INFORMATION SERVICES

After more than five years of preparation, more than 900 delegates from all 50 states and territories and about 1,000 observers met in Washington, D.C. on November 15-19, 1979 for the White House Conference on Libraries and Information Services. Don Ely, Director of the ERIC Clearinghouse on Information Resources, attended the Conference.

More than 3,000 resolutions from the state and territorial conferences were organized into five theme areas for discussion at the conference:

- meeting personal needs;
- enhancing lifelong learning;
- improving organizations and the professions;
- effecting governing society; and
- increasing instructional understanding and cooperation.

Seventeen resolutions were adopted at the closing session. These resolutions and a report of the Conference will be received by the President next March. Stuart Eisenstat, Assistant to the President for Domestic Affairs and Policy, promised to take the recommendations seriously. In an address to the Conference, President Carter stated that "*...the new Department of Education will have a greatly expanded and much more effective role in emphasizing the importance of books, of learning, and particularly of libraries.*"

The resolutions which appear to have some relation to ERIC are briefly noted:

1. Resolved that an Office of Library and Information Services be established within the Department of Education, directed by an Assistant Secretary of Education and...that this Secretary shall administer all grants and contracts currently administered by the Office of Libraries and Learning Resources and shall establish communications with all Federal programs related to library and information services...
2. Resolved that for FY 1981 and any subsequent years there be no reduction in funding and/or full funding of the Library Services and Construction Act, appropriate titles of the Higher Education Act and Elementary and Secondary Education Act, and the National Library of Medicine program.
3. Resolved that individuals, organizations, and agencies creating documents and books generating other information be encouraged to create these materials in computer-processible form in order to decrease the load of retrospective conversion.

Resolved that the Federal government direct all Federally supported libraries and information services, and other appropriate federal agencies to support the development, review, and adoption of national and international standards for publishing, producing, organizing, storing, and transmitting information using established and recognized procedures and institutions; and

Resolved that high priority attention be given to establishing or extending standards which address hardware and software compatibility, computer and communications network protocols, and machine-readable information; and

Resolved that the private sector be encouraged to participate and to support the development of such standards; and

Resolved that research be funded to develop new technologies that permit convenient and economic media conversion from and to media like print, microfiche, magnetic, optical, voice, etc.

4. Resolved that Congress designate the Library of Congress to provide leadership in the development of plans for such services as a national depository for all governmental publications, a national periodicals center, a national referral center, and a national network, and

That the state library agencies be designated as integral participants in the planning and development of national services and as leaders in the planning of state and local services.

5. Resolved that school and public library boards and administrators should establish policies for cooperation and for instructional programs which help children to use the library.

Resolved that school library and public library staff should specify procedures and implement programs for cooperation in accord with community and school needs.

Resolved that Congress set guidelines for each state to establish a school library in each school and that states will implement guidelines and set standards for all local libraries and evaluate such efforts.

Resolved that the federal government be urged to fund at full authorized levels those legislative programs which support improved school and public library service.

6. Resolved that a comprehensive approach be taken to the planning and development of multi-type library and information networks and programs including both profit and not-for-profit libraries from the public and private sector, and

Resolved that such plans be developed at the national, regional, and local level to include specific plans for a national periodicals system and include the concept of a national lending library for print and non-print materials...

Full copies of the resolutions with exact wording are available from the National Commission on Libraries and Information Services.

Full text of the major substantive papers will be handled by the ERIC Clearinghouse on Information Resources for the system.

ERIC was one of the data bases available through the Conference Information Center.

I. CENTRAL ERIC ANNOUNCEMENTS

A. EDRS Mailing Practices—Upgrading—Success Story

An important change in the EDRS contract renewed last July was the change in the mailing of microfiche and paper copy of documents from 4th class to 1st class and UPS. This change has resulted in a significant reduction of customer "late arrival" complaints and improved customer relations for the ERIC system.

...J. P. (Central ERIC)

B. Level Change Recommendations for Marginal Documents in the ERIC Backfile

Prior to October 1977, when the present quality control measures were instituted by Central ERIC, EDRS, and the ERIC Facility, documents of marginal legibility were occasionally entered into the ERIC system. It is requested that Clearinghouse personnel notify Central ERIC (Jim Prevel) when they find a document having major legibility problems in either MF or HC so that it can be determined if that document should be changed to Level 3 availability at EDRS and on the ERIC computer tapes.

...J. P. (Central ERIC)

C. Mini-File Announcement Problem

An article which appeared in the January 1980 issue of *Educational Leadership*, Journal of the Association for Supervision and Curriculum Development (Attachment 1) implies that the IAP (1975-1977) Minifile contains "ALL" the documents available from EDRS for only \$98.50.

Since this is a slight exaggeration, all Clearinghouses should be aware of the problem and be able to answer any questions that arise.

...Jim Prevel (Central ERIC)

D. Revised Schedule for New Thesaurus

The ERIC Facility is now in the process of incorporating all changes suggested by the VIP Coordinators and the VIP Executive Committee into the new *Thesaurus*. Clearinghouses can expect to receive a working copy of the new *Thesaurus* by March 21, 1980.

Upon receipt, please review the *Thesaurus* carefully. Any major problems or omissions should be called into Lynn Haupt (HE). From March 21 to April 4, Lynn and Jim Houston will also be reviewing the working copy and performing the final check and edit.

The new *Thesaurus* tape will be mailed to Oryx Press on April 15. Beginning with the August 1980 issue of RIE, all indexing will be based on the new *Thesaurus*.

Jim Houston (ERIC Facility) has indicated that processing of new term recommendations beyond those included in the VIP will be delayed until all *Play Thesaurus* recommendations are implemented.

After that, the monthly *DJF Status Report* in the EAB and the one-month turnaround for lexicographic response will be reinstated.

(See also Lynn Haupt's report on VIP activities under "ERIC Clearinghouse Announcements" for HE.)

...Pat Coulter (Central ERIC)

E. National Technical Meeting—Action Item Reminder

In the December 1979 issue of the EAB, Clearinghouses were asked to forward their nominations for attendees at the 1980 National Technical Meeting to reach Central ERIC by January 22. At press time of this EAB, only eleven of the Clearinghouses had responded. We would like to have these names to aid us in planning agenda items.

...Frank Smardak (Central ERIC)

F. ERIC Steering Committee Suggestion #2—Delayed Implementation

After consultation with Phyllis Steckler, it appears that the Oryx Press computer programs for CIJE cannot immediately accommodate the recommended change "*that the address of one-shot CIJE journal entries be placed in the Availability field in order to keep the abstract free for annotations.*" (See Attachment 1 of the January 1980 issue of the EAB, page 1 of 3, Suggestion #2.)

Datagraphics in Phoenix developed the CIJE software a year ago. Some costly changes have necessarily had to be made since then, but at present this one cannot be undertaken. For the time being, therefore, the address information should continue to be placed where it has always been. You will be notified, via the EAB and *ERIC Processing Manual* changes, if this change can be made at a later date.

...K. W. (Central ERIC)

G. How to Use ERIC and How to Start an ERIC Collection Brochures Both Now Available

How to Start an ERIC Collection, the long awaited and meticulously written brochure, turns out to be well worth waiting for. It is going to be highly useful, as well as good looking. It is on sale at GPO, but neither the stock number nor the price is known as yet.

The handsome new brochure *How to Use ERIC* may now be purchased from:

Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

Order by Stock Number: 017 080-02075-1
Price: \$2.75

Initial distribution of both of these publications has been made to the Clearinghouses by the ERIC Facility. Additional copies are available.

...Kit Welsh (Central ERIC)

H. Contract Renewals (EA, PS, SE, and SO)

NIE has exercised its options to renew the annual contracts for operation of the ERIC Clearinghouses on:

- Educational Management (EA)
- Elementary and Early Childhood Education (PS)
- Science, Mathematics, and Environmental Education (SE)
- Social Studies and Social Science Education (SO)

The contracts of the four Clearinghouses were routine, covering normal ERIC operations. Two special projects were funded in the SO contract. One provides for coverage of expenses related to the operation of the Committee of ERIC Directors (COED), which is chaired by Irving Morrisett of SO. The other covers the design, printing, and distribution of a general systemwide ERIC poster, similar to the "Try ERIC" poster manufactured and distributed by SO last year.

...Mildred Thorne and
Frank Smardak (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. Alternative Data Entry Techniques

At the present time, the "official" data entry technique utilized by ERIC to build the ERIC Data Base is Optical Character Recognition (OCR). The Clearinghouses key remotely, using typewriters equipped with an OCR-A element, and send the forms to the Facility. By virtue of the keying conventions observed, the Facility can "read" the forms and write their data to magnetic tape, without additional keying on its part. This one-time keying is very economical.

Some Clearinghouses, however, prepare data for other inhouse systems besides ERIC and for them the OCR forms may represent a double-keying. The Facility is prepared to work with Clearinghouses in these situations in order to be able to accept data via the technologically most advanced method and via the format most advantageous to the ERIC system as a whole.

One example is the ERIC Clearinghouse on Handicapped and Gifted Children, which keys data into the CEC computer system for its data base *Exceptional Child Abstracts*. It is convenient for EC to send the Facility a computer tape containing that segment of its bibliographic data headed for RIE. As long as the tape is in the proper format (an important consideration for economic reasons), the Facility is prepared to accept data via this technique. (Naturally, the documents must still be sent independently, for filming purposes).

A second example is the SE Clearinghouse, which is looking toward the direct transmission (over telephone lines) of RIE input, from the word processor they propose to acquire, to the Facility's word processor.

The Facility will continue to position itself so that the ERIC system can take advantage of new Clearinghouse data processing equipment and capabilities as they evolve.

...T. B. (ERIC Facility)

B. ERIC Data Base Statistics

Three statistical charts prepared for management use by Central ERIC are appended as Attachments 2(A-C). They cover, respectively, "Data Base File Growth," "Thesaurus File Growth," and "Level 1, 2, 3 Statistics."

...T. B. (ERIC Facility)

C. RIE and CIJE Schedules

A compressed schedule, showing the dates that RIE and CIJE are delivered to the printers, is provided as Attachment 3.

...Ted Brandhorst (ERIC Facility)

D. UD Scope of Interest Statement - Revision (See Attachment 4)

The scope of interest for the ERIC Clearinghouse on Urban Education (UD) has been revised to add the words *"Issues, programs, practices, and materials related to equal education opportunity at all grade levels and for all population groups."*

The following new paragraph has been added to "Notes" as an explanatory footnote.

"Equal educational opportunity as a social educational issue at all grade levels, preschool through post-secondary; the equal education of the racial, ethnic, and linguistic minorities within the scope of ERIC/UD, as well as social minorities (e.g., women)."

These changes represent data inadvertently omitted from the earlier text and do not represent any change in policy.

...G.S. (ERIC Facility)

E. ERIC Document Transfer Form

A supply of a new "ERIC Document Transfer Form," for use in transferring documents between Clearinghouses, was sent to the Clearinghouses on January 16, 1980. The form was designed and developed by the ERIC Technical Steering Committee and approved by Central ERIC. It will be stocked and distributed by the Facility.

It is estimated that the 150 forms enclosed with this memo will last approximately six months. When your supply runs low, please contact Al Hill at the ERIC Facility for an additional supply. Other questions concerning the form may be addressed to Grace Sundstrom, Facility Acquisitions Librarian. (See Attachment 5 for sample.)

...Grace Sundstrom (ERIC Facility)

F. Cataloging Corner

The editors have noticed a recent increase in two problems involving the use of ERIC authority lists:

1. Request for new institution names that are already in the *Source Directory* (many have been in for several years), and
2. Use of Descriptors that are close to the form in the *Thesaurus*, but not exactly right, indicating the indexer was probably working from memory, rather than working from the authority list.

The first problem results in a lot of rejected institution name requests and the second results in a lot of computer-invalidated Descriptors. Both create extra work for the editors and the correction keyers and any attention you could give the situation would be much appreciated.

...Lee Schreiber (ERIC Facility)

G. NUMBING NUMBERS FOR THE NUMEROUS NEOPHYTE NUMEROLOGISTS

Through December 1979 the RIE master file contains 167,697 accessions, 156,581 personal author index entries and 90,897 unique personal author names. This is an average of 1.8 records per author (considering all records) or an average of 1.7 records per author (considering only those records citing authors). Conversely, this is an average of .5 authors per record on the file.

...Ted Brandhorst (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Counseling and Guidance

1. CG Participates in California Personnel and Guidance Association Annual Meeting

The annual meeting of the California Personnel and Guidance Association was held in San Francisco in February 1980. Garry Walz, Director of the ERIC Clearinghouse on Counseling and Personnel Services, was invited to deliver the keynote address before the California Career Development Association, a division of CPGA. In addition, he and Associate Director, Libby Benjamin,

presented a preconvention workshop on "Counseling Adults for Life Transitions," as well as two convention programs on "Midlife Career Change"—both topics of very high current interest.

...C. J. (CG)

2. When is a "Retreat" an "Advance"

Getting together to plan for the future, rather than to review the past, is called an "advance." Early each year, CG does that, and shortly after the start of 1980, all of CAPS met for a full-day planning session at the home of one of the staff members. No telephones, no drop-in visitors, no malfunctioning Xerox or reader-printer—just a lot of sharing, listening, planning, to define and refine the directions CAPS will take this calendar year. Staffers volunteered to become team members on various projects, with the opportunity to do something "new."

...Carol Jaslow (CG)

B. ERIC Clearinghouse on Educational Management

1. American Bar Association Invites EA to Serve as Publishers

In a creative attempt to promote one of its new books, the American Bar Association invited the ERIC Clearinghouse on Educational Management and the Social Science Education Consortium to serve with it as copublishers.

The book, *Mandate for Change: The Impact of Law on Educational Innovation*, is a major contribution to the undertaking of how state laws (particularly curriculum mandates) affect teaching and learning. It reports the findings of a four-year study conducted by the ABA's Special Committee on Youth Education for Citizenship, with the support of the Ford Foundation.

The Clearinghouse's responsibility is to promote the book to a nationwide audience of school administrators and to sell copies on consignment from ABA.

...Stuart Smith (EA)

C. ERIC Clearinghouse on Handicapped and Gifted Children

1. CEC Appoints New Executive Director

The Executive Committee of The Council for Exceptional Children has named Jephtha V. Greer as Executive Director Designate, effective June 1, 1980. (CEC is a 62,000 member professional organization which serves the educational needs of handicapped and gifted children and youth through the U.S. and Canada.) Ms. Greer is presently Assistant Superintendent of Supporting Instructional Services, DeKalb County School System, Decatur, Georgia.

Jeptha Greer will succeed the late William C. Geer as the Council's third Executive Director in its 58 year history. Mr. Geer held numerous leadership roles within the organization, serving as President of the Georgia Federation, CEC; President of the Atlanta Area Chapter, CEC; and President of the Georgia Council for Administrators in Special Education. (See July 1979. EAB, page 6, for the story on William Geer.)

...M.C. (EC)

2. American Speech-Language-Hearing Association Annual Convention

At the American Speech-Language-Hearing Association Annual Convention in Atlanta, Georgia, November 16-19, 1980, Dorothy Bloch, Marion Cambel, and Sharon Hudack promoted ERIC products and services and performed requested mini-searches for a continuous queue of educators. Post-conference informal assessment indicated depletion of most handouts, growing dependence on ERIC services by educators in special education, and a "eureka" attitude displayed by a number of search requesters on seeing a citation on the ERIC CRT that did not appear on the nearly MEDLINE CRT. All concurred that if the interest shown was any indication of future use of ERIC, the next few months would be busy ones for several Clearinghouses.

...M.C. (EC)

3. Potential Use of ERIC by State Directors of Special Education Discussed

On January 15, 1980, Donald K. Erickson spent the afternoon with Dr. William V. Schipper, Associate Director of the National Association of State Directors of Special Education (NASDSE), discussing potential uses of ERIC by state directors of Special Education.

...M.C. (EC)

4. Transition Task Force Hearings—ERIC Represented

On January 9-11, 1980, Donald K. Erickson, Director of the ERIC Clearinghouse on Handicapped and Gifted Children, attended the installation of the last Commissioner of Education, Dr. William L. Smith, at DHEW headquarters, and represented ERIC and CEC at the transition task force hearings, specifically the hearings on Special Education and Rehabilitation Services and on Research and Improvement.

...Marion Cambel (EC)

D. ERIC Clearinghouse on Higher Education

1. VIP Activities

Attachments 6(A-B) report accomplishments of the Vocabulary Improvement Project for Phase II. This was the production phase of VIP, during which DJF's were prepared for the *Play Thesaurus*, from December 1, 1978 to September 14, 1979.

Over 1,500 scope notes were written by Clearinghouse personnel, and in Phase II alone over 14,000 person-hours were devoted to the project by Clearinghouse VIP personnel and Facility lexicographers. This does not count endless hours of work done at home beyond the normal workday! Such dedication is a rarity, and all participants are certainly to be thanked.

The VIP Executive Committee met in Washington, D.C., January 14-18, 1980 to discuss Descriptor problems still unresolved as of *Play Thesaurus 12*. Conceptual problems were examined along with scope notes and displays for specific Descriptors. In all, nearly 550 Descriptor conflicts were addressed. Participants included:

Pauline Atherton	IR
Dorothy Bloch	EC
Meg Block	ERIC Facility
Pat Coulter	Central ERIC
Lynn Barnett Haupt, Coordinator	HE
Jim Houston	ERIC Facility
Jane McClellan	CS
Kathleen McLane	FL
John Rosenberg	ERIC Facility
Pat Spellman	SP

(See also Pat Coulter's report on "Revised Schedule for New Thesaurus" under "Central ERIC Announcements.")

...L.B.H. (HE)

2. The War on PUBTYPES

Clearinghouses should receive shortly, if they have not already, revised materials on the PUBTYPE scheme. These materials (modifications to the *ERIC Processing Manual*: publication/document types and codes, category definitions, a cross-reference list, and a list of descriptors to be flagged as PUBTYPE terms in the new *Thesaurus*) are the result of countless hours of thinking and rethinking by Clearinghouse and Facility personnel, as well as by Central ERIC.

The final revisions were worked out by "The Last PUBTYPE Committee," which met on February 8, 1980. Members (who are still speaking to each other) were Bob Chesley, Ted Brandhorst, Pat Coulter, and Lynn Barnett Haupt. Recommendations of the ERIC Technical Steering Committee, the VIP Executive Committee, and ad hoc PUBTYPE committee, and individual Clearinghouse editors/indexers/searchers were taken into consideration.

This version is, we hope, one we can all live with for at least a few years and that now we can call a moratorium on PUBTYPE debates for a while! Thanks to everyone who offered suggestions.

...Lynn Barnett Haupt (HE)

3. HE's Coordinating Board Meets

The ERIC Clearinghouse on Higher Education's Coordinating Board met on February 5, 1980. This group, composed of representatives from 25 higher education associations, meets periodically to exchange information about the activities and publications of their individual associations, as well as to provide advice to the Clearinghouses about its products and services, plus how it can better serve association staff. Associations who gather for this forum include:

- American Council on Education
- Association of Governing Boards
- Association of American Universities
- National Association of College and University Business Officers
- American Association of State Colleges and Universities
- American Association of University Professors.

...M.S. (HE)

4. HE Participates in National Association of Independent Colleges and Universities Annual Conference

Staff from the ERIC Clearinghouse on Higher Education participated in and sponsored an exhibit at the National Association of Independent Colleges and Universities Annual Conference on February 1-2, 1980 in Washington, D.C.

...M.S. (HE)

5. Margot Sanders Eddy Returns to HE Part-Time

Margot Sanders Eddy will rejoin HE's staff on a part-time basis beginning in March 1980. She will resume responsibilities in the user services area along with Laura Ciarniello, the full-time staff member. Welcome back, Margot!

...Marilyn Shorr (HE)

E. ERIC Clearinghouse on Languages and Linguistics

1. Computer-Generated Publication

The ERIC Clearinghouse on Languages and Linguistics has just published a 352-page, computer-generated bibliography on language testing, entitled *Testing in Foreign Languages, ESL, and Bilingual Education, 1966-1979: A Select Annotated ERIC Bibliography*, compiled by Dale L. Lange and Ray T. Clifford. A very broad search of the ERIC data base was conducted, and after the printout was edited, a list of the final ED and EJ numbers was sent to the Facility. The Facility performed a computer run to generate camera-ready copy for main entries and indexes that look very much like those in *ERIC Information Products 1975-1977*, except that there are two main entry sections, one for RIE and one for CIJE.

With the exception of a few problems (mostly esthetic and having to do with upper-case-only data in the earlier records) the bibliography is very impressive. FL will be happy to share its experience with other Clearinghouses after user feedback has been received.

...Sophia Behrens (FL)

F. ERIC Clearinghouse on Reading and Communication Skills

1. Mini-Bibs Popular in Idaho and Oklahoma

A page listing no-cost items available from the ERIC Clearinghouse on Reading and Communication Skills was recently reprinted in newsletters for teachers published by the state offices of education in Idaho and Oklahoma. As a result, we have received nearly 200 requests from teachers in those states asking for copies of our mini-bibliographies.

...Mary K Monteith (CS)

G. ERIC Clearinghouse on Teacher Education

1. "ERIC Information Fair" Hosted By PS

Free ERIC mini-searches, information on using ERIC, materials from all ERIC Clearinghouses, and free coffee and goodies, attracted approximately 300 people to the ERIC Information Fair hosted by the ERIC Clearinghouse on Elementary and Early Childhood Education. The Fair was held in September 1979, soon after EECE moved to the College of Education, to increase awareness of the ERIC system and of the Clearinghouse's new location. An Education Library staff member, and the ERIC Clearinghouse on Reading and Communication Skills, also participated.

Visitors included teachers and librarians from the Urbana-Champaign area, as well as members of the University of

Illinois community. Since the Information Fair, the number of visitors to the Clearinghouse, and the number of ERIC searches run by the Education Library, have increased. In January, EECE held a smaller Open House and plans an annual Information Fair in the fall. An advertising flyer used to announce the ERIC Information Fair is displayed in Attachment 7.

...Linda Baskin (PS)

H. ERIC Clearinghouse on Tests, Measurement, and Evaluation

1. TM Participates in AERA Annual Meeting

Once again we are requesting papers from every participant at the Annual Meeting of the American Educational Research Association, April 7-11, 1980. We anticipate receiving 800-1,000 papers between now and December 1980. About half will be transferred and sent directly to the Clearinghouses. Unlike last year, we will not assign TM numbers to transferred papers; therefore, they will not appear in the ADR under the Clearinghouse accession number.

TM will also staff an exhibit booth at the AERA meeting which will be held in Boston. If any other Clearinghouses are planning to send representatives to the meeting, we would appreciate any assistance they could offer. Please contact us if you plan to attend.

2. TM Begins Two New Series of User Services Products

TM has recently begun two new series of user services products:

- *Highlights* is a series of prepackaged computer literature searches of the ERIC database on topics of current concern to the educational community. Each *Highlights* will sell for \$2.00 and be updated as needed.
- *ERIC/TM Update* is a series of brief mini-bibliographies on current topics in testing, measurement, and evaluation. This series will be free.

...Barbara Hunt (TM)

I. ERIC Clearinghouse on Urban Disadvantaged

1. British Visitors at ERIC/UD

The ERIC Clearinghouse on Urban Education was pleased to host four British visitors on January 19, 1980. They met with staff, reviewed Clearinghouse and ERIC system procedures, and observed a computer search demonstration. The names and organizations appear on the following page:

- Crispin Cross, Director of Research
Commission for Racial Equality
- George Manger, Director of Training
Commission for Racial Equality
- Derek Cherrington, Director
Centre for Advanced Studies in Education, Birmingham
- Louis Chase
National Federation of Self-Help Organizations

...Pauline M. Rothstein (UD)

2. UD Information Analysis Products to be Reprinted

ERIC References on Urban and Minority Education, compiled by Robert L. Vivolo and published in the *ERIC/CUE Equal Opportunity Review*, May 1979, will be reprinted in the journal, *Debate and Understanding*, published by the Martin Luther King Center for Academic Services and Minority Affairs at Boston University. This will be a theme issue on the needs of minority students.

A portion of *School Crime and the Social Order of the School*, by Francis A. J. Ianni and Elizabeth Reuss-Ianni, a paper developed by the ERIC Clearinghouse on Urban Education and published in the *IRCD Bulletin*, will appear in *Discipline in the Classroom*, published by the National Education Association. Abridged versions will also appear in *Educational Leadership* and *Today's Education*. This paper also received wide coverage in the national media, including an extensive write-up by Fred Hechinger in the *New York Times* (a nationally syndicated column) and one in the Newark, New Jersey *Star-Ledger*.

...S.T. (UD)

3. List of ERIC Clearinghouses to Appear in TC Press Publication

Writing for Publication in Education, by Sydney Katz, Jerome Kates, and Perry Zirkle, to be published by Teachers College Press in February 1980, will contain a list of ERIC Clearinghouses in the Appendix. UD staff assisted the editors of TC Press in the preparation of the list.

The Search

Fred Rosenau

ERIC

Online computer searches of the Educational Resources Information Center (ERIC) data base have been estimated to be running well over 100,000 per year through figures supplied by four major vendors. Many other searches are conducted by the more than 50 other institutions that also subscribe to the ERIC computer tapes and have their own computer search capabilities. But ASCD members may find a handier way to dig into these NIE-funded information files—via *Microfiche Mini-File of Information Analysis Products (1975-77)*. The Mini-File contains all the documents available from ERIC Document Reproduction Service (EDRS) in microfiche format, along with a paper copy of a bibliography that lists the documents in order of accession number, and three indexes—subject, author, and institution. Some typical subjects include recent trends in bilingual education, women's athletics, children and TV, intercultural communication, strengthening the small rural school, and adult learning. The price is \$98.50, plus \$1 postage. Order from EDRS, P.O. Box 190, Arlington, Virginia 22210.

A brochure describing some recent information analysis products is also available—free from ERIC, National Institute of Education, Washington, D.C. 20208. Also, at your nearest educational resource center you can look into a copy of the *Directory of ERIC Search Services*, which is organized geographically so as to show you which organizations offer computerized searches of the ERIC files, nationwide from Alabama to Wisconsin, and Australia and Canada as well.

Class Size

The second in a series of reports from the NIE-funded Class Size and Instruction Project has been published under the title *Relationship of Class-*

Size to Classroom Processes, Teacher Satisfaction, and Pupil Affect: A Meta-Analysis by Mary Lee Smith and Gene V. Glass. Earlier papers examined the relationship between class size and student achievement. Now the authors look at the relationship between class size and other outcome measures including classroom processes and learning environment, student attitudes and behavior, and teacher satisfaction. For some persons these outcomes will appear more valuable than achievement test scores. Essentially, on all measures, reduction in class size is associated with higher quality schooling and more positive attitudes. Effects are most notable for children ages 12 and under, and are least apparent for students 18 or older. Reducing class size has beneficial effects on both cognitive and affective outcomes and on the teaching process itself. To order the study, send \$5.50 to Order Department, Far West Laboratory, 1855 Folsom Street, San Francisco, California 94103.

Personnel Development

HEW's Education Division has a singularly significant role in professional development for educational personnel all across the nation. A new report now brings together, in readable prose, the current status of federal and state involvement in this critical domain including an analysis of what the U.S. Office of Education is doing (including descriptions of 22 different programs); how to apply for funding from each discretionary program; and results from a survey assessing what the various states are up to (along with detailed descriptions of how seven states are planning to coordinate all professional development). The report also depicts the federal legislative process and provides a listing of professional associations and organizations that are actively involved and of educational laboratories, dissemination networks, and foundations that can provide re-

sources. *The 1980 Report on Educational Personnel Development* (\$35 per copy) may be obtained from Feistritzer Associates, Inc., 1261 National Press Building, Washington, D.C. 20045.

Rural

Those working in or with rural schools will find some useful ideas in two publications: *A Directory of Rural Organizations and Private Funding for Rural Programs*. The first directory codes each organization for these categories: lobbying; membership; research; and service. The second tells you how to identify and approach suitable foundations. For copies or more information, write National Rural Center, Suite 1000, 1828 L Street, NW, Washington, D.C. 20036.

Another useful resource is *Imaginary Gardens? Real Problems*, an analysis of federal information sources on rural education. This publication looks at sources like the HEW Education Division and other Federal agencies (labor, agriculture, Congress, and so on), and more. Order (stock #EC-076) from National Educational Laboratory Publishers, 813 Airport Boulevard, Austin, Texas 78702. The price is \$6.

Fred Rosenau is Washington Representative, Far West Laboratory for Educational Research and Development, San Francisco, California.

URBAN EDUCATION (UD)Scope of Interest:

Academic, intellectual, affective, and social performance of urban young people from grade three through college entrance. Programs and practices that provide learning experiences designed to meet the special needs of the diverse populations served by urban schools, especially those that build upon the unique as well as common characteristics of these populations. The education in urban settings of young people from ethnic and minority backgrounds (including Blacks, Puerto Ricans, Dominicans, Haitians, Portugese, Chinese, Japanese, Italians, Eastern Europeans, and others). Structural changes in classrooms, schools, districts, and communities that directly affect urban children and youth. Innovative programs, practices, and materials that help to redress the curriculum imbalance in the treatment of ethnic and minority groups. Issues, programs, practices, and materials related to economic and ethnic discrimination, segregation, desegregation, and integration in schools and school districts. Issues, programs, practices, and materials related to equal educational opportunity at all grade levels and for all populations. The effects upon young people of urban experiences and environments, in particular as they relate to their social and academic performance in school. The general relationship between schooling and features of urban life such as neighborhood planning or redevelopment, health care and nutrition, demography and housing patterns, welfare practices, and so forth.

Notes:

The interest of the Clearinghouse on Urban Education extends to programs and practices in public, parochial, and private schools.

Equal educational opportunity as a social and educational issue at all grade levels, preschool through post-secondary; the equal education of the racial, ethnic, and linguistic minorities within the scope of ERIC/UD, as well as social minorities (e.g., women).

Documents about Native Americans, Chicanos, and Spanish-Americans (with an Iberian background) are processed by RC. For processing documents dealing with ethnic groups, the chart on the following page shows the agreed division of scope between the UD and RC Clearinghouses:

VIP INPUT (FINAL TOTALS)

The following is a final count of the DJFs submitted for the VIP. September 14 was the date originally scheduled for cessation of Clearinghouse input, but such input continued to trickle in through October 10.

CE - 232	JC - 348
CG - 527	PS - 367
CS - 309	RC - 195
EA - 322	SE - 200
EC - 359	SO - '54
FL - 160	SP - 255
HE - 575	TM - 571
IR - 685	UD - 346

SUBTOTAL - 5,605

AA (Facility) - 3,418 (original input & reactions to CH input, PTs 1-12)
1,923 (purges -- file maintenance, PTs 1-12)

GRAND TOTAL - 10,946

PTs 11 & 12

All original VIP input has been processed.

PT 11 contained a total of 1,830 new transactions, 1,002 from the Clearinghouses and 828 (including 261 purges) from the Facility. It was distributed on December 14.

PT 12 had 1,623 new transactions, 795 from the Clearinghouses and 828 (including 290 purges) from the Facility. It was distributed on January 11.

The total numbers of terms worked on through PT 11 and PT 12 are 3,508 and 4,023, respectively. These figures represent 103% and 118% of the approximately 3,400 terms originally expected to be evaluated in the VIP. Additionally, approximately 100 terms not yet evaluated were given a critical look by the VIP Executive Committee in its January 14-18 meeting in Washington, DC.

 Information not available

ERIC/EECE Information Fair

Free ERIC mini-searches, information on using ERIC, material from all ERIC Clearinghouses, and free coffee and goodies attracted approximately 300 people to the ERIC Information Fair hosted by EECE. The Fair was held in September, soon after EECE moved to the College of Education, to increase awareness of the ERIC system and of the Clearinghouse's new location. The publicity, signs designed for the Fair, and activities which occurred at the fair are described below.

Publicity - A special flier was designed and posted on bulletin boards around campus, including those in Psychology, Social Work, Home Economics, and general campus areas. A short notice was placed in the campus newspaper the day before the Fair. Within the College of Education, fliers were placed in all faculty and student mailboxes, on all bulletin boards, in elevators, and on all outside doors. (Sample flier attached.)

Overview - Many exhibits relating to the ERIC system were placed in the student lounge area immediately outside the Clearinghouse. A display on ERIC document processing, microfiche readers and reader/printers and materials from ERIC Clearinghouses were exhibited. Computer searching demonstrations were also held. Staff members at each exhibit talked about the exhibit and answered questions.

Welcoming Signs - Large letters reading "ERIC Information Fair" (cut out of yellow construction paper) were strung across the glass wall of the lounge area. An even larger sign of red letters asking "ERIC Who?" was strung across one wall of the lounge area. Balloons and crepe paper streamers helped create a festive atmosphere.

Exhibits and Signs - 1. The ERIC System Exhibit consisted of a chart illustrating document flow in ERIC, documents, rough and edited resumes, cataloging cards, and OCR abstracts. Copies of RIE, CIJE, sample microfiche, and a handout on the ERIC System were also available. 2. The Microfiche Exhibit featured a microfiche reader/printer and sample microfiche. Above the reader was a bright yellow sign reading "Fresh Fiche"; from this sign hung microfiche cut in the shape of fish and outlined in colorful construction paper. 3. The Computer Searching Exhibit included a print terminal hooked up to a CRT monitor so that several people could watch the searching at one time. A large "Search-A-Rama" sign in the shape of a computer card advertised the exhibit. Handouts describing searching and the University of Illinois search service were available. 4. A large 6-panel kiosk decorated with the names of the Clearinghouses formed a circular Clearinghouse Exhibit. "ERIC" was written around the top of the kiosk and "Educational Resources Information Center" around the bottom. The Clearinghouse names on the body of the kiosk were in various colors and shapes. The kiosk was surrounded by tables of Clearinghouse brochures, sample publications, and lists of the names and addresses

of the Clearinghouses. 5. Inside the Clearinghouse Library, visitors could browse through racks of EECE publications and resource lists, have coffee and cookies, or try the ERIC lessons on PLATO.

Special Features - 1. A major attraction of the Fair was the mini-search ticket each visitor received when entering the Information Fair. This ticket was good for a short (3-8 minute) search of ERIC and could be redeemed at any time during the fall semester. The ticket could also be redeemed at the Information Fair at a terminal inside the Library. Anyone requesting a search with a mini-search ticket was given information about the University of Illinois Library Search Service. 2. The Information Fair included a book give-away. The books were weeded from the Clearinghouse book collection just before the Fair. 3. Small yellow "ERIC Who?" buttons were worn by EECE staff members to identify them to visitors. 4. Visitors expressed appreciation for the cookies and exotic kinds of coffee served (French, Spanish, etc.)

Staffing the Information Fair - Most Clearinghouse staff members participated in the Fair. Clerical staff manned the book give-away, handed out mini-search tickets, and kept the refreshment table supplied. The librarian from the University of Illinois Education Library participated in the Fair by doing demonstration searches and mini-searches. Many ERIC/CS staff members also participated, especially in talking about ERIC and Clearinghouse publications.

After the Fair is Over - We considered the ERIC Information Fair a success because the number of subsequent visitors to the Clearinghouse increased; many who received mini-searches continued getting ERIC searches at the University of Illinois, and many people spoke to us about the usefulness of the Fair in bringing ERIC to their attention. Since the signs are already made, subsequent Fairs will be relatively easy to prepare. An Open House was held in January, but we decided that an annual Fair was probably sufficient. We would be happy to talk with Clearinghouse staffs who would like more information on setting up their own ERIC Information Fair.

ERIC INFORMATION FAIR

Monday, September 17, 1979

8:00 a.m. - 4:30 p.m.

College of Education--South Lounge

- * Meet the ERIC/EECE Staff
- * FREE Computer Search and Demo
- * ERIC Microfiche, Books, and Publications
- * Come see our new home at 140 Education Building
- * FREE Resource Lists
- * Coffee and Goodies

Sponsored by the ERIC Clearinghouse on Elementary and Early Childhood Education

NEW INFORMATION ANALYSIS PRODUCTS (IAP's)

1. ERIC Clearinghouse on Higher Education

- a. *Interstate Migration of College Students*, Thomas Linney, 4 pages, \$.40. Available from: AAHE, Suite 780, 1 Dupont Circle, Washington, D.C. 20036. Research Currents Series.

Federal student aid funds are distributed on the basis of need and are by their nature completely portable. State student aid funds, even those supported with federal dollars, are for the most part limited to use in the state that provides them. State residence requirements often limit eligibility for state funded student aid programs. There exists a continuing federal pressure to increase portability of all student aid funds. Drawing on the literature concerned with interstate migration of students and patterns of student financial aid at various state levels, this research current discusses the issue of portability and the patterns of student migration.

- b. *College and University Endowments—or, Singing the Inflation Blues*, Carol Herrnstadt Shulman, 4 pages, \$.40. Available from: AAHE, Suite 780, 1 Dupont Circle, Washington, D.C. 20036. Research Current Series.

This research current looks at the heated debate over whether institutions should develop new policies about their endowment investments, i.e., should they divert themselves of stocks in companies that do business in countries whose policies are in conflict with institutional values. The current examines the arguments for and against divestiture; assesses the impact divestiture may have on the American economy; and looks at new institutional developments in this area.

- c. *A Legal Bookshelf for Administrators*, Patricia Hollander, 8 pages, \$.50. Available from: AAUA, P. O. Box 536, Oneonta, N.Y. 13820. Administrators Update, Vol. 1, No. 2, Fall 1979.

This review is a bibliography of legal references for college administrators covering such areas as student rights and due process, Supreme Court decisions affecting education, student admissions, affirmative action, student records, student press, collegiate sports, copyright law, faculty, and womens issues.

2. ERIC Clearinghouse on Tests, Measurement, and Evaluation

- a. *TM 68: The Educational Implications of Piaget's Theory and Assessment Techniques*, Richard De Lisi, \$5.00.

This paper is intended for those educational practitioners and researchers who find themselves both curious and confused about Piaget's theory. Central aspects of the theory and assessment techniques and their relevance for educational practice and research are introduced. In addition, Piaget's own statements and ideas about education are summarized.

I. CENTRAL ERIC ANNOUNCEMENTS

A. Copyright Problems

There have been two cases recently of copyright problems. In each case, the Clearinghouse involved acted in good faith based on copyright release, or what was interpreted as copyright release. At issue, among other things, is the necessity to require formal ERIC system copyright releases on all non-government documents, or whether cover letters "giving permission" can be substituted in specific instances. While lawyers are debating issues which will affect the eventual system policy, let me suggest that particular care be given to accepting cover letters as a substitute for official copyright releases.

The following notice will appear in *Interchange*:

For copyright reasons ERIC has been asked to change the availability of two documents from Level 1 to Level 3 (not available from EDRS):

ED 168 261 - *The Gifted: A Perishable Resource*

ED 168 549 - *Systems Engineering of Education XIX: Preparing Occupational Instruction*

Organizations holding these items in their ERIC microfiche collections are asked to discard these microfiche. Credit will be automatically given by the ERIC Document Reproduction Service for the cost of these microfiche.

...B.C. (Central ERIC)

B. ERIC Search: Tournament

The "First Annual ERIC Search Tournament" will be held at the Online '80 meeting in San Francisco, California on November 12-14, 1980 (see Attachment 1). Those who know her will recognize the fertile imagination of SMERC's Kathy Clay, who has brought us "Searching ERIC on DIALOG: The Times They Are a' Changing," "Byte my Baud" and other noteworthy contributions to the literature of information science. We would appreciate knowing if anyone has plans to attend the meeting.

...Bob Chesley (Central ERIC)

C. A Guide to School Library Media Programs Prepared by ERIC/IR

Donald Ely and Barbara Minor of the ERIC Clearinghouse on Information Resources have prepared a guide outlining important information about school libraries. This guide addresses the following types of information about school libraries:

- points of access (national, state, regional, and local), including journals;
- the magnitude of the school library enterprise; and
- the roles and functions of school librarians.

A copy of this guide is displayed in Attachment 2. Please feel free to contact the Clearinghouse for additional information.

...Cheryl Chase (Central ERIC)

D. School Librarian Internship Program

A group of five school librarians participated in the first session of the NIE sponsored School Librarian Internship Program. In cooperation with the American Association of School Librarians (AASL), the program seeks to investigate the problems of awareness and access for the library media specialist to the resources available at the NIE Library, ERIC, the Information Resources Division, and other national library collections such as the National Agricultural Library and the National Library of Medicine. It is hoped that the program will guide us all in better serving the library/media audience.

For two weeks the interns were thoroughly exposed to all aspects of the ERIC system, as well as other information resources in the Washington metropolitan area. A group report has been submitted and individual reports are expected shortly. A summary of these reports, including the interns' perceptions of the ERIC program and their suggestions for serving the school library audience, will appear in the next EAB.

Two future internship sessions are planned this year, April 21-May 2 and July 14-25, 1980. (See also EC entry on page 8.)

...Pat Coulter (Central ERIC)

E. Access to SOC's

Don't forget that EDRS has some space (within limits) each month to include Clearinghouse announcements, flyers, etc., in their monthly microfiche shipments to the ERIC Standing Order Customers. USE IT - SAVE POSTAGE!

...Jim Prevel (Central ERIC)

F. Hot-Line From USOE on Developments in Education

The Office of Education now has a toll-free telephone recording giving several minutes of information on important developments in education. In Washington, dial 472-2729; outside Washington, dial (800) 424-0214.

...Frank Smardak (Central ERIC)

G. Oryx Press Publishes Bibliographies

Several new bibliographies, recently compiled by Oryx Press in cooperation with SMERC, have been completed (see Attachment 3). The focus on these bibliographies is on practitioner-oriented materials; they should be of interest to everyone in the system.

...Kit Welsh (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. ERIC Ready Reference #1

Attachment 4 is a display of ED and EJ ranges for each calendar year since ERIC started. As the data base grows, it will be increasingly common to limit search output by year. Ready Reference #1 is designed to be put on the wall above searching terminals and to be eye-legible at that distance.

...Ted Brandhorst (ERIC Facility)

B. Scope of Interest Guide, Index

The "Index" at the back of the *Scope of Interest Guide* helps to delineate Clearinghouse subject areas and reduces the number of document transfers by pinpointing Clearinghouse areas of interest. It has come to our attention that certain terms might be added to the "Index." If any Clearinghouse would like to select terms from the list below, they will be added to the "Index" for the *ERIC Processing Manual*. Please identify which terms coincide with the subject matter processed by your Clearinghouse and return your selection (if any) to the Facility.

Abused children	Black English
Accessibility (handicapped)	Brainstorming
Adolescence	Camping
Affirmative action	Death education
Analytic reasoning	Dental health
Assessment	Driver education
Barrier-free design	Food service
Battered women	Halfway houses

Immunization programs
Individually guided education
Linking agents
Mnemonics
Modality based education
Museums
Neglected children
Nutrition education
Open universities

Parenting
Playgrounds
Prisoner education
Prison rehabilitation
Rural blacks
Senior high school students
Senior citizens
Student activities
Violence
Visual literacy

...Grace Sundstrom (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Adult, Career, and Vocational Education

1. Wisconsin Communication and Information Network Uses ERIC

Juliet Miller, Director of the ERIC Clearinghouse on Adult, Career, and Vocational Education, discussed ERIC with representatives of libraries involved in the Wisconsin Vocational, Technical, and Education (VTAE) Communication and Information Network at a meeting held at the Waukesha County Technical Institute in Pewaukee, Wisconsin on February 27, 1980.

The Wisconsin VTAE Network links 33 postsecondary technical institutes via computer terminals, in the support of three major goals:

- communication through electronic mail and conferences;
- access to the Wisconsin Career Information System; and
- searching of ERIC and NTIS data bases.

The ERIC Clearinghouse is exploring ways of joining this computer conference link to help libraries in the 33 locations strengthen their ERIC searching skills.

...J.M. (CE)

2. CE Assistant Director named Editor of *Career Education Quarterly*

Bob Bhaerman, Assistant Director for Career Education, has been designated editor of the *Career Education Quarterly* (CEQ), the official journal of the National Association for Career Education. For the past year, he has served as an editorial consultant to the CEQ and is currently guest editing an issue dealing with "CETA and Career Education." Bob also submits a similar ERIC column to the *Illinois Career Education Journal*. Through both of these efforts, the ERIC system is becoming more widely known in the career education community, a sizeable part of the total education community.

...Juliet Miller (CE)

B. ERIC Clearinghouse on Educational Management

1. NASSP to Publish Report on Vouchers

Sometime later this year, secondary school principals across the nation will receive a 57-page report on educational vouchers prepared by the ERIC Clearinghouse on Educational Management.

The report was originally published in 1979 by the Association of California School Administrators (through a cooperative arrangement with the Clearinghouse) as an issue of *School Management Digest*. Recently it caught the eye of Scott D. Thomson, Director of the National Association of Secondary School Principals, who wants to publish a special edition of the digest for distribution to NASSP's 36,000 members.

NASSP became interested in the topic in the aftermath of a PBS television program, "Free to Choose," in which Milton Friedman propounded the voucher concept. When Thomson received telephone calls from members expressing concern about the impact of vouchers, he decided the association should prepare a monograph on the subject for its members.

At this point Thomson came across the digest. As he told Clearinghouse Director Philip K. Piele in a letter, "Your product is so good...that we would prefer to publish it instead." He terms it "the most readable summary available on the topic."

The digest was written by Clearinghouse freelance writer John Lindelow.

...Stuart Smith (EA)

C. ERIC Clearinghouse on Elementary and Early Childhood Education

1. Dr. Katz President of OMEP/U.S.

Dr. Lilian G. Katz, Chairman of the Department of Elementary and Early Childhood Education and Director of the ERIC Clearinghouse on Elementary and Early Childhood Education at the University of Illinois, has been elected to a two-year term as President of the U.S. National Committee of the World Organization for Early Childhood Education.

The organization, whose official name is Organization pour l'Education Prescolaire (OMEP), is represented by a national committee in each of more than forty member countries. It is funded by a special grant from UNESCO supporting programs promoting research and the dissemination of knowledge

about the education and care of young children around the world. The organization publishes a quarterly journal and holds world council and assembly meetings each year.

Professor Katz will represent the U.S. National Committee at the 1980 World Assembly in Quebec next July.

...Charlotte Watkins (PS)

D. ERIC Clearinghouse on Handicapped and Gifted Children

1. ERIC/NDN Relationship

On Friday, February 8, 1980, Don Erickson met at the U.S. Office of Education with Drew Leby (OE's NDN Program Officer) and Diane McIntyre (Far West Laboratory) as part of his role as Chairperson of the ERIC/NDN linkage committee. The three participants agreed that cooperation between the two systems should move far beyond the level of assigning ERIC descriptors to JDRP approval programs. Some specific activities were discussed, but extensive progress in this matter probably will have to wait until all programs have found their new niches in the Department of Education. If any ERIC personnel have been working with any NDN personnel at a local or regional level, please forward a brief description of the activity to Don Erickson at the ERIC Clearinghouse on Handicapped and Gifted Children.

...M.C. (EC)

2. EC Conducts Workshop for Staff in the Louisiana State Department of Education

On Wednesday, February 20, 1980, Don Erickson and Jean Nazzaro conducted an all day workshop/materials demonstration for 40 Louisiana SEA staff, Regional Resource Center directors, and other state special education consultants. Although this workshop was not conducted with Clearinghouse funds, the opportunity was seized for delivering a good dose of ERIC information to the exceptionally attentive attendees.

3. School Librarians Visit EC

On Tuesday, February 26, 1980, the ERIC Clearinghouse on Handicapped and Gifted Children was privileged to host five librarians who were participating in the NIE special two-week program to instruct librarians in elementary and secondary schools about resources available through the National Institute of Education.

The librarians, from Wisconsin, South Dakota, Washington, Wyoming, and Maryland, and two project leaders from the Maxima Corporation, evidenced high interest during their visit, which lasted the major part of the day. Although their prior knowledge of NIE resources ranged from sophisticated to modest, all asked penetrating questions regarding every aspect of this Clearinghouse's operations and easily grasped the relationship of one Clearinghouse to another, as well as relationships between Clearinghouses and the other ERIC components. All Clearinghouse staff who interacted with the librarians during their visit were left with the impression that out there in the schools we have interested and vibrant allies who need more of our support to become working members of our larger Network.

4. EC Begins Sending RIE and CIJE Resumes to the ERIC Facility on Magnetic Tape

The ERIC Clearinghouse on Handicapped and Gifted Children has begun sending resumes for RIE and CIJE to the Facility in tape form, skipping the OCR step. Resumes are keyed onto floppy disks via a microprocessor system, and tapes are generated via a GALAXY/5 minicomputer. Tapes are sent directly to the ERIC Facility. The system reduces typing time, allows for greater ease of correction, and eliminates OCR problems at the Facility with resulting greater efficiency. This system is possible due to close coordination and shared usage with EC's host organization, The Council for Exceptional Children.

E. ERIC Clearinghouse for Junior Colleges

1. Promotion of Information Analysis Products

The recent trend has been for each ERIC Clearinghouse to be a representative of the ERIC system as a whole, not just in the capacity allowed by its own particular scope. ERIC Clearinghouses also serve library and media associations and dissemination groups on a regional basis. For the past few months, the ERIC Clearinghouse for Junior Colleges has conducted a series of workshops on the ERIC system for Los Angeles County Schools and the California Library and Media Educators Association (CMLEA).

In addition to distributing the *ERIC Information Analysis Products* compilations for 1975-1977 and 1978, JC has displayed *actual copies* of publications of topical concern to the participants. This has stimulated great interest and also a few questions:

- "What is the cost of individual products?"
- "Where are these products available?"
- "What method of payment will you accept?"
- "How can I be placed on mailing lists for future publications?"

Unfortunately, this information is not always present on the cover or in the front matter of the product. Rather than presenting an uninformed appearance by answering user questions by saying, "I don't know, but you can contact the particular clearinghouse," JC now selects only those IAP's where cost and ordering information is clear.

In planning for the CMELA Annual Convention, display of appropriate Clearinghouse publications was thought useful to both participants (for their information) and to Clearinghouses (for promotion of their products). To maximize the amount of information given each participant, a form was devised (see Attachment 5) for their use when asking for further information on a particular publication.

Right on the spot, conference attendees can indicate their interest in a particular product without having to follow-up when they return to their own offices. Allowed to "get cold," users seldom follow-up on publications of their own accord, even if their interest was stimulated at the time. Information on ordering products through the Clearinghouse, associations, or EDRS can then be forwarded to the individual with a minimum of effort on the part of both the attendees and the Clearinghouse.

All of the Clearinghouses were contacted in advance regarding this procedure and were given an opportunity to suggest certain IAP's they would like to have especially promoted. It was extremely helpful to have a supply of each Clearinghouse's IAP's on hand to facilitate selection by telephone. Such occasions as these workshops offer a great opportunity to represent the ERIC IAP program across scope areas and JC hopes you will be pleased with the response.

...Bonnie Sanchez (JC)

F. ERIC Clearinghouse on Reading and Communication Skills

1. RCS Column Scores Well

Each year, staff at the ERIC Clearinghouse on Reading and Communication Skills contribute articles to a regular ERIC/RCS column in the *Reading Teacher* and *Journal of Reading*, published by the International Reading Association. Dr. Janet Binkley, editor of both journals recently informed us

that an IRA survey of 480 randomly selected readers found that our work was reaching 95% of the members who receive one of these journals. This was true both for college faculty and for elementary and secondary school classroom teachers.

...Mary K Monteith (CS)

G. ERIC Clearinghouse on Rural Education and Small Schools

1. USOE Rural Education Specialist Visits RC

Norm Hern, the primary contact person for rural education in the U. S. Office of Education, visited the ERIC Clearinghouse on Rural Education and Small Schools on February 13-14, 1980. The primary focus of his visit was to keep abreast of current developments in the field of rural education.

...A.H. (RC)

2. Indian Education Liaison

Elaine Benally (American Indian Specialist) and Amelita Hill (User Services) of the ERIC Clearinghouse on Rural Education and Small Schools, gave an ERIC workshop providing information and technical assistance pertaining to the acquisition of materials and equipment and the training of staff for the development of an ERIC mini-library. This library would serve the students and communities under the jurisdiction of the Albuquerque Indian School (19 Pueblos, Mescalera Apaches, Jicarillo Apaches, Ute Mountain Ute, and Southern Ute). The workshop was held at the All Indian Pueblo Cultural Center, Albuquerque, New Mexico, on March 7, 1980.

...A.H. (RC)

3. ERIC/CRESS - State Collaboration

Judi Conrad (Information Specialist for Rural Education, Small Schools, and Outdoor Education, of the ERIC Clearinghouse on Rural Education and Small Schools, gave a presentation on the ERIC system to the participants of the "Building State Information Resource Center: SEDL Regional Exchange Workshop," in Austin, Texas, on February 28, 1980. Participants represented state departments of education, universities, and information centers from Arkansas, Louisiana, Mississippi, New Mexico, Oklahoma, and Texas.

...A.H. (RC)

4. Migrant Student Record Transfer System

Manuela Quezada (Information Specialist for Mexican American and Migrant Education) of the ERIC Clearinghouse on Rural Education and Small Schools, met with the Director and User Services Director of the Migrant Student Record Transfer System (MSRTS) in Little Rock, Arkansas on February 12-13, 1980.

A system was developed that would allow MSRTS computer terminal operators in the field to indirectly access ERIC via the MSRTS center in Little Rock. The MSRTS personnel will forward requests to ERIC/CRESS. These requests will be categorized and answered, if possible, by off-the-shelf items. For those requests that necessitate a computer search, an analytic summary of the search results will be provided in a form suitable for dissemination from Little Rock via terminal.

...Amelita Hill (RC)

H. ERIC Clearinghouse on Teacher Education

1. SP Staff Change

Pat Spellman has announced her resignation as Senior Information Analyst effective March 21, 1980. Pat has been with the Clearinghouse since June 1976, managing the acquisitions, document processing, and abstracting/indexing functions. She also served as VIP project coordinator and as a member of the VIP Executive Committee. Her contributions and sound judgments will be missed.

...D.S. (SP)

2. International Visitors to SP Receive Orientation

Three groups of international visitors participated in orientations at the ERIC Clearinghouse on Teacher Education in recent months. The parties included:

- a study tour concerned with educational technology, from the People's Republic of China;
- several members of the AACTE intern program from the Somali Democratic Republic, the Philippines, and Jamaica;
- a visitor from Tubingen University, West Germany.

...Dean Schwanke (SP)

I. ERIC Clearinghouse on Urban Education

1. UD to be Represented at International Conference

Erwin Flaxman, Director of the ERIC Clearinghouse on Urban Education, will be a speaker at the International Conference on Self Help to be held in New York City, March 31- April 4, 1980. The conference is sponsored by the City College of New York, the National Urban League, and the Institute for Urban and Minority Education. Dr. Flaxman will speak on the value of documenting self-help activities and disseminating this information internationally.

A Guide to School Library Media Programs

Points of Access

National. The American Association of School Librarians (AASL) is a division of the American Library Association (ALA). The Executive Secretary is Alice E. Fite (50 E. Huron Street, Chicago, Illinois 60611). The official journal is School Media Quarterly in which ERIC/IR has a regular column. The annual program meetings coincide with ALA (New York City, June 28 - July 4, 1980) and for the first time, there will be a separate convention in Louisville, Kentucky, September 25-28, 1980 for which a registration of 3,000 is expected. Don Ely of ERIC/IR is serving as coordinator of all ERIC efforts at the Louisville meeting.

Within the U.S. Office of Education there is an Office of Libraries and Learning Resources which has administered various federal programs related to libraries, e.g., LSCA; Elementary and Secondary Education Act, Title IV B; Higher Education Act, Title II B.

State. There is no one pattern for state organizations but there are organizations for school library media specialists in nearly every state. The organizational patterns are: (1) separate state associations for school library media personnel only; (2) combined school library-educational media/technology associations; and (3) a school library media section of the state library association. The patterns prevailing in the states covered by each Clearinghouse can be determined by contacting the state library office or state education department office responsible for school libraries. The AASL office has also been helpful in identifying school library media organizations on the state level.

Each Clearinghouse can facilitate linkages between ERIC and school library media personnel through naming the most accessible standing order customers (SOC's). When school librarians know where they can get nearby help and access to all ERIC resources, the potential for use is enhanced.

Regional and Local. Some large cities or regions have organizations for school library media personnel. Such regional or local groups usually have no official affiliation with the state or national associations. To discover if such organizations exist in your area, ask school library media personnel.

Journals. School Media Quarterly is the official journal of AASL. School Library Journal (published by R.R. Bowker) is also popular. School library personnel who include nonprint media within their scope may read Instructional Innovator (formerly Audiovisual Instruction) which is published by the Association for Educational Communications and Technology (AECT). Another magazine, widely read by teachers and school library personnel, is Media and Methods.

Magnitude of the School Library Enterprise

A 1974 study by the National Center for Educational Statistics (NCES) showed that 74,625 (85.3%) of the 87,465 public schools had school library media centers (LMCs).

Of the 22,992 secondary schools, 22,315 (97.1%) had LMCs; all secondary schools with enrollments of 2,000 or more (1,409), had LMCs (100%).

Of the 64,473 elementary and combined schools, 53,310 (81.1%) had LMCs; LMCs were least prevalent in elementary/combined schools with enrollments of less than 300.

Thirty-nine out of 40 children attended schools with LMCs; between 1964 and 1974, the number of children attending schools with LMCs increased by 50%.

Functions

The role and professional obligation of the library media specialist is currently seen to be that of an effective teacher of both students and other teachers.

In addition to teaching students through use of a variety of instructional media, equipment, and applied teaching strategies, the media specialist should also assume an intensive leadership role in development and application of new ideas and strategies with classroom teachers to help them apply the new media and teaching methods to improve their teaching. While administrative support is seen for providing time for library management and parent or teacher conferences, media specialists are not yet free from pressures to cover study halls or serve as a relief or substitute teacher.

Task Analysis

A task analysis survey of school library personnel conducted for the School Library Manpower Project found that the head of the LMC in 72% of the schools studied participates in curriculum development and revision, while assistant librarians (also professional personnel) in 50% of the schools and audiovisual specialists in 38% performed the same function. The heads of the LMCs in 77.8% of the schools assist curriculum committees in selection of appropriate materials for resource units and curriculum guides; in 84.9% they assist individual teachers in curriculum planning; in 75.3%, they conduct evaluations of adequacy and suitability of facilities,

equipment, and materials, and services with regard to learning outcomes; in 93.7% they plan cooperatively with faculty members to coordinate materials and library activities with curriculum programs, units, textbooks; and in 76.6%, they work with teachers to design innovations in instruction. The assistant librarian and audiovisual specialist perform the same functions to a lesser degree.

Special Interest * Resource Guides in Education

Oryx Press is planning, for 1980, a series of annotated bibliographies on essential and current topics in education. The focus of the bibliographies will be on practitioner-oriented materials.

When determining the best organization to do the research for this series, Oryx Press looked to the San Mateo Educational Resources Center (SMERC). SMERC, under contract with 27 educational agencies in California and with educational agencies in Alaska, Arizona, Florida, Hawaii, Montana, Nebraska, Oregon, and the U.S. Virgin Islands, fills 25,000 requests for educational information each year, thus giving them a national perspective on educational issues. These requests come (approximately) from the following administrators—45%; teachers, counselors, librarians, and others involved in the educational process—50%; the remainder come from graduate students, researchers, parents, and others. Thus, Oryx Press believed that the desired practical focus could be provided best and most comprehensively by SMERC.

The first in the series of Special Interest Resource Guides will be on the topic of classroom and school site discipline—creative, assertive, humane, sanity-saving, positive, preventive, and PRACTICAL. Other Guides scheduled will cover such areas as Drug Abuse and Mainstreaming.

The topics for all the guides will be selected on two bases: interest as expressed by the educational community (the ERIC system entered over 1,000 items on the topic of discipline in 1978 and 1979 alone); interest as expressed by the public (the 11th annual survey conducted by *Phi Delta Kappan* states, "Once again, the American public perceives the perennial problem of discipline as the most important problem facing the schools today." September, 1979).

The major resource for compiling these educational bibliographies will be the ERIC (Educational Resources Information Center) database, but other sources, both computerized and non-computerized, will be tapped in order to provide the best and most topical and most up-to-date information on each subject.

*Discipline, available Spring, 1980, others throughout the year.

Discipline

★ Compiled by San Mateo Educational Resources Center (SMERC). ISBN 0-912700-71-8. 1980 Paperbound. \$7.50(t).

Discipline and Classroom Control: A Special Interest Resource Guide is the first in a series of annotated bibliographies on special interest topics in education.

Six Guides will be published in 1980, and six each year thereafter. The September, 1979, *Phi Delta Kappan* states:

"... the American public perceives the perennial problem of discipline as the most important problem facing the schools today

This guide supplies access to information on classroom and school site discipline—creative, assertive, humane, sanity-saving, positive, preventive, and PRACTICAL (See also page 19)

Drug Abuse

★ Compiled by San Mateo Educational Resources Center (SMERC). ISBN 0-912700-72-6. 1980 Paperbound. \$7.50(t).

Drug Abuse. A Special Interest Resource Guide is the third in a series of annotated bibliographies on special interest topics in education. Six Guides will be published in 1980, and six each year thereafter. The increase of alcoholism and other drug abuse among young people makes this topic of great concern to teachers, administrators, and parents. This book leads to the current information available on this immediate problem, including behavioral aspects, prediction and prevention, drug education, and drug therapy (See also page 19).

Special Interest Resource Guides in Education are being compiled by the San Mateo Educational Resources Center (SMERC), which fills over 25,000 requests for educational information each year, giving them a national perspective on educational issues. These requests come (approximately) from the following groups: administrators—45%, teachers, counselors, librarians, and others involved in the educational process—50%; the remainder come from graduate students, researchers, parents and others. The major resource for compiling these educational guides is the ERIC (Educational Resources Information Center) database—but other sources, both computerized and non-computerized, are also used in order to provide the best, most topical, and up-to-date information on each subject (See also page 19)

*Discipline, available April, 1980; Drug Abuse, available August, 1980

Mainstreaming

Compiled by San Mateo
Educational Resources
Center (SMERC).
ISBN 0-912700-73-4. 1980.
Paperbound. \$7.50(t).

Mainstreaming: A Special Interest Resource Guide is the second book in a series of special interest topics in the field of education. Six Guides will be published in 1980, and each year thereafter. A 1978 issue of *Exceptional Children* states, "... Appropriate implementation of Public Law 94-142 will require the concerted effort of many individuals—general and specific educators and administrators, a myriad of support personnel, parents, siblings, and the children themselves." This guide supplies access to the most current information on meeting the needs of special children—a requirement for all educators (See also pages 8 and 19).

SMERC, the San Mateo Educational Resources Center, accesses both computerized and noncomputerized data filling requests for information each year.

NEW INFORMATION ANALYSIS PRODUCTS

ERIC Clearinghouse on Information Resources

- a. *A Classification of Evaluation Studies of Instructional Technology Included in the ERIC System*, Dennis D. Goöler, 192 pages, \$14.00. Available from Syracuse University Printing Services, 125 College Place, Syracuse, N.Y. 13210. IR-34.

The more than 200 studies identified are listed in a number of categories under three broad headings--purposes for evaluation, focus of evaluation, and methods of evaluation. Abstracts are included in the bibliography.

- b. *Cost-Effectiveness and Instructional Technology: A Review of Conceptual Issues and Selected References*, Philip Doughty And Others, 60 pages, \$5.00. Available from Syracuse University Printing Services, 125 College Place, Syracuse, N.Y. 13210. IR-35.

Intended for the practitioner with a basic understanding of instructional technology, this publication examines concepts and practices in this type of evaluation, reviews the literature, and provides an annotated bibliography.

- c. *A Working Bibliography of Commercially Available Audiovisual Materials for the Teaching of Library Science*, 2nd ed., revised and expanded, Irving Lieberman and others, 120 pages, \$8.50. Available from Syracuse University Printing Services, 125 College Place, Syracuse, N.Y. 13210. IR-36.

Films, filmstrips, slides, video and audio tapes are listed in seven categories--introduction to librarianship, reference, use of books and the library, classification and cataloging, selection of materials, printing and history of books and libraries, and automation. A list of sources and title index are included.

- d. *The Information Interview: A Comprehensive Bibliography and an Analysis of the Literature*, Wayne W. Crouch, 44 pages, \$4.00. Available from Syracuse University Printing Services, 125 College Place, Syracuse, N.Y. 13210. IR-37.

A brief review of the literature on the reference interview introduces a bibliography of 76 journal articles and monographs listed in three categories. Subject and author indexes and cross references are provided.

- e. *An Assessment of the Current Status of Educational Technology*, Paul Saettler, 34 pages, \$3.00. Available from Syracuse University Printing Services, 125 College Place, Syracuse, N.Y. 13210. IR-38.

This overview of the field reviews the historical roots of educational technology, the status of instructional design and media selection, systems approaches to instruction, instructional uses of specific media technologies, current problems, and future prospects.

- f. *Assessing the Competencies of Media Professionals: A Model for Determining Costs and Effectiveness*, Evelyn H. Daniel and Donald P. Ely, 59 pages, \$4.75. Available from Syracuse University Printing Services, 125 College Place, Syracuse, N.Y. 13210. IR-39.

This summary of procedures and outcomes of a study undertaken to develop assessment methodologies provides discussion of measures of both primary and secondary costs analysis, the cost-effectiveness model, and general competency assessment by faculty. For a related document, see IR-17 (ED 149 740).

- g. *A Guide to Audiovisual Resources about ERIC*, Donald P. Ely, 36 pages, \$3.00. Available from Syracuse University Printing Services, 125 College Place, Syracuse, N.Y. 13210. IR-40.

The current, available materials listed include computer programs, sound filmstrips, sound microfiche, slide/tapes, overhead transparencies, video cassettes and videotapes. Evaluative reviews are included.

- h. *Guide to Educational Resources*, 4th ed., revised and updated, 461 pages, \$4.50.

Updated on a selective basis, this guide lists sources in seven categories—yearbooks and encyclopedias, directories, dictionaries and glossaries, guides, indexes, the ERIC system, and statistical information. Guides to funding sources are appended and cross references are provided.

- i. *Sex Education and the Library: A Basic Bibliography for the General Public with Special Resources for the Librarian*, Sol Gordon, 46 pages, \$4.50. Available from Syracuse University Printing Services, 125 College Place, Syracuse, N.Y. 13210. IR-42.

An overview of the current status of sex education discusses the myths of sexual knowledge, the special role of parents, public attitudes toward sex education, and outlines a special role for libraries. The selective bibliography is designed for parents, children, adolescents, and young adults, as well as librarians; materials are listed in a number of subject categories.

ACTION ITEMS

1. COPYRIGHT RELEASE POLICY (NEW)

Several Clearinghouses already require the use of the system copyright release statement for all documents entered into the system (except for Education Department sponsored reports). In view of recent experience, and the recommendation of our NIE copyright attorney, *it will become system policy that all documents shipped to the Facility after May 10, 1980 must have a signed copy of the official ERIC "specific document" or "blanket" copyright release statement.* These forms will be kept on permanent archival file at the Clearinghouses. As has been the practice, exception will still be made for documents sponsored by OE and NIE. If there is any question about what constitutes an exception, inquiry should be made through the Clearinghouse monitor.

If a document is received which was generated under a grant or a contract funded by a component of the Department of Education, and that document bears a copyright notice, we have been asked to contact the NIE copyright office to determine if the restriction is legitimate. In this case, contact your Clearinghouse monitor providing, if possible, the contract number, grantee, and institution.

...Bob Chesley (Central ERIC)

2. U.S. DEPARTMENT OF EDUCATION DESIGNATION ON PUBLICATIONS

Any publication which has previously carried the designation "U.S. Department of Health, Education, and Welfare" anywhere on its cover or in its contents, should have the designation changed to "U.S. Department of Education," if it will be published after May 6, 1980. Clearinghouses should note that this change should also be made in the NIE disclaimer notice printed in any of its products. (See previous notice regarding the NIE logo and disclaimer in the September 1979 issue of the EAB.)

...Kit Welsh (Central ERIC)

I. CENTRAL ERIC ANNOUNCEMENTS

A. Proposed IAP Titles to be Announced When Clearinghouse Contracts Renewed

In order to facilitate planning within and between Clearinghouses for Information Analysis Products (IAP's), *proposed* titles will be

announced in the *ERIC Administrative Bulletin* when the Clearinghouse contracts are renewed. In order to catch up, Attachment 1 contains IAP titles for those contracts renewed thus far in 1980.

...Bob Chesley (Central ERIC)

B. NIE Document Selection Report

On March 24, 1980, a memorandum from Grace Sundstrom of the ERIC Facility outlined a new procedure which requires that all NIE documents received from the Facility and not selected for RIE be returned to the Facility, and that the reason be given for their rejection. An *NIE Document Selection Report* form was attached. This new procedure is being implemented in order to meet an internal NIE directive, which specifies that NIE reports which are not accepted for inclusion in the ERIC system must be retained in a permanent collection in the NIE Library.

...Frank Bryars (Central ERIC)

C. Federally-Funded Dissertations

Clearinghouses must be particularly careful in dealing with dissertations which have been partially or entirely funded by the Department of Education or any of its predecessor agencies. If there is an indication that the dissertation was funded by the Department of Education or one of its predecessor agencies, the Clearinghouse should attempt to determine the name of the contractor or grantee institution that received the funds and check (through the Clearinghouse monitor) with NIE's Copyright Office to determine what rights ERIC is entitled to as far as input into the system is concerned.

...Cheryl Chase (Central ERIC)

D. Contract Renewals - RC and SP

NIE has exercised the Government's option to renew the contracts for the operation of the ERIC Clearinghouse on Rural Education and Small Schools (RC) and the ERIC Clearinghouse on Teacher Education (SP):

● ERIC Clearinghouse on Rural Education and Small Schools

During this contract year, RC will undertake a special project to develop a document or packet of materials which will enable State legislators and their staff to utilize the ERIC data base in obtaining information relevant to their needs, primarily current or pending legislation. This will be a joint project with the Education Commission of the States. This marks the third year of the Contract (April 1, 1980 - March 31, 1981).

- ERIC Clearinghouse on Teacher Education

The following three special projects have been proposed by SP and approved by NIE for the contract year:

- (1) SP will undertake the development and dissemination of "ERIC: An Instructional Module for Preservice Teacher Education Students," a module designed to inform teachers in training of the nature of the ERIC system, its component parts, structure and contents of the data base and methods for access to the materials contained in it.
- (2) SP will provide logistical support for the activities of the ERIC Technical Steering Committee.
- (3) SP will provide logistical support for the activities of the ERIC National Technical Meeting.

See Attachment i for Information Analysis Products to be developed by these two Clearinghouses.

...Cheryl Chase and Pat Coulter (Central ERIC)

E. Observations on ERIC by School Library Interns

As promised in a previous edition of the EAB, I would like to share some of the comments we received from the School Library Media Interns regarding the ERIC system. Keep in mind that their experience with the ERIC system varied and that most were inexperienced, having had their first real introduction to ERIC during this internship.

The overall reaction to the program was most enthusiastic. The group report included the following observations on ERIC:

- RIE and CIJE are valuable sources of information that can be used specifically for grantsmanship and curriculum development.
- The initial "starter kit" is priced within the range of a school library budget. The "starter kit" refers to the minifiles of IAP's plus journals.
- ERIC would be most usable at a Teacher Center or at a district-wide educational service/professional library.
- ERIC should be used by the teachers to develop instructional programs for children. The personal use of the ERIC data base would not be accepted or funded in some locales.
- ERIC would probably be "piloted" for a year (i.e., an initial "starter kit" purchased), and would then be evaluated for patron usage.

- The inclusion of books and other copyrighted materials in ERIC would make for a truly complete education data base. This could be very important in geographic areas where there is little or no access to large university libraries.
- ERIC Clearinghouses need larger budgets (allowances from ERIC) in order, among other things, to distribute newsletters to building level librarians.
- The principal Clearinghouse designated to serve elementary and secondary levels needs to be clarified; apparently the one on Educational Management currently handles this area in its scope.

Selected individual quotes:

- *"Initially I plan to order the 'starter kit' (RIE, CIJE, Thesaurus, The Best of the Best, and both minifiles). The prices are compatible with the...Library's budget. In September all students and faculty will be introduced to the wonders of a manual ERIC search."*
- *"We want to help in marketing [ERIC]. Call on building people to review products, especially the IAP line, in our journals and state newsletters."*
- *"Inservice or re-education was demonstrated a necessity by our lack of awareness. No one had urged or requested that we learn about ERIC before. New teachers coming from Schools of Education must not be utilizing ERIC resources either."*
- *"The followup to this internship will hopefully take a lifetime to complete."*

...Pat Coulter (Central ERIC)

F. ERIC Facility Competition

The ERIC Processing and Reference Facility contract is up again for competition this year after a successful 5-year period with ORI, Inc.

Assuming all channels of communication are open and receptive, the RFP should be announced by early May and awarded by November.

...Jim Prevel (Central ERIC)

G. One RIE Semiannual Index from GPO

Beginning with 1980, GPO will be printing only the one RIE Semiannual Index for January-June 1980. This paperback volume will be priced at \$8 domestic, \$10 foreign. It should be available in late August 1980 from:

Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

Oryx Press will continue to publish the hardbound RIE Annual Cumulations (Abstracts & Indexes). The Oryx Annual Index Cumulation will, in effect, obviate the need for the second Semiannual Index. The 1980 volumes will be available in the Spring of 1981.

...K.W. (Central ERIC)

H. Oryx Press Announcement to All RIE Subscribers

The 1979 hardbound Annual RIE Cumulations are in production, according to a handsome flyer Oryx Press has mailed out. The price of the Abstracts (2 volumes) is \$80 domestic, \$85 foreign; the price of the Indexes (1 volume) is \$47.50 domestic, \$50 foreign. Prices include postage and handling. Orders should be sent to:

Oryx Press
2214 North Central Avenue at Encanto
Phoenix, Arizona 85004

Oryx will be glad, upon request, to send additional flyers to the Clearinghouses for their use.

...K.W. (Central ERIC)

I. ERIC Puzzle

A delightful contribution from the ERIC Clearinghouse on Counseling and Personnel Services in their Quarterly Report has been included with this issue of the EAB as Attachment 2. ERIC can be fun!

...Kit Welsh (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. "Posters" for ERIC Users Conference—Where to Send Them

On February 13, Central ERIC sent a memo to all Clearinghouses requesting that they prepare "Posters" that would illustrate the handling of a reference inquiry and the many possible ERIC outputs that might be made in response to such an inquiry. The request, as it appeared in that memo, is repeated below:

"Note the 'Poster Session' in the draft Agenda. Each Clearinghouse is requested to prepare a single poster that will portray a typical question that may have come to the Clearinghouse from the constituency being addressed (e.g., school

librarians) and possible ERIC responses to that question (e.g., ED and EJ citations from the journals, relevant thesaurus displays, computer searches, computer printouts, IAP's, actual microfiche and paper copy documents, referrals, etc.). Within this framework you may use your imagination. All posters need not be alike. We are after real questions (within each Clearinghouse's scope of interest) and practical outputs that will help demonstrate to the attendees that ERIC is accessible and contains material that would be of use in real life school and teaching situations. The sixteen posters will be mounted around the perimeter of the meeting room. Posters should be planned so as to be completed by June 1. Instructions as to where to send completed posters will be provided later."

The ERIC Clearinghouse on Urban Education, as the "local" Clearinghouse for the conference, has since volunteered to be the recipient of these 16 posters, in order to avoid the necessity to transship from the Facility to New York City.

When you complete your poster, therefore, please transmit it to the UD Clearinghouse to the attention of Erwin Flaxman. Attention should be given to packing the posters adequately to withstand normal "rough" mail handling. UD will serve as custodian of the completed posters and will deliver them to the conference site the evening of June 26. If you want the posters returned to your Clearinghouse, please let UD know. Otherwise they will be collected at the ERIC Facility for use on other occasions.

UD has one caution: use their complete address, as shown in the *ERIC Directory*; the "Box 40" is essential in order to avoid shipment delays.

ERIC Clearinghouse on Urban Education
Box 40
Teachers College, Columbia University
525 West 120th Street
New York, New York 10027
Attention: Erwin Flaxman

...T.B. (ERIC Facility)

B. Missing Mail Bag

On March 31, the U.S. Postal Service notified the ERIC Facility that a bag of mail directed at the several occupants of 4833 Rugby Avenue, Bethesda, Maryland was missing. The bag had been left unattended briefly by a carrier and was missing when the carrier returned.

This is the first such incident of this kind to occur and the Postal Service states that they have taken precautions to see that it can't happen again.

There is no way of knowing how much of the missing mail may have been directed to the Facility. Monday is typically a heavy mail day. The contents of the bag may still be recovered. However, if you directed a letter to the Facility around March 26-28 and have not had a response (if one was called for), you may wish to send a follow-up. We are particularly concerned for the many entries being received right around this time for the two "Directories" (microfiche and search services) on which we are working.

...Ted Brandhorst (ERIC Facility)

C. Punctuation in the Descriptive Note Field

When creating notes for the Descriptive Note field, use standard punctuation rules, e.g., a period should be used at the end of sentences and to separate two distinct thoughts.

Example: Ph.D. Dissertation, University of Maryland.
Appendix may be marginally legible due to small print.

Example: Paper presented at the Annual Meeting of the Association for Education in Journalism (62nd, Houston, TX, August 3-5, 1979). For related document, see ED 123 006.

Formerly, when the Clearinghouses used to begin this field with pagination data, it was necessary to use a semicolon to separate pagination from other types of information. With pagination now supplied by the Facility and in its own separate field, it is no longer necessary for Clearinghouses to be concerned with subfield delimiters in this field.

...Lee Schreiber (ERIC Facility)

III. ORYX PRESS ANNOUNCEMENTS

A. Oryx Press to Publish Discipline Guide

Discipline and Classroom Control: A Special Interest Resource Guide is the first in a series of annotated bibliographies on special interest topics in education. The series is being compiled for Oryx Press by the San Mateo Educational Resources Center (SMERC). Six guides will be published in 1980, and six each year thereafter. The first in the series, *Discipline and Classroom Control*, was chosen because (as stated in the *Phi Delta Kappan*, "...the American public perceives the perennial problem of discipline as the most important problem facing the schools today." This guide should be published by late spring of 1980.

...S.S. (Oryx Press)

B. Oryx Press Visitor

Oryx Press enjoyed a recent visit from Carol Jaslow of the ERIC Clearinghouse on Counseling and Personnel Services, who was spending some time in the Phoenix area.

...Susan Slesinger (Oryx Press)

IV. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Counseling and Personnel Services

1. CAPS Participates in the American Personnel and Guidance Convention

For most of one week in March 1980, the ERIC Clearinghouse on Counseling and Personnel Services operated at a skeletal level. The Director, Associate Director, CIJE Editor, and Learning Resources Center Coordinator were all actively involved at the American Personnel and Guidance Convention in Atlanta, Georgia. The first two presented two workshops on career development; the latter two tended an ERIC booth. Almost 100 people participated in the workshops. Between 600-700 people visited the booth where, for the first time, CAPS offered six hours of free mini-searching. Helen Mamarchev reported that 104 people took advantage of the service.

...Carol Jaslow (CG)

B. ERIC Clearinghouse on Educational Management

1. Dr. Piele Takes on New Role at University of Oregon

Philip K. Piele, Director of the ERIC Clearinghouse on Educational Management, was recently appointed to a new position in the College of Education at the University of Oregon. The appointment places Dr. Piele in charge of the Information and Field Services Unit, which was newly formed to coordinate the services of the Clearinghouse, the Field Training and Service Bureau, and the Oregon School Study Council.

The rationale for the merger of these agencies is to expand the services of each by dovetailing their resources. For example, Clearinghouse IAP's will be distributed to school administrators throughout the state through channels maintained by the Bureau and the Study Council. The merger will also give Clearinghouse staff the opportunity to interact personally with practitioners and school board members in providing documentation to meet their needs.

The appointment and reorganization became effective in February. Dr. Piele's position as Director of the Clearinghouse will not change.

...Stuart Smith (EA)

B. ERIC Clearinghouse on Higher Education

1. Leveling Terms

As a result of the completion of the Vocabulary Improvement Project, the list of EDUCATIONAL LEVEL TERMS has been modified slightly and the list of AGE LEVEL TERMS has been adopted for processing. Indexing from both of these lists will begin with the August issues of RIE and CIJE (see Attachments 3 and 4). (These lists also appear in the front part of the March 1980 Working Copy of the Thesaurus.)

...M.S.S. (HE)

2. CIJE Journal Coverage Updated by HE

The ERIC Clearinghouse on Higher Education has updated its CIJE coverage, dropping five journals and adding four others.

Those dropped are:

- Bulletin of the Association of African Universities
- Interface Journal
- Medical Education
- Studies in Philosophy and Education
- West African Journal of Education

Journals added as of April 4, 1980 include:

- Journal of Dental Education
- Journal of Optometric Education
- Journal of Tertiary Educational Administration
- New Directions for Institutional Advancement

...M.S.S. (HE)

3. HE's Conference Participation

March was a big conference participation month for HE staff:

- American Association for Higher Education (AAHE) Conference

Everyone was involved in staffing an exhibit at the AAHE Conference. In addition to typical exhibit responsibilities, the staff sold several hundred dollars worth of IAP's. During the AAHE Conference, the Clearinghouse hosted a breakfast meeting of twenty higher education program directors. These representatives were helpful in providing ideas about how the Clearinghouse can best serve the higher education community. As part of the conference, AAHE and the Clearinghouse co-sponsored a reception for

conference participants to meet and talk with authors of the Research Report Series. We were pleased with the response, for it was an effective means of promoting the series as well as recognizing the work of the authors.

- Federal Policy in Higher Education Seminar

Thomas Linney coordinated a Federal Policy in Higher Education Seminar for twenty doctoral students in higher education programs across the country. The two-day seminar included presentations by policymakers from HEW, the transition staff for the Department of Education, U.S. Senate and House of Representatives staff, and representatives of Higher Education Associations. The seminar was co-sponsored by the HE Clearinghouse, Association for the Study of Higher Education, and American Association for Higher Education.

- Association for the Study of Higher Education (ASHE)

Jon Fife, Marilyn Shorr, and Lynn Barnett participated in the Association for the Study of Higher Education (ASHE) Conference. Jon is Secretary-Treasurer of the ASHE Board and also coordinated this year's conference.

...M.S.S. (HE)

4. Name Change

After six years of thought, Lynn Barnett Haupt has returned to her maiden name. ("Haupt" was so hard to pronounce anyway.)

...Marilyn Scutt Shorr (HE)

C. ERIC Clearinghouse on Information Resources

1. New ERIC Training Package Available

Each Clearinghouse and component of the ERIC system should have received a sound microfiche, ERIC BASICS. This 48 frame color microfiche is accompanied by a 10 minute audiocassette and instructions for use. It is intended for individuals who have never used ERIC and who want an orientation to RIE, CIJE, and the Thesaurus. It should save librarians a lot of time when someone asks, "Would you tell me about ERIC?"

This ERIC BASICS package was field tested with the designated audience and reviewed by five Clearinghouses. Recommended changes were incorporated in the final version.

11080

Publicity in each Clearinghouse newsletter and in contacts with users would be appreciated. The sound microfiche package is available for \$10 postpaid from Information Resources Publications, Syracuse University, 130 Huntington Hall, Syracuse, New York 13210. (A slide/tape version of ERIC BASICS is available for \$50 from Information Resources Publications.)

...Donald P. Ely (IR)

D. ERIC Clearinghouse on Languages and Linguistics

1. Kathleen McLane Leaves ERIC

The ERIC Clearinghouse on Languages and Linguistics is sad (for us) and happy (for Kathleen) to announce that Kathleen McLane left her position as Assistant Director as of April 21, 1980 to assume the position of Information Management Consultant with Berul Associates of Rockville, Maryland. During the past six years, Kathleen has made an outstanding contribution not only to this Clearinghouse, but also to the ERIC system as a whole. We will miss her wit and incisive mind.

...Peter Eddy (FL)

2. Foreign Visitors at ERIC/FL

On March 12, 1980, Linda Turner and John Brosseau gave an ERIC workshop, including a computer searching demonstration, to a visiting delegation from the Peking Foreign Experts Bureau. The delegation, which was particularly interested in ESL, spent half a day at the Center for Applied Linguistics.

On March 24, 1980, Kathleen McLane and Linda Turner conducted an ERIC workshop, including a computer searching demonstration, for a group of Syrian ESL supervisors touring the United States. Their visit to ERIC/CLL was arranged by the American Language Institute as part of their schedule of educational activities in the Washington area.

...K.M. (FL)

3. Indochinese Information Via ERIC

The National Indochinese Clearinghouse and Technical Assistance Center (NICTAC), which is operated by the Center for Applied Linguistics, reports that it averages 50 referrals to ERIC each day on its 800 number and by mail. These calls are primarily requests from practitioners and community workers for copies of the *Indochinese Refugee Education Guides*. Since the Guides are out-of-print and are now available *only* from ERIC, callers are directed to the microfiche collection closest to them and/or EDRS, as appropriate.

...Kathleen McLane (FL)

E. ERIC Clearinghouse on Science, Mathematics, and Environmental Education

1. ERIC/SMEAC Former Staff Members in the News

Dr. Richard Sagness assumed the position of Dean of the College of Education at the State College of Idaho at Pocatello.

Dr. Arthur Lucas (Chairman, Department of Education at Flinders University in Australia) is on leave at Chelsea College in England.

Dr. James Kozlow and Dr. Arthur White were honored by having their article for the *Journal of Research in Science Education* selected as the best article published in 1979. They will present their paper and receive an award at the annual NARST meeting this spring.

...B.M. (SE)

2. ERIC/SE Staff News

Dr. Stanley Helgeson assumed the office of President of the National Association for Research in Science Teaching for 1980-81.

Dr. Robert Howe was in Egypt for approximately two weeks in February and March. He was working with several colleges and the Ministries of Education and Health. Mr. Hussein Mahmoud from the Egyptian Ministry of Education is on the staff of ERIC/SMEAC and completing a Ph.D. at Ohio State University this year. Cooperative programs with Egyptian agencies and institutions are being developed.

Dr. Marilyn Suydam attended and participated in an international meeting on mathematics education in Germany in January.

...B.M. (SE)

3. ERIC/SE Staffing Changes

Effective January 1, 1980, the following staff changes have been made:

- *Dr. Patricia Blosser from Research Associate to Associate Director for User Services for the SMEAC Information Reference Center and the ERIC Clearinghouse for Science, Mathematics, and Environmental Education. Dr. Blosser is Professor of Science Education at Ohio State University and has been a staff member of ERIC/SMEAC for a number of years. Pat is active in teaching, research, and service*

activities. She is a Past-President of the Association for Education of Teachers in Science and is currently on the Board of Directors of the National Science Teachers Association.

- *Dr. Marilyn Suydam from Research Associate to Associate Director for Mathematics Education for the SMEAC Information Reference Center and the ERIC Clearinghouse for Science, Mathematics, and Environmental Education.* She replaces Dr. John Higgins who is staying on the staff as a Research Associate. Dr. Suydam is a Professor of Mathematics Education at Ohio State University and has also been a staff member of ERIC/SMEAC for a number of years. Dr. Suydam has been active in research and service activities. She has been involved in a variety of association activities including serving as editor of a National Council of Teachers of Mathematics yearbook and as a member of the Board of Directors of the School Science and Mathematics Association.
- *Mr. Tom Grimes from Clerk to Program Assistant.* Mr. Grimes will be assisting on a variety of activities with primary responsibilities in user services and processing publications.

...Bev Malcolm (SE)

F. ERIC Clearinghouse on Social Studies/Social Science Education

1. CIJE Processing Survey

For the purpose of investigating a bit further the time lag between appearance of citations in CIJE and in *Education Index*, the ERIC Clearinghouse on Social Studies/Social Science Education surveyed 50 core journal input for the period August-November 1979. The modus operandi was to tabulate days in process at the Clearinghouse, note publication date in CIJE, and compare CIJE publication date with *Education Index's* publication date of the same citations. Several interesting results were noted:

- 50's turnaround time averages 8½ days for core journals.
- The *Education Index* publisher seems to have achieved an especially short turnaround time, judging from the date we logged several journals in and the date the corresponding citations appeared in *Education Index*. In several cases, *Education Index's* publication date was only a few weeks after our log-in date.
- One journal was cited in *Education Index* months before we even received the journal. We are trying to speed up this process by requesting that publishers send us their journals as soon as they are available.

- SO's citations in CIJE average one to two months behind the same citations in *Education Index*. On no occasion did we beat them and we published at the same time on only a few occasions.

Has anyone else done a similar survey? We would be interested to hear news from other Clearinghouses.

...Diana Beer (SO)

2. Visitor from Deutschland at ERIC/SO

Horst Pötsch, Division Director for Social Sciences Education, Department of Education, Federal Republic of Germany, Bonn, visited ERIC/SO on February 24-29, 1980. In his position as head of Social Science Education for the Federal Republic, Mr. Pötsch is responsible for developing publications for both teachers and students. For this reason, he requested staff assistance in identifying documents in the ERIC system that would provide information about new approaches to social studies curricula, instructional aids, theory and practice in the U.S.A. In addition, he worked extensively with James E. Davis in developing a plan for setting up a system similar to ERIC in Germany.

...Char Purvis (SO)

3. SO Poster Project

The ERIC Clearinghouse for Social Studies/Social Science Education is currently working on a two-color system-wide attention-attracting poster. Letters have been sent to each Clearinghouse for feedback and ideas relating to six possible slogans. A progress report, along with tentative drawings, will be presented at the May Technical Meeting.

...Carol Krismann (SO)

G. ERIC Clearinghouse on Teacher Education

1. Mima Spencer to Chair ASIS SIG/ISE Group

Mima Spencer, Associate Director of the ERIC Clearinghouse on Elementary and Early Childhood Education, is chairperson-elect of the Special Interest Group on Information Services to Education (SIG/ISE) of the American Society for Information Science (ASIS). She is also the chairperson of the planning committee for the combined SIG/ISE and SIG/MGT (Management) session to be held at the October meeting of ASIS in Anaheim, California. The topic of the session will be "Time Management and Setting Priorities."

...L.B. (PS)

2. PS Staff Attends National Online Meeting

Two PS staff members attended the National Online Information Meeting in New York City on March 25-27, 1980. Mima Spencer participated in the Forum for Online User Groups by co-chairing a session on "How to Plan and Hold an Online Conference or Workshop." Linda Baskin coordinated the poster session and organized student volunteers for the Forum.

...L.B. (PS)

3. Evening Hours at ERIC/EECE Library

Staff members of the ERIC Clearinghouse on Elementary and Early Childhood Education are pleased with the response of users to the recently extended hours of the ERIC/EECE Library. The Library is now open from 5-9 p.m., Monday through Thursday, in addition to the regular hours of 8-5, Monday through Friday.

Approximately 200 people have visited the Library during the evening hours since they began on January 28. Flyers announcing the new hours were posted on doors and elevators in the College of Education, placed in department mailboxes, and sent to area schools and day care centers. Visitors have included students with evening classes and people in the community with full time jobs. Workshops for evening classes have also increased. The evening hours are covered by ERIC/EECE staff members in exchange for release time during the regular work week.

...Linda Baskin (PS)

LIST OF ATTACHMENTS

- Attachment 1: Announcement of Proposed IAP Titles for Renewed Clearinghouse Contracts
- Attachment 2: Hidden Word Puzzle
- Attachment 3: Mandatory "Educational Level" Descriptors
- Attachment 4: Mandatory "Age-Level" Descriptors
- Attachment 5: New Information Analysis Products
- Attachment 6: Remove List - RIEAPR80
- Attachment 7: CIJE Input by Clearinghouse (CIJEMAR80 and CIJEAPR80)
- Attachment 8: RIE Input by Clearinghouse (RIEAPR80)
- Attachment 9: Microfiche Inventory and Quality Control Check (RIEDEC79 and RIEJAN80)

ANNOUNCEMENT OF PROPOSED IAP TITLES FOR RENEWED CLEARINGHOUSE CONTACTS

I. ERIC CLEARINGHOUSE ON COUNSELING AND PERSONNEL SERVICES

Renewal Date: January 1, 1980

- A. Programs and Practices in Adult Counseling
- B. Research and Practice in Student Support Services
- C. Stress Counseling
- D. Strategies for Futurizing Counseling
- E. Counseling the Displaced Homemaker
- F. Counseling for Weight Reduction
- G. Counseling for Mid-Life Career Change
- H. Counseling for Retirement
- I. Counseling for Counselor Burn-out
- J. Career Development Programs and Practices
- K. Counseling for Leisure Time
- L. Parent and Family Counseling
- M. Futurism in Counseling
- N. Marriage Counseling

II. ERIC CLEARINGHOUSE ON EDUCATIONAL MANAGEMENT

Renewal Date: January 1, 1980

- A. Communications and the Open Organization
- B. Administration of Mainstreaming
- C. Administrator Selection
- D. Conflict Management
- E. Implementing Change and Innovation
- F. Teacher Motivation
- G. Merit Pay Programs
- H. Administrator Evaluation
- I. Individualized Instruction
- J. Teachers Have Rights, Too
- K. School Leadership Handbooks

III. ERIC CLEARINGHOUSE ON ELEMENTARY AND EARLY CHILDHOOD EDUCATION

Renewal Date: February 1, 1980

- A. Integration of Affective and Cognitive Processes in Young Children
- B. After School Day Care
- C. The Federal Role in Parent Involvement
- D. Parents and Teachers: Significant Distinctions
- E. Second Language Learning in Young Children: Considerations for Program Planners
- F. Stress and the Elementary School Child
- G. Managing Children in the Elementary Classroom: A Review of Research
- H. Socialization of Children in Classrooms
- I. Parenting—Now and in the Future

- J. Model Programs for After School Day Care
- K. Day Care Centers in the U.S.
- L. International Year of the Child Materials from Around the World
(An Annotated Bibliography)
- M. CDA Resources for Advisors/Teachers

IV. ERIC CLEARINGHOUSE ON INFORMATION RESOURCES

Renewal Date: January 1, 1980

- A. Research into Practice: School Library Media Centers
- B. Research into Practice: Educational Technology
- C. Public Libraries/School Libraries: The Issues, the Research
and the Future
- D. Directory of Academic Programs in Information Science
- E. Productivity in Instruction: Considerations, Conditions, and Costs
- F. The School Library Media Specialist as a Linking Agent
- G. AECT Annual Review Paper for ECTJ
- H. Videodiscs for Educatic

V. ERIC CLEARINGHOUSE ON RURAL EDUCATION AND SMALL SCHOOLS

Renewal Date: April 1, 1980

- A. College and University Outdoor Education Centers: Present Status
and Recommendations for the Future
- B. Cost Differential for Rural Schools
- C. Guidelines for Librarians in Small Rural Schools
- D. Organizing Migrant Parent Advisory Committees
- E. Some Methods in Resolving Discipline Problems for Indian Student
- F. Strategies Needed to Encourage Minority Students
- G. Utilizing Rural Areas to Teach Scince
- H. Utilizing Rural Areas to Teach Social Studies

VI. ERIC CLEARINGHOUSE FOR SCIENCE, MATHEMATICS, AND ENVIRONMENTAL EDUCATION

Renewal Date: January 1, 1980

- A. Abstracts of Presented Papers, National Council of Teachers of
Mathematics, 1981
- B. Research in Mathematics Education (K-College)
- C. Teaching Problem Solving in Mathematics
- D. Unpublished Instruments in Mathematics Education, Volume 2
- E. Applications of Mathematics to Science
- F. Annual Review of Research in Science Education, 1979
- G. Abstracts of Presented Papers (NARST), 1980
- H. Activity Sourcebook for Earth Sciences

Answers: ERIC, Oryx, GPO, Thesaurus, Descriptors, RIE, CIDE, EDRS, Term, Terminal, Identifier

MANDATORY
"EDUCATIONAL LEVEL"
DESCRIPTORS
(Procedure implemented in February 1975)

In the ERIC system, one or more of the fourteen (14) Descriptors listed below must be used to index educational level, when a document or journal article deals with such levels.

These Descriptors are listed in this introduction for the convenience of ERIC indexers. Guidelines for their use are covered on pages 238-238(G) of the ERIC Processing Manual. Indexers should read and become familiar with these guidelines before using this list.

o EARLY CHILDHOOD EDUCATION

Scope Note: Activities and/or experiences that are intended to effect developmental changes in children, from birth through the primary units of elementary school (grades K-3).

oo PRESCHOOL EDUCATION

Scope Note: Activities and/or experiences that are intended to effect developmental changes in children, from birth to entrance in kindergarten (or grade 1 when kindergarten is not attended).

oo PRIMARY EDUCATION

Scope Note: Education provided in kindergarten through grade 3.

o ELEMENTARY SECONDARY EDUCATION

Scope Note: Formal education provided in kindergarten or grade 1 through grade 12.

oo ELEMENTARY EDUCATION

Scope Note: Education provided in kindergarten or grade 1 through grade 6, 7, or 8.

ooo ADULT BASIC EDUCATION

Scope Note: Education provided for adults at the elementary level (through grade 8), usually with emphasis on communicative, computational, and social skills.

ooo PRIMARY EDUCATION

Scope Note: (See above.)

ooo INTERMEDIATE GRADES

Scope Note: Includes the middle and/or upper elementary grades, but usually 4, 5, and 6.

oo SECONDARY EDUCATION

Scope Note: Education provided in grades 7, 8, or 9 through grade 12.

ooo JUNIOR HIGH SCHOOLS

Scope Note: Providing formal education in grades 7, 8, and 9 -- less commonly 7 and 8, or 8 and 9.

ooo HIGH SCHOOLS (Changed from "Senior High Schools" in March 1980.)

Scope Note: Providing formal education in grades 9 or 10 through 12.

oo SECONDARY EDUCATION (Cont'd)

ooo HIGH SCHOOL EQUIVALENCY PROGRAMS

Scope Note: Adult educational activities concerned with the preparation for and the taking of tests which lead to a high school equivalency certificate, e.g., General Educational Development program.

o POSTSECONDARY EDUCATION

Scope Note: All education beyond the secondary level -- includes learning activities and experiences beyond the compulsory school attendance age, with the exception of adult basic education and high school equivalency programs. (Before APR75, restricted to "education beyond grade 12 and less than the baccalaureate level.")

oo HIGHER EDUCATION

Scope Note: All education beyond the secondary level leading to a formal degree.

oo TWO YEAR COLLEGES (Changed from "Junior Colleges" in March 1980.)

Scope Note: Public or private postsecondary institutions providing at least 2, but less than 4, years of academic and/or occupational education.

MANDATORY
"AGE-LEVEL"
DESCRIPTORS
(Procedure implemented in March 1980)

The eight (8) Descriptors listed below are used to index age level in the ERIC system. Each covers a specific age range. One or more of these Descriptors must be posted to ERIC documents or journal articles concerned strictly with age-level groups or populations. However, appropriate educational level Descriptors should always be considered first and be given precedence over these age levelers. For instance, a document properly indexed with EARLY CHILDHOOD EDUCATION (mandatory educational leveler) should not also carry the age leveler YOUNG CHILDREN, unless a subset of the total population with which the document is concerned falls outside the scope of early childhood education. (In other words, the use of YOUNG CHILDREN would be appropriate if a part of the subject population is not adequately conveyed by the activities and experiences with which early childhood education is normally concerned.) Also, the broader-narrower relationships among these terms should always be considered in indexing. As with the educational levelers, the use of a narrower term (e.g., YOUNG CHILDREN) would usually obviate the need to also use its broader term (e.g., CHILDREN), and vice versa.

Expanded guidelines for use of the mandatory age levelers are being incorporated into the next revision of the ERIC Processing Manual, scheduled for completion in the spring of 1980. In the meantime, indexers should base their decisions to use these Descriptors on the individual document and the importance of age-level as a retrieval tag.

-
- o CHILDREN
Scope Note: Aged birth through 12 years.
 - oo YOUNG CHILDREN
Scope Note: Aged birth through 8 years.
 - ooo INFANTS
Scope Note: Aged birth to 24 months.
 - ooo PRESCHOOL CHILDREN
Scope Note: Aged 2 through 5 years.
 - o ADOLESCENTS
Scope Note: Aged 13 through 17 years.
 - o ADULTS
Scope Note: Aged 18 years and over.
 - oo MIDDLE AGED ADULTS
Scope Note: Aged 45 through 64 years.
 - oo OLDER ADULTS
Scope Note: Aged 65 years and over.

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC CLEARINGHOUSE ON LANGUAGES AND LINGUISTICS

- a. *A Linguistic Guide to English Proficiency Testing in Schools.* Thomas Dieterich and Cecilia Freedman. Price: \$5.95.

A critique and catalog of currently used measures of oral English proficiency.

- b. *Testing in Foreign Languages, English as a Second Language, and Bilingual Education, 1966-1979: A Select, Annotated ERIC Bibliography.* Compiled by Dale Lange and Ray Clifford.

Contains approximately 1,600 annotated journal and document citations on language testing. Price: \$7.95.

- c. *A Guide to Language Camps in the United States.* Lois Vines. Price: \$3.95.

A directory, resource guide, and annotated bibliography.

- d. *ACTFL 1979: Abstracts of Presented Papers.* Price: \$5.95.

500-word abstracts of more than 50 of the papers presented at the ACTFL annual meeting held in Atlanta in November 1979.

2. ERIC CLEARINGHOUSE FOR SCIENCE, MATHEMATICS, AND ENVIRONMENTAL EDUCATION

- a. *Understanding the Realities of Problem Solving in Elementary School with Practical Pointers for Teachers.* December 1979. Price: \$2.00.

This paper is divided into three parts. Part I connects the reality of the classroom with the idealism which arises from some of the problem solving literature. It is argued that a broader concept of problem solving is needed to provide a perspective for bridging the gap between the conceptions of the problem solving in the literature and typical classroom practice. Part II examines what "problem solving" might mean in the context of the elementary school classroom. Part III considers how children can be helped to understand the non-arbitrary character of rules of arithmetic by examining the connectedness of mathematical ideas, rules and procedures. Also included is a list of references and recommended readings, a list of specific pointers for teachers, and a conclusions section.

- b. *Some Theoretical Issues in Mathematics Education: Papers From a Research Pre-session.* December 1979. Price: \$2.50.

Three addresses by internationally renowned mathematics researchers and a fourth paper on the role of research are presented. Each of the addresses focuses on the learning process, but from different points of

view. Heinrich Bauersfeld provides an analysis of the miscommunication inherent in many teacher-student interactions. Four deficient areas of research are discussed. Efraim Fischbein directs attention to the role of intuition in learning. Hans Freudenthal traces the growth of number and geometry ideas in one child. The fourth paper, by Richard Lesh, identifies four problem areas needing research.

- c. *Applied Mathematical Problem Solving*. November 1979. Price: \$6.50

This collection of nine papers, prepared for a conference held at Northwestern University in 1978, presents varied perspectives on applied problem solving. Assessing applied problem solving, planning for interest and motivation, developing a theory, reviewing research findings, considering learning disabilities, analyzing through information processing, designing instruction, trends in research, and models for applied problem solving are presented.

- d. *National Association for Research in Science Teaching 53rd Annual Meeting, Abstracts of Presented Papers*. 1980. Price: \$4.25.

This publication contains abstracts of papers to be presented at the 53rd annual meeting of the National Association for Research in Science Teaching (NARST), held in Boston, Massachusetts, April 11-13, 1980. Papers relate to research techniques, learning, cognitive development, instruction, science curriculum, teacher education (preservice, inservice) and other topics.

- e. *Research Reporting Sections, Annual Meeting of the National Council of Teachers of Mathematics*. 1980. Price: \$1.75.

Presented are abstracts of 14 research reports. Topics covered include: (1) the effects of games on mathematics skills and concepts; (2) the use of problem-solving heuristics in the playing of games involving mathematics; (3) sex differences in electing mathematics; (4) the origins of sex differences in high school mathematics achievement and participation; (5) the long-term consequences of sex differences in high school mathematics achievement; (6) locus of control and mathematics instruction; (7) the interaction of general reasoning ability and Gestalt and analytic strategies of processing spatial tasks with transformational and nontransformational treatments in secondary school geometry; (8) student performances, individual differences, and modes of representation; (9) the development of problem-solving capabilities in primary grade children; (10) story problems; (11) spatial visualization skill and processes used in solving mathematical problems; (12) factors of organization and clarity in mathematics lessons; (13) the psychology of equation solving, an information processing study; and (14) number concepts and the introduction of calculus.

- f. *Values Activities in Environmental Education*. December 1979. Price: \$3.75.

This collection of class activities is intended to provide approaches to values discussion and clarification at all levels of the public

school. Activities are presented for elementary school, junior high school, and senior high school, and for ranges encompassing the entire range or various sequential ranges of grades. Subject areas involved in the activities include single subject areas or combinations of: science, mathematics, social studies, language arts, and fine arts. Each activity includes a purpose statement, grade level, subjects involved by discipline area, references, and an activity description. Activities place the student in a simulated circumstance where he or she must choose between conflicting values.

- g. *An Analysis of Mathematics Education in the Union of Soviet Socialist Republics*. December 1979. Price: \$4.25.

The current status of mathematics education in the Union of Soviet Socialist Republics is reported. The perceptions of Davis and Romberg reflect their own observations and discussions with Soviet educators. Kantowski and Rachlin give their impressions resulting from reading reports on Soviet research techniques and findings. Davis and Romberg discuss common practices in present Soviet schools, difficulties in language, Soviet mathematics curricula, and mathematics education research and development in the Soviet Union. Rachlin considers Soviet approaches to the study of problem-solving processes in mathematics, while Kantowski gives another view of the value of studying mathematics education research and development in the Soviet Union.

- h. *Current Issues V: The Yearbook of Environmental Education and Environmental Studies. Selected Papers from the Eighth Annual Conference of the National Association for Environmental Education*. November 1979. Price: 6.00.

These proceedings are divided into two major sections. Section I contains papers based on original research and thought and are intended as examples of products of rigorous scholarship. This section is subdivided into three subsections covering the future, the present, and the past. Papers appearing in this section were reviewed by at least two researchers selected for their expertise relative to the article being examined. Twelve papers appear in this section. The second section includes descriptive or journalistic papers and program reviews. Papers for this section are intended to be useful and of interest to environmental educators. In all, 16 papers appear in Section II. A section of guidelines for authors concludes the document.

3. ERIC CLEARINGHOUSE FOR SOCIAL STUDIES/SOCIAL SCIENCE EDUCATION

- a. *Law in the Classroom: Activities and Resources*. Mary Jane Turner. (#239-3; Price: \$17.00).
- b. *Global Issues: Activities and Resources for the High School Teacher*. Kenneth A. Switzer and Paul T. Mulloy (#240-7; Price: \$7.95).
- c. *Learning to Live in Society: Toward a World View of the Social Studies*. Edited by Richard E. Gross and David Dufty (#241-5; Price: \$14.95).

- d. *Social Studies in the Mainstreamed Classroom, K-6.* Anna S. Ochca and Susan K. Shuster (#242-3; Price: \$11.95).
- e. *Staff Development for the Social Studies Teacher.* Elizabeth Dillon-Peterson and G. Dale Greenawald (#234-1; Price: \$6.95).
- f. *Data Book of Social Studies Materials and Resources.* Volume 5, Edited by Judith E. Hedstrom (#244-X; Price: \$10.00).
- g. *Future Studies in the K-12 Curriculum.* John D. Haas (#245-8; Price: \$8.95). Published jointly with ERIC/CAPS.
- h. *Consumer Education Sourcebook.* Dorothy Lungmus et al. (#246-6; Price: \$9.95).

ACTION ITEMS

1. COPYRIGHT RELEASE POLICY (REVISITED)

The copyright release policy stated in the April 1980 *ERIC Administrative Bulletin* has brought a number of inquiries regarding the requirement to obtain a copyright release statement for Federal documents that are not created by the Department of Education. We have discussed the issue with our copyright attorney and the policy is amended as follows:

"Federal documents produced inside and outside the Department of Education may be entered into ERIC without a copyright release, with the following exceptions:

- *If Department of Education documents claim copyright, a check should be made through the monitor to determine the validity of the claim.*
- *If non-Department of Education documents claim copyright, then copyright release should be obtained for these documents."*

These copyright policies will be incorporated into the "Acquisitions" section of the *ERIC Processing Manual*.

...B.C. (Central ERIC)

2. NIE LIBRARY REQUEST FOR LEVEL 3 DOCUMENTS

The NIE Library requests that Clearinghouses collect and forward to it copies of Level 3 documents and books, where it is possible to do so. Frequently, Clearinghouses receive free copies for examination, or are in a position to request them, and do not keep them for their own use. The NIE Library makes a good central depository where these materials will continue to be available. Please send such material to Frank Pryars at NIE.

...B.C. (Central ERIC)

3. SHARING PRINTING COSTS OF IAPs

Central ERIC has sometimes requested from the Clearinghouses additional copies (over the 10 required) of IAPs in order to respond to specific requests from NIE staff and other important constituencies. We do this, however, only if we feel that it serves and promotes the best interest of ERIC. We understand that, for some Clearinghouses, providing these copies over time has been an added cost burden. We are therefore suggesting that,

if your Clearinghouse feels the need for NIE to share in this added expense, you include the following statement in your next Clearinghouse technical proposal and budget for it in the cost proposal:

"The Clearinghouse will supply NIE with 10 copies of each IAP produced during the contract year and, upon request, furnish up to an additional 20 copies of assorted IAPs."

...Bob Chesley (Central ERIC)

I. ERIC TECHNICAL STEERING COMMITTEE ANNOUNCEMENTS

The ERIC Technical Steering Committee met immediately following the National Technical Meeting to consider issues that surfaced at the Meeting. As a result, the Committee will forward nine recommendations to Central ERIC for their decision. The recommendations, a summary of the Technical Meeting, and a review of the evaluations will be attached to a future issue of the EAB. In the meantime, here are a few announcements and reminders:

- In order to summarize the national meeting, session reports are needed. Recorders are reminded to forward their reports to Marilyn Shorr as soon as possible.
- Each Clearinghouse should send a list of its heavily posted Identifiers to the Facility.
- At the indexing sessions of the Technical Meeting, consensus was reached on several indexing principles. The next EAB will summarize these guidelines. They will also be referred to the Facility for appropriate consideration for the *ERIC Processing Manual*.
- Please remember that Clearinghouse responsibility for promoting the new ERIC *Thesaurus* did not end with the marketing session at the Technical Meeting. Continue to generate ideas for both Oryx Press and your individual Clearinghouse. Anything the Clearinghouses can do to promote the *Thesaurus* to its constituents is a vital part of this PR project.

...Marilyn Shorr (HE)

II. CENTRAL ERIC ANNOUNCEMENTS

A. ERIC Technical Meeting - 1980

The annual National ERIC Technical Meeting was held in Alexandria, Virginia, at the Seminary Road Ramada Inn on May 6-8, 1980. A packed

and interesting agenda structured by the ERIC Technical Steering Committee kept all the participants actively involved during the 2½ day conference.

This meeting was the first of its kind, concentrating on a specific theme rather than covering the entire gamut of ERIC operations. In this case, the principal topic of discussion concerned the implementation of the new and completely revised *Theaurus* which has resulted from the intensive ERIC Vocabulary Improvement Program carried on over the past 2½ years.

Agenda items included work sessions on indexing and abstracting, design of search strategies using new *Theaurus* terms, orienting users to the existence and implications of the new *Theaurus*, search management issues from both manual and online aspects, the establishment of strategies for tough search topics, and methods of establishing consistent indexing practices.

Pleasant encouragement was provided during the conference's group luncheon when Dr. Milton Goldberg, Associate Director, NIE/DIP, addressed the conferees. In his remarks, Milt indicated how sincerely impressed he was with the dedication that ERIC personnel evidenced in their work and how apparent that spirit and professionalism was at the session of the meeting he had attended.

It was virtually unanimous on the part of the conferees that the meeting had been very intensive and extremely fruitful. In fact, many ERIC veterans expressed the feeling that this meeting had been the most productive of any held over the past twelve years, primarily because sufficient time had been provided to come to closure on the important issues being discussed.

...F.S. (Central ERIC)

B. American Education Magazine

In response to several Clearinghouse requests, arrangements have been made to have all ERIC Clearinghouses added to the Department of Education free mailing list for *American Education* magazine. Starting date for first delivery is not known at this time, but it should be in the not too distant future. (Expressions of gratitude should be addressed to Frank Bryars.)

...Frank Smardak (Central ERIC)

C. Collaboration with the R&D Exchange

The Appalachian Education Laboratory (AEL) Regional Exchange published in its March 1980 *Bulletin* a news item on the mini-bibliographies produced by the ERIC Clearinghouse on Reading and Communication Skills (CS). The *Bulletin* is mailed to 700 educators in the 11 southeastern states served by the AEL Regional Exchange.

I am informed the the AEL Regional Exchange would be pleased to announce in future issues of its *Bulletin* the availability of similar materials from other ERIC Clearinghouses, as space permits. If interested in this dissemination vehicle for reaching educators in the southeastern region of the country, send a sample packet of any materials that would be available to:

Ms. Marilyn B. Slack
Bulletin Editor
AEL Regional Exchange
Appalachia Educational Laboratory
P.O. Box 1348
Charleston, West Virginia 25325

Marilyn will then contact the Clearinghouse to make arrangements for featuring certain materials in a particular issue and for receiving multiple copies (100 suggested) for responding to requests.

We encourage this type of collaboration between ERIC and the R&D Exchange for the purpose of serving educators.

...Mildred Thorne (Central ERIC)

III. ERIC FACILITY ANNOUNCEMENTS

A. ERIC Users Conference to be Held at ALA in 1980

The ERIC Users Conference, in an effort to approach the large audience offered by librarians, academic librarians, school librarians, and media center staff, will be held in 1980 as an *ACRL-sponsored Pre-Conference of the American Library Association (ALA) Annual Conference in New York City.

ALA will run from June 29 to July 5; the Pre-Conference will run from June 27 to June 28.

Because of its size, the ALA conference typically uses several hotels in any city in which it is held, and New York is no exception. However, the central conference hotel, at which most sessions will be held, is the New York Hilton. The ERIC Users Conference will be held in that hotel. (Please see Attachment 1 for a list of hotels in the area recommended by ALA.)

Special efforts are being made this year to publicize this change in venue. Notice of the ERIC meeting will appear in the ALA Preliminary Program, the final Conference Program, and in several library-related journals appearing from March to June. A significantly increased audience is anticipated in 1980, with numerous new faces.

Attachment 2 is a copy of the Preliminary Agenda for the ERIC Users Conference. Total-group sessions last for 1½ days. Many

sessions are specifically designed for the first-time library and school library oriented attendee. Handouts will be numerous and in several cases there are handouts paralleling the presentations, thereby saving the attendees much note-taking. On Saturday afternoon the conference breaks up into small groups for some hands-on searching opportunities using the ERIC data base and all three of the major online vendors.

The ERIC Users Conference is free and all are invited who would like to find out more about how ERIC may fit into their information needs.

Pre-registration is requested, so that we can determine in advance the size of the rooms needed and other logistical requirements. Attachment 3 is a pre-registration form for your convenience. Please complete one form per person and return it to the ERIC Facility, as indicated on the form.

*ACRL—Association of College and Research Libraries

...T.B. (ERIC Facility)

B. OCR Keying

In a pair of memos dated February 5 and February 13, 1980, respectively, the ERIC Facility transmitted to the Clearinghouses stock of a new, smaller, and more convenient 8½" x 11" OCR form, together with instructions for its use. Since separate memos have a way of getting lost, we thought it might be prudent to repeat some of the information in the EAB, thereby making it more "findable." Some additional new information is also included.

- Follow-on Sheets

Because of the smaller size, occasional resumes will require two sheets. Simply begin the second sheet with the Clearinghouse accession number, following the instructions in the *OCR Keying Manual* (p. 33).

- Line Corrections (Descending Order; CIJE on Same Sheet as Resume)

Key line corrections in descending order, according to the *OCR Keying Manual*. RIE and CIJE keying conventions are now identical, with the sole exception being that CIJE corrections must be keyed on the same OCR form as the resume being corrected. The Oryx data processing subcontractor cannot handle corrections separated from the resume to which they apply.

- Typewriter Line Spacing (5 or 4½, but not 6)

The typewriters in the Clearinghouse that were modified to produce 5 lines per inch may still be used. In addition, Correcting Selectrics that have not been modified from their regular 6 lines per inch may now also be used.

In our original memos we said that the new scanner will accept 6 lines per inch. This is true; however, we have had other types of equipment problems that have led us to occasionally use the prior scanner as a backup device. The prior scanner will not take 6 lines per inch. Therefore, when using a 6 lines per inch regular typewriter, please set the machine's line space lever at $1\frac{1}{2}$. (This amounts to about $4\frac{1}{2}$ lines per inch and makes the resulting resumes scannable on either machine we use.)

- Blue Pens and Pencils Not to be Used

Do not make corrections or other editorial marks in blue pen or pencil (including non-reproducible blue). Such marks can be detected by the scanner. Red felt tip pens (not regular ink pens or red pencils, both of which contain lead) cannot be scanned and should be used in lieu of blue or other colors.

- Typewriter Maintenance

Regular inspection of all OCR forms that are produced should be performed to ensure that the quality of the forms is acceptable. Faint, broken, or smudged characters are not acceptable to the scanner and are an indication that either the typewriter is in need of adjustment by a service technician or that the wrong type of ribbon, or a worn ribbon, is being used. Extra care should be taken to make sure that the first character of the accession number is centered in the box in the upper left corner of the OCR form and that the accession number is keyed correctly. If the accession number is not keyed accurately and positioned properly, the entire resume may be rejected by the ERIC computer system or overlaid onto another resume.

- CIJE Resumes

Production keying at the Clearinghouse would be eased if more than one typewriter were available. As long as the OCR-A ball is used, the Clearinghouses may now use either the modified 5 lines per inch typewriter or regular unmodified typewriters set at $1\frac{1}{2}$ line spacing. It is hoped that this new flexibility will permit improved keying production of both RIE and CIJE resumes.

...T.B. (ERIC Facility)

C. Indexing to the Specific Level of Subject Matter Dealt With by the Document—Why This Practice is Advantageous for Retrieval

It can be demonstrated that indexing to the specific level of subject matter dealt with by the document (and *not* indexing automatically to higher generic levels) captures the maximum possible amount of information at the time of indexing and therefore permits the later

searcher the maximum amount of flexibility in retrieval. In other words, if the indexer "indexes up," then paradoxically the additional term(s) confuse the situation and do not permit the searcher to isolate certain topics or to make as many discriminations as could be made if the "specificity" rule were observed.

This can perhaps best be shown via an example:

Assume subjects A and B occurring in the same hierarchy, with A broader than B, e.g.:

*A Languages
B . American Indian Languages*

Assume three documents, X, Y, and Z

X deals with Languages in general

Y deals with American Indian Languages in particular

Z deals with Languages in general and American Indian Languages in particular

Assume two distinct indexing efforts I1 and I2. In the first effort the rule of specificity is observed. In the second effort, the indexer "indexes up" generically as well:

<u>Document</u>	<u>I1 Index Terms</u>	<u>I2 Index Terms</u>
X	A	A
Y	B	A,B
Z	A,B	A,B

As can be seen, under the specificity rule, each document is indexed uniquely; under the "index up" rule, documents Y and Z are indexed identically and therefore cannot be distinguished during retrieval.

Assume four search requests R1, R2, R3, and R4. In the first case the searcher wants to retrieve all documents dealing with Languages in general. In the second instance, the searcher wants only documents dealing with American Indian Languages. In the third case the searcher wants to retrieve all documents dealing with Languages in general or American Indian Languages in particular. In the fourth case, the searcher wants material on Languages in general but also on American Indian Languages as exemplars.

<u>Search</u>	<u>Search Terms</u>	<u>Retrieval Under "Specific" Rule</u>	<u>Retrieval Under "Index-Up" Rule</u>
R1	A	X, Z	X, Y, Z
R2	B	Y, Z	Y, Z
R3	A or B	X, Y, Z	X, Y, Z
R4	A and B	Z	Y, Z

As can be seen, the "index-up" rule leads to the inability to distinguish in retrieval between document Y and document Z. These two documents become identical as far as retrieval is concerned and always emerge together, even though their coverage is quite different. Another way to put it is that the searcher cannot isolate documents dealing just with topic A because it is assigned whether the true topic is A or B.

On the other hand, the "specific" rule permits the best of both worlds. If retrieval should be restricted to documents dealing with topic A then term A alone can be used in the search. If retrieval should include documents dealing with A and should also include any topics narrower to A, then term A can be OR'd with term B (and any other terms at the same NT level as B) and quite different search results will be obtained. The *Thesaurus* provides the information needed to structure such a search.

"Indexing up" creates an irreversible confusion that the searcher cannot later untangle during retrieval. "Indexing ^{specificity} specificity" permits the searcher, armed with the *Thesaurus* to go after either the material targeted specifically on the topic of interest or to go more broadly after ~~both~~ that topic and its many component topics. Indexing "specifically" gives the searcher options. "Indexing up" takes those options away.

...Ted Brandhorst (ERIC Facility)

D. Resumption of Monthly DJF Status Report

The *DJF Status Report* is included as Attachment 4. Issuance of this monthly report in the EAB was temporarily discontinued during the final days of the VIP. It last appeared in the EAB in October 1979.

The May 1980 report lists all new Descriptors processed since the issuance of the March 1980 *Thesaurus Working Copy*. Some of these terms are marked by asterisks; these will appear in the 1980 edition of the "Completely Revised" *Thesaurus* to be published by Oryx Press in June 1980. Another list of these asterisked terms, with Scope Notes and "USE" references, was given to all participants at the May 1980 National Technical Meeting. Asterisked or not, all new terms appearing in this *DJF Status Report* and marked as "implemented" may be used in current Clearinghouse indexing.

Now that the VIP has been concluded, the 1-month turnaround for Facility responses to new term recommendations is being resumed.

...J.H. (ERIC Facility)

E. More VIP Statistics

The following new tabulations have been calculated for the VIP work, from November 1979 to April 1980:

- November 1979
Thesaurus Totals: 5,291 main (indexable) terms
2,840 "use" terms
0 "invalid" terms (Percent of non-
indexable to
indexable terms =
54%)
8,131 total terms

- VIP Totals: 512 new main terms
841 transferred main terms
(now "use" terms)
123 "invalid" terms
18 purged main terms
563 new "use" terms
716 deleted "use" terms

- April 1980
Thesaurus Totals: 4,821 main (indexable) terms
3,528 "use" terms
123 "invalid" terms (Percent of non-
indexable to
indexable terms =
76%)
8,472 total terms

...Jim Houston (ERIC Facility)

IV. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Adult, Career, and Vocational Education (CE)

1. CE Participates in Various Meetings

The staff of the ERIC Clearinghouse on Adult, Career, and Vocational Education attended four key professional meetings during March 1980:

- Juliet Miller, Director, gave two presentations and displayed ERIC materials at a convention booth during the recent American Personnel and Guidance Association meeting in Atlanta, Georgia.

- Joel Magisos, Associate Director of the Information Services Division at the National Center, discussed continuing linkages with Vocational Education Research Coordinating Unit Directors at their annual meeting in Hilton Head, South Carolina.

- Bob Bhaerman, Assistant Director for Career Education participated on a panel entitled, "Dissemination of Evaluation Information" at the "Communicating Career Education" Conference sponsored by the Northwest Regional Educational Laboratory in Seattle, Washington.
- Nevin Robbins, Assistant Director for Adult Education, coordinated several activities at the Adult Basic Education Conference in Houston, Texas.

...J.M. (CE)

2. Memorial to Bonna Somerlott

Bonna Somerlott, Secretary to the Director of the ERIC Clearinghouse on Adult, Career, and Vocational Education, died on Sunday, April 27, 1980. After graduating from Johnstown High School in Ohio in 1978, she attended Columbus Business University for one year before joining the Clearinghouse staff in 1979. Her love of life, determination, and courage have been an inspiration to all of us who knew her.

...Juliet Miller (CE)

B. ERIC Clearinghouse on Counseling and Personnel Services (CG)

1. CG Participates in Meetings

The staff of the ERIC Clearinghouse on Counseling and Personnel Services participated in several meetings during the month:

- Dr. Garry Walz, Director, presented the keynote address at the seminar on vocational education, sponsored jointly by the School of Education (University of Michigan) and the Michigan Department of Education. Libby Benjamin, Associate Director, served as a session leader.
- Carol Jaslow presented a one-day ERIC search-strategy workshop in Minneapolis, Minnesota for state education librarians who search ERIC but do not have collections. The group had free search time on Lockheed, SDC, and BRS, and made full use of it.
- Helen Mamarchev, in her capacity as elected graduate student representative to the National Association of Women Deans, Administrators, and Counselors (NAWDAC), was in Cincinnati for the annual NAWDAC convention at which she was an invited speaker. Once again, CAPS ran free minisearchers for participants, who expressed delight with the results.

...Carol Jaslow (CG)

C. ERIC Clearinghouse on Handicapped and Gifted Children (EC)

1. Cassette Tape IAP Available from the Council for Exceptional Children

To support the idea that the resources and expertise of the schools should be highly involved in the prevention of and programming for chronic norm violators, The Council for Exceptional Children convened an Invisible College Conference on Education's Responsibility for Disruptive, Alienated, and Incarcerated Youth.

Presentations were made by 12 participants on the cutting edge of knowledge in this field. The participants' concerns were directed toward the development of programs and procedures that facilitate the maturation of young people and help lead them toward meaningful and normalized adult roles.

This tape album contains significant parts of each presentation delivered as well as excerpts from discussions that followed in the closed two-day college conference held January 8-9, 1979 in Carmel, California. The IAP is entitled "The CED Invisible College Conference on EDUCATION'S RESPONSIBILITY FOR DISRUPTIVE, ALIENATED, AND INCARCERTAED YOUTH." It consists of six cassette tapes, a program brochure and study questions which can serve for purposes of discussion. These materials were prepared by M. Angele Thomas, CEC.

The tape is available from The Council for Exceptional Children, Publication Sales Unit, 1920 Association Drive, Reston, Virginia 22091 (Stock No. 201, \$65.00, EC 123 069). A book (an IAP), based on the Invisible College Conference presentations, is in production. *Disruptive Youth in School* is now available.

...M.C. (EC)

2. EC Represented at Meeting Co-Sponsored by BEH and NDN

Lynn Smarte represented the ERIC Clearinghouse on Handicapped and Gifted Children at a meeting co-sponsored by the Bureau of Education for the Handicapped and the National Diffusion Network, on March 18-19, 1980. Participants included representatives from BEH and NDN, five State Facilitators, five State Implementation Grand Coordinators, and twelve Developer Demonstrators representing programs supported as Early Education Outreach Programs by BEH. All participants saw the Clearinghouse as a vital and integral part of this sub-network.

...M.C. (EC)

3. EC Advisory Board Meets on Acquisitions and Selection

Acquisitions and Selection procedures in the ERIC Clearinghouse on Handicapped and Gifted Children were examined

and evaluated by a 4-member Advisory Board on March 17-18, 1980. The members, who were invited to participate on the basis of acknowledged expertise in their fields of specialization and service to the educational community, were as follows:

- Dr. Albert Fink
University of Indiana (behavioral disorders)
- Dr. Daniel P. Keating
University of Minnesota (gifted)
- Dr. Barton B. Proger
Montgomery County Intermediate School District 123,
Pennsylvania (program development and evaluation)
- Dr. Geraldine Scholl
University of Michigan (visually handicapped)

The Board studied ERIC and Clearinghouse guidelines, "walked a document through," engaged in "hands on" selection, brainstormed with the Clearinghouse selection team, and pored through acquisitions printouts to identify gaps and develop a model networking schema. Outcomes include invaluable suggestions for refining and upgrading the selection form, using the "hands on" selection exercise for periodic field evaluation, and implementing the model networking schema.

...M.C. (EC)

4. Donald K. Erickson Writes Preface for *Special Education Index to Parent Materials*

In the preface which he was invited to write for the forthcoming *Special Education Index to Parent Materials* (a NICSEM publication), Donald K. Erickson cited the significance of the seventies for the education of handicapped children and the challenges of the eighties.

The *Index* is important, according to Erickson, and will contribute to education for the handicapped learner in the eighties because it describes 2,580 materials to be used by parents of handicapped learners in the home. He notes that the law specifies involvement of parents in educational planning and that evidence shows an increasing number of parents are becoming involved in the education of their handicapped children.

...M.C. (EC)

5. EC Staff Attends the 58th Annual International Convention of The Council for Exceptional Children

The ERIC Clearinghouse on Handicapped and Gifted Children staffed the booth of The Council for Exceptional Children during

its 58th Annual International Convention in Philadelphia, Pennsylvania, April 21-25, 1980, where many questions were answered. Products of all ERIC Clearinghouses were displayed; systemwide products were dispensed upon request. Scheduled periods provided attendees with an opportunity to communicate with authors of Information Analysis Products produced by the EC Clearinghouse. Throughout, a captivated cluster of observers focused on the online searching. The kinds and numbers of special educators' questions about ERIC indicated increasingly sophisticated knowledge about and reliance upon the ERIC network.

...Marion Cambel (EC)

D. ERIC Clearinghouse on Higher Education (HE)

1. HE Staff Attends Annual Association for Institutional Research Conference

Jon Fife, Marilyn Shorr, and Lynn Barnett represented the ERIC Clearinghouse on Higher Education at this year's annual Association for Institutional Research Conference held in Atlanta, Georgia. The three staffed an ERIC exhibit and demonstrated computer searching.

...M.S. (HE)

2. Bill Mayville Receives Doctorate in Higher Education

Congratulations go to Bill Mayville, Research Associate, who received his doctorate in higher education at George Washington University's spring graduation.

...Marilyn Shorr (HE)

E. ERIC Clearinghouse on Information Resources

1. Quality of Indexing in ERIC Files

Apologies to Brutus, I write not to condemn ERIC but to praise him. Every time we go through an analysis of the quality of indexing and abstracting in ERIC, we note that, to really do an adequate job, we need to compare the indexing and abstracting records with the original document. I had an opportunity to do that this spring and thought you would like to know that the results were very encouraging. I had my indexing/abstracting class from the School of Information Studies review a random sample of 200 resumes selected from the 1979 volume of *Resources in Education*. The 1979 volume was selected because it followed in time such efforts at improving the quality of indexing and abstracting as the *Abstractor/Indexer Workbook*.

Indexing was reviewed in terms of evidence of scope, comprehensiveness, specificity, etc. Abstracts were considered using such criteria as appropriateness of type, quality of topic sentence, density of information, terseness, and cohesiveness of style.

For the sake of accuracy, some instances of over- and mis-indexing were noted, and there was an occasional sentence that would choke a horse. But a recurring theme in the analysis was: scope of document was evident; all indexable concepts were treated; indexing was to the level of specificity in the document; abstract was of appropriate type; there was a high density of information; the style was acceptable.

Here's to us—Cheers!

...Bruce Clark (IR)

F. ERIC Clearinghouse for Social Studies/Social Science Education

1. German Educators Visit SO

Dr. Heinz Reiske, Deputy Director of the Adult Education School Association, in Germany, and the Honorable Rudi Rohlmann, Chairman of the same organization, toured the ERIC Clearinghouse for Social Studies/Social Science Education on April 3, 1980. The two educators were interested in the uses of educational technology in the United States and wanted to learn about the ERIC system. The two were accompanied by Dr. Roy B. Minnis, Consultant, Educational Services, U.S. Office of Education in Denver.

...Charlotte J. Purvis (SO)

G. ERIC Clearinghouse on Teacher Education

1. Dr. Karl Massanari Provides Assistance to Barbados

Dr. Karl Massanari, Director of the ERIC Clearinghouse on Teacher Education, was a consultant for the Government of Barbados from May 5 to May 20, 1980, in support of a University of the West Indies mandate to upgrade the quality of pre- and inservice teacher education for that nation. Dr. Massanari is aiding in the construction of an evaluation system to measure progress of the project.

...M.B. (SP)

2. Computer Use at SP

As part of its 1979-80 contract obligations, the ERIC Clearinghouse on Teacher Education has written a summary of its

computerized document processing/publications editing system. The report is available to other interested Clearinghouses upon request.

...M.B. (SP)

3. SP Holds Orientation for Advisory Board

The ERIC Clearinghouse on Teacher Education held an orientation for its Advisory Board at the Clearinghouse on April 12, 1980. This springtime meeting was organized to acquaint new members of the Board with Clearinghouse staff, with other re-appointed members of the Board, and with the goals of the Clearinghouse for the 1980-81 contract year. The Board consists of twelve persons whose professional experiences are in the following areas: K-12 classroom teaching, teacher centers, elementary/secondary and higher education media services, staff development, research and development, teacher education, and the American Alliance for Health, Physical Education, Recreation, and Dance.

...Michael Butler (SP)

4. Staff Changes at SP

The following staff changes at the ERIC Clearinghouse on Teacher Education have occurred:

- Rob Gillette has been promoted from Program Assistant to Senior Information Analyst for the Clearinghouse. He will be responsible for the management of acquisitions, document processing, and abstracting/indexing.
- Donna Metz has been appointed an Abstractor/Indexer (part-time);
- Steve Seitz has been appointed Publications Assistant;
- Lisa Harvey has been promoted from Indexer/Abstractor to Assistant Information Analyst;
- Agnes Torres has been transferred from Document Processing Clerk to Secretary/Receptionist.

...Dean Schwanke (SP)

H. ERIC Clearinghouse on Urban Education

1. UD Conducts SOC Tutorials

Two 1-day Standing Order Customer tutorials were held at the ERIC Clearinghouse on Urban Education in March. Rather than being workshops in the usual sense, these were small-group intense learning situations designed to develop the participants' ability to offer ERIC-related services. Standing Order Customers were given the choice of attending either of two tutorials, one of which was on computer searching and the other on training ERIC users. Some elected to attend both. We found that this was a most successful model for training, as the small number of participants involved encouraged a great deal of interaction and information exchange.

...Stella Torgoff (UD)

<i>Readers & Reader/Printers (Advice)</i>	<i>Customer Service</i>																					
	3:15 - 3:45	BREAK		Coffee and tea																		
	3:45 - 4:15	<p>7. ERIC IN THE CLASSROOM</p> <p>--- Reports of Two Outreach (To Practitioners) Efforts</p> <p>A. Raising the Awareness of ERIC Among Classroom Teachers - Report of a cooperative project between Lincoln (Nebraska) Public Schools and the ERIC Clearinghouse on Teacher Education.</p>	<p>Michael Butler, ERIC Clearinghouse on Teacher Education (ERIC/SP)</p> <p>Betty Dillon-Peterson, Lincoln Public Schools</p>	Requests for searches increased 300% after initiation of the project. The Media Center and Media Services staff were fully involved.																		
	4:15 - 4:45	<p>B. Practical Uses of ERIC in a School Setting</p> <p><i>ERIC as a source for curriculum guides, inservice training materials, student handbooks, CAI, and other "How to" materials—Report on a series of workshops conducted for the Michigan Department of Education.</i></p>	Carol Jaslow, ERIC Clearinghouse on Counseling and Personnel Services (ERIC/CG)																			
	5:00	ADJOURN																				

DAY	TIME	SESSION	PARTICIPANTS	NOTES
JUNE 28 SATURDAY	8:30 - 9:00	<p>9. THE NEW ERIC THESAURUS -- Results of the General Revision Effort of the Past Two Years</p> <p><i>The new Oryx-published Thesaurus should be out by the time of the Conference. The Thesaurus is a gateway to the content of the ERIC data base. A major revision effort (just completed) has added many Scope Notes and made many other improvements. These improvements will be reported, with some illustrations from topics of interest to this audience.</i></p>	Lynn Barnett, ERIC Clearinghouse on Higher Education (and Vocabulary Improvement Project Staff)	Copies of the new Thesaurus will be on display here and at the Oryx booth.
	9:00 - 10:00	<p>10. AUDIOVISUAL RESOURCES ABOUT ERIC</p> <p><i>Actual copies of all non-obsolete packages will be assembled and discussed. Selections from some packages will be shown (All will be available for viewing and ordering). Packages include slide-tape cassette shows, transparencies, videotapes, etc. Librarians will have a chance to decide which is best for their particular setting.</i></p>	Don Ely, ERIC Clearinghouse on Information Resources (ERIC/IR)	<p>An ERIC/IR publication describing all major AV packages, and providing availability information, will be handed out.</p> <p>The ERIC Videotape Set, produced by ERIC/UD, will be screened on a published schedule in the ERIC/IR suite.</p>
	10:00 - 10:30	BREAK		Coffee and tea
	10:30 - 12:00	<p>11. SEARCHING ERIC: COMPUTER SEARCHING (AND/OR/NOT) MANUAL SEARCHING -- Teammates or Competitors?</p> <p><i>SMERC performs a greater volume of ERIC searches than any other group. This session will attempt to take advantage of the special experience and capabilities SMERC has developed. It will be followed after lunch with small group session, and opportunities for hands-on computer searching</i></p>	Kathy Clay, San Mateo Educational Resources Center (SMERC)	<p>Copies of recent articles by Ms. Clay on searching ERIC will be available as handouts.</p> <p>A series of posters, each contributed by an ERIC Clearinghouse, will be on permanent display around the room. Each poster will display an actual question received from a library or school setting, together with search strategy, titles retrieved, printouts, microfiche, reproduced documents, IAP's (if any), complete information packages, etc.</p>
	12:00 - 1:30	LUNCH		
	1:30 - 3:30	<p>12. SMALL GROUP COMPUTER SEARCHING DEMONSTRATIONS</p> <p><i>Groups will employ all three major online vendors: BRS, Lockheed, SDC. Groups will be led by experienced ERIC searchers. Hands-on opportunities will be provided.</i></p>	Organizer: Jim Preve' (NIE) (Assisted by Clearinghouse Staff)

I. CENTRAL ERIC ANNOUNCEMENTS

A. Visit to San Mateo Educational Resources Center (SMERC)

I have recently returned from a visit to the San Mateo Educational Resources Center (SMERC). Several facts and decisions are of interest to the ERIC system.

SMERC has decided to discontinue their Fugitive Information Data Organizer (FIDO) data base. They will, however, continue collection of the materials, many of which are curriculum guides and materials which may well be appropriate for ERIC. They will forward them to the ERIC Facility for distribution. These documents will have attached a Reply Card which will permit early notification to SMERC of the Clearinghouse's selection decision.

SMERC is the largest educational information center around, handling more than 20,000 information requests a year. It is also one of the few that is largely self-supporting. Frank Mattas, who originated the center and who has served as its director since the early days of ERIC, will be retiring at the end of June. Frank has stated his desire to continue to be active in educational dissemination.

SMERC is also acting as a sub-contractor to Oryx Press to index and annotate the backlog of journal articles inherited from Macmillan. They predict they will be finished with the 1979 journals by June, and up-to-date by November. The journals formerly indexed by Macmillan (and then SMERC) and which are now being assigned to Clearinghouses have already been completed through 1979. This effort will help considerably in bringing CIJE entries up-to-date.

...B.C. (Central ERIC)

B. IAP Rationale

"In a culture of warring specialisms, drowned in fragmented data and fine-tooth analysis, synthesis is not merely useful—it is crucial." This statement, extracted from Alvin (*Future Shock*) Toffler's new book *Third Wave* (1980), p. 17, has been called to our attention by Chuck Hoover. The Section from which it has been extracted is entitled "Knowledge (Information) Synthesis (Interpreted)" and is reprinted as Attachment 1.

...Bob Chesley (Central ERIC)

C. TITLES FOR IAP's

"Do I want to read this?"

"You've gotta be kidding."

"What do you suppose this is all about?"

How many times have you picked up a document or a bibliography, read a title, and asked yourself questions like those above? Those of us at

Central ERIC find ourselves looking at IAP titles and asking these questions too often. We are concerned that we and you are losing potential readers of some excellent ERIC IAP's.

An IAP should:

- accurately reflect the contents of the document;
- clearly indicate the audience for which it was developed (e.g., Rural Education, Special Education, Higher Education); and
- be stated in an interesting, appealing, or attractive way.

Please consider these criteria in developing all titles for future IAP's.

...Cheryl Chase (Central ERIC)

D. CONTRACT RENEWALS (CS and FL)

NIE has exercised the Government's option to renew the contracts for the operation of the ERIC Clearinghouse on Languages and Linguistics and the ERIC Clearinghouse on Reading and Communication Skills.

- ERIC Clearinghouse on Languages and Linguistics (FL)

This marks the fourth year of this contract (June 1, 1980 to May 31, 1981). See Attachment 2 for IAP's to be developed by FL. During the contract year, FL will undertake two special projects:

- (1) The Clearinghouse will begin a long-term effort to increase its coverage of and service to the field of bilingual education. During the contract year FL will exchange acquisition information with the National Clearinghouse on Bilingual Education as part of its effort to increase RIE input in the bilingual area.
- (2) FL will plan and coordinate a workshop on educational information resources for librarians and other staff who provide information support to educational researchers. Participants will be selected from minority colleges presently cooperating with NIE's Minority and Women's Program. (This project is funded by the Minority and Women's Program.)

...Pat Coulter (Central ERIC)

- ERIC Clearinghouse on Reading and Communication Skills (CS)

The contract basically was routine in nature providing for the customary ERIC services for the contract year June 1, 1980 through May 31, 1981. See Attachment 2 for IAP's to be developed by CS. Two special projects were funded in the contract:

- (1) development of a series of ERIC broadcasts with local radio and possibly television stations.
- (2) development of a prototype basic skills tool for teachers using the ERIC system. The prototype would be a bibliography (including abstracts) of materials in the ERIC data base that relate specifically to the classroom teacher. The initial basic skills subject areas covered would be in the reading and mathematics area (The ERIC Clearinghouse on Science, Mathematics, and Environmental Education will collaborate in the preparation of the latter materials.)

...Frank Smardak (Central ERIC)

E. AASL CONTACTS

A list of State Affiliate Presidents of the American Association of School Librarians is presented as Attachment 3. You may find these people helpful in your outreach efforts with the school library community.

...Pat Coulter (Central ERIC)

F. ERIC REGIONAL TECHNICAL MEETINGS SCHEDULED FOR 1980

As previously announced, there will be two regional technical meetings held this year instead of the three held in the past year.

The locales, dates, sponsors, fiscal agents, and breakouts of units attending each of the meetings are as follows:

WESTERN REGIONAL

Date: October 1-3, 1980 (Noon to Noon)
 Location: Boulder, Colorado
 Sponsor and Fiscal Agent: SO
 Attendees From: CG, CS, EA, JC, PS, RC, SO, and Oryx Press

EASTERN REGIONAL

Date: October 22-23, 1980 (8:30 a.m.—4:00 p.m.)
 Location: Washington, D.C.
 Sponsor: UD
 Fiscal Agent: EC
 Attendees From: CE, CS Module, EC, FL, HE, IR, SE, SP, TM, UD, Facility, EDRS, and CERIC

Details concerning motel arrangements, agendas, etc., are in the process of being worked out by the two meeting coordinators, Sydney

Meredith of SO and Betty Engle of UD. Suggestions concerning agenda items, etc., would be welcomed by both of these coordinators.

...Frank Smardak (Central ERIC)

II. ERIC FACILITY

A. DIALOG DIALORDER Service

The latest flyer on the ERIC DIALORDER Service recently received from Lockheed is provided in Attachment 4.

...Dorothy Slawsky (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Adult, Career, and Vocational Education (CE)

1. CE Focusing on Education and Work

Effective this year, the ERIC Clearinghouse on Adult, Career, and Vocational Education is developing the area of education and work as a fourth key scope area. Several strategies have been employed to provide coverage in this area.

- Acquisitions activities targeted to such groups as CETA prime sponsors, and other involved in the education and work area, have been initiated.
- Several short bibliographies have been developed on education and work.
- Announcements have been made in the ERIC/CE *Clipboard* alerting contributors and users to our interest in this area.
- Education and Work has been included as an area for consideration in our planning activities.
- CE is exploring cooperative efforts with CG and UD in this area.
- CE is communicating with two DOL funded Clearinghouses to explore cooperative arrangements in the area of employment and training.

...Juliet V. Miller (CE)

B. ERIC Clearinghouse on Elementary and Early Childhood Education (PS)

1. Dr. Katz Attends White House Reception

Dr. Katz recently attended a White House reception marking the 15th anniversary of Head Start. Lady Byrd Johnson was the guest of honor; other speakers included President Jimmy Carter and Patricia Harris. Dr. Katz originally taught in a Head Start classroom and designed the Enabler Model for the Head Start Planned Variation Project. She has also consulted on the Child Development Associate project which provides training for Head Start staff.

...L.B. (PS)

2. Dr. Katz Reviewer for *Encyclopedia of Educational Research*

Dr. Lilian Katz, Director of the ERIC Clearinghouse on Elementary and Early Childhood Education, will be reviewing all early childhood education entries for the fifth edition of the *Encyclopedia of Educational Research*, which is sponsored by AERA.

...L.B. (PS)

3. PS Staff Participate in Library Information Fair

Dianne Rothenberg of the ERIC Clearinghouse on Elementary and Early Childhood Education served as chairperson of the exhibit of Online Services at a local Information Fair sponsored by the Lincoln Trails Library System. The Information Fair was held in the Market Place shopping mall and included exhibits of various services offered by libraries. Dianne arranged for demonstrations of online searching by representatives of DIALOG and SEC and supervised booth preparation and staffing. Norma Howard of EECE assisted in staffing the exhibit.

C. ERIC Clearinghouse on Tests, Measurement, and Evaluation (TM)

1. FOREIGN VISITORS AT TM

During recent weeks, the ERIC Clearinghouse on Tests, Measurement, and Evaluation has been visited by two foreign scholars:

- Dr. Henk C. de Bruyre
C.I.T.O. (National Institute for Educational Measurement)
Netherlands
- Dr. Harold Herman
University of the Western Cape
South Africa

Both individuals toured the research facilities of ETS and were given demonstrations of computer searching.

...B.H. (TM)

2. Staff Changes at TM

The following staff changes have occurred recently at the ERIC Clearinghouse on Tests, Measurement, and Evaluation:

- Geralyn Kaminsky has been appointed to the position of Indexer/Abstractor.
- Virginia Mistic has been appointed to the position of Secretary.
- Mary Kreutzer has been appointed to the position of Clerical Assistant (Acquisitions), replacing David Ochmanek.
- Gail Dietz Conley (Document Processing Coordinator) has resigned to take a cataloging position at E.R. Squibb.
- Barbara Hunt (User Services Representative) has resigned to accept a position as Business Librarian at Sun Oil.
- Marilyn Halpern has been appointed to the position of User Services Representative.

...B.H. (TM)

3. EXCERPTS FROM THE *DICTIONARY OF USEFUL RESEARCH PHRASES*

A question which frequently arises at the ERIC Clearinghouse on Tests, Measurement, and Evaluation, and perhaps at other Clearinghouses, is whether or not a document is a research report. Perhaps the explanation from the *Dictionary of Useful Research Phrases* will provide a clue (see Attachment 5).

...Barbara Hunt (TM)

D. ERIC Clearinghouse on Urban Education (UD)

1. Black Educators Conference

Dr. Jerome Wright, Associate Director of the ERIC Clearinghouse on Urban Education, was invited to attend a Black Educators Conference in Washington, D.C. on March 27-28, 1980. The conference was sponsored by Congressman Augustus F. Hawkins and Congresswomen Shirley Chisholm, and the theme was "Schools That Work—Recommitment to Public Education."

Participants were organized into workshops on various educational themes, and each group was responsible for formulating concrete suggestions and/or models for the two Congresspersons. ERIC materials were provided to the participants by Dr. Wright. The results of the conference will be published by the Institute for the Study of Educational Policy at Howard University.

...S.T. (UD)

2. UD Clearinghouse IAP Entered into Senate Hearing Record

A section of a UD Clearinghouse Information Analysis Product was included in the record of the *Hearing Before the Committee on Labor and Human Resources, United States Senate, on Shirley M. Hufstедler to be Secretary of Education*. The paper was "Hispanic Migration and Demographic Patterns: Implications for Educational Planning and Policy," by José Hernández, which was presented at a conference co-sponsored by the Clearinghouse. It was entered into the record by Al Perez, Associate Counsel of the Mexican American Legal Defense and Educational Fund, testifying in favor of Secretary Hufstедler's appointment.

Knowledge (Information)Synthesis (Interpretation)

According to Alvin Toffler in
Third Wave, 1980 p. 17

A powerful tide is surging across much of the world today, creating a new, often bizarre, environment in which to work, play, marry, raise children, or retire. In this bewildering context, businessmen swim against highly erratic economic currents; politicians see their ratings bob wildly up and down; universities, hospitals, and other institutions battle desperately against inflation. Value systems splinter and crash, while the lifeboats of family, church, and state are hurled madly about.

Looking at these violent changes, we can regard them as isolated evidences of instability, breakdown, and disaster. Yet, if we stand back for a longer view, several things become apparent that otherwise go unnoticed.

To begin with, many of today's changes are not independent of one another. Nor are they random. For example, the crack-up of the nuclear family, the global energy crisis, the spread of cults and the emergence of separatist movements from Quebec to Corsica, may all seem like isolated events. Yet precisely the reverse is true. These and many other seemingly unrelated events or trends are interconnected. They are, in fact, parts of a much larger phenomenon: the death of industrialism and the rise of a new civilization.

So long as we think of them as isolated changes and miss this larger significance, we cannot design a coherent, effective response to them. As individuals, our personal decisions remain aimless or self-canceling. As governments, we stumble from crisis to crash program, lurching into the future without plan, without hope, without vision.

Lacking a systematic framework for understanding the clash of forces in today's world, we are like a ship's crew, trapped in a storm and trying to navigate between dangerous reefs without compass or chart. In a culture of warring specialisms, drowned in fragmented data and fine-tooth analysis synthesis is not merely useful--it is crucial.

ANNOUNCEMENT OF PROPOSED IAP TITLES FOR RENEWED CLEARINGHOUSE CONTRACTS

1. ERIC CLEARINGHOUSE ON LANGUAGES AND LINGUISTICS

Renewal Date: June 1, 1980

Extensive Papers

- Indochinese Students in U.S. Schools: A Guide for Administrators and Managers
- Responding to Learner Needs: Listening and Speaking Activities for the Foreign Language Classroom
- Needs Assessment in English as a Second Language
- Readability in Foreign Language Tests
- Directory of Foreign Language Service Organizations
- Teaching Conversation in ESL

Short Papers

- The Non-traditional Language Learner
- Public Awareness and the Foreign Language Teacher
- Teaching French as a Multicultural Language
- Sociolinguistics and ESL: The Importance of Language Variation

2. ERIC CLEARINGHOUSE ON READING AND COMMUNICATION SKILLS

Renewal Date: June 1, 1980

- Standardized Reading Achievement Tests
- The Cloze Procedure as a Teaching Technique
- Screening for Problem Readers, and What to Do Next
- ERIC First Analysis: The National High School Debate Topic for 1981-82
- Integrating Basic Skills Instruction, K-6: (A TRIP Booklet)
- Teaching Comprehension Without Questioning (A TRIP Booklet)
- Reader's Theatre in the Classroom (A TRIP Booklet)
- Schema Theory Applied: Building Comprehension Skills (TRIP)
- Newspapers in Education (TRiP)
- Taming of Television: The Wise Use of Television for Children (TRIP)
- Techniques for Individualization in the Secondary English Classroom (TRIP)
- Annotated Bibliography of Research in the Teaching of English:
1 July 1980 through 31 December 1980
- Recommended English Language Arts Curriculum Guides K-12 and Criteria for Planning and Evaluation, 1980

ERIC

DIALOG* DIALORDER™ SERVICE
ERIC DOCUMENT REPRODUCTION SERVICE (EDRS)
ERIC

SCOPE OF SERVICE

EDRS supplies **only** the ED-numbered items in the ERIC database. ERIC ED-numbered documents have three levels of availability: 1) Document available in **both** microfiche (MF) and paper copy (PC) form, 2) Document available only in MF form, or 3) Document not available from EDRS. The prices and level are shown with each ED record in the ERIC database.

.ORDER ERIC **must** include document form desired (MF or PC) as special instructions.

The "ship to" and "bill to" address will be supplied by DIALOG. Requests for an address other than those with your DIALOG account must be supplied as special instructions. EDRS service is worldwide.

OPTIONS AVAILABLE

Order is shipped 48 hours after receipt of order. Type of delivery should be requested, e.g., airmail, United Parcel Service, Federal Express, etc. All shipments are F.O.B. Arlington, Virginia.

CHARGES AND TERMS

Cost of document either in MF or PC is contained in ED record abstract data. Add \$.50 per document ordered plus postage. Payment upon receipt of invoice in U.S. funds only.

Deposit accounts desired.

All postage charges are F.O.B. Arlington, Virginia, and will be billed on invoice.

MISCELLANEOUS

Supplier will retrieve orders daily from the DIALOG DIALORDER Service. No payments necessary to CCC.

CONTACT

Once an order has been retrieved by EDRS and a date and time appear in the .LIST TRANSMITTED column, all questions concerning the order should be directed to:

EDRS
3030 North Fairfax Drive
Arlington, VA 22201

Telephone: 703/841-1212

- see ordering procedures on verso -

*Trademark Reg. U.S. Pat. & Trademark Office.

ERIC

ERIC ORDERING PROCEDURES

Only ERIC report documents (i.e., ED numbered items only) are supplied by the ERIC Document Reproduction Service. To be sure that you are requesting only publications that are available from EDRS, the following procedures are recommended:

- 1 → ? BEGIN 1
1nov79 20:12:12 User34/6
\$0.13 D.005 Hrs File1*
File1*:ERIC 66-79/SEPT
Set Items Description (+=OR;*=AND;-=NOT)

- 2 → ? KED156700; KED148885; KED148884; KED148880
KEEP ED156700
KEEP ED148885
KEEP ED148884
KEEP ED148880
- 3 → ? TYPE 99/6/1-4
99/6/1
ED156700
Declining Test Scores: a State Study.

99/6/2
ED148885
List of Hypotheses Advanced to Explain the SAT Score Decline.

99/6/3
ED148884
Motivational Factors in the SAT Score Decline.

99/6/4
ED148880
Distribution of SAT Scores to Colleges as an Indicator of
Changes in the SAT Candidate Population.
- 4 → ? .ORDER ERIC (MF, 1 COPY EACH)
0004 ITEMS IN ORDER
ORDER SERIAL #00038

? LOGOFF
1nov79 20:16:17 User3476
\$1.75 D.070 Hrs File1*

LOGOFF 20:16:21

1. BEGIN I in the ERIC file.
2. Enter accession numbers for which full document copies are requested; or perform search according to normal DIALOG procedures, KEEPing records in set 99 for order. Be sure to check first whether the document is available from EDRS. (This information is given in each ERIC ED-numbered record.)
3. TYPE set 99 in a short format to view for accuracy. Delete unwanted items using KEEP- EDnnnnnn if necessary.
4. Enter .ORDER ERIC (MF or PC) (number of copies) (special shipping instructions, if any). All ERIC orders must include an indication of MF or PC.

ERIC-2 (November 1979)

EXCERPTS FROM THE *DICTIONARY OF USEFUL RESEARCH PHRASES*

WHAT WAS SAID...	WHAT WAS MEANT...
<i>"It has been known..."</i>	I didn't look up the original reference.
<i>"A definite trend is evident..."</i>	These data are practically meaningless.
<i>"Of great theoretical and practical importance..."</i>	Interesting to me.
<i>"While it has not been possible to provide definite answers to these questions..."</i>	This was an unsuccessful experiment, but I still hope to get it published.
<i>Three of the samples were chosen for detailed study..."</i>	The others made no sense.
<i>"Typical results are shown..."</i>	The best results are shown.
<i>"The most reliable results are those obtained by Jones..."</i>	He was my grad assistant.
<i>"It is believed that..."</i>	I think...
<i>"It is generally believed that..."</i>	A couple of other guys think so, too..."
<i>"It is clear that much additional work will be required before a complete understanding of the phenomena is possible..."</i>	I don't understand it.
<i>"Correct within an order of magnitude..."</i>	Wrong.
<i>"It is hoped that this study will stimulate more work in this field..."</i>	This is a lousy paper, but so are the others in this field.
<i>"Thanks are due to Joe Blotz for assistance with the experimental work and George Frink for valuable discussion..."</i>	Blotz did the work and Frink explained to me what it meant.
<i>"A careful analysis of obtainable data..."</i>	Three pages of notes were obliterated when I knocked over a glass of beer.
<i>"A statistically oriented projection of the findings..."</i>	Wild guess.

I. CENTRAL ERIC ANNOUNCEMENTS

A. Computer Searching of the ERIC File

Over the past several years we have become aware of the increasing extent to which computers are being used to search the ERIC file. Until recently, there was little quantitative data available. Recent information indicates that in 1979 the approximate number of computer searches conducted at the major on-line vendors was 135,000. Approximately 56% of these were conducted at universities and library schools. Government agencies, public libraries, and other sources accounted for 22%. An additional and surprising 21% came from industrial and business concerns.

In addition to searches conducted at the on-line vendors, approximately 50 more agencies, universities or institutions subscribe to or individually purchase ERIC tapes. Preliminary and incomplete information from these sources indicate that they conduct searches numbering from a few hundred to 25,000 a year. The average is about 3,000 searches per site per year, but may not be representative of the entire group. If extended, this would represent an additional 150,000 searches per year.

Information on rate of increase is somewhat skimpy, but would seem to indicate an increase in searching activity of around 30% for the first quarter of 1980.

...B.C. (Central ERIC)

B. Portions of ERIC Microfiche File Available

The Oklahoma Capacity Building Project advises us that they have duplicates of portions of the ERIC microfiche collection which they would like to sell. These are:

ED 000 001 - 001 193
ED 000 194 - 002 400
ED 012 794 - 016 143
ED 066 621 - 071 507
ED 073 195 - 075 470
ED 075 482 - 075 686
ED 133 418 - 133 993

If any ERIC users are interested, they may contact:

Dr. Jack Craddock
Project SEEK
State Department of Education
2500 North Lincoln Boulevard
Oklahoma City, Oklahoma 72103

...B.C. (Central ERIC)

C. ERIC Slide-Tape Developed by UCLA Library

The library at UCLA has developed a slide-tape which describes the process of using ERIC from the perspective of the library. Some of you saw it at the recent ALA meeting. It is a well-developed presentation, and has the advantage of being easily adapted to other libraries with the substitution of a few slides. We will be announcing its availability for purchase in the next *Interchange*. Meanwhile, please use Clearinghouse communication channels to let librarians know of its availability for purchase. The price is \$25 and includes 58 2" x 2" slides and a 12½ minute narration on cassette tape. It is available from:

Library Accounting
Room 22480
University Research Library
University of California, Los Angeles
Los Angeles, California 90024

...Bob Chesley (Central ERIC)

D. Advertising the New *Thesaurus of ERIC Descriptors*

An NIE Press Note was included in the last microfiche shipment to standing order customers announcing the new *Thesaurus of ERIC Descriptors* (see Attachment 1). You may reproduce this note for your own purposes in advertising the new *Thesaurus*.

...Pat Coulter (Central ERIC)

E. ERIC Users Meeting

The annual ERIC Users Meeting was held as a 2-day preconference session at the American Library Association Conference in New York City on June 27-28, 1980.

Approximately 40 non-ERIC persons attended and heard knowledgeable and enthusiastic speakers discuss the ERIC system and describe library applications.

...J.P. (Central ERIC)

F. ERIC Tape User Referrals

Just a reminder that questions from ERIC users about the ERIC tapes and their applications may be referred to either Ted Brandhorst or Pat Brown at the ERIC Facility.

A recent ERICTAPES questionnaire was tabulated and the results appear as Attachment 2.

...Jim Prevel (Central ERIC)

G. CIJE Journals - An Effort to Get Earlier Information from Publishers

In order to cut down on the time between receipt of journals and the appearance of processed articles in CIJE, Clearinghouses and SMERC should contact each publisher of both cover-to-cover and selective journals on your lists and ask them if they can either provide you with galley proofs of each issue or send you pre-publication copies of an issue. You could tell the publishers that it is in their interests to have journal articles cited in CIJE as quickly as possible after publication.

So that you do not have to make an additional effort in the middle of a present subscription, the request should be made at the time of renewal, or when beginning a new subscription.

...Kit Welsh (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. ERIC Price Code Conversion Table Accessible on DIALOG

Beginning with RIE August 1979, specific EDRS prices were replaced with "Price Codes" that must be converted into actual dollars and cents via a table. The reason for this change was to better accommodate the ERIC data base to periodic changes in the EDRS pricing structure. In the past these changes required a revision of all existing prices in the data base. In the future only the table will have to be changed.

The new procedure did, however, create a problem for online users in that the conversion table contained in RIE was not always located conveniently near the terminal being used nor was it always included with the citation printouts being distributed.

This problem has now been alleviated somewhat by the fact that DIALOG has made the price code table accessible directly online via the "?ERICCODE" command. Lockheed's explanation of this new feature appears as Attachment 3.

...Ted Brandhorst (ERIC Facility)

B. Problems with Old and New Institutional Name Forms

Several documents from the Center for Social Organization of Schools, at John Hopkins University, have recently been cataloged under an older and obsolete form of the name (see new and old name forms below).

NEW NAME: Johns Hopkins Univ., Baltimore, Md.
Center for Social Organization of Schools.
(BBB15058)

OLD NAME: Johns Hopkins Univ., Baltimore,
Md. Center for the Study of Social Organization
of Schools (LYR39605).

This kind of cataloging error can be hard to catch at the Facility and requires expensive backfile changes when finally detected. It is mentioned here as a reminder to Clearinghouse catalogers to make certain they have selected the correct and most current institutional name form for the document in hand.

...Julie Holladay (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Counseling and Personnel Services

1. Garry Walz and Libby Benjamin Participate in Florida Counselor Educators Renewal Conference

Garry Walz and Libby Benjamin, Director and Associate Director, respectively, of the ERIC Clearinghouse on Counseling and Personnel Services, recently participated in the second annual Florida Counselor Educators Renewal Conference held at Crystal River, Florida, where they were responsible for two days of the four-day program on "Adult Career Guidance."

More than 30 counselor educators and vocational educators from Florida's public and private universities, as well as State Department of Education personnel, returned home deluged with CAPS publications and resources which will be useful to them in their work with adults.

...C.J. (CG)

2. Carol Jaslow Conducts Session at the ERIC Users Conference in New York

Carol (K.) Jaslow presented a session entitled "Practical Uses of ERIC in a School Setting" at the ERIC Users Conference held in New York on June 27-28, 1980. The focus of the session was on ERIC as a resource for the classroom teacher. Numerous handouts of sample ERIC searches designed to respond to specific teacher informational needs were distributed.

...C.J. (CG)

3. Kit Welsh Makes Last Official Visit to CG

Early in June 1980, Kit Welsh of Central ERIC made a last official Site Visit to the ERIC Clearinghouse on Counseling and Personnel Services (CAPS) (she plans to retire early next spring). The staff of the Clearinghouse took the opportunity to show her how much she is valued, not only as a monitor, but as an extremely concerned and caring person. A special dinner party for Kit and Clem was held at which many pictures were taken and mementos of a long and happy association presented.

...Carol Jaslow (CG)

B. ERIC Clearinghouse on Educational Management

1. Copier Improves Quality of Document Input

Thanks to a new plain paper copier, the ERIC Clearinghouse on Educational Management is able to input a higher percentage of its documents at Levels I and II.

Last winter when we began shopping for a new copier, we were surprised by the reproduction quality attainable with the new generation of copiers. The copier we eventually bought (a Minolta 310) has contributed a new dimension to our document legibility screening procedures because of its ability to:

- make crisp black and white copies from colored inks (including dittoes) and colored papers;
- make better copies than the originals, improving fuzzy or smudged documents from marginal to satisfactory in legibility.

Acquisitions Librarian Clarice Watson estimated that about 10% of our documents could be upgraded one level (from II to I or from III to II) and that an additional 1% could be processed that would otherwise have to be rejected or delayed. Our experience during the two months since the copier was installed has borne out these estimates.

In case you're wondering, NIE's Contracts and Grants Office informed us we could use federal money to lease, but not purchase the copier. We bought it with local money instead.

...Stuart Smith (EA)

C. ERIC Clearinghouse on Elementary and Early Childhood Education

1. Staff Changes at PS

The following staff changes became effective July 1, 1980 at the ERIC Clearinghouse on Elementary and Early Childhood Education.

- Norma Howard became User Services Coordinator. She will continue to do computer searches and serve as VIP consultant.
- Janet Bowermaster became Index Editor and will also be working with Norma Howard as User Services Assistant.
- Linda Baskin became Project Manager for the Child Development Associate (CDA) Resource Center project directed by Dr. Lilian Katz. She will continue part-time as Assistant Director at ERIC/PS.

...Mima Spencer (PS)

D. ERIC Clearinghouse on Handicapped and Gifted Children

1. EC Exhibits at the Helen Keller Centennial Congress

Don Erickson and Lynn Smarte, Director and User Services Specialist, respectively, at the ERIC Clearinghouse on Handicapped and Gifted Children, staffed an ERIC exhibit booth at the Helen Keller Centennial Congress, Boston, Massachusetts on June 24-26, 1980. The Congress brought together for the first time participants representing over 200 different organizations involved with the blind and deaf blind. Lynn and Don were especially impressed with new technologies available from Kurzweil Computer Products, Inc., which enable a blind person to run a computer search and set the results in Braille or voice output!

...Marion Cambel (EC)

E. ERIC Clearinghouse on Higher Education

1. Jonathan Fife Serves on UNESCO Subcommittee

Dr. Jonathan D. Fife of the ERIC Clearinghouse on Higher Education served on the subcommittee to develop the U.S. position papers for the UNESCO Third Regional Conference for Ministries of Education of the European Region held in Sofia, Bulgaria on June 12-21, 1980.

The Clearinghouse staff worked with Dr. Fife in preparing a position statement on new tasks involved in the training of professional personnel. This conference has added importance because it was the first time that the United States had been present as a full member of the UNESCO European Region and it was the first international conference that Secretary Shirley Hufstедler attended as the head of the new Department of Education.

...M.S.S. (HE)

2. Jonathan Fife Elected to NCHEMS

Dr. Jonathan D. Fife was recently elected vice-chair, chair-elect of the National Advisory Council of the National Center for Higher Education Management Systems (NCHEMS).

...Marilyn Scutt Shorr (HE)

F. ERIC Clearinghouse on Information Resources

1. Call for Assistance at the IR Exhibit at ASIS (October 1980)

The ERIC Clearinghouse on Information Resources will be exhibiting at the annual meeting of the American Society for Information Science in Anaheim, California, October 6-10, 1980. Because of the distance, only one person from IR will be able to go. Remembering the proverb, "Many hands make light work," we would

like to invite any Clearinghouse or Facility staff who are attending the meeting to volunteer for an hour or so at the exhibit.

This would not only give participants visiting the exhibit a better and more balanced picture of the ERIC system, but remove some of the burden from the ERIC Clearinghouse for Junior Colleges (who have generously agreed to help out, but not take over the exhibit!), as well as preserve the sanity of our lone staff member.

If you are planning to be there and are willing to help out—even an hour a day would be great—please write or call Cheryl Willson at IR ((315) 423-3640) and give her your name and some idea of when you can be there. We would really appreciate any and all assistance you can provide.

...Barb Minor (IR)

G. ERIC Clearinghouse for Junior Colleges

1. A Fond Farewell from Bonnie Sanchez

It is with some regret that I make the announcement of my termination from ERIC. As of July 31, I will be resigning from the Clearinghouse for Junior Colleges as Associate Director. My husband has obtained an administrative position in Escondido Unified Schools and we will be moving there the first part of August. Escondido is in the northern part of San Diego County, Southern California.

My major regret in leaving ERIC is in leaving all the fine people I have met and worked with during my five-year stay. It has been uplifting in today's work-world of noncaring attitudes and minimum efforts to be associated with such professional and dedicated individuals. I have made many friends I will never forget and I am thankful for my short time with you. If you ever get to the Escondido area, I hope you will look me up. Thanks again for the privilege of knowing each of you.

...Bonnie Sanchez (JC)

H. ERIC Clearinghouse on Languages and Linguistics

1. New Address for FL

The Center for Applied Linguistics and the ERIC Clearinghouse on Languages and Linguistics have moved from Arlington, Virginia. Their new address and telephone number are as follows:

ERIC Clearinghouse on Languages and Linguistics
Center for Applied Linguistics
3520 Prospect Street, N.W.
Washington, D.C. 20007
(Telephone: (202) 298-9292)

...Mary Neibuhr (FL)

I. ERIC Clearinghouse on Reading and Communication Skills

1. Dr. Appleby Goes to Stanford

Dr. Arthur Appleby, Associate Director of the ERIC Clearinghouse on Reading and Communication Skills, will leave the Clearinghouse in late August to assume a position as Associate Professor, School of Education, Stanford University, California. We are sorry to have him leave, but wish him much luck and happiness in his new job.

...M.K.M. (CS)

2. CS Participates in IRA Meeting

Dr. Karl Koenke, Jane McClellan, and other staff members recently participated in the International Reading Association (IRA) Convention held in St. Louis, Missouri. Dr. Koenke chaired a preconvention institute on adult learning disabilities; Ms. McClellan chaired a session on recreational reading; and staff members demonstrated computer searching at the exhibit.

...M.K.M. (CS)

3. More CS Networking

Mary K Monteith recently participated in planning for and working at a regional library system information fair held in Champaign, Illinois. The Lincoln Trail Libraries information fair included demonstrations of on-line bibliographic data base searching by representatives of DIALOG and ORBIT.

...Mary K Monteith (CS)

J. ERIC Clearinghouse for Science, Mathematics, and Environmental Education

1. SE Staff Activities and Awards

Dr. Stanley Helgeson, Associate Director for Science Education, became President of the National Association for Research in Science Teaching at the recent annual meeting. Dr. Helgeson also served as Program Chairman for the 1980 annual meeting.

Dr. Marilyn Suydam, Associate Director for Mathematics Education, was recently elected to the position of Director of the National Council of Teachers of Mathematics. Dr. Suydam has been active in many NCTM activities and has served as editor and contributing author for several NCTM yearbooks.

ERIC/SMEAC received the Distinguished Service Award for organizations and agencies from the National Association for Environmental Education at their recent annual meeting. Thirteen organizations and agencies were nominated for the award.

ERIC/SMEAC cooperated in producing the 1980 AETS Yearbook, *The Psychology of Teaching for Thinking and Creativity*, edited by Dr. Anton E. Lawson. The Yearbook, published by the SMEAC Information Reference Center, includes chapters by a number of well-known writers. The Foreword was written by Jean Piaget.

Staff of the SMEAC Information Reference Center and ERIC/SMEAC recently held workshops in 11 cities on sources of materials for energy and environmental education and training. Techniques for searching on-line data bases including ERIC were stressed. All participants were given the opportunity to operate a computer terminal and type their own searches. Over 400 people participated in the workshops. Funds for the workshops were provided by the Office of Education and the Environmental Protection Agency.

...Robert Howe (SE)

K. ERIC Clearinghouse on Teacher Education

1. Foreign Visitors at SP

The ERIC Clearinghouse on Teacher Education hosted four visitors from other parts of the world during May 1980. Dr. Ernest Goldschmidt from the Denmark Ministry of Education, and three university administrators from Jordan participated in orientations and discussions with Clearinghouse staff.

...Dean Schwanke (SP)

- NOTES: (1) A small, white-handled pocket knife was found at the ERIC Users Conference in New York. If you have lost such an item, please contact Elizabeth Pugh at the ERIC Facility.
- (2) Reminder to Clearinghouses: When submitting the list of IAP's for inclusion in the EAB, please include the ED (or CH number) and the price.

NATIONAL INSTITUTE OF EDUCATION
WASHINGTON, D.C. 20208

A Note to ERIC Users

The Educational Resources Information Center (ERIC) takes great pride in announcing the forthcoming publication of the **THESAURUS OF ERIC DESCRIPTORS--COMPLETELY REVISED**.

This new edition contains the definitive vocabulary of education. It includes over 8,000 subject descriptors and will serve as the main tool for access to and retrieval of information from the ERIC system.

For the past 2 years, educators and librarians in all 16 ERIC clearinghouses and other system components have researched, developed, and updated the ERIC vocabulary. As a result, the new **THESAURUS** will include over 1,400 revised definitions and several hundred new ones. It will also contain revised instructions for its use.

Publication of the **THESAURUS OF ERIC DESCRIPTORS--COMPLETELY REVISED** is planned for summer 1980. It will be available through the publisher--Oryx Press, 2214 North Central Avenue, Phoenix, AZ 85004--for \$13.20 in the United States and \$14.40 (postage included) in foreign countries.

April 1980

ERICTAPES QUESTIONNAIRE

(SUMMAR. TABULATION)

1. Documentation

A. How would you rate the documentation that accompanies ERICTAPES, i.e., the document entitled *ERIC Tape Documentation*?

Excellent Superior 4 Very Good 9 Good 1 Fair Adequate 2 Poor

B. How would you rate the letters to tape users or the announcements in our newsletter *Interchange* as a means of informing you of data base changes?

Excellent Superior 5 Very Good 9 Good 1 Fair Adequate Poor

2. Price

How would you rate the price of ERICTAPES relative to the price of other data bases?

Expensive 1 Average 10 Low/Economical 6

3. Quality

A. How would you rate the physical quality of the magnetic tapes provided by ERICTAPES?

Excellent Superior 8 Very Good 7 Good 1 Fair Adequate Poor 1

B. How would you rate the quality of the data contained in the tapes, i.e., its accuracy, completeness, etc.?

Excellent Superior 4 Very Good 8 Good 7 Fair Adequate 2 Poor

C. How would you rate the overall quality of the data base as a source of useful educational information?

Excellent Superior 6 Very Good 8 Good 1 Fair Adequate 2 Poor

4. Problems

A. Have you had any significant problems with the data base?

No 15 Yes 2 If yes, please explain.

B. Have you had any significant problems with the service provided by ERICTAPES?

No 12 Yes 5 If yes, please explain.

5. Additional Services ERICTAPES Should Provide

Is there anything ERICTAPES should be doing that it is not? Are there any additional services we should provide?

No 10 Yes 4 If yes, please explain.

6. Usage

A. How do you use ERIC tapes and what services do you provide?

Batch Searches 14 SDI/Current Awareness 9 Teaching Tool 6 Online Searches 4 Publications 3

ERIC AND NTIS PRICE CODES

Both ERIC (File 1) and NTIS (File 6) offer document delivery for items located in their respective databases. Copies can be purchased in either microfiche (MF) or paper copy (PC) reproduction forms. Price codes are given with each record. To provide easy decoding of the price codes, we have developed ?ERICCODE and ?NTISCODE.

ERIC (since August 1979) and NTIS (since 1977) both display price codes in their records indicating the cost of either form of reproduction, e.g.,

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC Clearinghouse on Higher Education

- a. Federal Influence on Higher Education Curricula, William Mayville, 55 pages, \$4.00.

Recent federal regulations primarily designed to correct specific social ills or insure financial accountability have indirectly had significant impact on the academic area of institutions. This report identifies the federal programs and regulations that have had the greatest impact on college curriculum, reviews what this impact has been, and assesses its long-term implications.

- b. Program Evaluation, Charles Feasley, 59 pages, \$4.00.

The common practice of program evaluation is a recent phenomenon, taking hold across the nation within the past five years. This monograph discusses reasons institutions or their sub-units voluntarily undertook program evaluations, with particular attention given to the contrasts between what people say they value, and the things they actually measure.

- c. Liberal Education in Transition, Clifton Conrad and Jean Wyer, 66 pages, \$4.00.

The decade of the 1970's marked an unprecedented period of innovation in liberal education. This paper looks at recent developments including the history of liberal education, the range and diversity of innovations in liberal education, a summary of three distinctive programs, a review of research on the outcomes of liberal education.

All of these publications are available through:

American Association for Higher Education
1 Dupont Circle, Suite 780
Washington, D.C. 20036.

2. ERIC Clearinghouse on Reading and Communication Skills

- a. ERIC First Analysis: Consumer Interests, David L. Wagner, 96 pages, June 1980, CS 502 909, September 1980 RIE.

The five chapters of this book are intended to prepare high school debaters and their coaches for the investigation of the 1980-81 High School Debate Problem Area and Resolutions, "How Can the Interests of U.S. Consumers Best Be Served?"

Available from:

- ERIC Document Reproduction Service
P.O. Box 190
Arlington, Virginia 22210

Available in microfiche and paper copy.

- Speech Communication Association
5205 Leesburg Pike
Falls Church, Virginia 22041

\$2.50 single copy; 10% discount on 10 to 49 copies, 20% discount on 50 or more.

- b. Speech Communication Activities in the Writing Classroom, Jane Blankenship, Sara Latham Stelzner, 44 pages, 1979, Received from Printer February 1980, CS 502 778, \$3.00.

This booklet offers suggestions for integrating language arts instruction for older students. The authors describe an approach that focuses specifically on speech communication activities that have been incorporated successfully into English programs. Readers will find concrete plans, assignments, learning activities, and assessment techniques to guide them in incorporating speaking and listening into writing instruction.

3. ERIC Clearinghouse on Science, Mathematics, and Environmental Education

- a. Energy Education Programs, Elementary School Programs and Resources, Herbert L. Coon and John F. Disinger, Compilers, \$1.50.

Fourteen energy education programs in elementary schools are described. Also included is an annotated bibliography of energy materials in Resources in Education available through ERIC.

- b. Energy Education Programs, High School Programs and Resources, Herbert L. Coon and John F. Disinger, Compilers, \$1.50.

Presents methods by which selected high schools have integrated energy education into classrooms. The twelve case studies report what resources the schools have employed and how they are utilized. An annotated bibliography includes information concerning other curriculum materials.

- c. An Annotated Bibliography of Environmental Communication Research and Commentary: 1969-1979, Renee Guillierie and A. Clay Schoenfeld, \$4.25.

Significant literature of the environmental communication field is identified and reviewed in this annotated bibliography. Included are (1) background on environmental communication; (2) strategy and tactics of the environmental communication literature review; (3) an index; (4) journal articles; and (5) book abstracts.

- d. Review of Research: Teacher Questioning Behavior in Science Classrooms, Patricia E. Blosser, \$1.75.

Selected for this review are dissertations and other research reports related to science teacher questioning behavior. Research is summarized separately for observational studies and experimental studies.

- e. 1980 AETS Yearbook: The Psychology of Teaching for Thinking and Creativity. Anton E. Lawson, Editor, \$7.00.

This seventh yearbook of the Association for the Education of Teachers in Science (AETS) contains papers that involve the relationship of teaching thinking and creativity as this activity is performed in a science education context. Following a foreword by Jean Piaget are eleven chapters written by Robert Gagne, Constance Kamii, Robert Cass, A. E. Lawson and C. A. Lawson, Robert Karplus, D. P. Ausubel, J. D. Novak, E. P. Torrance, J. A. Vargas and P. A. Moxley, and M. A. Mogus.

- f. Outdoor Areas as Learning Libraries, CESI Sourcebook, An Occasional Sourcebook of the Council for Elementary Science, International, Alan J. McCormack, \$6.50.

This guide provides ideas for outdoor learning activities appropriate for youngsters in elementary, middle, and junior high schools. Activities are designed to assist the teacher in using outdoor areas surrounding the school as a laboratory for effective instruction.

- g. Calculators: A Categorized Compilation of References, Marilyn N. Suydam, \$5.50.

Provides annotated references that deal with the use of calculators in education. Each entry includes a limited set of descriptors which denote the focus of the reference. An index is appended.

- h. Task Variables in Mathematical Problem Solving, Gerald A. Goldin and C. Edwin McClintock, Editors, \$10.00.

A framework for research in problem solving is provided by categorizing and refining variables describing problem tasks. A model is presented in the first article for the classification of task variables into broad categories. Other articles define and discuss each category of task variables, give examples, survey the existing research literature, and explore the theoretical implications of task variables within the category.

- i. Assessing Mathematical Achievement, John L. Higgins, Margaret Kasten and Marilyn N. Suydam, Compilers, \$2.50.

Compiled to serve as a reference on assessment of achievement in pre-college mathematics, this report contains discussion of patterns of mathematical assessments in terms of the history and nature of assessments of achievement, the relationship between assessment and minimum competency testing, and the current status of state assessment programs. Portions of reports of the National Assessment of Education Progress and the California Assessment, grades 6 and 12, are presented to examine trends in mathematics achievement.

- j. A Categorized Listing of Research on Mathematics Education, 1974-1978. Marilyn N. Suydam, \$8.00.

Articles, dissertations, and ERIC documents for the five-year period are included in this compilation. An index cites the research reports by categories for major topics.

ACTION ITEMS

1. SMERC TO BE ADDED TO CLEARINGHOUSE NEWSLETTER MAILING LISTS

Ms. Susan Long, Director of the SMERC information unit, requests that she be put on the mailing list for all Clearinghouse newsletters. Her address is:

Ms. Susan Long
San Mateo Educational Reference Center
333 Main Street
Redwood City, California 94063

...Bob Chesley (Central ERIC)

2. INDEXING, AND USE OF THE REVISED 1980 *THESAURUS*

The lexicographic staff is beginning to wonder where all the copies of the new 1980 *Thesaurus of ERIC Descriptors* have gone! The RIE validation program flagged 225 unauthorized Descriptors for the August 1980 issue (not including those with typographical or scanning problems). Most of these were former Descriptors that are now UFs or "dead." The 225 terms accounted for a minimum of 19 hours additional editorial processing time—each had to be checked in the new *Thesaurus*, manually corrected, rekeyed, and then proofed. It appears that a similar situation is occurring with the September 1980 CIJE, although precise figures are not yet available.

A few old Descriptors in the input were to be expected as indexers begin to shift to the new *Thesaurus*. However, there were still 156 unauthorized Descriptors used in the September 1980 RIE input. Since September covered 4 weeks, rather than 5 like August, the reduction in unauthorized Descriptor usage over August is more apparent than real. This is especially true considering the fact that *more unauthorized terms were used in the later input* (110 usages were flagged in the last 2 weeks).

It appears that after briefly getting acquainted with the new *Thesaurus*, many indexers are now still depending on their recall. Using recall for indexing should never be encouraged, but this is especially true with the new *Thesaurus*. Many old stand-bys such as PROGRAM PLANNING, CURRICULUM PLANNING, etc. are simply no longer there. Scope notes have altered the meaning of some terms. More specific terms have been added. Sparse usage of the new terms gives credence to the suspicion that old editions of the *Thesaurus* may still be in use.

After talking with some Clearinghouse vocabulary coordinators, it is apparent that there are some old vocabulary lists and old *Thesaurus* Working Copies that have not been discarded (or archived). Personnel involved with RIE or CIJE input should in all seriousness avoid the old *Thesaurus*. Please see that all copies of the old *Thesaurus* are confiscated from indexers, editors, typists, free lance personnel, and other staff members involved with input. Try to remove all traces of the old *Thesaurus* from bulletin boards, desks, binders, etc. If in-house lists are used, please re-establish such

lists using the new *Thesaurus*. References or copies of pages from the *ERIC Processing Manual* that reflect the old *Thesaurus* should be thrown away. (All sections of the *Manual* referring to the *Thesaurus* are presently being updated and should be completed over the next 2 months.)

A few additional reminders:

- "Educational level" Descriptors are *still* mandatory.
- Mandatory "Age-level" Descriptors were implemented in March, effective with the August 1980 RIE and September 1980 CIJE.
- Descriptors that are *identical* to the Publication Types and which are not the subject of the document are *not* to be entered in the Descriptor Field.

For a discussion of these items, see the introductions to the March 1980 Working Copy or the June 1980 published *Thesaurus of ERIC Descriptors*.

Let's use the new *Thesaurus*, and make all the "blood, sweat, and tears" of the VIP stand for something.

...Jim Houston (ERIC Facility)

I. ERIC TECHNICAL STEERING COMMITTEE ANNOUNCEMENTS

In addition to planning and managing technical meetings, the ERIC Technical Steering Committee receives suggestions for changes in the system. These recommendations are screened, reviewed, combined, and final recommendations made to Central ERIC. A recent set of recommendations and Central ERIC responses are included in Attachment 1.

...Bob Chesley (Central ERIC)

II. CENTRAL ERIC ANNOUNCEMENTS

A. Milton Goldberg Reassigned

Milton Goldberg, until recently NIE Associate Director for Dissemination and Improvement of Practice (DIP), has been assigned the responsibility for heading the Office of Dissemination and Professional Improvement in the Education Department. This new unit is located under the Assistant Secretary for Research and Improvement of Practice, the same organization that contains NIE. Eunice Turk, previously the Assistant Director for Program Coordination and Analysis in DIP is the new Acting Associate Director for DIP.

...B.C. (Central ERIC)

B. Russian Papers

The help of the ERIC Clearinghouses in putting together four documents concerning the status of educational research in Russia was well received at NIE. A belated note of thanks to those involved is displayed in Attachment 2.

...Bob Chesley (Central ERIC)

C. Proposed Vocabulary Development Program

An outline of the proposed procedure for future ERIC vocabulary development is displayed in Attachment 3. All Clearinghouse vocabulary coordinators and others involved in vocabulary work should carefully review this new procedure and accompanying forms:

- Attachment 4—ERIC Vocabulary Development Form
- Attachment 5—ERIC Vocabulary Development Program
- Attachment 6—ERIC Vocabulary Status Report

It is hoped that what is proposed will streamline the current method of updating and changing the ERIC vocabulary.

Please send or call in your comments and suggestions to me during the month of August. We hope to implement a new system in early September.

...Pat Coulter (Central ERIC)

D. 1979 IAP Bibliography Off the Press

The third edition of the publication *ERIC Information Analysis Products (and Other Clearinghouse Publications)*, 1979 is now off the press and Clearinghouses will soon be receiving their supply of copies. As you distribute these print copies, this would be a good opportunity to tell your clients about the *microfiche* copies of IAPs available in a mini-file from EDRS. Information on this min-file is written in news style as a sample item which could be submitted to the professional journals in your scope areas in order to publicize IAPs (see Attachment 7).

...Mildred Thorne (Central ERIC)

III. ERIC FACILITY ANNOUNCEMENTS

A. Back Issues of RIE

The Facility stocks a modest number of back issues of RIE for use in satisfying the requests of libraries for out-of-print issues to complete their sets. The following issues are available in larger quantities than we want to stock and could be obtained by Clearinghouses that might find them useful in training sessions.

Any Clearinghouse wishing to obtain copies of the RIE issues listed below should contact Al Hill at the ERIC Facility.

YEAR	MONTH	NUMBER OF COPIES AVAILABLE
1974	November	25
1976	November	150
1977	April	50
1977	October	50
1978	March	50
1978	May	50
1978	November	50
1979	July	50
1979	August	50
1979	December	50
1980	May	75
1980	June	75

...Ted Brandhorst (ERIC Facility)

B. Identifiers and the Identifier Authority List

The Identifier validation program was implemented for the first time in June 1980 with the August RIE. The new program runs the Identifier Authority List (IAL) against the terms in the Identifier Field and flags as "Unauthorized Identifier" all terms not in the IAL. All flagged terms are reviewed by the lexicographic staff, and new Identifiers that are approved are added to the IAL prior to the release of the monthly issue. When the issue is released for publication, a second pass of the Identifier Field is made, and an *Identifier Exception Report* is created. This report provides a second Identifier check for the master files. The program that generates the *Exception Report* was implemented earlier than the Identifier validation program; this report has now been generated for three RIE issues (July, June, and August). On the basis of these reports, it appears that RIE alone will account for 250-300 new Identifiers each month. Figures are not currently available for CIJE, but it is expected that a comparable amount may be produced for that publication.

Over 350 occurrences of "Unauthorized Identifier" flags were reviewed for the August RIE (a 5-week issue). Those that did not result in a new Identifier added to the IAL were usually modified and then added, changed to an existing IAL Identifier, or moved to an appropriate Descriptor. While most of the new Identifiers could readily be added to the file after the addition of a category number, others presented some problems. Some guidelines intended to alleviate these problems are included as Attachment 8. This Attachment contains no really new guidelines, but reminders of established practices. Please review it and add it to your copies of the IAL.

Basically, the input of Identifiers for RIE has been good (i.e., reasonable in quantity as well as content). It appears that most indexers are using the IAL and not generating needless entries. If you have terms that you plan to use for a number of documents and that are not in the IAL and that may appear to the uninformed as "off-the-wall," call or drop a note to the lexicographic staff to alert us. Eventually, within the next few weeks, procedures and the "IAL Input Form" that were discussed at the National Technical Meeting will be implemented; these will further aid the generation of new Identifiers.

...Jim Houston and Carolyn Weller
(ERIC Facility)

IV. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Higher Education

1. HE Participates in the Annual Conference of the National Association of College and University Attorneys

Lynn Barnett, Laura Ciarniello, and Margot Eddy staffed an exhibit and demonstrated computer searching at the National Association of College and University Attorneys Conference held in Washington, D.C. In addition, an ERIC bibliography on legal issues in higher education was distributed by HE to each registrant.

...Marilyn Scutt Shorr (HF)

B. ERIC Clearinghouse on Languages and Linguistics

1. Workshop for Minority Librarians

Staff from the FL Clearinghouse and Lynn Barnett from the HE Clearinghouse presented a workshop on ERIC which was sponsored by the NIE Office of Minorities and Women at Bowie State College on July 30-31, 1980. The 37 participants came from 18 states, the District of Columbia, and Puerto Rico.

...M.N. (FL)

2. Behrens Attends Meeting

Sophia A. Behrens attended the meeting of the American Speech-Language-Hearing Association's Steering Committee of the Board of Examiners in Speech Pathology and Audiology on July 12-14, 1980.

...M.N. (FL)

3. Linda Turner Departing FL

Linda Turner, User Services Coordinator at FL for the past three years, left the Clearinghouse to work on another contract at CAL on

June 13, 1980. She'll be a hard act to follow! Her replacement is Lori Street. Lori taught Spanish and French for three years at the secondary level and also has public relations experience.

...Mary Niebuhr (FL)

C. ERIC Clearinghouse on Reading and Communication Skills

1. CS Participates in AASA Conference

Linda Baskin and Janet Bowermaster participated in the summer instructional leadership conference held by the American Association of School Administrators in Chicago, Illinois in July. They conducted on-demand computer searches of the ERIC data base and answered questions about the ERIC system.

...M.S. (CS)

2. Mima Spencer Visits Louisiana SEA

Mima Spencer participated in the State Technical Assistance Team visit to the Louisiana State Department of Education, August 6-7, 1980.

...Mima Spencer (CS)

D. ERIC Clearinghouse on Rural Education and Small Schools

1. Edington Involved in International Meetings

Dr. Everett Edington, Director of the ERIC Clearinghouse on Rural Education and Small Schools, is to chair a session on "Rural Youth Organizations" and to present a paper entitled "Education of Rural Minorities in the United States and Selected Countries" at the Fifth World Congress of Rural Sociology in Mexico City, August 7-11, 1980.

At the same meeting, the International Rural Youth Researchers organization will also meet. Dr. Edington is one of the co-founders of that organization.

...A.H. (RC)

2. Edington Gives Presentation at ECS Meeting

Dr. Everett Edington, Director of ERIC/CRESS, gave an ERIC presentation at the Education Commission of the States annual meeting in Atlanta, Georgia, July 31 to August 2, 1980.

...Amelita Hill (RC)

E. ERIC Clearinghouse on Social Studies/Social Science Education

1. New FTS Number for S0

Please change the FTS number for the S0 Clearinghouse which appears on page 19 of the *ERIC Directory* to 320-3308.

ERIC TECHNICAL STEERING COMMITTEE RECOMMENDATIONS/CENTRAL ERIC RESPONSES

1. RECOMMENDATION:

That the indexing of the ERIC Processing Manual be revised to clarify (1) the relationship between the descriptors and the abstract, and (2) guidelines for assigning educational level terms when the intended level of the document is difficult to identify. (Specific suggestions for these recommended changes are as follows:

- ERIC Processing Manual, Section 7.4.2 (last paragraph, p. 234)

Suggested change:

"Whether the abstract is author-provided or written or modified within the ERIC system, it is a good idea to examine the index terms in relationship to the language of the document. The use in the abstract of author phrasing and terminology or other near synonyms for the index terms provides a supplementary means of access for full-text searching. However, the descriptors should all make sense in the context of the abstract. In cases where..."

- ERIC Processing Manual, Section 7.4.6, p. 225, #2

Suggested change:

"Are the concepts represented by the major terms reflected in the abstract, i.e., will the searcher coming to the abstract through the descriptors be able to see that they are appropriate to the context of the abstract?"

- ERIC Processing Manual, Section 7.4.3, p. 238ff

Suggested change:

"Some notes on determination of the educational level based on an 'educated guess,' as opposed to not assigning any level descriptor because of lack of information would be helpful. Example #6 on p. 238F seems to fall in the same category as #7 (i.e., 'Though designation of educational level might be applicable in this case, none could be indexed without further information.')

"An example of 'educated guessing' might be as follows: A curriculum guide titled 'Heavy Equipment Mechanics: Trade and Industrial Education Two-Year Course' might be indexed:

DESCRIPTORS: *AUTO MECHANICS; *DIESEL ENGINES;
*TRADE AND INDUSTRIAL EDUCATION;
BEHAVIORAL OBJECTIVES; LEARNING
ACTIVITIES; HIGH SCHOOLS; POSTSECONDARY
EDUCATION

"Although the document itself may make no reference to intended level for the guide, the indexer knows from experience that the material is typical of that in similar guides designed for vocational high school, private or public technical school, and community college programs. Thus, assigning the two leveling terms is preferred to not assigning any."

ACTION:

Approved. The proposed changes have been referred to the ERIC Facility for inclusion in the indexing section of the ERIC Processing Manual.

2. RECOMMENDATION

That the Facility lexicographer study the possibility and draft ideas of some alternative to the "USE"/"UF" references in the Thesaurus (particularly the double UFs) in cases where the reference is not intended to be taken literally but is intended to direct the indexer/searcher to "see" some other descriptor display(s).

ACTION:

In order to ensure a continued systemwide vocabulary development program, a new procedure for vocabulary development is now being considered. This new procedure includes the use of one review/advisory group. In addition to reviewing specific recommendations for changes and new terms, this group will be responsible for reviewing issues which were not resolved during VIP.

This suggestion will be referred to the Executive Committee of the Vocabulary Review Group (Facility lexicographer is a member of the Executive Committee). This group should be operational in September.

3. RECOMMENDATION

Future issues of Working Copies of the Thesaurus should carry RIE and CIJE postings, in order to facilitate searching at Clearinghouses and to help I/A people use terms more consistently. (Periodically, Clearinghouses can consider deletion of terms not being utilized.)

ACT N:

This effort would cost approximately \$1,000. Since cost is a significant issue and the RIE/CIJE postings appear in the printed edition of the Thesaurus, this project will not be funded in order to fund recommendation #5: adding RIE/CIJE postings to the ERIC Identifier Authority List.

4. RECOMMENDATION

That in future editions of the Thesaurus of ERIC Descriptors every "invalid descriptor" carry as part of its scope note (or in a footnote on the same page) an indication that it must be used for retrieving material indexed before the descriptor's "death date."

ACTION:

This recommendation needs further study. During the next month the ERIC Facility and Central ERIC will review this subject further and in September this suggestion will be reviewed by the new Executive Committee of the Vocabulary Review Group.

5. RECOMMENDATION:

That future editions of the Identifier Authority List carry after each entry the number of RIE and CIJE postings to that identifier. Besides serving both searchers and indexers (in the same way that postings carried in the Thesaurus do), this information would help vocabulary improvement coordinators isolate identifiers which should be considered for descriptor status.

ACTION:

This recommendation will be implemented.

6. RECOMMENDATION:

That the indexing section of the ERIC Processing Manual be published separately for the general public (publicized in future editions of the Thesaurus, in RIE, etc.) so that serious searchers of the data base have access to the guidelines followed in ERIC indexing. Usefulness of the abstracting and cataloging guidelines to a wider audience might also be considered.

ACTION:

This is a good suggestion. In addition to providing basic information to users by clarifying ERIC indexing methods, users' comments may suggest improvements. It will be published by the Facility with a sales price comparable to other ERIC TOOLS.

7. RECOMMENDATION:

All Clearinghouses should be required to use the disposition code on the Acquisitions Data Report. Those Clearinghouses that enter documents before selection will leave the code blank until the disposition is known. All disposition codes should be updated as necessary.

ACTION:

Central ERIC recognizes the need for use of a disposition code in every case where a document title is entered on the Acquisitions Data Report. However, since several other changes in the ADR section of the ERIC Processing Manual are under consideration, implementation of this recommendation is deferred until the other revisions are completed.

ERIC STAFF —

A nice comment on all the work
you did. *BD*

MEMORANDUM DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
NATIONAL INSTITUTE OF EDUCATION

DATE: 8 July 1980

TO : Michael Timpane, Director Designate
Gladys Keith Hardy, Deputy Director Designate

JK
FROM : Iris Rotberg, Assistant Director
Office of Planning & Program Development

SUBJECT: Soviet Papers

As you know, the Planning Office sponsored several papers on Soviet educational research and practice last year. At Chuck Hoover's suggestion, these papers were subcontracted through four ERIC Clearinghouses. Bob Chesley and his staff were extremely helpful in working with us and with the Clearinghouses so that the work was completed in a highly professional and efficient way. I would recommend this method of commissioning papers to NIE staff. I found it a most useful and relatively inexpensive way of accomplishing the work.

Robert Chesley ✓
Milton Goldberg
Lois-ellin Datta
Marc Tucker

PROPOSED ERIC VOCABULARY DEVELOPMENT PROGRAM

As a result of the system's experience with VIP as well as the need to increase efficiency and reduce costs, the following procedure is suggested for future development and control of the ERIC vocabulary.

1. There will be one basic procedure and one form for the submission and review of all proposed changes to the ERIC vocabulary. (In the past, backfile changes and the submission of new terms were treated separately and required separate forms.)
2. ERIC Clearinghouses and selected users will have an opportunity to submit and review all proposed changes and additions prior to final review/implementation by the Facility.
3. The former Vocabulary Review Group will be reconstituted, reduced in number, and will serve as the one review/advisory group for the ERIC Vocabulary Development Program. In addition to receiving specific recommendations for changes and new terms, this group will be responsible for reviewing larger issues such as hierarchies, overlapping concepts, and other broad questions which were not resolved during the VIP program. The former Thesaurus Advisory Panel will be abolished. The new group will consist of the following members:
 - 16 - ERIC Vocabulary Coordinators
 - 1 - Facility Lexicographer
 - 1 - CIJE/Thesaurus Contractor
 - 1 - CERIC Project Monitor
 - 5 - Users representing the ERIC online users group, an online search facility, a university librarian, a school librarian (manual search facility), and an educational practitioner. Members of this group will be rotated every two years.

Further, this group will have an Executive Committee composed of the former members of the VIP Executive Committee (4), the Facility Lexicographer, and an ERIC monitor. The purpose of this group is to resolve any problems/conflicts identified by the larger review group.

4. The Chair of the VRG will assume the following responsibilities:
 - a. Coordinate activities of the VRG and act as liaison among Facility, Clearinghouses, users, and Central ERIC.
 - b. Receive from Facility Lexicographers all negative comments from VRG members pertaining to proposed Thesaurus changes.
 - c. Collate and summarize those negative responses.

- d. Arrange monthly meetings (telephone, if possible) of the VRG Executive Committee to assess negative responses.
- e. Prepare final recommendations for Facility Lexicographer.
5. The present DJF Status Report (revised and renamed "Vocabulary Status Report") will be used as the mechanism for alerting the Vocabulary Review Group to proposed changes. This new form will also be used to solicit comments and recommendations. This form will list proposed changes with brief annotation or a scope note for new terms. The present form lists only the term itself.) Reviewers will be able to comment directly on the form and/or attach more extensive comments.
6. The DJF form developed for the VIP program will be merged with the old TCN form to produce a basic form on which all changes and new term recommendations will be submitted. This new form will be known as the "Vocabulary Development Form."

This new procedure is still in "draft" form as are the new forms attached. We welcome your comments and suggestions.

ERIC VOCABULARY DEVELOPMENT FORM

D. Authorities Used

(Citations of regularly used authorities may be copied onto the form.) Each authority used should be marked as X = Term Found, 0 = Term Not Found

- Good, Dictionary of Education, 1973
- Page & Thomas, International Dictionary of Education, 1977
- NCES, Combined Glossary, 1977
- ED156915 -- 'The Role of Education in Desegregating Schools in Large Cities'
-
-
-
-
-
-
-
-

E. Impact on Thesaurus

Indicate potential impact of this transaction on hierarchies and other terms in the Thesaurus. Consider, particularly, any overlap with other terms. Homographs should be qualified; occasionally, additional forms, revising older scope notes and displays, will need to be submitted in order to avoid indexing mistakes.

Unambiguous. No overlap. Not a homograph.

F. Impact on Data Base

1. New Term

- Attach full-text search, including strategy. Do not limit the search (i.e., by Cleanhouse, by RIE or CLJE, etc.). **SEARCH ATTACHED**
- List identifiers to be transferred to new term. Include all variations. It is unnecessary to also list accession numbers to which the identifiers are posted.

Magnet Schools Russell Conwell Middle Magnet School
Magnet Centers Magnet School Plan
Magnet Programs Conwell Middle Magnet School
Magnet Program

- List all accession numbers to which the new term should be posted, excluding those posted by the identifiers listed above. Precede by an asterisk (*) those accession numbers where the new term should be a major Descriptor.

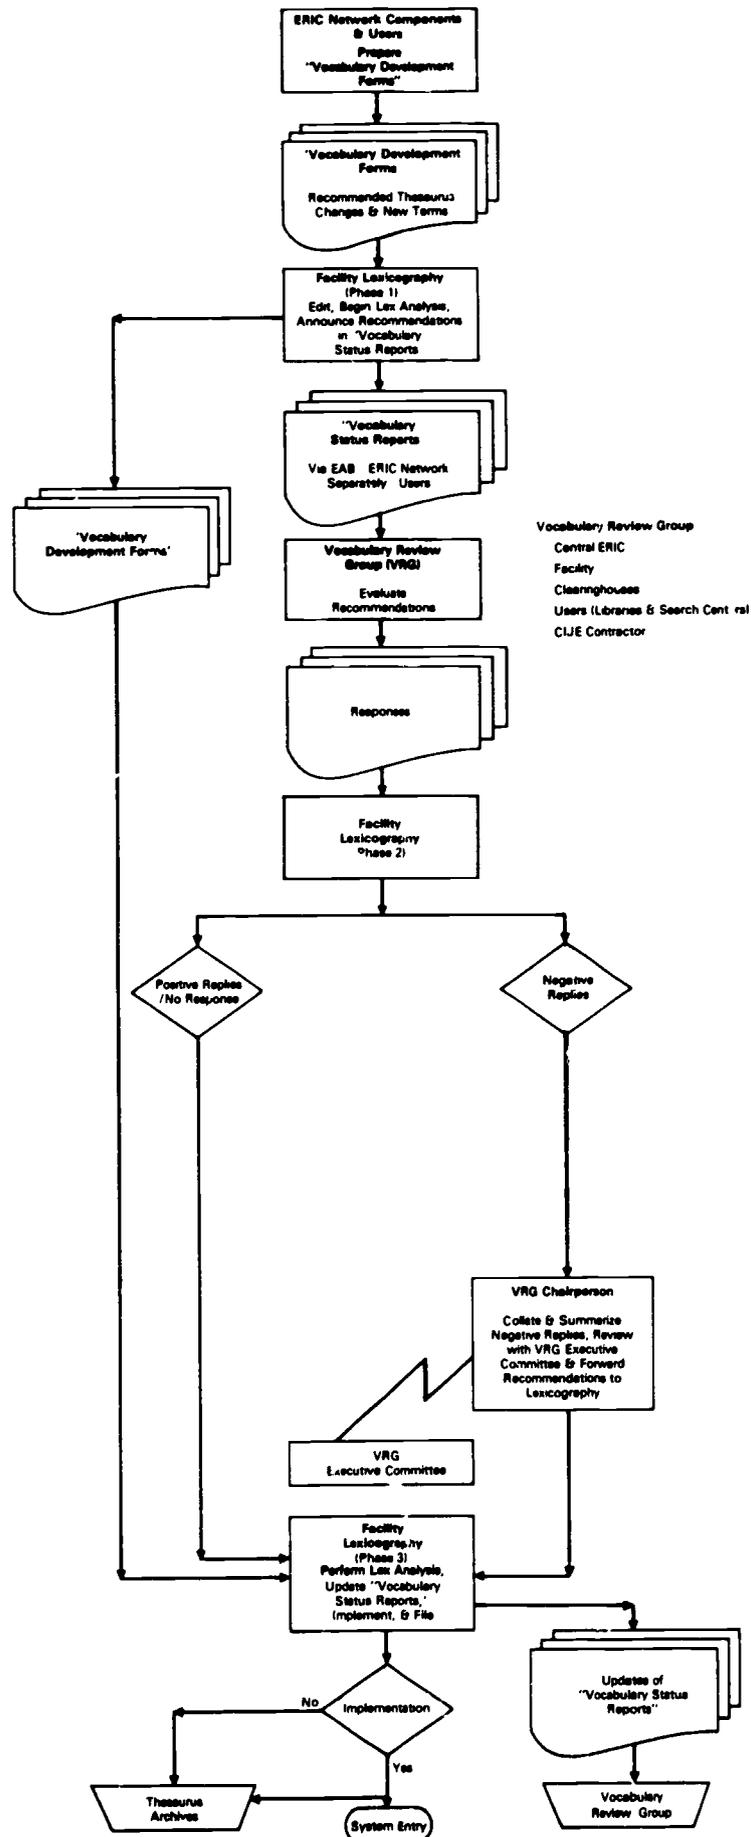

EDD16718	ED064434	*ED117206	ED145054	ED148960	*ED156915	ED178646	*EJ203973
ED019341	ED078621	ED117226	ED145058	*ED149454	ED166214	*ED181931	*EJ207708
ED041056	ED094014	ED130450	*ED146313	ED152905	ED169172		*EJ210203
*ED064125	ED116307	ED137433	ED146708	ED152912	*ED170423		

2. Purge

- Attach search.
- Show total postings: _____
- Check one:
 - Transfer all postings to _____
 - Transfer postings to _____, excluding _____ (List accession numbers and show necessary manual reindexing for each.)

Postings are not transferable.
(Attach 2nd form for invalid/“dead” term entry, or provide manual reindexing for all postings.)

MINI-LIBRARIES OF IAPs ON FICHE

ERIC (Educational Resources Information Center) has put the 944 "Information Analysis Products" produced by the 16 ERIC Clearinghouses from 1975 to 1979 on microfiche and made the collections available to educators in specially designed boxes. Contained in each mini-file are microfiche copies of interpretive reports on topics of high current interest, annotated bibliographies, research reviews, and state-of-the-art studies. A paper copy of a bibliography listing (by Clearinghouse) all the documents in the mini-file and indexing them by subject, author, and institution is enclosed with each box.

The mini-files for each year are available from the ERIC Document Reproduction Service (EDRS), P.O. Box 190, Arlington, Virginia 22210 at the following prices:

1975-1977 (574 documents) - \$99.50 (includes postage)
1978 (211 documents) - \$37.35 (includes postage)
1979 (159 documents) - \$20.95 (includes postage)

(Reproduce and include in all copies of IAL)

BASIC GUIDELINES FOR ERIC IDENTIFIERS

1. UFs of Descriptors are *not* permitted in the Identifier Field. To permit them would defeat the reason for their existence in the first place (i.e., to reduce the number of synonyms for a concept). If you disagree with a particular UF, submit a *Thesaurus* change or call the Lexicographers.
2. Identifiers should never have their first word abbreviated, i.e., not "Natl Commission Libraries and Information Science," but rather "National Commission Libraries Information Science."
3. To shorten a concept that exceeds 50 characters (including spaces):
 1. remove first conjunctions and/or prepositions;
 2. abbreviate common words such as association (Assn), education (Educ);
 3. truncate at the end of the line.

Normally, the first and second procedures make the third unnecessary. Put yourself in place of the searcher, and imagine what would normally be the important words to be searched.

4. Invalid or "dead" Descriptors are just as invalid in the Identifier Field as they are in the Descriptor Field.
5. Homographs or potential homographs should be avoided *unless* qualified, e.g., "Flooding (Psychology)." Education jargon (being what it is and borrowing as it does from every field) is an area ripe for homographs, and new Identifiers should be reviewed with the non-subject specialist in mind.
6. Institutions, centers, schools, etc., should have the standard state postal abbreviation added if the state name is not a part of the term (e.g., "Wheaton College IL"). Other entities such as councils, organizations, projects, etc. should have the postal abbreviation added if the addition will help prevent confusion (e.g., "Northeastern State Council WA"). For all similar entities in countries other than the United States, follow the organization name with the name of the country in parentheses. Institutions, schools, organizations, etc., are being verified by the Lexicographers for their existence and correctness through use of such directories as NCES's *Higher Education Directory*, Patterson's *American Education*, and the *Encyclopedia of Associations*.
7. States (and provinces of Canada) are to be entered with the state/province name first followed by the city name within parentheses, e.g.:
 - California (Los Angeles);
 - Quebec (Montreal).

Geographic entities of countries other than the United States and Canada should always begin with the name of the country followed by the subentity within parentheses. Remember that now that ERIC has a Geographic Source

geographic Identifiers should be used *only* when they represent the subject matter or area studied; they should *not* be used simply to indicate the source of the document.

8. Public Law numbers should be avoided and the name of the Act used instead. For example, "P L 94 142" should not be used. Use instead "Education for All Handicapped Children Act." If you have a public law number that you cannot translate into an Act name, call the Lexicographers and it can be looked up.

NOTE:

Identifiers may not contain ANY punctuation other than parentheses, i.e., () marks.

- No periods;
- No hyphens;
- No commas;
- No question marks;
- No exclamation marks;
- Nothing, except parentheses.

They may look "funny," but names such as "Smith (Sam P)," "45 15 Plan," etc. must be entered without punctuation. Please alert all indexers, editors, and typists.

Identifiers may not exceed 50 characters including spaces.

All Identifier guidelines and rules apply to *both* RIE and CIJE.

NEW INFORMATION ANALYSIS PRODUCTS

ERIC Clearinghouse on Rural Education and Small Schools

- a. American Indian Community Controlled Education. "Determination for Today, Direction for Tomorrow", Joseph C. Dupris, 57 pages, (NELP-\$6.25, Stock No. EC-083), RC 012 058.

The Basic Indian Education Act and the Indian Self-Determination Education Assistance Act have helped to pave the way for American Indians to realize their historical right to contrroll their own education. This paper discusses the focus of the 1980's toward consolidation of school contracting procedures, including obtaining a centralized contractive authority under the BIA; curriculum development in the area of cultural education; and parental and tribal participation in public schools.

- b. So You Need Information About Mexican Americans? Let ERIC Help!, Manuela L. Quezada and Richard Chabran, 68 pages, (NELP-\$6.25, Stock No. EC-082), RC 012 072.

The guide describes ERIC's functions, what kinds of documents are found in the data base, where the documents come from, and who uses the system. Procedure is given for conducting both manual and computer searches of the data base, with detailed descriptions devoted to the use of descriptor and identifier retrieval terms under which all documents are indexed. The most commonly used Mexican American descriptors and identifiers are listed. Use of the "Thesaurus of ERIC Descriptors", the monthly "Resources in Education" abstract journal, and the monthly "Current Index to Journals in Education" is also explored.

- c. Motivating Migrant Secondary Students: "No One Can Stop You But Yourself", Robert Lynch, 59 pages, (NELP-\$6.00, Stock No. EC-081), RC 012 007.

To identify the factors contributing to the high dropout rate of secondary migrant youths, 350 youths were surveyed to assess what they viewed as "good" programs and why they had dropped out of school. This monograph discusses their reasons for dropping out; compares the responses with other studies; provides interviews with migrant students, excerpts from letters, and articles which shed light on the young people's experiences with secondary education; and describes nine exemplary programs.

- d. The Impact of Interstate Programs on Continuity in Migrant Education, Cassandra Stockburger, 71 pages, (NELP-\$6.50, Stock No. EC-078), RC 011 966.

Interstate planning has increased markedly in the past decade since the availability of migrant education funds under the Elementary and Secondary Education Act, but planning remains piecemeal with no effective coordination at the federal level. The most notable efforts to deal with the question of educational continuity have taken place outside the public school system. This report points out the need for migrant educators to develop new techniques to take advantage of the natural continuity which exists within the child and his family.

- e. Directory of Selected State Outdoor Education Programs: State Responses to a 1979 Query Conducted by the Council on Outdoor Education/AAHPERD, Judi Conrad, Comp., 298 pages, (NELP-\$8.75, Stock No. EC-087), RC 012 096.

Nearly 1200 on-going outdoor education programs, projects, and/or curricula in U.S. elementary and secondary schools are listed and annotated in this 1979 directory, the result of a national survey sponsored by the Council on Outdoor Education within the American Alliance for Health, Physical Education, Recreation, and Dance (AAHPERD). Following a brief introduction describing the purpose, method, and funding of the survey, results for each survey item are presented in tabular form. A state-by-state comparison of responses is included.

- f. Establishing a State Outdoor Education Association: The New York Model, Thomas P. Benjamin, 44 pages, (NELP-\$5.50, Stock No. EC-088), RC 012 054.

Because the New York Outdoor Education Association (NYSOEA) has made significant contributions to the establishment and expansion of outdoor education programs in the state and throughout the world, this guide is directed toward those who want to strengthen their own state or regional association or to create one. The paper provides an analysis of the strategies contributing to the success of the NYSOEA and suggests concrete procedures for establishing comparable state outdoor education associations.

- g. Legal Liability--Adventure Activities, Betty van der Smissen, 48 pages, (NELP-\$5.75, Stock No. EC-086), RC 012 055.

The adventure of adventure education comes in the testing of oneself, in pitting self against the environment and in striving to overcome the environment through personal skill. Unfortunately, instead of perceiving the risks in terms of physical and psychological challenges, many schools and other organizations perceive them in terms of liability suits. The five aspects of legal liability involved in most court cases are discussed, as are the four methods of financial risk management.

- h. Utilizing Adventure Education to Rehabilitate Juvenile Delinquents, Gerald L. Golins, 74 pages, (NELP-\$7.00, Stock No. EC-084), RC 012 057.

The use of adventure based education is a new and relatively unresearched but apparently successful practice in the rehabilitation of juvenile delinquents. Courses offered by schools, state social service system, juvenile courts, youth service bureaus, and other agencies are generally patterned after the standard Outward Bound course and involve the mastery of such outdoor pursuits as mountaineering, sailing, or river rafting.

This document includes an out-line of steps in the development of an adventure education rehabilitation program; a sample program schedule; suggested teaching methodology; and a reprint of an article emphasizing the need for adequate follow-up activities.

- i. America's Small School, Barbara L. Schneider, 50 pages, (NELP-\$6.00, Stock No. EC-085), RC 012 073.

Dissatisfaction with the quality of education in large elementary and secondary schools has been one of the factors leading to rediscovery of the small school in America. The question is whether small schools are truly better places for educating elementary and secondary students. Although often viewed as being essentially rural in nature, small schools are found in metropolitan areas as well and may include religious schools, prep schools, American Indian schools, and alternative schools. Student enrollment, geographical location, organizational type and funding sources are all factors that must be considered in the study of small schools and their effectiveness. This document directs attention to several studies that look at the positive side of education in small schools.

- j. Education for Rural Women: A Global Perspective, Lily Chu, 43 pages, (NELP-\$5.00, Stock No. EC-080), RC 012 018.

This paper recognizes the urgent educational needs of rural women; summarizes research and statistical findings on rural women in the areas of education, income, employment, and values orientation; points out some cultural conflicts and dilemmas that may occur as a result of short-sighted, fragmented, and hastily implemented educational programs; presents a global perspective of the education of rural women which calls for social and policy changes and is multidimensional, grassroots based, and oriented to the culture and people of rural America; and delineates the needs for research, for regional rural centers, and for federal support in rural women's education.

- k. You and the Rural Connection: Answers to Your Questions about Rural Career Guidance, Harry Drier and others, 34 pages, (NELP-\$4.50, Stock No. EC-079), RC 012 016.

Samples of the approximately 1,900 requests for information received by the Rural Connection between September, 1977, and November, 1978, have been selected to give the reader a general idea of the kind of career information requested by guidance counselors in small, rural schools. The requests are organized into two main categories. Career Education and Information of Professional Interest to Guidance Counselors. The source of each sample request is noted, along with information given in response and any additional action which may have been taken to help the caller. Statistics on the occupational categories of the callers, the kind of request, and how the caller learned of the Rural Connection are also provided.

All of these publications are available from NELP:

ACTION ITEMS

1. CLEARINGHOUSE MAILING LIST CHECK

Please review your mailing lists for newsletters and other general mailings to make sure that the NIE library is included. It is important that the mailings be directed *by name* to the following address:

Ms. Joanne Cassell
NIE Library
National Institute of Education
Washington, D.C. 20208

...Bob Chesley (Central ERIC)

2. THE NEW *THESAURUS*

Although the preface to the new *Thesaurus* invites users to send their comments directly to Central ERIC, questions have arisen within ERIC about a formal procedure for discussing such Clearinghouse staff comments.

In an effort to streamline handling of comments and suggestions, Lynn Barnett, who has been named Chair of the reconstituted Vocabulary Review Group, has been asked to receive *Thesaurus* comments from within the system. (See the August EAB for a description of the Vocabulary Review Group which includes Clearinghouse, Facility, and user representatives, which will be using the revised vocabulary development procedure.) Hopefully, we can benefit from the VIP experience to solve future problems. Please send your general comments, criticisms, or questions to Lynn at HE.

...P.C. (Central ERIC)

3. HOW TO CITE AN ERIC DOCUMENT

ERIC staff and librarians are frequently asked for the "correct" form for citing an ERIC document. Various forms are suggested by several style manuals. After reviewing these suggested forms (as well as those submitted from several people with the ERIC system), the following format has been concluded to be most useful to users and librarians.

Please review the format and let me know whether it should be adopted as the "official" ERIC recommendation on how to cite an ERIC document. Such a recommendation is planned for inclusion in RIE and CIJE and perhaps other publications as well.

EXAMPLES:

● RIE

Cleek, John E. et. al. Directions: Addresses on Education. Overland Park, Kansas: Johnson County Community College, 1979. 42p. (Cited in ERIC, Resources in Education, ED 180 555).

● CIJE

Wilhite, Lora. "Physics Teaching in a Rural School." Physics Teacher. Vol. 17, no. 6, p. 357-61, September 1979. (Cited in ERIC, Current Index to Journals in Education, EJ 210 087).

...P.C. (Central ERIC)

4. A REMINDER - FL HAS MOVED

As noted in the July 1980 EAB, the ERIC Clearinghouse on Languages and Linguistics has moved from Arlington, Virginia to Washington, D.C. Please be sure that all ERIC systemwide publications and Clearinghouse printed products carry the new FL address and telephone number which is:

ERIC Clearinghouse on Languages and Linguistics
Center for Applied Linguistics
3520 Prospect Street, N.W.
Washington, D.C. 20007
(Telephone: (202) 298-9292)

...Pat Coulter (Central ERIC)

5. EAB STORY SUBMISSION

Articles for the EAB are currently being received in very casual and unstandardized form and while this poses no serious problem, there are occasional articles which do not bear the name of the person submitting the story, or the name of the Clearinghouse involved. This often requires some sleuthing, and while there are clues in the text as to which Clearinghouse is reporting, obtaining the name of the submitter requires calling the Clearinghouse.

A so-called "ERIC Article Submission Form" (Attachment 1) has been designed which may help the situation. There is no requirement for its use, but it might be helpful if several copies were Xeroxed and used when material for the EAB is written. Handwritten stories are still welcome, of course. Just be sure each story includes the following minimum information:

- Date of preparation;
- Headline;
- Text of article;
- Indication that the article has an attachment;

- Name and code of the Clearinghouse;
- Name of the person submitting the story.

Also, please keep in mind that all stories must be sent to the contract monitor by the 10th of each month. All news items must be approved by Central ERIC before they are included in the EAB.

...Elizabeth Pugh (ERIC Facility)

I. CENTRAL ERIC ANNOUNCEMENTS

A. No Advisory Board Meeting During Final Contract Year

The time is approaching when several ERIC Clearinghouse contracts will be recompeted. During the last round of competitions five years ago, the policy was established that Advisory Board meetings would not be held during the final year of any contract. We have recently reviewed this policy with the Contracts and Grants Division. They express serious concern about possibilities of protest due to unfair advantage. The policy will, therefore, remain in effect. However, the policy should not prevent communication and sharing of information unrelated to contract renewal.

...B.C. (Central ERIC)

B. Summary of Selected Clearinghouse Quarterly Report Data for 1979

Summaries of statistical data from the Clearinghouse Quarterly Reports in 1979 are displayed as Attachment 2. (These reports were:

- Breakdown of Users;
- Type of Requests;
- Question Answering Activities;
- Documents Acquired and Processed.)

Although there are some inconsistencies which the coming revision to the ERIC Administrative Manual should resolve in the future, the figures indicate extensive activity across the system.

...Bob Chesley (Central ERIC)

C. ERIC Clearinghouse Contracts Renewed for EC, HE, JC, and UD

The National Institute of Education has exercised the Government's option to renew contracts for the following four ERIC Clearinghouses:

- ERIC Clearinghouse on Handicapped and Gifted Children (EC)

This marks the fifth year of this contract (September 1, 1980 to August 31, 1981). During the contract year EC will undertake two special projects:

- (1) The Clearinghouse will perform the function of host to the Eastern Regional ERIC Technical Meeting to be held in the Fall of 1980.
- (2) The Clearinghouse will coordinate the activities of the ERIC Clearinghouse Computer Search Committee and computer searching workshop.

- ERIC Clearinghouse for Higher Education

This marks the third year of this contract with George Washington University for operation of this Clearinghouse. The contract provides for customary ERIC input-output activities plus a small special project to provide for 10% of Lynn Barnett's time in assisting in the final implementation of the systemwide Vocabulary Improvement Program recommendations.

- ERIC Clearinghouse for Junior Colleges

This marks the third year of this contract (September 1, 1980 to August 31, 1980). During the contract year JC will undertake three special projects:

- (1) The Clearinghouse will complete work on 60 research methodology descriptors for the *Thesaurus of ERIC Descriptors*.
- (2) The 1974 ERIC *Directory of Acronyms, Initialisms, and Abbreviations* will be revised and updated.
- (3) The Clearinghouse will conduct a bibliometric assessment of ERIC citations in the community college literature. This project supports ERIC's concern for spreading ideas that affect educational practice.

- ERIC Clearinghouse on Urban Education

The ERIC Clearinghouse on Urban Education has been awarded a renewal for the fourth year of their operation of the Clearinghouse under the present contract as of September 1, 1980 - August 31, 1981. The Director, Erwin Flaxman, and his staff are to be commended for the excellence of their work over the past year and for the interesting plans they have made for the coming year.

For lists of Information Analysis Products to be produced by these four Clearinghouses, please see Attachment 3.

...Cheryl Chase - EC
 Frank Smardak - HE
 Pat Coulter - JC
 Kit Welsh - UD
 (Central ERIC)

D. THESAURUS PROMO SLIDE TAPE SENT BY IR TO ALL CLEARINGHOUSES

The ERIC Clearinghouse on Information Resources has distributed copies of the *Thesaurus* Promo Slide Tape to all Clearinghouses. Reactions to the product have been extremely favorable. I would encourage you to use it whenever possible.

...Cheryl Chase (Central ERIC)

E. ERIC-RELATED ITEMS IN THE NFAIS NEWSLETTER

A copy of the *NFAIS Newsletter*, Volume 22, Number 4, 1980 is enclosed with this issue of the EAB. There are two-ERIC related news items carried in this edition:

- Page 10: National Institute of Education (NIE) Mini-Library on Fiche.
- Page 18: Educational Resources Information Center (ERIC) New ERIC *Thesaurus*.

...Pat Coulter (Central ERIC)

F. EASTERN REGIONAL TECHNICAL MEETING

As previously announced in the EAB, the Eastern Regional Technical Meeting is scheduled to be held in Washington, D.C. on October 22-23, 1980. Arrangements have been made for out-of-town attendees to be housed at the Embassy Square Hotel at 2000 N Street, N.W., a little over one block away from NIE headquarters at 19th and M Streets.

NOTE: Out-of-towners should take care to emphasize to the Washington cab drivers that the desired destination is the Embassy Square Hotel and not the Embassy Row Hotel at 2015 Massachusetts Avenue, N.W. (The difference in tariff is about \$30 a day for a single room.)

The meetings, however, will not be held at the hotel, but will be conducted in the main conference room (Room 823) of NIE Headquarters in the Brown Building, 1200 Nineteenth Street, N.W.

The ERIC Clearinghouse on Urban Education (assisted in fiscal matters by EC) is in charge of the program for this meeting. The agenda is in the final stages of development under the direction of Betty Engel and Stella Torgoff. Copies will be mailed directly to each of the individuals who have been designated as attendees. Questions concerning the agenda or any other aspects of the meeting should be directed to Betty or Stella or to Frank Smardak at Central ERIC.

...Frank Smardak (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. Staff/Telephone Number Changes at FL and TM

The ERIC Clearinghouse on Languages and Linguistics and the ERIC Clearinghouse on Tests, Measurement, and Evaluation have submitted information regarding staff and/or telephone changes. Their respective letters appear as Attachment 4. Please indicate these changes in your ERIC Directories.

...Elizabeth Pugh (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Adult, Career, and Vocational Education (CE)

1. CE Loses Two Assistant Directors

Nevin Robbins, Assistant Director for Adult Education, left the Clearinghouse on August 15, 1980 to assume a position of Assistant Professor for Adult Education at the University of Southern Mississippi in Hattiesburg. He is missed.

Bob Bhaerman, Assistant Director for Career Education, left the Clearinghouse on August 30, 1980. However, he is remaining at the National Center for Research in Vocational Education as an information specialist on a new project—Technical Assistance and Training for Occupational Skills. He too will be missed at the Clearinghouse.

...J.W. (CE)

2. Reviewing the Past and Looking Ahead at CE

The entire Clearinghouse staff (professional, technical, and clerical) participated recently in a half-day retreat. It is nearing the end of the contract year and we moved out of the office to a relaxed atmosphere to discuss the past and to solidify plans for the next. We split into small groups and discussed acquisitions, processing, publications, and user services. Everyone attended two groups and contributed ideas, opinions, and suggestions.

...Judy Wagner (CE)

B. ERIC Clearinghouse on Counseling and Personnel Services (CG)

1. Mamarchev Participates in Conferences for Women

Helen Mamarchev made two presentations recently at the summer seminar of the Michigan Women's Center Consortium, August 21-22, 1980 in Grand Rapids, Michigan, on the topics of "How to Use ERIC

in Identifying Women's Issues" and "Assertiveness Training." In her capacity as the graduate student representative, she also attended a planning session of the 1981 Conference Program Committee of the National Association for Women Deans, Administrators, and Counselors.

...Helen Mamarchev (CG)

2. Walz and Benjamin Conduct Workshop in Florida

Garry Walz (Director) and Libby Benjamin (Associate Director) were invited by the Florida State Department of Education to do a workshop for counselors and other helping personnel in Oskaloosa County, Florida, early in August 1980. The focus of the workshop was on stress management, change agency, and personnel and professional development. Nearly 50 people participated in the workshop.

...Carol Jaslow (CG)

C. ERIC Clearinghouse on Elementary and Early Childhood Education (PS)

1. Katz, Spencer, Baskin of EECE Attend OMEP Assembly in Quebec

Lilian Katz, Mima Spencer, and Linda Baskin attended the World Organization for Preschool Education (OMEP) assembly in Quebec, Canada from July 28 to August 2, 1980. This marks the first time that EECE has exhibited at an international conference.

Dr. Katz, who is currently serving as the President of the U.S. National Committee for OMEP, also attended a meeting of the World Council which was held just prior to the OMEP meeting. At the OMEP meeting, Ms. Spencer and Ms. Baskin did mini-searching, distributed resource sheets, informed conference attendees about microfiche locations in their own countries, and introduced ERIC to international early childhood professionals from 38 countries.

The EECE exhibit was enthusiastically received by conference participants and was chosen for coverage by the *Montreal Gazette* in a feature article headlined "Intelligent ERIC Knows More About Education Than Any Professional." Ms. Spencer commented that attending an international conference where the official languages included English, Spanish, and French made one aware of the limitations of having ERIC in only one language. One of the follow-up activities planned is publication of information about ERIC in the international OMEP journal.

...J.B. (PS)

2. Bowermaster of EECE to Speak to Illinois Regional Library Council

Janet Bowermaster of EECE, will be the featured speaker at the meeting of the Illinois Regional Library Council in downtown Chicago on September 25, 1980. Approximately thirty public, school, and academic libraries will attend to learn about the ERIC

Thesaurus, the uses of ERIC for school librarians, and the users of the ERIC system in general. The Clearinghouse was contacted to participate in this meeting after one of the council members attended the ERIC Users Conference at the American Library Association meeting in New York earlier this summer.

...J.B. (PS)

3. DIALOG Workshop Hosted by EECE

The ERIC Clearinghouse on Elementary and Early Childhood Education, in conjunction with the Champaign-Urbana Online Users Group, has arranged to have Lockheed Information Systems conduct an on-campus DIALOG computer searching workshop on September 9-10, 1980. The workshop will include a half-day seminar on new DIALOG features and advanced system capabilities and 1½ days of introductory sessions. The introductory sessions will cover all the DIALOG features from basic commands through "Search.Save," with additional material on search strategies and problem analysis. Norma Howard (EECE) is the local coordinator for the workshop.

...Janet Bowermaster (PS)

D. ERIC Clearinghouse on Handicapped and Gifted Children (EC)

1. Joyce Aegerter Leaves EC Clearinghouse

As the ERIC Clearinghouse on Handicapped and Gifted Children begins its new fiscal year on September 1, 1980, it does so without one very familiar face. Joyce Parrish Aegerter left the Clearinghouse during the past fiscal year.

Joyce began her tenure with the Clearinghouse in 1971 as a User Services Specialist. She drew heavily on her dual backgrounds as a reference librarian and a special education teacher to do a superb job in developing answers to the wide variety of questions that came to the Clearinghouse. In 1973 she was promoted to the position of Assistant Director for User Services and a year later assumed supervisory responsibility for all data base building activities in addition to the user services component.

Once again, in 1976, Joyce was promoted. At this time she became Assistant Director in charge of all CEC Information Services and Associate Director of the Clearinghouse. In this capacity, she supervised data base building, user services, publicity, and training. In addition to her local clearinghouse work, Joyce made many contributions to ERIC systemwide over the 9 years of her association with the program.

Joyce will be missed by all of us at EC, as well as by her many other "Information" friends across the country.

...D.E. (EC)

2. EC Staff Attend Conference on Emotionally Disturbed

Don Erickson, June Jordan, and Angele Thomas attended The Council for Exceptional Children's "Institutes and Topical Conference on the Seriously Emotionally Disturbed" in Minneapolis, Minnesota on August 11-15, 1980.

An IAP, *Education's Responsibility for Seriously Disturbed and Behaviorally Disordered Children and Youth*, edited by Frank Wood, will be produced based on key presentations. Additionally, the staff identified model programs and contributions for another IAP (*An Educator's Handbook of Promising Practices and Programs for Disruptive Youth*) to be edited by Angele Thomas, David Sabatino, and Rosemary Sarri.

...Don Erickson (EC)

3. EC Conducts Workshops for the Virginia Educational Media Association

Lynn Smarte presented three ERIC workshops for a total of 83 members of the Virginia Educational Media Association. Workshops were held in Newport News, Farmville (at Longwood College), and Radford (at Radford University). Attendees included school librarians, college librarians, library/media supervisors, and professional library staff. Many participants were surprised and pleased to learn about the existence of IAP's and that they were encouraged to contact Clearinghouses directly with information requests.

...L.S. (EC)

4. EC Success with Computer Search Reprint Technique

The ERIC Clearinghouse on Handicapped and Gifted Children has experienced success with its system for handling computer search reprints. Although ideas for reprint titles usually come from actual search requests, the citations which appear in a reprint are hand-picked and the DIALOG "KEEP" command is used to generate a "perfect" search. Photocopies are made of the reprint in small batches of 30-50 copies. (This avoids the storage problem and financial risk involved in maintaining a large inventory.)

Latest reprint titles are announced in the ERIC column in every edition of the journal, *Exceptional Children*, and in our Clearinghouse publications brochure. Announcement of a reprint always includes a cut-off date for availability which is 6 months from the date the search was run. At the end of 6 months, unpopular titles are dropped and popular titles are updated and announced as such. Users love the reprints because they get a "perfect" search for only \$10. Searchers love them because popular topics that are tough to search can be hand-selected once and for all.

Even if that tough topic doesn't sell well, we save the master and when someone calls for that topic in the future, we simply combine the reprint with an update for a high precision, high recall search.

...Lynn Smarte (EC)

E. ERIC Clearinghouse on Higher Education

1. Foreign Visitors at HE

Twenty Venezuelan professors met with Laura Ciarniello on September 3, 1980 in a workshop to discuss ERIC and its role in the literature review phase of preparing research papers. The professors were hosted by George Washington University for a ten-day intensive study workshop on writing dissertations.

...Marilyn Shorr (HE)

F. ERIC Clearinghouse for Junior Colleges

1. Staff Changes at JC

The staff at the ERIC Clearinghouse for Junior Colleges has gone through some significant staff changes. Gayle Byock recently replaced Bonnie Sanchez, who had been Associate Director for a number of years. Gayle comes most recently from Boston, where she worked on a program for the city of Cambridge and did graduate studies at Harvard University. Previously she taught at a community college in Colorado.

Donna Dzierlenga is our User Services person as of September 1. She has been with JC in other capacities for the past two years.

Pam Inaba has joined the staff in the capacity of clerk-typist.

...G.B. (JC)

2. Popular Monograph Series

A series of 12 monographs on the sciences in two-year colleges has received widespread attention from the field and a special letter of commendation from the project monitor at the National Science Foundation:

"I think that you and your staff have made an important and valuable contribution to the science education community. Intuition and conjecture about the status of science instruction in the nation's community colleges will now be supported (or replaced) by systematic evidence on the representative reality of what really exists the country around. And that is a real milestone contribution for which you are all to be congratulated."

Addressed to instructors, these publications draw on national data to present a portrait of curriculum and instruction in the following science areas:

- Economics;
- Physics;
- Biology;
- Chemistry;
- Mathematics;
- Environmental Sciences;
- Interdisciplinary Social Sciences;
- Earth and Space;
- Sociology;
- Engineering;
- Agriculture and Natural Resources;
- Psychology.

The monographs were produced as a joint effort of the Center for the Study of Community Colleges and the ERIC Clearinghouse for Junior Colleges. They have been distributed to department chairs in every two-year college in the country. SO and SE participated in the preparation.

...Gayle Byock (JC)

G. ERIC Clearinghouse on Reading and Communication Skills (CS)

1. Koenke Appointed to Reading Center Committee

Dr. Karl Koenke has recently been appointed a member of the Reading Education Committee for the Center for the Study of Reading, at the University of Illinois. The committee is responsible for evaluating the reading education reports prior to publication.

...MKM (CS)

2. African Educators Visit CS

A group of educators from French speaking African countries spent an afternoon in August visiting the CS Clearinghouse and learning about the ERIC system.

...MKM (CS)

3. CS Attends Association for Education in Journalism Meeting

Bernard O'Donnell and Dorcas Rohn attended the annual meeting of the Association for Education in Journalism held August 9-13, 1980 at Boston University. They took an exhibit, and Dorcas met with the ERIC liaison committee of AEJ to continue working on acquisition arrangements for AEJ papers.

...Mary K Monteith (CS)

H. ERIC Clearinghouse for Social Studies/Social Science Education (SO)

1. Western Regional Meeting for 1980

The ERIC Clearinghouse for Social Studies/Social Science Education is planning the arrangements and agenda for the Western Regional Meeting which will be held October 1-3, 1980 (noon to noon) in Boulder, Colorado. Attendees will include staff from CG, CS, EA, JC, PS, RC, SO, and Oryx Press.

Reservations for all participants from out-of-town have been made at the Boulder Rodeway Inn. Please note that the Rodeway is a change from the previously indicated Brokers Inn. (Brokers wound up having insufficient space to accommodate the ERIC tribe.)

...C.P. (SO)

2. SO Advisory Board Meeting

The necessity of presenting a preliminary renewal proposal and annual report earlier than usual meant that the regular fall meeting of the ERIC/ChESS Advisory Board had to be cancelled, since it would have occurred too late to assist in the writing of the proposal.

As a substitute, Director Irving Morrisett met in San Francisco with a small group of Advisory Board Members and Associate Director Jim Davis met in Chicago with another small group of Advisory Board Members. Although this is a makeshift procedure, it turned out to have advantages as well as disadvantages. The major advantage was that a much more thorough exploration of the ideas of individual Board members was possible. Board members like this procedure. In addition, some money was saved. Disadvantages were that Board members were somewhat inconvenienced and not all could be involved. (Also, Board members like to visit Boulder and the SSEC.)

...C.P. (SO)

I. ERIC Clearinghouse on Teacher Education (SP)

1. Staff Changes at SP

Lisa Harvey recently resigned as Assistant Information Analyst to take a position as Writer for a management consulting firm. Cathy Julius has been appointed as the new Assistant Information Analyst.

Donna Metz has moved from a part-time position as Abstractor/Indexer to the full-time position of Program Assistant.

...D.S. (SP)

2. Foreign Visitors at SP

Karl Massanari, Michael Butler, and Dean Schwanke spent the afternoon of September 10 with educators from Brazil.

The Clearinghouse also recently provided orientation for the following visitors:

- Mrs. Else Sejer Larsen, Principal
State Teacher Training College
Emdrupborg, Denmark
- Mrs. Adebisi Ogunfolu
Nigeria
- Mr. Geoffrey Lloyd
Assistant Director of Teacher Education
Education Department
Victoria, Australia

...D.S. (SP)

3. SP Exhibits at Teacher Conventions

The ERIC Clearinghouse on Teacher Education exhibited at two recent teacher conventions:

- National Education Association (NEA)
July 1-3, 1980
Los Angeles, California
- American Federation of Teachers (AFT)
August 18-20, 1980
Detroit, Michigan

Both conventions were well attended, and drew considerable attention from the Democratic Presidential candidates.

...Dean Schwanke (SP)

4. Massanari Participates in OSE Planning

Dr. Karl Massanari, Director of the Clearinghouse on Teacher Education, attended and participated in meetings of the Office of Special Education (OSE) and the National Support System Project on September 8 and 9, 1980. The purpose of the meeting was to determine long-range planning and activities for the OSE.

...Michael Butler (SP)

J. ERIC Clearinghouse on Tests, Measurement, and Evaluation (TM)

1. Foreign Visitors at TM

Each summer, the Educational Testing Service conducts special programs for visiting foreign scholars. During the summer of 1980, nearly 60 foreign educators were at ETS learning about program evaluation, educational testing, item response theory applied to practical testing problems, and cost/benefit analysis of educational programs. The visitors were given an orientation to ERIC and a tour of TM.

...M.H. (TM)

2. TM and AERJ Discontinue Special Project

The ERIC Clearinghouse on Tests, Measurement, and Evaluation and the *American Educational Research Journal* have decided to discontinue the special AERJ project in which exemplary research projects indexed in RIE were announced in AERJ. TM instead will produce a "How to Use ERIC" poster, based on NIE's "How to Use ERIC" brochure. It will be distributed to all microfiche standing order customers in the United States.

...M.H. (TM)

3. Staff Changes at TM

Reba Lippincott will be joining the Clearinghouse staff on September 2, 1980 as an Abstractor/Indexer.

Chuck Myers retired from ETS, effective August 29, 1980, after 33 years of service. He was associated with the Clearinghouse since 1978 as an Abstractor/Indexer and as Coordinator of the VIP project. His contributions to ERIC are greatly appreciated and will be sorely missed.

...Marilyn Halpern (TM)

INFORMATION ANALYSIS PRODUCTS TO BE DEVELOPED BY EC, JC, HE, AND UD

The following IAP's will be developed by EC, JC, and HE during the next contract year:

1. ERIC Clearinghouse on Handicapped and Gifted Children (EC)
 - Teacher Burnout: A Primer for Special Services Personnel.
 - An Educator's Handbook of Promising Practices and Programs for Disruptive Youth.
 - Education's Responsibility for Seriously Disturbed and Behaviorally Disordered Children and Youth.
 - Current Issues and Future Directions in Gifted Education.
2. ERIC Clearinghouse on Higher Education
 - The Politics of Higher Education
 - University Reform: An International Review.
 - Accreditation: History, Process and Problems.
 - The Competent Student: Functional Literacy in the College Setting.
 - Financial Analysis for Academic Units within Institutions of Higher Education.
 - Strategic Planning, Management, and Decision-making.
 - Indices of Quality of the Student Experience in Higher Education.
 - Identifying Criteria for Judging Excellence in Academic Programs.
 - Organizational Communication and Higher Education.
 - Access Issues for the 1980's.
 - Faculty Workload: A Measure of Faculty Productivity.
 - Evaluation of Tenured Faculty.
 - Adult Women: Next Student Pressure: on Campus.
 - Adopting the Curriculum for Underprepared Students.
 - Federal Regulations and Higher Education: An Overview for College and University Administrators.

- Career Advancement of Women Administrators Within Higher Education.
- A Model Grievance Procedure for Higher Education.

3. ERIC Clearinghouse for Junior Colleges

- State of the Art/Soft Cover Book:
 - Teaching the Sciences.
 - Questioning the Community College Role.
 - Women Administrators in Community Colleges.
 - Expanding Occupational Education.
- Monograph:
 - Making Good on the Open Door Promise.
- State of the Art/Topical Paper:
 - Science for Women, Minorities and Handicapped.
 - Occupational Education for the 80's.
- Extensive Bibliography/Review:
 - The Impact of Energy on Community College Programming.
 - Responding to Student Needs Through Community Follow-up.
 - Pre-college Programs.
 - Reorganization of Community Colleges: Multi vs. Single Unit Colleges.
 - Adjusting to the Trends in RN Programs.
 - Lay Advisory Committees for the Humanities.

4. ERIC Clearinghouse on Urban Education

- Hispanic Special Education (conference proceedings).
- Successful Schooling for Black Students.
- Asian American Group Differences.
- The Implementation of Title IX Guidelines for Sex Equity in the Public Schools.
- Urban Schools and Their Communities.
- Private Sector and Urban School Collaborations.

ACTION ITEMS

1. ERIC/STATE CAPACITY BUILDING PROJECT COOPERATION

During the recent meeting of the ERIC Directors, I asked all ERIC Clearinghouses to contact State Capacity Building Project Directors in their SOC regions, learn about the capacity building operations in various states, and discuss possibilities for collaboration. Since many of the capacity building projects focus largely on making use of ERIC, it is important that each of us be aware of the activities of the other.

State Capacity Building Projects provide a mechanism for the ERIC system to increase practitioner awareness and access of ERIC services and products. Although most capacity building projects are familiar with the ERIC data base, they may not be familiar with IAP's and the training Clearinghouses can provide in searching ERIC.

Next January, I will be asking all Clearinghouses to let me know who has been contacted and the results that have been or will be forthcoming.

...Bob Chesley (Central ERIC)

2. IDENTIFIER - "LIMITED ENGLISH SPEAKING"

It has come to FL's attention that documents which refer to programs for people of *limited English speaking ability* (LES) are surfacing in several subject areas. The italicized phrase is the legislation terminology. To keep all of this material together, FL requests that Clearinghouses use the population Identifier "LIMITED ENGLISH SPEAKING." There is a Descriptor, "NON ENGLISH SPEAKING," but it refers to a different population.

(NOTE: The need for one of these terms *does not* necessarily mean the other is also applicable.)

Should "LIMITED ENGLISH SPEAKING" be heavily posted within the next six months, FL will consider it for "Descriptorhood." Thank you in advance for your cooperation.

...Mary Niebuhr (FL)

I. CENTRAL ERIC ANNOUNCEMENTS

A. ERIC AT AASL (PART I)

A separate article in this issue (entitled "ERIC at AASL (Part II)" under the announcements of the ERIC Clearinghouse on Information Resources) describes the ERIC participation at the first meeting of the American Association of School Librarians. ERIC's participation, coordinated by IR, was very well received. The reaction by participants reinforces strong feelings about the importance of this group in helping us reach teachers and administrators. Of particular significance was the enthusiastic participation of the school librarians who spent two weeks at an NIE intern program last year. We also heard a number of times from those who have been involved in activities recently sponsored by ERIC Clearinghouses.

...Bob Chesley (Central ERIC)

B. ERIC SELECTION POLICY ON PUBLICATIONS THAT BECOME RAPIDLY OUTDATED

It has recently been suggested that documents in the ERIC system that become rapidly outdated either be updated annually or not included in the system at all.

In general, documents which become rapidly outdated, when they can be identified as such, should not be placed in RIE. Exceptions can be made when the document appears to have wide *applicability* or when they are *exemplary products*. (See Section 3.3.2 of the *ERIC Processing Manual*.)

...Cheryl Chase (Central ERIC)

C. ELECTRONIC MAIL PILOT PROJECT

Unfortunately the Electronic Mail Pilot Project for the ERIC system described during the recent ERIC Directors' meeting will not proceed due to the inability of the Purchasing Group at the Department of Education to process the purchase order before the end of the fiscal year.

...Jim Prevel (Central ERIC)

D. WESTERN REGIONAL TECHNICAL MEETING, 1980

The Western Regional Technical Meeting was held October 1-3, 1980 at the ERIC Clearinghouse for Social Studies/Social Science Education in Boulder, Colorado. Participants included representatives from seven ERIC Clearinghouses (CG, CS, EA, JC, PS, RC, and SO) and Oryx Press (Susan Slesinger), the ERIC Technical Steering Committee (Marilyn Shorr), and Central ERIC (Frank Smardak).

Agenda sessions were focused on:

- concerns that have arisen out of using the new *Thesaurus*, included problems caused by the breaking up of formerly pre-coordinated Descriptors and resulting confusing scope notes;
- improvement of CIJE turnaround time;
- need to establish and maintain frequent contact with the microfiche Standing Order Customers (SOC's);
- consideration of quality of RIE abstracts throughout the system;
- variations and inconsistencies in Clearinghouse indexing;
- acquisition trends and techniques;
- Clearinghouse user service activities; and
- revision of the EAB format.

Reports of the various sessions are being summarized along with resulting recommendations. These will be forwarded to the ERIC Technical Steering Committee for its consideration and disposition.

The meeting, as a whole, was considered to be a huge success judging from the evaluations received from the participants. The host Clearinghouse (SO) was voted kudos for doing an outstanding job on not only how it conducted the meeting and the handling of the logistics, but particularly its exceptional Western style hospitality.

...Frank Smardak (Central ERIC)

II. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Adult, Career, and Vocational Education (CE)

1. CE Pre-Review Process of Drafts for IAP'S

The ERIC Clearinghouse on Adult, Career, and Vocational Education conducts pre-reviews of drafts for Information Analysis Products. The procedure for this pre-review is as follows:

- Three copies of the draft received from the author are distributed (two to recognized knowledge experts; one to a National Center staff member with knowledge expertise).

- Each reviewer completes a review form which provides for specific comments against selected criteria (scholarship, usefulness, equity, communicability, marketability), summarizes the strengths of the product, and makes recommendations for improvement. Reviewers are also encouraged to make comments in the margins of the manuscripts.
- Clearinghouse staff analyze the information from the reviews and then suggest revisions to the author.

This process takes approximately two weeks. CE would be happy to share copies of these pre-review forms with other Clearinghouses.

...Cathy Thompson (CE)

2. "RRS Meetings Exchange" Available at All Clearinghouses

Resource and Referral Service (RRS), which is funded by NIE and is a project of The National Center for Research in Vocational Education, puts out the *RRS Meetings Exchange*. This listing of national and regional meetings of interest to educators is distributed to all ERIC Clearinghouses. It is an invaluable tool for determining conferences in the various scope areas. We have found that convention sponsors are often willing to display ERIC materials at no cost, even though there are no representatives of ERIC at the meeting.

...Judy Wagner (CE)

B. ERIC Clearinghouse on Counseling and Personnel Services (CG)

1. ERIC Display Booth Set Up at APA Conference

For years the American Psychological Association (APA) has been coming to ERIC in the form of about 700 convention papers a year. For the first time, ERIC went to APA with a display booth and assorted handout materials. The meeting was in Montreal and was attended by many Canadian psychologists, although the largest contingent was from California.

...C.J. (CG)

2. Walz and Benjamin Return from Trip to Hong Kong, Philippines, and Hawaii

Dr. Garry R. Walz (Director) and Dr. Libby Benjamin (Associate Director) of the ERIC Clearinghouse on Counseling and Personnel Services have recently returned from Hong Kong, the Philippines, and Hawaii. The trip was supported by University of Michigan non-appropriated funds.

At Hong Kong University they met with interested faculty to discuss ERIC and career counseling; in Manila Dr. Walz presented the keynote speech at the 10th World Congress of the International Association of Educational and Vocational Guidance (IAEVG), and both Walz and Benjamin participated in panel discussions on ERIC, counseling education, and adult counseling; and in Hawaii, they met with counselor educators on counselor education and ERIC.

...Carol Jaslow (CG)

C. ERIC Clearinghouse on Educational Management (EA)

1. EA Has Role in NIE Project to Train Administrators

The ERIC Clearinghouse on Educational Management will have a role in a new NIE-funded inservice training program for school administrators. The program is based on the Project Leadership Model developed by the Association of California School Administrators for the training of California administrators. ACSA's Project Leadership is a short-term experience that uses presenters' guides and small regional groupings of administrators for efficient training and followup.

NIE has awarded a contract to ACSA and the Division of Educational Policy and Management (DEPM) at the University of Oregon to expand the Project Leadership Model for use in two other western states. A major part of the contract involves revising the presenter's guides to include research-based materials. This revision work will be subcontracted to the EA Clearinghouse, which will search the ERIC data base to identify relevant materials and then analyze the data in language understandable to practitioners.

The project also includes field testing the revised presenters' guides with particular emphasis on their utility in dissemination of research.

...Stuart Smith (EA)

D. ERIC Clearinghouse on Elementary and Early Childhood Education (PS)

1. PS Information Fair

The ERIC Clearinghouse on Elementary and Early Childhood Education held a second Information Fair/Open House in the College of Education at the University of Illinois on September 22, 1980. Following up last year's successful Open House, this year's publicity activities were designed to introduce new faculty, staff, students, and other potential local users to ERIC.

Among several displays, a particularly effective one was an attractively designed arrangement of computer printouts of the most recent ERIC citations authored by Deans and Department Heads in the College. The cited microfiche and a reader were located

next to the display of citations. This display received so much attention that it was made a continuing exhibit in the main faculty/student lounge after the Fair was over.

Other activities included demonstrations of on-line computer searches of the ERIC data base and handouts of coupons redeemable for mini-searches at specified later dates, and silver pencils bearing the words, "Try ERIC for Information on Education."

...J.B. (PS)

2. PS Hosts Visitor from Louisiana

Barbara Abshire, from the Louisiana Dissemination Capacity Building Project of the Louisiana State Department of Education, visited the ERIC Clearinghouse on Elementary and Early Childhood Education September 8-9, 1980. Ms. Abshire toured both the PS and CS Clearinghouses and discussed state file building and many aspects of document processing with staff members. Ms. Abshire also attended a DIALOG training workshop hosted by ERIC/PS in conjunction with the Champaign-Urbana Online Users Group on the University of Illinois campus on September 9-10, 1980.

...J.B. (PS)

3. Spencer and Rothenberg of PS Attend AASL Meeting

Mima Spencer and Dianne Rothenberg attended the first annual meeting of the American Association of School Librarians held in Louisville, Kentucky from September 24-28, 1980. The ERIC program was planned by Don Ely and Marilyn Laubacher of the IR Clearinghouse. Ms. Spencer participated in sessions on ERIC, computer searching, and state and regional resources. Ms. Rothenberg conducted on-line computer searches of ERIC and demonstrated the PLATO lesson created by the PS staff to disseminate information about the ERIC system by means of computer assisted instruction. In addition, Ms. Spencer and Ms. Rothenberg helped IR and other ERIC staff host an open house for the nearly 2,000 conference attendees.

...Janet Bowermaster (PS)

E. ERIC Clearinghouse on Handicapped and Gifted Children (EC)

1. EC Invites You to Piggyback Your Products for Display at ASHA Conference

The ERIC Clearinghouse on Handicapped and Gifted Children will have an exhibit booth at the American Speech, Language, and Hearing Association (ASHA) conference in Detroit, Michigan on November 21-24, 1980.

Other Clearinghouses are invited to send sample IAP's or a limited selection of other products. The products should deal specifically with the target population being served by the conference. Call Sharon Hudack or Marion Cambel for further information at (800) 336-3728.

...Marion Cambel (EC)

2. ERIC Online Project at EC

The ERIC Clearinghouse on Handicapped and Gifted Children is conducting a special project dealing with computer searching of ERIC. A history of what has happened to date as well as a description of the scope of the project is provided in Attachment 1.

...Lynn Smarte (EC)

F. ERIC Clearinghouse on Information Resources (IR)

1. ERIC at AASL (Part II)

The conference of the American Association of School Librarians (AASL) held in Louisville September 25-28, 1980, provides an example of cooperation among ERIC units, friends of ERIC, and other programs within the Division of Dissemination and Improvement of Practice/Information Resources. The plan for covering this conference was to program extensive offerings for school librarians who had a wide variety of experiences with ERIC. Staff was drawn from Central ERIC, Clearinghouses, other programs within DIP/IR, and friends of ERIC. Coordination was provided by the IR Clearinghouse. The program included:

- ERIC Open House - four hours when individuals could come and go as they pleased; six stations permitted one-on-one response to questions. A wide variety of ERIC resources were available.
- ERIC Update - a formal session intended for librarians familiar with ERIC who wanted state-of-the-art information.
- Information Services for Education - an introduction to a variety of educational information sources with emphasis on ERIC.
- Searching ERIC by Computer - for school librarians wanting to learn the basics of computer searching; some instruction and some hands-on experience were offered.
- ERIC Exhibit - 18 hours of face-to-face meetings with several hundred participants.

In addition to the ERIC programs, a session on "Librarians as Linkers" was conducted by John Peterson of RRS and a dissemination presentation, "School Improvement in the 80's," was done by Von Valletta. Ed Ellis was a resource person on the scene.

The ERIC team consisted of:

- NIE
Chuck Hoover
Bob Chesley
Jim Prevel
Alan Moorehead
- Clearinghouses
Don Ely
Marilyn Laubacher
Diane Rothenberg
Mima Spencer
- NWREL
Maggie Thorne
- SMERC
Curtis May
- AASL Interns from the ERIC/AASL Program Last Summer
Marilyn Goodrich
Carolyn Daniel
Jim Weigel

From the notebook of "lessons learned," these observations:

- Provide multiple points of entry for the variety of experiences people bring to ERIC.
- Build ERIC into conference/convention sessions as an integral part of this program.
- Use friends of ERIC—their direct experience with the system often comes across as more credible than the experience of those who are within the system.
- "Open" formats permit custom interviews with individuals; however, sufficient staff must be available.
- Designate one person to coordinate all ERIC and ERIC-related efforts.
- Plan all aspects of the program and use of staff as far in advance as possible.

...Don Ely (IR)

G. ERIC Clearinghouse on Languages and Linguistics (FL)

1. FL and CAL Staff See BBC-Produced Russian Language Instructional Materials

On September 30, 1980, Mr. Terry Doyle of the BBC-TV presented a videotaped sample of the recently completed BBC Russian language

instructional materials to FL and CAL (Center for Applied Linguistics) staff, as well as to some Georgetown University Russian professors. Mr. Doyle has been responsible for the development of several such video instructional programs at the BBC, including their very successful French program.

...M.N. (FL)

2. FL Involvement in Workshops

Lori Street was on the program at the Fairfax County Inservice session for foreign language teachers on August 28, 1980. She described the services of ERIC and the Center for Applied Linguistics.

Mary Niebuhr presented a one-hour session on ERIC at the first annual WATESOL Convention at the University of Maryland, Baltimore County, September 27, 1980.

...Mary Niebuhr (FL)

H. ERIC Clearinghouse on Reading and Communication Skills (CS)

1. Outreach to Teachers and Students by CS

CS involvement with teachers and education students this month has included assisting at the ERIC/EECE open house on the University of Illinois campus and conducting a workshop for over 40 English teachers who are attending the university on one-year fellowships.

...MKM (CS)

2. CS Article Reprinted in *The Education Digest*

A CS article, "Implications of the Ann Arbor Decision: Black English and the Reading Teacher," written by Mary K Monteith for the March 1980 issue of *Journal of Reading* was condensed and appears in the October 1980 issue of *The Education Digest*.

...Mary K Monteith (CS)

I. ERIC Clearinghouse on Rural Education and Small Schools (RC)

1. RC Hosts Nigerian Visitor

The ERIC Clearinghouse on Rural Education and Small Schools was chosen by the Office of International Education, United States Department of Education, as one of the nine centers in six states to host Mrs. Adebisi Ogunfolu, Chief Inspector of Education, Ministry of Education, Abeokuta, Ogun State, Nigeria. Mrs. Ogunfolu was at the RC Clearinghouse October 12-15, 1980.

While in the United States, Mrs. Ogunfolu will be visiting primary schools and centers that are involved in educational innovation.

During her visit to the Clearinghouse, Mrs. Ogunfolu received a thorough orientation to the ERIC system and also visited several local primary schools.

...A.H. (RC)

2. ERIC/CRESS Announces Nuptials

Manuela (Nellie) L. Quezada, our Mexican American and Migrant Information Specialist, was married to Conrad Joseph Aragon, September 20, 1980. Nellie will be using Quezada-Aragon for her surname. She was with us nine years as Quezada and we hope she'll be with us many more years as Quezada-Aragon.

Eric Cress and Mary Contrares were married on June 14, 1980. Both Eric and Mary are teachers in the Las Cruces school system. Good luck to our fellow Eric Cress and his bride.

...Amelita Hill (RC)

J. ERIC Clearinghouse for Social Studies/Social Science Education (SO)

1. Election of Members of the Council of ERIC Directors (COED)

Election of new members of COED was held at the ERIC Directors' Meeting on September 18, 1980. The three-year terms of Don Ely (IR) and Erwin Flaxman (UD) expired. Julie Miller (CE) was newly elected and Erwin Flaxman was re-elected. Following the election, COED members met and elected Peter Eddy (FL) as chairman, replacing Irving Morrissett (SO), whose term continues for another year. The other continuing member is Art Cohen (JC), whose term runs for another two years.

...Irving Morrissett (SO)

K. ERIC Clearinghouse on Teacher Education

1. Barbadian Intern at SP

Ms. Annette Smith, Librarian, Barbados Public Library (Bridgetown), is a visiting intern at the American Association of Colleges for Teacher Education during the month of October 1980. She will be spending time in the SP Clearinghouse studying the abstracting/indexing principles of ERIC, actually performing some abstracting/indexing tasks, and visiting area curriculum libraries. On her return to Barbados, she will be working with the Caribbean Examinations Council in organizing an ERIC-like regional center for secondary level curriculum materials.

...Michael Butler (SP)

2. SP Staff Meets with Advisory Board

The ERIC/Teacher Education Advisory Board met with the SP Clearinghouse staff on September 12-13, 1980 to discuss issues in Clearinghouse operations. With continued "level funding" for Clearinghouse operations in mind, the Board made a number of recommendations, including reducing the number of documents entered into RIE, and reducing the number of computer searches made available to the general public.

...D.S. (SP)

3. SP Conducts SOC Workshop in West Virginia

The Associate Director and User Services Specialist at the ERIC Clearinghouse on Teacher Education traveled to Charlestown, West Virginia on September 26 to conduct the first SOC workshop for the 1980-81 contract year. Much of the discussion centered around the new *Thesaurus*, and the promotional slide/tape produced by IR was used to clarify some of the changes in the *Thesaurus*.

...D.S. (SP)

4. New Address and Telephone Number for SP

The ERIC Clearinghouse on Teacher Education has not moved very far (the adjacent suite of offices), but the address and telephone number have changed to the following:

ERIC Clearinghouse on Teacher Education
One Dupont Circle, Suite 610
Washington, D.C. 20036
Telephone: (202) 293-2450

...Dean Schwanke (SP)

L. ERIC Clearinghouse on Urban Education

1. UD Contributions to *The Urban Review*

The Urban Review, published quarterly by Agathon Press, regularly features articles developed by the staff of the ERIC Clearinghouse on Urban Education. These articles are designed to provide readers of the journal with appropriate resources and/or summaries of recent research on urban education. Erwin Flaxman, Director of the UD Clearinghouse, is Consulting Editor of the journal.

...S.T. (UD)

2. Gordon Named Editor of *Review of Research in Education*

Edmund Gordon, Senior Research Associate at the ERIC Clearinghouse on Urban Education has been named Editor of the annual publication of the American Educational Research Association, *Review of Research in Education*. He will serve as editor for the 1982, 1983, and 1984 issues.

...Stella Torgoff (UD)

The ERIC Clearinghouse on Handicapped and Gifted Children

ERIC Online Project

Lynn Smarte, ERIC/EC

Many of you may have wondered what happened to the "ERIC Clearinghouse Computer Searchers Committee" idea discussed at the 1980 ERIC National Technical Meeting in a session conducted by Linda Baskin and Lynn Smarte.

An abbreviated history is that Bob Chesley liked the idea and asked Cheryl Chase to meet with me to discuss a means of implementing the ideas generated at the tech meeting. We decided that the project would need a coordinator and some minimal funding, so we built it into ERIC/EC's FY80 clearinghouse contract as a special project. We've dropped the word "committee" because anyone in the ERIC system who's involved with searching will be involved with the project.

The exact text from the proposal follows:

5.2 Special Project #2.

Coordination of ERIC Clearinghouse Computer Search Committee and Computer Searching Workshops.

Two significant occurrences have prompted the proposal for this special project:

1. The final report on the ERIC Resource Management Workshops (1979) stated that 33% of the S.O.C.s attending expressed a need for further training in computer searching the ERIC data base.
2. Clearinghouse computer searchers held a session at the 1980 ERIC National Technical Meeting. At this meeting, searchers voiced strong support for setting up the means to achieve the following goals:
 - * Provide a means for Clearinghouse searchers to communicate regularly with each other.
 - * Provide a channel for searchers outside the ERIC network to communicate their suggestions, concerns, or questions about the ERIC data base.
 - * Advise the ERIC system on problems with the data base, suggested improvements, suggested topics for national and regional technical meetings, etc.
 - * Represent the ERIC system in communicating with online service vendors.
 - * Coordinate the scheduling of workshops on computer searching the ERIC data base, prepare handouts that could be used in such workshops, etc.

The Council for Exceptional Children

1920 Association Drive, Reston, Virginia 22091 • (703) 620-3660

In FY 80, ERIC EC proposes to meet the needs expressed by standing order customers, other ERIC data base searchers, and by Clearinghouse searchers by conducting the following activities:

1. Serving as the "ERIC Search Hotline" to receive calls from searchers outside the ERIC network who have questions or suggestions for improving the data base. The Council for Exceptional Children has a toll free number which would facilitate this service. When appropriate, calls would be referred to other ERIC system components or the online service vendors.
2. Monitoring changes in the way the ERIC data base is loaded on BRS, Lockheed's DIALOG, and SDC's Orbit systems. This would involve spending time experimenting online when the vendors make changes or add new features in order to assure accurate retrieval of information.
3. Gathering searching tips, successful workshops ideas, etc., from Clearinghouse searchers and organizing them for input into a computer search section of the EAB.
4. Coordinating requests for workshops on searching the ERIC data base (when the request cannot logically be handled within the purview of another Clearinghouse). Workshops will be available on a cost recovery basis. The availability of this service will be announced to S.O.C.s, online user groups, and other ERIC searchers, with the stipulation that the workshop "host" arrange for payment of transportation, announcements, handouts, terminal rental, and other such expenses (i.e., everything except staff salaries). When appropriate, searchers from other Clearinghouses will be asked to participate.
5. Developing a model outline and handouts for conducting ERIC computer search workshop.

Right now I am in the process of:

1. Announcing the project within the ERIC system (i.e. EAB) and to searchers of ERIC outside the system (Interchange, vendor newsletters, direct mailing to online user groups, etc.)
2. Gathering searching tips, successful workshop ideas, etc. to share with other clearinghouse searchers and "outside" searchers when appropriate.

You can help by:

1. Spreading the word about the "ERIC Search Hotline" to potential users and referring here suggestions for changes in ERIC online. (NOTE: of course this doesn't mean individual clearinghouses should refer all questions about searching ERIC to ERIC/EC! Just send them here if you can't answer it or it's a suggestion for change.)
2. Writing to us or calling the hotline yourself if you notice a problem with the data base, have a suggestion for improvement, a searching tip, etc.
3. Referring to ERIC/EC requests for workshops on searching ERIC when your clearinghouse can't or doesn't want to handle it.

The project will be coordinated by:

Lynn Smarte and Sharon Hudack
ERIC Clearinghouse on Handicapped
and Gifted Children

NEW INFORMATION ANALYSIS PRODUCTS

ERIC CLEARINGHOUSE ON LANGUAGES AND LINGUISTICS

1. *Graduate Theses and Dissertations in English as a Second Language: 1978-79*, by S. Cooper. 48 pp. \$2.95.

125 entries taken from information by 20 graduate programs in the U.S. and Canada.

2. *Teaching a Second Language: A Guide for the Student Teacher*, by C. Knop. 60 pp. \$4.95.

Discusses various interactions that student teachers engage in during the practicum and offers suggestions, techniques, and activities for benefiting from these interactions.

3. *Assessing Study Abroad Programs for Secondary School Students*, by H. Loew. 38 pp. \$2.95.

Covers information disclosure by sponsoring agencies, insurance, selection of staff and students, setting academic standards, facilities and accommodations abroad, and program evaluation.

4. *Chinese Language Study in American Higher Education: State of the Art*, by P. Eddy, J. Wrenn, and S. Behrens. 60 pp. \$7.95.

Results of a national survey of Chinese teaching in higher education, includes information about enrollments, program structure, materials, students, instructors, testing, study abroad, self-study, levels of attainment, and funding.

5. *Sentence Combining in Second Language Instruction*, by T. Cooper, G. Morain, and T. Kalivoda. 82 pp. \$7.95.

6. *Teaching the Metric System in the Foreign Language Classroom*, by B. Stevens. 56 pp. \$4.95.

Provides rationale, definitions, terminology, and extensive classroom activities in French, German, and Spanish that can be used within existing school programs.

Ordering information: Center for Applied Linguistics, 3520 Prospect Street, N.W., Washington, D.C. 20007. Orders for single titles are also accepted; add \$1.75 postage and handling per order. Checks may be made payable to CAL. For information on Volumes 1 and 2, write to ERIC/CLL User Services.

ACTION ITEMS

1. CIJE—New Guidelines

Central ERIC has developed new guidelines for the processing of journal articles for *Current Index to Journals in Education*, with the assistance of the Clearinghouses, Oryx Press, and the ERIC Facility. These guidelines reflect Central ERIC's serious concern that CIJE be RIE's true sister publication. When it was felt some background was needed to explain a new procedure or to clarify an existing one, it has been provided below.

a. Processing Schedule for Articles

During the past year, studies have been made at various ERIC Clearinghouses on the difference between CIJE and *Education Index* in the elapsed time from original publication of a journal article to announcement in these two index journals (see EAB January 1980). This caused Central ERIC to survey all the Clearinghouses systematically as to the length of time it was taking to receive journals after their publication and to process journal articles from receipt of journals through the mailing of OCR forms to the ERIC Facility. There were wide variances in the times reported in both categories. Journals were reported up to nine months late (January issue received in October), and the processing of articles ranged from a one day turnaround to 18 weeks. Little or nothing can be done about the first time category, but processing time can clearly be considerably compressed.

New Central ERIC Policy in this matter is as follows: Journal articles should be processed as rapidly as possible. One day would, of course, be the optimum. However, three weeks is to be considered the maximum acceptable elapsed time under normal circumstances. Anything over that should have substantial justification and the Clearinghouse monitor should be made aware of it. It is anticipated that peak periods in the year, when many journals are received at once, will affect this elapsed time and cause it to vary, but not substantially. In order to record and track the processing cycles, the attached log form (Attachment 1) should be put into effect in January 1981 and copies should be included in Clearinghouse Quarterly Reports thereafter.

b. Acquiring Journals

Requesting page proofs for journals has not been successful and that effort should be discontinued. However, complimentary subscriptions and early copies should still be solicited. First class mail should be requested for all subscriptions.

c. Selective Coverage

In light of the 10% cut in input to CIJE being asked of the Clearinghouses by Central ERIC in the upcoming contract year, a new

policy regarding coverage of journals will be in effect. All journals should be reassessed for:

- Continuance on the Source Journal List;
- Regularity of publishing schedule;
- Cover-to-cover eligibility;
- Selective eligibility;
- Availability in major libraries (does not mean foreign journals are not acceptable).

Unless there is no question of a journal's close relationship to the field of education throughout its content, serious consideration should be given to reducing its status from "cover-to-cover" to "selective."

Selection decisions should observe the criterion that articles must add substantially to the body of educational knowledge. This should preclude the inclusion of less important articles and should sharpen the eye of the selectors for better material. Selective coverage should be the preferred category.

d. Re-evaluation of "One Shot" Policy

There appears to be an increasing need for Clearinghouses to have more flexibility in regard to the inclusion of "one shots." New journals that need to be assessed for possible coverage may have a trial period during which 1-3 articles may be indexed in issues in sequence, or intermittently, for not more than four months in all. If at the end of that time they are considered important enough, given the overall need to keep CIJE's list stable at around 780, they may be added to the Source Journal List, subject to Attachment 2, *Procedure for Handling New Journals to be Covered in CIJE*. Again selective coverage is preferred.

One-shot journals are presently shown in CIJE's monthly Journal Contents Index. The possibility of identifying them as one-shot sources is being explored and will be reported on next month.

e. Publication Types

Printing Publication Types in the monthly issues is also under consideration. This too would add to the size of each issue and does present some programming problems.

...Kit Welsh (Central ERIC)

2. Documents Approved for Refilming Must Have a Single Frame Resume Attached

A Single Frame Resume appears as page one of every ERIC document announced in RIE. Therefore, when a Clearinghouse returns a document to either EDRS or the ERIC Facility for refilming (with Central ERIC's approval), the resume must accompany the document. If the original single frame resume is not available, please recreate the resume according to the established format.

If a document is received at the Facility without its resume, processing is delayed because one has to be created at the Facility, or elsewhere, before it can be filmed. Please do not send a computer printout, as it is not in the proper format. If the document has already appeared in RIE, the information can be obtained from the entry in the Document Resume Section.

...L.S. (ERIC Facility)

3. Clearinghouses Asked to Flag IAP's

In order to prepare the new page at the front of RIE that will highlight IAP's (Pubtype 071) for users, the Facility needs to identify incoming IAP's as soon as possible. It would help a great deal, therefore, if Clearinghouses could flag IAP's on the "Clearinghouse Accession Log Sheet."

Just write "IAP" in the "Comments" column of the log sheet and that will be sufficient. Later, if the Facility goes to an online editing system, we will probably be able to search incoming data for Pubtype 071 and obviate the need for this flag, but until that time your assistance is requested.

...Lee Schreiber (ERIC Facility)

4. EAB—New Grouping of Information for Visitors and Upcoming Meeting Participation

A new grouping of information which will become a regular feature of the EAB has been added with this issue. Reports of Clearinghouse participation in meetings and reports of visitors to Clearinghouses will now be presented as attachments. This month's meeting participation has been submitted by JC, PS, and SE; visitor information has been reported by EA, JC, and TM. This new grouping of stories will tighten up the structure of the EAB and will allow readers to find this information in one place. (Please see Attachments 3 and 4.)

Along the same line, Central ERIC, at the Eastern Regional Technical Meeting in Washington, requested that Clearinghouses report through the EAB their plans to attend meetings at least 6 weeks in advance. To aid this request, a form entitled "Upcoming Meeting Participation" is displayed as Attachment 5. Please Xerox several copies of it and send completed forms to Elizabeth Pugh at the ERIC Facility where they will be compiled and also submitted to Central ERIC. This information too will become a regular feature of the EAB.

Reminder: if you have not submitted your *Conference Calendar* entry for 1981 meetings, please do so that this project can be completed.

...Elizabeth Pugh (ERIC Facility)

I. CENTRAL ERIC ANNOUNCEMENTS

A. Removal of Material from Documents

If a document being considered for the ERIC system contains materials that will not reproduce clearly because of either color or poor print quality, an attempt should be made to obtain a better copy. Usually the author or producer of the document would prefer to furnish a reproducible copy rather than have an incomplete version available from ERIC.

In many instances the illegible parts are tables or charts which are referred to in the text. Omission of such segments may adversely affect the value of the document, thereby frustrating the user. *In general, material should not be removed, despite poor legibility.*

In cases where better copies of a document cannot be obtained, consideration should be given to omitting the document, unless it provides a unique and valuable contribution to the literature, and the illegible material is considered to be minor.

...B.C. (Central ERIC)

B. Annual ERIC User Meeting to be Discontinued

The ERIC user meetings began in the early years of the system as a meeting to provide technical assistance to users of ERIC computer tapes. In the past several years, it has evolved to become a two-day meeting with sessions for a wide variety of individuals interested in ERIC and in helping others to use it. Although evaluations by participants have remained quite positive, the number of people attending has been relatively small in relation to the cost and effort of planning and holding the meeting. This is primarily due to the need to hold the sessions before or after association meetings. As a result of these considerations, in a time of serious budget problems, the decision has been made not to continue the annual users meeting.

We do desire to continue a program that will permit continued interaction with the kind of individuals who have attended user meetings in the past. These individuals include, but are not limited to, microfiche standing order customers. We plan to accomplish this interaction through inclusion of substantive sessions during meetings such as ALA, ASIS, and AASL. This strategy proved highly successful at the recent AASL meeting.

We would like to ask Clearinghouses which have money in their budgets for attending the annual user meeting to redirect it towards such sessions that will provide substantive information about ERIC at the kind of meetings where linkers can be trained and can provide a multiplier effect.

...Bob Chesley (Central ERIC)

C. Standardized Bibliographic Format for Citing ERIC Documents in Bibliographies and Lists of References

Several replies to the recent request for recommendations on how to cite an ERIC document have been received. Presently, Clearinghouses are recommending a variety of "suggested formats."

After reviewing the formats currently being used and discussing these with ERIC staff and ERIC users, Central ERIC is recommending that the format below be adopted systemwide as the recommended format:

Smith, John D. and Johnson, Jane. Career Education for Women. Chicago, Illinois: Central University, 1973. (ERIC Document Reproduction Service No. ED 654 321).

Price, John A. "Native American Techniques of Survival in the Country." Indian Historian 11 (4): 3-11, December 1978. (ERIC No. EJ123 465).

The CIJE citation is included because several of the periodical reproduction services (of which there are now many) give a price discount if the user supplies an accession/identification number.

After several months experience in using the above formats, we will evaluate our experience and perhaps incorporate the recommendations into RIE and CIJE.

...P.C. (Central ERIC)

D. School Library Interns

The Information Resources Division's pilot School Library/Media Specialist Internship program is now completed. From our perspective, as well as that of the participating interns, the program was most successful and enlightening to us all. The four interns are now actively sharing knowledge gained during their two-week visit (including information on ERIC) to conduct workshops, write articles, and make presentations. Clearinghouses should consider tapping these interns as resource people. They may be willing to help in workshops, presentations, reviewing practitioner oriented publications, or to provide ideas on how to reach and work with the library community. A listing of the fourteen interns is presented in Attachment 6.

...Patricia Coulter (Central ERIC)

II. ERIC FACILITY ANNOUNCEMENTS

A. Re-Load of ERIC Data Base on Lockheed's DIALOG System

The RIE and CIJE data bases were re-loaded by Lockheed the weekend of November 8-9, 1980. The resultant file is still in a "test" phase and bears a test file number, but will shortly be changed to its normal File 1 designation if everything checks out. The First International ERIC Search Contest, being held in conjunction with the Online 80 conference in San Francisco will serve as a significant "proving ground" for this new file.

Lockheed has informed us that no problems were experienced during the reload other than the presence of some Descriptors in the PUBTYPE field for recent CIJE data and the absence of Publication Date data in several thousand CIJE records. We are attempting to check into these problems. During the conversion, any Descriptors found in the PUBTYPE field in the CIJE data were ignored. They were left in the resumes, but are not available for retrieval via the inverted index files.

In the course of the re-load, several improvements were made by DIALOG that all ERIC searchers should be aware of and that we want to take this opportunity to highlight:

- Corporate Source (Institution), Sponsoring Agency, and Descriptive Note fields were not included in the "Basic Index." This is a deliberate change from previous practice and was done in response to user comments and in order to remove from the Basic Index many words that interfere with and create "noise" in the full text retrieval process.
- Publication Type codes have been "expanded" by DIALOG into a combination of text plus code, very much as they appear in the RIE resumes. A typical result of this DIALOG expansion would appear as follows: "Teaching Guide (052)." However, it should be noted that for reasons related to data compression and printout column width, DIALOG has selected its own "names" for the PUBTYPE codes and that these are not always identical with the generally longer "names" that appear in RIE. A complete list of the PUBTYPE codes and how DIALOG has translated them appears as Attachment 7. This action will be beneficial for the users in that the output of ERIC searches will carry not only the PUBTYPE code but also the meaning of that code, saving the user any sort of look-up.
- Clearinghouse Accession Numbers will be specifically selectable, just as are specific ED or EJ accession numbers. Formerly, only Clearinghouse Prefixes could be searched.

- Publication Year will refer to the date the given document or article was originally published or disseminated. Currently the write-up in the DIALOG documentation defines this field as the year of announcement in RIE or CIJE. This write-up will be changed to reflect the new status of this field.

The fact that Lockheed found several thousand CIJE records not bearing Publication Date information should be noted by searchers. We will provide additional information on this situation after we have investigated it.

- A new "Rotated Descriptor" file is now available. This file is created from the contents of the Descriptor field and has a line entry for every word in every Descriptor.
- Output of searches may now be sorted online by Personal Author, Corporate Source, Journal Name, Publication Year, or Title, before being printed out.
- The standard DIALOG printed citation will include references to the abstract journal issue in which the entry originally appeared, e.g., "RIEMAR80."

Attachment 8 represents an advance pre-publication copy of the DIALOG "blue sheet" on ERIC.

...T.B. (ERIC Facility)

B. Womens Educational Equity Communications Network (WEECN)

As of this writing, the WEECN project has not been re-funded by the Womens Educational Equity Act Program within the Department of Education.

Since funding ran out at the end of September, there are currently no operating offices or staff to respond to inquiries and requests or to handle documents.

The various interactions between WEECN and ERIC must, therefore, be discontinued. ERIC will no longer be receiving input via WEECN and any previous WEECN input that is rejected should not be returned to the new non-existent WEECN Documentation Facility.

...T.B. (ERIC Facility)

C. Acquisitions Data Report (ADR)

The ADR software is programmed to flag as potential duplicates titles that match down to a certain point but then one title continues on farther than the other. An example is:

Title A: Motorcycle Safety Education

Title B: Motorcycle Safety Education. A Curriculum Guide.

This course of action seemed necessary to the Facility because so frequently subtitle information or series information is either not recorded at all or is recorded variably. The alternative rule of not flagging such situations seemed to us to create the possibility of the system not flagging many true duplicates. We decided it was better to be safe than sorry.

The Steering Committee recently asked us about this approach and we felt that the reasoning we gave them should be shared with all of you.

...Ted Brandhorst (ERIC Facility)

D. Last "DJF Status Report"

Attachment 9 is a report of the major *Thesaurus* changes implemented between May 1 and October 24, 1980 (i.e., changes not included in the commercially available, "completely revised" published edition of June 1980). The 19-page report is identical to one distributed to the Clearinghouse Vocabulary Coordinators on October 30 except for a summary on the last page concerning recommended Descriptors that were not implemented.

This report does not appear in the familiar block form of earlier *DJF Status Reports*. This is because the one report was already done and to type the data again in the block format would have taken about as many pages but conveyed less information.

Attachment 9 is the "last" *DJF Status Report* because of a special reason. In December, and continuing on a monthly basis, a new *Vocabulary Status Report* will be used to list new *Thesaurus* recommendations. This new report will provide a mechanism for all Clearinghouse Vocabulary Coordinators to react fully to *Thesaurus* recommendations before they are actually implemented.

A few of the new terms listed in Attachment 9 were marked "implemented" back in May when the preceding *DJF Status Report* appeared in the EAB, but will actually carry *Thesaurus* add dates of Jul80 through Oct80. This has occurred because the lexicographic staff set priorities over the past months with respect to updating the *Thesaurus* file and if an earlier approved term was getting little or no use in indexing, its input was delayed in favor of other transactions of more pressing need.

All changes in Attachment 9 will be included in the forthcoming October 1980 *Thesaurus Working Copy*. The delay in getting the Working Copy out was the result of a need to correct various discrepancies between the content of the published *Thesaurus* and what was actually done with postings in the VIP updates of the *RIE/CIJE Master Files*. Some terms shown as "transferred" in the *Thesaurus* were, in fact, not

transferred. This occurred because of insufficient postings checks by either Clearinghouses or the Facility during the VIP. For example, ANCILLARY SERVICES was not transferred to ANCILLARY SCHOOL SERVICES because too many of its postings had nothing to do with "schools or school services." Thus, ANCILLARY SERVICES had to be removed as a UF and added again as a "dead" term, with a note added to ANCILLARY SCHOOL SERVICES that the concept was formerly indexed under ANCILLARY SERVICES. Another example of this nontransferability was STUDENT DISTRIBUTION. The published *Thesaurus* logically says "use SCHOOL DEMOGRAPHY" for this concept. However, it was discovered during a postings check that STUDENT DISTRIBUTION was misused many times for test score distributions; therefore, a transfer was not possible. A third example of this *Thesaurus* vs. postings inconsistency was the proposed transfer of the Identifier WEST INDIANS to the new Descriptor LATIN AMERICANS. A search during the postings cleanup revealed that WEST INDIANS was too valuable an access point to be merged with a much broader term; therefore, it had to be deleted as a *Thesaurus* UF and reinstated as an approved Identifier.

The above examples are illustrative of 470 add/change/delete modifications that had to be made in order to make the *Thesaurus File* completely compatible with the VIP postings updates. In addition to these modifications, 43 new Descriptors were added for the current Oct80 Working Copy edition—25 from the Clearinghouses and 18 from the Facility. The current total number of *Thesaurus* terms is 8,558, including 4,859 indexable concepts and 3,699 nonindexable UF and "dead" terms.

...J.H. (ERIC Facility)

E. Homograph of the Month (and Runner-Up)

Recently, the Descriptor ENGLISH TEACHER EDUCATION (see Scope Note) was used by an indexer for an article on the education of teachers in the United Kingdom.

In addition, the Identifier GREEKS was used by an indexer to refer to sorority and fraternity students. This leads us to the observation that the new Descriptor GREEK AMERICANS currently has no Scope Note and maybe isn't so self-explanatory after all.

...Jim Houston and Carolyn Weller
(ERIC Facility)

F. Cataloging Notes

A miscellany of notes on recent problems encountered by the Facility RIE editors was assembled for distribution and discussion at the Eastern Regional Technical Meeting. The notes were felt to be useful enough to warrant inclusion in the EAB. The Facility will continue periodically to insert cataloging notes of this type into the EAB as the need arises. (See Attachment 10.)

...Lee Schreiber (ERIC Facility)

G. Cross-References in the Source Directory

The *Source Directory* is getting to be a very large authority list. It's size and the inclusion in it of so many old and no longer used name forms creates certain problems. The Facility is aware of these problems and has provided Central ERIC with a list of suggested improvements for the future, for their consideration.

However, while these recommendations are pending, some immediate help can be had in the form of needed and helpful cross-references. If you have some cross-references which, if included in the *Source Directory*, would help Clearinghouses find the correct name forms, please suggest these cross-references to the Facility Editorial Department. We will give them serious consideration and, if valid and justified, will insert them into the *Source Directory* at the earliest opportunity.

...Julie Holladay (ERIC Facility)

III. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Adult, Career, and Vocational Education (CE)

1. Dr. Susan Imel Joins CE as Assistant Director

The ERIC Clearinghouse on Adult, Career, and Vocational Education is happy to announce that Dr. Susan Imel is joining the Clearinghouse as the new Assistant Director.

Since August 1976, Dr. Imel has been Director of Continuing Education at Avila College in Kansas City, Missouri. She has been active in the Missouri Association for Adult and Continuing Education and has served several consultancies in the area of planning and evaluation continuing education programs. She holds a Ph.D in Adult Education and a Masters in Library Science from the University of Michigan.

We are delighted to have Dr. Imel join the Clearinghouse staff to serve as liaison to the adult education community.

...Juliet Miller (CE)

2. CE Procedure for Handling Document Requests

The ERIC Clearinghouse on Adult, Career, and Vocational Education uses the following procedure for handling requests for specific documents:

- Obtain the FD number;
- Make a copy of the abstract;

- Fill out the EDRS form (ED number and number of pages);
- Send the abstract and the EDRS order form back to the user with a note that the document must be ordered from EDRS.

Occasionally the abstract is not copied, for instance, when the request is from a book store or a business and is for many documents.

This process works well because it assures that the patron is getting what was requested.

...Judy Wagner (CE)

B. ERIC Clearinghouse on Counseling and Personnel Services (CG)

A. CG Reaches Out to Newsletter Editors

Newsletters are an efficient vehicle for disseminating interesting ideas to professionals, therefore the ERIC Clearinghouse on Counseling and Personnel Services has recently intensified efforts to make ERIC/CAPS more visible.

A list of newsletters (with editors' names and addresses) was compiled and letters were sent to each offering to provide on a regular basis a short column highlighting recent ERIC documents specifically targeted to their audience. A sample was enclosed with a postcard (addressed and stamped) which stated, "Yes, I'm interested. Please contact me;" and "No, I'm not interested."

Editors who responded favorably were contacted by telephone to find out their publication schedule and to determine their areas of interest. Two charts were then developed: the first indicates publication deadlines for each month of the year; the second describes each newsletter's focus, plus ERIC descriptors to use when searching for documents that will be appropriate for each particular newsletter column.

...Helen Mamarchev and Martha Tobias (CG)

C. ERIC Clearinghouse on Elementary and Early Childhood Education (PS)

1. Notes on Computer Conferencing Via PLATO

The ERIC Clearinghouse on Elementary and Early Childhood Education staff have been experimenting with the use of PLATO for in-house staff conferencing. A notes file was reserved on PLATO for the Clearinghouse and staff members were instructed briefly in procedures for interacting with the system.

Staff get on-line regularly to leave and receive messages, announcements, and information bulletins, and to ask for information or opinions on various issues related to Clearinghouse operations. Both the original notes and responses to those notes are available on-line and are listed in an on-line notes directory.

This file has proven especially useful as an interactive means of disseminating information from staff meetings to staff members who were unable to attend the meetings. Future uses of this file may include development of resource lists and fact sheets on-line, accumulation of Clearinghouse statistics, and outreach to other PLATO users.

...J.B. (PS)

2. CDA Contract Renewal with PS

The contract for the Child Development Associate (CDA) Resource Center at the University of Illinois has been renewed for a second year. Dr. Lilian Katz, Director, and Linda Baskin, Assistant Director, of the ERIC Clearinghouse on Elementary and Early Childhood Education, are the Director and Project Manager respectively of the CDA Resource Center. CDA is a national program funded by the Administration for Children, Youth, and Families/Head Start for competency based training of child care workers.

Since early childhood education is a focus of both the CDA Resource Center and the Clearinghouse, staff of both centers work closely together in collecting, disseminating, and sharing information and resources.

...Janet Bowermaster (PS)

D. ERIC Clearinghouse on Higher Education (HE)

1. Vocabulary Review Group Members Announced

Representatives from Clearinghouses (many old VIP'ers), Central ERIC, the ERIC Facility, Oryx Press (SMERC), and the user world have indicated their willingness to serve on the rejuvenated Vocabulary Review Group. They will be looking at proposed changes to the *Thesaurus* and will also be looking for solutions to remaining vocabulary problems. See Attachment 11 for a VRG membership list, and feel free to offer suggestions (or gripes) to the Chair).

...L.B. (HE)

2. CIJE Mentioned in the *Journal of Optometric Education*

Current Index to Journals in Education (CIJE) was mentioned in the summer 1980 issue of the *Journal of Optometric Education*. In the annual report of the Association of Schools and Colleges of Optometry, the journal's coverage in CIJE was cited as proof of its own prestige and the professional growth of the organization.

...Lynn Barnett (HE)

3. Lynn Barnett Asked to Sit on NACUA Panel of Advisors

Lynn Barnett has been asked to sit on a panel of advisors for the National Association of College and University Attorneys (NACUA), which is exploring the feasibility of establishing a Clearinghouse on Higher Education and the Law. NACUA plans to offer an information service to its constituency, making use of its own internal legal files as well as law-related literature in ERIC. The first meeting was October 3, 1980, in Washington, D.C.

Marilyn Shorr (HE)

E. ERIC Clearinghouse on Information Resources

1. Use of a Xerox 850 Word Processor at IR

At the recent ERIC Directors Meeting, I promised to provide a description of the sorts of things which IR has been doing since it gained access to a Xerox 850 word processor with communications capability. The Clearinghouse does not own the word processor and therefore is not in a position to make use of it on a full-time basis, but with the time available to us we have managed to do some interesting things.

All input for RIE and CIJE is entered in the processor. Initially we were generating OCR forms from the processor. We then moved to a stage where we simply shipped a floppy disc containing the resumes to the ERIC Facility, and now have moved to point-to-point transmission of resumes between our processor and that of the ERIC Facility. In addition to the ease of making corrections on a word processor, having the resumes stored in machine-readable form permits us to print clean copy of our input for our SDI service.

The second application of the word processor is in the area of our publications program. The text of all of our IAP's is entered in the processor. This enhances the possibilities of editing, the quality of the camera-ready copy produced, and the possibility of updating the products in the future with minimal cost and effort.

The third major application of the processor is in the area of acquisitions mailings. In the past we used form letters to solicit input for RIE. We are not taking advantage of the processor's capability of merging a variable list with a basic document, thereby allowing us to personalize our acquisition letters and to reference the specific item desired in the body of the letter. It is interesting to note that since we have gone to this method the response rate to our acquisitions mailings has climbed from about 20% to about 60%.

There are two other things which we have tried with some success. Because of the communications capability, it is possible to use the processor as an intelligent terminal for doing computer searching. This means, for example, that we can use the processor to conduct a search on DIALOG, store the results of the search, and then edit those results to produce a product. In a similar fashion we have linked the processor to Syracuse University's main frame computers, and have managed to have the best of both worlds.

...Bruce Clark (IR)

F. ERIC Clearinghouse for Junior Colleges (JC)

1. Cohen Named Consulting Editor of *Change* Magazine

Dr. Cohen has been named a consulting editor of *Change* magazine. Dr. Cohen and Dr. Florence Brawer have been working closely with Washington State Community Colleges on their humanities program. Some work has also been done with San Diego Community Colleges.

...G.B. (JC)

2. Cohen Delivers Address to Oregon Community College Representatives

On September 16, 1980, Dr. Cohen delivered a major address entitled "Planning for General Education" to the Faculty and administrative staff from several Oregon Community Colleges at a meeting at Mt. Hood in Portland, Oregon.

...G.B. (JC)

3. JC Produces Numerous Bibliographies

The Association of Community College Trustees distributed Topical Paper #72 entitled "Proposition 13: Implications for Community Colleges" at their annual meeting in October in Hawaii. Recently the Clearinghouse has made its presence known, in lieu of attendance, by producing numerous bibliographies. In the last few weeks, bibliographies have been on such topics as:

- retention/attrition of students;
- part-time faculty;
- teaching composition;
- community education and community services;
- developmental mathematics;
- general education.

We are looking forward to a joint publication with UD and a contribution towards IR's publication on media.

...Gayle Byock (JC)

G. ERIC Clearinghouse on Reading and Communication Skills (CS)

1. Holly O'Donnell to Give Workshop for COLUG

On December 4, 1980, Holly O'Donnell will be giving an all-day workshop for the Chicago On-Line Users Groups (COLUG) in Chicago on the topic of searching ERIC with the new *Theaurus*. Comments other Clearinghouses may have concerning the use of the new *Theaurus* in searching would be appreciated.

...MKM (CS)

2. Gail Taylor Leaves CS

We regret that Gail Cohen Taylor is leaving the ERIC Clearinghouse on Reading and Communication Skills for a full-time position as publications editor with the Illinois State Water Survey in Urbana, Illinois.

...Mary K Monteith (CS)

H. ERIC Clearinghouse on Rural Education and Small Schools (RC)

1. RC Staff Star on Radio Talk Show

Staff of the ERIC Clearinghouse on Rural Education and Small Schools were featured guests on the 30-minute talk show "Coffee Time," on October 2, 1980. A brief background to the ERIC system and current trends and problems concerning RC's scope areas were presented. Representing RC were:

- Betty Rose Rios
Ass.istant Director
- Elaine Benally
Information Specialist for American Indian Education
- Judy Conrad
Information Specialist for Rural, Small Schools,
and Outdoor Education

- Manuela Quezada-Aragon
Information Specialist for Mexican American
and Migrant Education.

...Amelita Hill (RC)

1. ERIC Clearinghouse for Science, Mathematics, and Environmental
Education (SE)

1. Demand for ERIC Publication Increased by Review in *Christian
Science Monitor*

A recent ERIC/SMEAC publication sponsored by NIE entitled *An Analysis of Mathematics Education in the Union of Soviet Socialist Republics* by Robert B. Davis, Thomas A. Romberg, Sidney Rachlin, and Mary G. Kantowski was reviewed by the *Christian Science Monitor*. The review has led to over 400 inquiries in less than a month for information about the publication or for purchasing the publication. About half the requests have been to purchase the monograph.

Several TV programs and one national TV network are among those requiring the monographs for possible reviews in the future.

...R.W.H. (SE)

2. EPA Grant to ERIC/SMEAC for Information Dissemination Project
Renewed for 1981

The Environmental Protection Agency has renewed the grant for the EPA Information Dissemination Project for 1981. The grant provides funds to the SMEAC Information Center to conduct activities that support activities similar to ERIC/SMEAC in the areas of water quality and wastewater treatment education and training. Several ERIC/SMEAC staff are employed part-time on this project.

Major activities will include:

- collecting, reviewing, and abstracting materials (print and non-print);
- continuing a computerized database;
- writing and publishing several monographs;
- producing information bulletins;
- providing question-answering services;

- conducting workshops; and
- developing a demonstration microcomputer network for messages and information exchange.

...Robert W. Howe (SE)

K. ERIC Clearinghouse on Tests, Measurement, and Evaluation

1. New Publication on Copyright

Recommended reading is the *Final Report of the National Commission on New Technological Uses of Copyrighted Works*, especially the sections on authors' rights, copyright protection of data bases, and the legal definition of a publication. The document is printed by GPO; stock number: 030-002-00143-8. The price is \$4.75.

...Carol Paskowsky (TM)

2. A Simple Promotional Idea That Worked

During 1979, TM averaged only 64 publications orders per month. In late January 1980, we began inserting a copy of our latest publications list with each order that was filled. We did not anticipate a very large return on this activity, but decided to try it.

Since the institution of this practice, our publications orders have increased 500%, now averaging 327 orders per month. Though I have not analyzed the orders from 1979, I assume that many of those users heard about one of our publications, and were not aware of the other publications produced by the Clearinghouse. With this promotional activity, we hope to make users aware of the wide range of publications and services available from the Clearinghouse.

...Barbara Wildemuth (TM)

3. New Telephone Number

The telephone number for Reba Lippincott, abstractor/indexer, is (609) 734-5174.

PROCEDURE FOR HANDLING NEW JOURNALS TO BE COVERED BY CIJE*

The question has arisen as to how new journals that are candidates for CIJE coverage should be handled. Central ERIC has made the following decisions:

1. New journals should be nominated by the Clearinghouse responsible for the subject area concerned. If a journal does not fall into a well-defined subject area, it may be nominated by any component of the ERIC system.
2. If non-Clearinghouse components (e.g., Oryx, EDRS, Central ERIC, ERIC Facility) learn of new candidate journals, they should transmit the information to the appropriate Clearinghouse. If the original recipient cannot determine the appropriate Clearinghouse the material should be sent to the ERIC Facility's Acquisitions Department (Grace Sundstrom) for this decision.
3. Journals that fall clearly into the general or mixed category that cannot be assigned to any one Clearinghouse, will be assigned for consideration to Oryx (and its sub-contractor SMERC).
4. Given the large number of journals covered in CIJE at the present time, Clearinghouses should generally attempt to delete a marginal journal (less valuable content or erratic publication schedule) in order to add a significant new journal. The responsibility for making this decision belongs to the individual Clearinghouse. If, however, it becomes necessary in the opinion of the Clearinghouse to add one or more journals and not delete any, justification should be submitted to Kit Welsh at Central ERIC who in consultation with Oryx Press will make a decision in the matter.

...Kit Welsh/Jim Prevel (Central ERIC)

CLEARINGHOUSE PARTICIPATION IN CONFERENCES

1. ERIC Clearinghouse on Elementary and Early Childhood Education (PS)

Mima Spencer and Linda Baskin attended the American Society for Information Science (ASIS) meeting in Anaheim, California in early October 1980. Ms. Spencer co-chaired a program session on time management and setting priorities which was attended by 100 conferees and was well received. Ms. Spencer is the current chairperson of the ASIS Special Interest Group on Information Services to Education for which Ms. Baskin serves as an alternate cabinet representative. Barbara Wildemuth of TM is chairperson-elect of SIG/ISE. Ms. Baskin is the chairperson-elect of the Special Interest Group on Technology, Information, and Society. Ms. Spencer is serving as the cabinet representative to this group.

2. ERIC Clearinghouse for Junior Colleges (JC)

On September 16, Dr. Cohen delivered a major address entitled "Planning for General Education" to the faculty and administration from a number of Oregon Community Colleges at a meeting at Mt. Hood in Portland.

On November 20-23, Donna Dzierlenga will represent ERIC at the California Media and Library Association (CMLA). The Clearinghouse will have a booth with materials from various Clearinghouses, and Donna will present a 1½ hour workshop entitled "ERIC: the Essential Informational Tool," which includes an introduction to the new *Thesaurus*.

3. ERIC Clearinghouse for Science, Mathematics, and Environmental Education (SE)

Dr. Marilyn Suydam has been involved in a number of conferences sponsored by ASCD. Marilyn has been making presentations regarding trends in mathematics education. Conferences have been held in several regions of the United States.

VISITORS HOSTED BY ERIC CLEARINGHOUSES

1. ERIC Clearinghouse on Educational Management (EA)

The Clearinghouse hosted two guests from Chile during October 1980. Dr. Guillermo Clericus Etchegoyen, President of the University of Concepcion, and Dr. Jorge Jimenez, a professor at the university, acting as interpreter. Clearinghouse Director, Dr. Philip Piele, discussed the ERIC system with Dr. Clericus and arranged for Ms. Jo Ann Mazarella to do a computer search for the visitors on higher education in Chile. The visitors expressed great interest in the system and appeared very pleased with the citations given them, especially one document written in Spanish.

2. ERIC Clearinghouse for Junior Colleges (JC)

James Rutherford, Assistant Secretary of Education for Research and Improvement of Practice, paid a visit to the Clearinghouse on October 21, 1980, spending about three hours reviewing document processing and the types and geographic distribution of search requests and IAP's. All in all it was a very interesting visit for all those present.

3. ERIC Clearinghouse on Tests, Measurement, and Evaluation (TM)

Students from Princeton Theological Seminary visited the Clearinghouse in October. Although ERIC might not be their primary information retrieval source, they were interested in using the system and were given a list of descriptors which dealt with theological and religious concepts. Descriptor displays included such groups as Religion, Religious Cultural Groups, Religious Conflict, Religious Education, Theological Education, Ethical Instruction, Moral Values, and Values Education.

ERIC

DIALOG INFORMATION RETRIEVAL SERVICE

FILE DESCRIPTION

ERIC is the complete database of educational materials collected by the Educational Resources Information Center. It consists of two subfiles: *Resources in Education* (RIE), which is concerned with the most significant and timely education research reports; and *Current Index to Journals in Education* (CIJE), an index to more than 700 periodicals of interest to every segment of the educational profession.

SUBJECT COVERAGE

The ERIC database includes a wide variety of educational information organized by the following broad subject areas:

- Adult, Career, and Vocational Education
- Counseling and Personnel Services
- Early Childhood Education
- Educational Management
- Handicapped and Gifted Children
- Higher Education
- Information Resources
- Junior Colleges
- Languages and Linguistics
- Reading and Communication Skills
- Rural Education and Small Schools
- Science, Mathematics, and Environmental Education
- Social Studies/Social Science Education
- Teacher Education
- Tests, Measurement, and Evaluation
- Urban Education

SOURCES

ERIC collects and indexes many document types: research reports, evaluation studies, curriculum guides, lesson plans, bibliographies, course descriptions, theses, journal articles, pamphlets, and other "fugitive" materials. All non-copyrighted items can be purchased from the ERIC Document Reproduction Service (EDRS) in paper copy or microfiche. There are approximately 650 locations throughout the country having collections of the ERIC microfiche, and most are open to the general public.

DIALOG FILE DATA

 This guide is intended to provide a basic outline for developing local
 mathematics programs. It was developed to give Kansas mathematics teachers from
 grades K-12 minimal sequential experiences in implementing the skills, values,
 and concepts of the mathematics program. The guide contains objectives, a
 checklist of topics appropriate for each grade level, and a human resources
 guide which provides the names of individuals willing to serve as technical
 assistants to local school districts. (NR) /AB

-------	-----	---------------

**New Group Codes, as announced in the Jun80 published Thesaurus, are not yet
carried in the Thesaurus master file.

(2)

COMMUNICATION RESEARCH	SEP80	CS	450
SCOPE NOTE: Investigation into the nature and function of human communication, both verbal and nonverbal, in one-to-one or group settings (Note: do not confuse with "Language Research").			
CONTROVERSIAL ISSUES (COURSE CONTENT)	OCT80	SO	110
SCOPE NOTE: Matters of public concern and controversy that are taught, often through discussion, in social studies, current events, science, and other classes (Note: for the issues themselves, as opposed to teaching about them, use more precise terms).			
COURT JUDGES	AUG80	Fa-	380
USED FOR: Magistrates		cility	
SCOPE NOTE: Public officials authorized to hear and decide cases in courts of law.			
DEINSTITUTIONALIZATION (OF DISABLED)	AUG80	EC	250
SCOPE NOTE: Processes and services that enable disabled persons to live outside of the confines of asylums, nursing homes, and other residential institutions.			
EDUCATIONAL MALPRACTICE	OCT80	EA	500
USED FOR: Academic Malpractice			
SCOPE NOTE: Wrongful or negligent acts on the part of teachers or schools that result (or may result) in student detriments, especially including the failure of students to learn.			
EPISTEMOLOGY	OCT80	Fa-	260
USED FOR: Cognitive Theory		cility	
SCOPE NOTE: The study of how knowledge is acquired.			
FREE EDUCATION	OCT80	Fa-	140
USED FOR: Education that does not require the payment of tuition (Note: do not confuse with "Free Schools").		cility	
GREEK AMERICANS	OCT80	UD	380
GROUP HOMES	AUG80	EC	210
SCOPE NOTE: Nonconfining residential facilities providing professional supervision in a group living arrangement for either adults or juveniles, usually those who are unable to function independently -- intended to reproduce as closely as possible the circumstances of family life, and at minimum providing access to community activities and resources (Note: do not confuse with "Personal Care Homes").			
HAITIANS	OCT80	UD	380
SCOPE NOTE: Peoples of Haiti or Haitian descent.			
INDIVIDUALIZED EDUCATION PROGRAMS	OCT80	EC	410
SCOPE NOTE: Educational programs for handicapped children, each geared to the needs of an individual child and conducted in accordance with a written plan agreed on between school officials and the child's parents -- required by Federal law (i.e., the "Education for All Handicapped Children Act") to provide all school-age handicapped children with a free and appropriate education.			

(3)

INTERLANGUAGE USED FOR: Approximative Systems (Language Learning) SCOPE NOTE: A learner's systematic, internally structured, and autonomous version of a target language -- this system evolves, is governed by rules, and defines the developing linguistic competence of the learner.	JUL80	FL	290
LABORATORY ANIMALS	AUG80	Fa- cility	070
LATE REGISTRATION SCOPE NOTE: Enrolling after the school semester, quarter, etc. has begun (Note: for the age of students when they enter school, see "School Entrance Age").	AUG80	Fa- cility	020
LEAST SQUARES STATISTICS SCOPE NOTE: Statistics that are designed to provide estimates that minimize the probability of large errors by minimizing the sum of squared errors (the "least squares method" fits a curve to a given set of data such that the sum of the squares of the distances from each point of the data to the fitted curve is a minimum).	OCT80	TM	340
LONELINESS SCOPE NOTE: Unhappiness caused by a lack of friends or companions.	AUG80	CG	420
LINKING AGENTS SCOPE NOTE: Individuals or groups who attempt change by connecting knowledge and related resources to practitioners -- the linker's role often includes providing necessary support for adoption/adaptation of new ideas or developments.	OCT80	Fa- cility	380
MALPRACTICE SCOPE NOTE: Wrongful or negligent treatment of clients by professional personnel that results (or may result) in damage, injury, or loss (Note: coordinate with such Descriptors as "Medical Services," "Psychological Services," etc. as appropriate, or use the more specific Descriptor "Educational Malpractice" -- for malpractice of lawyers, court judges, etc., use the Identifier "Legal Malpractice").	OCT80	Fa- cility	500
MAXIMUM LIKELIHOOD STATISTICS SCOPE NOTE: Statistics that are designed to provide estimates that maximize the probability of zero, or negligible, error (that is, estimates most likely to be correct).	OCT80	TM	340
METACOGNITION USED FOR: Meta Knowledge Metamemory SCOPE NOTE: Knowledge or beliefs about factors affecting one's own cognitive activities -- also, reflection on or monitoring of one's own cognitive processes, such as memory or comprehension.	OCT80	PS	310
MONOLOGS USED FOR: Interior Monologues Soliloquies	OCT80	Fa- cility	260

1345

(4)

<p>NOTIONAL FUNCTIONAL SYLLABI USED FOR: Functional Notional Syllabi SCOPE NOTE: Foreign language course curricula based upon the learner's communicative needs and organized according to the content of what is to be communicated rather than the grammatical form of the language or specific situational requirements.</p>	OCT80	FL	110
<p>NUCLEAR ENERGY USED FOR: Atomic Energy SCOPE NOTE: Power derived from the fission (splitting) of the nuclei of heavy elements such as uranium, or the fusion of light elements such as the hydrogen isotopes deuterium and tritium).</p>	OCT80	Fa- cility	400
<p>OBESITY USED FOR: Overweight (Excessive Body Fat) SCOPE NOTE: Body condition characterized by a disfiguring excess of weight or fat.</p>	OCT80	CG	070
<p>OBJECT PERMANENCE USED FOR: Object Concept SCOPE NOTE: The knowledge that objects continue to exist even when one is not perceiving them.</p>	OCT80	PS	310
<p>PHARMACOLOGY SCOPE NOTE: The science of the nature and properties of drugs, particularly their actions or effects (Note: see also "Pharmacy").</p>	SEP80	Fa- cility	250
<p>PICTURE BOOKS SCOPE NOTE: Books (usually, but not necessarily for children) in which illustrations are essential to the presentation, either coordinated closely with the text or used alone without text.</p>	SEP80	CS	320
<p>READING ALOUD TO OTHERS SCOPE NOTE: Reading aloud for the sake of the listener's well-being (e.g., to inform or entertain the listener or audience, to develop his/her/their appreciation of literature or reading readiness, etc.) (Note: use "Oral Reading" when the purpose of reading aloud is to develop or diagnose the reader's language skills).</p>	SEP80	CS	440
<p>RESEARCH ASSISTANTS</p>	OCT80	Fa- cility	380
<p>SCOPE OF BARGAINING SCOPE NOTE: The topics and issues accepted or contested as appropriate for consideration in collective bargaining.</p>	OCT80	EA	150
<p>SOCIAL COGNITION SCOPE NOTE: Conceptions about interpersonal and social phenomena (e.g., persons, the self, motives, feelings, relations, social rules, societal institutions) -- also, cognitive processes and skills used in social interaction (e.g., communication skills, perspective taking, empathy).</p>	OCT80	PS	310

			(5)
STATISTICAL DISTRIBUTIONS		OCT80	TM 340
USED FOR:	Distributions (Statistics) Frequency Distributions		
SCOPE NOTE:	Tables or graphs of observed, predicted, or theoretical data indicating either the probability or the number of instances to be found along successive intervals of an ordered scale -- also, the mathematical functions of distributions.		
TEACHER MADE TESTS		OCT80	TM 520
SCOPE NOTE:	Tests and other measures that are planned, assembled, written, or otherwise prepared by teachers for use with particular groups of students (Note: for specificity, coordinate with other terms in the "Tests" and "Measures (Individuals)" hierarchies).		
THRESHOLD LEVEL (LANGUAGES)		OCT80	FL 290
SCOPE NOTE:	The minimum level of foreign language proficiency needed for learners to communicate in most everyday situations, including situations for which they have not been specifically trained -- emphasis is on oral skills and listening comprehension -- objectives for reading and writing skills are narrowly restricted.		
WEIGHT (MASS)		OCT80	Fa- 400 cility
SCOPE NOTE:	(Note: for living organisms, use "Body Weight").		
WILDLIFE		AUG80	Fa- 070 cility
SCOPE NOTE:	Animals and/or plants living in a natural (undomesticated or uncultivated) state.		
WOMEN FACULTY		SEP80	Fa- 380 cility
USED FOR:	Women Professors **Women Teachers		
SCOPE NOTE:	Female academic staff members engaged in instruction, research, administration, or related educational activities.		
WRITING PROCESSES		OCT80	CS 310
USED FOR:	Composition Processes (Literary)		
SCOPE NOTE:	Series of thoughts and behaviors involved in planning, writing, and/or revising written compositions.		
WRITING RESEARCH		OCT80	CS & 450 Facility

***INVALID "DEAD" DESCRIPTORS (JUN80)

ANCILLARY SERVICES (1967 1980)

SCOPE NOTE: Invalid Descriptor -- see more precise Descriptors such as "Ancillary School Services," "Community Services," "Social Services," etc.

ARCHITECTURAL BARRIERS (1970 1980)

SCOPE NOTE: Invalid Descriptor -- coordinate other architecture/facility terms with "Physical Mobility" or "Visually Handicapped Mobility" -- also use "Accessibility (for Disabled)" if appropriate.

**See under Deleted Descriptors.

***All initiated by Facility. No transfers made during comprehensive 1980 tape updates.

(6)

ASSISTANT SUPERINTENDENT ROLE (1966 1980)

SCOPE NOTE: Invalid Descriptor -- use "Superintendents" (Note: occasionally used indiscriminately in the past for "Assistant Principal Role" -- see "Assistant Principals" for that concept).

CLINIC PERSONNEL (SCHOOL) (1966 1980)

SCOPE NOTE: Invalid Descriptor -- see preferred Descriptors "Allied Health Personnel" and "School Health Services" (Note: postings will be transferred to the preferred terms in a forthcoming computer tape update).

CONTINUATION EDUCATION (1968 1980)

SCOPE NOTE: Invalid Descriptor -- scoped to refer to instruction for potential learners who have rejected conventional schooling, but used indiscriminately for "Continuing Education" -- see "Continuation Students."

FLES GUIDES (1967 1980)

SCOPE NOTE: Invalid Descriptor -- coordinate preferred Descriptors "Curriculum Guides" and "FLES" (Note: postings will be transferred to the preferred terms in a forthcoming computer tape update).

FLEXIBLE SCHEDULES (1967 1980)

SCOPE NOTE: Invalid Descriptor -- used inconsistently in indexing for both school and job schedules -- see "Flexible Scheduling" and "Flexible Working Hours" respectively for those concepts.

INEQUALITIES (1970 1980)

SCOPE NOTE: Invalid Descriptor -- used inconsistently in indexing -- for mathematical inequalities, use "Inequality (Mathematics)" -- for educational inequalities, use "Equal Education" -- for social and economic inequalities, see "Disadvantaged" or Descriptors relating to social, race, sex, or ethnic bias or discrimination.

LABORATORY TECHNIQUES (1967 1980)

SCOPE NOTE: Invalid Descriptor -- used inconsistently in indexing -- use "Laboratory Training" for human relations laboratory techniques -- otherwise, use "Laboratory Procedures."

LANGUAGE AIDS (1966 1980)

SCOPE NOTE: Invalid Descriptor -- used for both "Native Language Instruction" and "Second Language Instruction" -- see those Descriptors as well as "Educational Media."

LANGUAGE GUIDES (1966 1980)

SCOPE NOTE: Invalid Descriptor -- used for both "Native Language Instruction" and "Second Language Instruction" -- see those Descriptors as well as "Curriculum Guides," "Dictionaries," etc.

PERFORMANCE CRITERIA (1968 1980)

SCOPE NOTE: Invalid Descriptor -- used inconsistently in indexing -- see "Evaluation Criteria" and "Specifications."

PERFORMANCE SPECIFICATIONS (1969 1980)

SCOPE NOTE: Invalid Descriptor -- used inconsistently in indexing -- see such Descriptors as "Equipment Standards," "Facility Requirements," and "Performance Factors."

(7)

PRESSURE (1970 1980)

SCOPE NOTE: Invalid Descriptor -- originally intended as a physical science term but used inconsistently for social pressure, psychological stress, etc., as well as physical pressure -- see such Descriptors as "Pressure (Physics)," "Political Influences," "Social Influences," and "Stress Variables."

PROJECT APPLICATIONS (1967 1980)

SCOPE NOTE: Invalid Descriptor -- used inconsistently in indexing -- see "Program Proposals" and "Program Descriptions."

READING DIFFICULTY (1966 1980)

SCOPE NOTE: Invalid Descriptor -- used for both the reading problems of students and the reading level of materials -- see "Reading Difficulties" and "Readability" respectively for these concepts.

READING LEVEL (1966 1980)

SCOPE NOTE: Invalid Descriptor -- used for both the reading level of people and the readability level of materials -- see "Reading Achievement" and "Readability" respectively for these concepts.

RETENTION STUDIES (1966 1980)

SCOPE NOTE: Invalid Descriptor -- see preferred Descriptor "Retention (Psychology)" (Note: postings will be transferred to the preferred term in a forthcoming computer tape update).

SCHOOL PLANNING (1966 1980)

SCOPE NOTE: Invalid Descriptor -- use "Educational Facilities Planning" or, if appropriate, the broader term "Educational Planning."

****SECURITY (1967 1978)**

SCOPE NOTE: Invalid Descriptor -- use a more precise Descriptor such as "Security (Psychology)" or "School Security," or use an Identifier such as "Building Security."

SELF DIRECTED CLASSROOMS (1966 1980)

SCOPE NOTE: Invalid Descriptor -- used inconsistently in indexing -- see the more precise Descriptors "Open Education," "Independent Study," "Individualized Instruction," and "Student Projects."

STUDENT DISTRIBUTION (1966 1980)

SCOPE NOTE: Invalid Descriptor -- used indiscriminately in indexing -- see such Descriptors as "School Demography," "Geographic Distribution," and "Test Norms."

TEACHING (1966 1980)

SCOPE NOTE: Invalid Descriptor -- used inconsistently in indexing -- see "Instruction," "Teaching (Occupation)," and "Teaching Methods."

TEXTBOOK PUBLICATIONS (1966 1980)

SCOPE NOTE: Invalid Descriptor -- see the more precise Descriptors "Textbooks" and "Textbook Publication."

TRACKING (1968 1980)

SCOPE NOTE: Invalid Descriptor -- used indiscriminately in indexing -- see more precise Descriptors "Track System (Education)," "Perceptual Motor Coordination," and "Psychomotor Skills," as well as the Identifier "Tracking (Science)."

****Carries Add Date of Mar78. All other "dead" terms in this list carry Jun80.**

(8)

TRAINABLE MENTALLY HANDICAPPED (1967 1980)

SCOPE NOTE: Invalid Descriptor -- see preferred Descriptor "Moderate Mental Retardation" (Note: postings will be transferred to the preferred term in a forthcoming computer tape update).

WEIGHT (1968 1980)

SCOPE NOTE: Invalid Descriptor -- used inconsistently in indexing -- for inorganic physical objects, use "Weight (Mass)" -- for living organisms, use "Body Weight" -- for scores, use "Weighted Scores" -- for data other than scores, use the Identifier "Weighted Data."

SCOPE NOTES (ADDITIONS)

ALLIED HEALTH PERSONNEL

(Note: Prior to Jun80, see also "Clinic Personnel (School)").

AMERICAN INDIANS

Both North and South American Indians.

COLLEGE SECOND LANGUAGE PROGRAMS

(Note: Prior to Mar80, this concept was indexed under "College Language Programs").

ETHNIC DISCRIMINATION

Restriction or denial of rights, privileges, and choice because of ethnic origins
(Note: do not confuse with "Ethnic Bias").

EXPERIMENTAL SCHOOLS

Schools in which new teaching methods, new organizations of subject matter, personnel practices, and advanced educational theories and hypotheses are tested.

FACULTY MOBILITY

(Note: if possible, use the more precise term "Teacher Transfer").

HANDICRAFTS

Creative activities of making articles by hand, often with the aid of simple tools or machines -- also, the handiworks resulting from such activities.

HIGH INTEREST LOW VOCABULARY BOOKS

Books designed to interest learners whose reading abilities are below age or grade level.

LANGUAGE RESEARCH

Research in linguistics (Note: do not confuse with "Communication Research").

LITERACY

Ability to read and write -- also, communication with written or printed symbols (i.e., reading and writing).

(11)

ORAL READING

The act of reading aloud, often used to develop or test reading skills (Note: use "Reading Aloud to Others" when the purpose of oral reading is to inform or entertain a listener or group of listeners).

PHONICS

The study of sound-letter relationships in reading and spelling, and the use of this knowledge in recognizing and pronouncing words.

PREREADING EXPERIENCE

Preschool incidental learning that prepares children for reading (Note: use "Reading Readiness" for formal prereading training -- prior to Sep80, the use of this term was not restricted by a Scope Note).

PRIVATE FINANCIAL SUPPORT

Financial aid received from private sources (Note: do not confuse with "Private School Aid").

RACIAL DISCRIMINATION

Restriction or denial of rights, privileges, and choice because of race (Note: do not confuse with "Racial Bias").

READING FAILURE

Lack of achievement or accomplishment in reading.

READING READINESS

Act of preparing, or degree of preparedness, for formal reading instruction or any other reading activity or task.

SATELLITES (AEROSPACE)

(Note: if applicable, use the more specific term "Communications Satellites").

SCHOOL HEALTH SERVICES

(Note: prior to Jun80, see also "Clinic Personnel (School)").

SOCIAL DISCRIMINATION

Unfavorable treatment of individuals or groups on arbitrary grounds (Note: do not confuse with various "bias" terms, which refer to prejudicial attitudes that may lead to such treatment).

TEACHERS

(Note: see "Faculty" for other specific terminology related to "Teachers").

UNITED STATES HISTORY

(Note: prior to Mar80, "American History" was occasionally used for this concept).

VERBAL DEVELOPMENT

Growth in ability to use and comprehend words in either oral or written form.

SCOPE NOTES (CHANGES)

//ACCELERATION

The process of progressing through an educational program at a rate faster than that of the average student (Note: for the time rate of change of velocity, use the Identifier "Acceleration (Physics)").

// = Added indexing note only; no change to basic scope.

(12)

ACCESSIBILITY (FOR DISABLED)

Characteristics of facilities, programs, and services that allow them to be entered or used by individuals despite visual, hearing, mobility, or other impairments (Note: for physical access, coordinate with "Physical Mobility" or "Visually Handicapped Mobility" -- prior to Jun80, see also "Architectural Barriers").

AMERICAN INDIAN STUDIES

Curriculum or subject area encompassing the culture, history, achievements, and contemporary concerns of American Indians.

BIAS

An inclination, or a lack of balance (Note: use a more specific term if possible).

CONTINUATION STUDENTS

Students enrolled in special continuation education programs -- continuation education enables youth and adults who have previously dropped out of or otherwise rejected conventional schooling to complete their formal education (Note: prior to Jun80, "Continuation Education" was also used to index this concept).

CRITICAL PATH METHOD

Technique used to coordinate and schedule the sequential activities of a project to complete it as efficiently and quickly as possible (Note: see also the identifier "Program Evaluation and Review Technique" -- prior to Mar80, the instruction "Path Analysis, use Critical Path Method" was carried in the Thesaurus).

//DAY CARE CENTERS

Professionally run facilities that care for groups of children on a partial or full day basis (Note: prior to Mar80, the instruction "Day Care Centers, use Day Care Services" was carried in the Thesaurus).

DESIGN REQUIREMENTS

Specifications that must be met for the designs of facilities or objects in order to satisfy the physical or psychological needs of users.

//DIFFUSION

Process by which an idea gets from its source or origin to its place of ultimate use (Note: prior to Mar80, the use of this term was not restricted by a Scope Note -- for the diffusion of humans, use "Population Distribution" -- for chemical, molecular, etc. diffusion, use the identifier "Diffusion (Natural Sciences)").

EDUCATIONAL FACILITIES PLANNING

Planning the facilities and grounds of educational institutions (Note: prior to Mar80, this concept was indexed under "School Planning").

FINANCIAL AID APPLICANTS

Individuals requesting financial support.

FREE SCHOOLS

Alternative schools offering a completely voluntaristic framework, including an unstructured curriculum and a spontaneous learning environment -- students are free to select what to learn, with whom, when, and how -- grades, competition, and comparisons between individuals are discarded (Note: do not confuse with "Free Education" or "Freedom Schools").

GERIATRICS

Branch of medicine dealing with the physiology and pathology of old age.

// = Added indexing note only; no change to basic scope.

(13)

HOSPITAL SCHOOLS

Schools in hospitals for formal instruction of hospitalized children (Note: do not confuse with "Teaching Hospitals" or "Patient Education" -- prior to Oct79, this term was not scoped).

INEQUALITY (MATHEMATICS)

Mathematical expression or proposition concerning the difference in size between two quantities (Note: for educational or socioeconomic inequality, refer to Scope Note of "Inequalities (1970 1980)").

JUDGES

Persons selected or appointed to decide in competitions or contests (Note: if possible, use the more specific term "Court Judges").

LANGUAGE ACQUISITION

Development in the individual of his/her native language (Note: do not use for "Second Language Learning" -- prior to Mar80, the Thesaurus carried the instruction "Language Acquisition, use Language Development" -- "Language Development" did not carry a Scope Note).

MEDICAL RECORD ADMINISTRATORS

Individuals who plan, develop, and administer medical record systems for hospitals, clinics, health centers, etc. (Note: for librarians in medical libraries, coordinate "Librarians" and "Medical Libraries" -- for librarians who are directly involved in patient care, use the Identifier "Clinical Medical Librarians").

MIGRATION

Demographic movements of individuals or groups.

MINICOURSES

Courses at any educational level that are of relatively short duration (e.g., shorter than a school's regular academic term or session) and intended to achieve certain limited objectives.

//NONGRADED INSTRUCTIONAL GROUPING

Grouping students according to such characteristics as academic achievement, mental and physical ability, or emotional development rather than by age or grade level (Note: some of the former "nongraded/ungraded" Descriptors merged with this term were occasionally used to index "Nongraded Student Evaluation").

//NONGRADED STUDENT EVALUATION

Evaluation of student progress or achievement without the use of letter grades or other summary ratings -- provides feedback about a student's specific strengths and weaknesses rather than summarizing his or her overall performance (Note: some of the former "nongraded/ungraded" Descriptors merged with "Nongraded Instructional Grouping" were occasionally used to index this concept).

//OCCUPATIONAL TESTS

Tests designed to predict job performance by recording specific abilities and interests that correspond with those of persons successfully engaging in the particular field of work (Note: for occupational interest inventories, use "Interest Inventories").

PERCEPTION

The process of becoming aware of objects, qualities, or relations via the sense organs -- involves the reception, processing, and interpretation of sensory impressions (Note: use a more specific term if possible -- do not confuse with "Attitudes" or "Opinions").

// = Added indexing note only; no change to basic scope.

(14)

PHYSICAL MOBILITY

Individual's ability to move within his or her immediate environment (Note: for demographic or geographic mobility, use "Migration" -- prior to Mar80, "Architectural Barriers" was frequently used to index this concept).

//PRIVATE SCHOOL AID

Public or private financial support given to private, religious, or other nonpublic schools, colleges, or universities (Note: do not confuse with "Private Financial Support").

//READABILITY

The quality of reading matter that makes it interesting and understandable to those for whom it is written (Note: prior to Jun80, "Reading Difficulty" and "Reading Level" were occasionally used to index this concept).

//READING ACHIEVEMENT

Level of attainment in any or all reading skills, usually estimated by performance on a test (Note: prior to Jun80, "Reading Level" was occasionally used to index this concept).

READING DIFFICULTIES

Problems in reading, caused either by disabilities associated with psychological processes or by such factors as physical or sensory handicaps, cultural background, low ability, etc. (Note: do not use for "Readability" -- the previous term "Reading Difficulty" was not scoped and was often confused with "Readability").

RELEASED TIME

Time granted to students, employees, or institutionalized persons to pursue special activities.

RELIGIOUS EDUCATION

Instruction in religion at any level not leading to a degree in theology (Note: prior to Mar80, this term was not restricted by a Scope Note -- for formal education for careers in religion, including the clergy, use "Theological Education").

RESEARCH DESIGN

The underlying plan or organization of a research project or study that determines its scope and approach -- also, the process of planning and organizing research activities (Note: for documents/articles dealing with research methods or experimental procedures, use "Research Methodology").

RESEARCH METHODOLOGY

Procedures used in making systematic observations or otherwise obtaining data, evidence, or information as part of a research project or study (Note: do not confuse with "Research Design," which refers to the planning and organization of such procedures).

RESEARCH NEEDS

Questions or problems that require research (Note: prior to Mar80, the use of this term was not restricted by a Scope Note -- see also "Research Methodology," "Research Opportunities," and "Research Problems").

//RETENTION (PSYCHOLOGY)

That aspect of memory that involves either short- or long-term holding of information (Note: prior to Jun80, "Retention Studies" was also used to index this concept -- for the concept of "retention of personnel, teachers, students, etc.," see such Descriptor as "Employment Practices," "Teacher Persistence," and "School Holding Power").

// = Added indexing note only; no change to basic scope.

(15)

SPECIFICATIONS

Detailed written statements of characteristics or requirements (Note: use a more specific term if possible).

SPEECH HANDICAPS

Defects and disturbances that interfere with oral communication.

STRUCTURAL ANALYSIS (1966 1980)

Invalid Descriptor -- originally intended as a linguistics term but used indiscriminately -- see "Structural Analysis (Linguistics)" and "Structural Analysis (Science)" -- see also such Descriptors as "Chemical Analysis," "Literary Criticism," and "Group Structure," or such Identifiers as "Cognitive Structures," "Musical Analysis," "Structure of Knowledge," and "Structural Learning."

SUMMATIVE EVALUATION

Evaluation at the conclusion of an activity or plan to determine its effectiveness.

TEACHER PERSISTENCE

One's active continuance as a teacher by reason of personal choice.

TEACHER RESPONSE

Teacher reaction to instructional and/or classroom situations (Note: prior to Mar80, the instruction "Teacher Reaction, use Teacher Attitudes" was carried in the Thesaurus).

TEACHING ASSISTANTS

Persons, usually graduate students, who assist as instructors at the college level (Note: for K-12 assistants, use "Teacher Aides").

TEACHING HOSPITALS

Hospitals where formal medical training takes place, usually affiliated with nursing or medical schools (Note: do not confuse with "Hospital Schools" or "Patient Education").

TELECOURSES

Sequences of lessons offered over television for credit or auditing purposes (Note: for courses on the subject of television, use "Television Curriculum" -- prior to Mar80, this term did not carry a Scope Note).

THEOLOGICAL EDUCATION

Formal education in a higher education institution in preparation for careers in religion, including the clergy (Note: prior to Mar80, this term was not restricted by a Scope Note).

TRANSFORMATIONS (MATHEMATICS)

Substitution of one mathematical configuration or expression by another in accord with a mathematical rule.

DELETED DESCRIPTORS

CONTINUATION EDUCATION

(Now a "dead" term -- former UF CONTINUATION HIGH SCHOOLS (1968 1980) moved under CONTINUATION STUDENTS.)

DEVELOPMENTAL VOCABULARY

(Completely purged from Thesaurus -- postings will be transferred to appropriate terms in 1981.)

GEOGRAPHIC MOBILITY

(Synonym of MIGRATION -- any postings will be transferred there in 1981.)

(16)

LATE SCHOOL ENTRANCE
(Purged -- changed to LATE REGISTRATION.)

MONOLOGUES
(Postings transferred in 1980 updates to MONOLOGS.)

RESEARCH APPRENTICESHIPS
(Postings will be transferred to RESEARCH ASSISTANTS in 1981.)

TRACKING
(Made a "dead" term.)

WEIGHT
(Made a "dead" term -- had been used every which way.)

WOMEN TEACHERS
(Postings transferred in 1980 updates to WOMEN FACULTY.)

DELETED "DEAD" TERMS

ADULT LITERACY (1970 1980)
(Resurrected to main term status.)

AMERICAN LITERATURE (1966 1980)
(Changed to UF status -- all postings reassigned in 1980.)

ANIMAL SCIENCE (1967 1980)
(Changed to UF status -- all postings reassigned in 1980.)

CATALOGS (1967 1980)
(Resurrected to main term status.)

FRESHMEN (1967 1980)
(Changed to UF status -- all postings reassigned in 1980.)

MEDICAL RECORD LIBRARIANS (1969 1980)
(Changed to UF status -- all postings reassigned in 1980.)

PAINTING (1966 1980)
(Changed to UF status -- all postings reassigned in 1980.)

SATELLITE LABORATORIES (1966 1980)
(Changed to UF status -- all postings reassigned in 1980.)

SCHOLASTICISM (1971 1980)
(All postings either transferred to SCHOLARSHIP or to the Identifier field --
purged from the Thesaurus.)

SENIORS (1966 1980)
(Changed to UF status -- all postings reassigned in 1980.)

SPECTROGRAMS (1967 1980)
(Changed to UF status -- all postings reassigned in 1980.)

(17)

DELETED UF'S (Former USE terms are within parentheses. Excludes 23 former UF's that were changed to "dead" terms; for these, see Invalid "Dead" Descriptors listing beginning on page 5.

OTHER MISCELLANEOUS CORRECTIONS

A. SCOPE NOTES

- | | |
|-----------------------------------|--|
| AMERICAN INDIAN RESERVATIONS | Changed "...the Federal government..." to "...governments..." |
| ANCILLARY SCHOOL SERVICES | Added "prior to..." reference to "dead" term ANCILLARY SERVICES. |
| BUSINESS ADMINISTRATION EDUCATION | Added "Do not confuse with BUSINESS EDUCATION." |

(18)

BUSINESS EDUCATION	Added "Do not confuse with BUSINESS ADMINISTRATION EDUCATION."
LITERARY DEVICES (1970 1980)	Changed "Literature Devices" to "Literary Devices" in this Scope Note.
MODERATE MENTAL RETARDATION	Added "prior to..." reference to "dead" term TRAINABLE MENTALLY HANDICAPPED.
RECOGNITION (PSYCHOLOGY)	Added "see also..." note for RECALL (PSYCHOLOGY).
RESOURCE STAFF	Word "other" changed to "regular."
SEX DISCRIMINATION	Added "Do not confuse with SEX BIAS."
STUDENT ATTITUDES	Word "not" in "was not restricted" was left out of Apr80 entry.
TEACHING PROGRAMS (1966 1980)	"Instructional Programs" changed to "Instruction" in Scope Note as former term is now "dead."
VISIBLE SPEECH	Added "prior to..." reference that this term previously had no Scope Note.

B. UF/USE REFERENCES

ACADEMIC DEANS	UF "Deans of Faculties" changed to "Deans of Faculty."
ADMINISTRATORS	Pound sign (double USE) added to UF "Community School Directors (1967 1980) #."
ENUNCIATION IMPROVEMENT (1966 1980)	Changed to double UF -- that is, <u>use</u> ARTICULATION (SPEECH) <u>and</u> SPEECH IMPROVEMENT.
MAN MACHINE SYSTEMS	UF "Man Machine Dialogues" changed to "Man Machine Dialogs."
MATHEMATICS ANXIETY	Present UFs deleted. Added UF "Mathematics Avoidance."
UNIFIED STUDIES PROGRAMS (1966 1980)	Added this UF to the display of UNIFIED STUDIES CURRICULUM. It was inadvertently omitted from the Mar80 Thesaurus.

C. OTHER CROSS-REFERENCES

BIAS	Moved out of ATTITUDES hierarchy. ATTITUDES no longer fits as BT with introduction of NT STATISTICAL BIAS. See Scope Note on page 12.
CHANGE AGENTS	Made BT of EXTENSION AGENTS and new term LINKING AGENTS. Indexing note to "use a more specific term" added.

(19)

LANGUAGE ACQUISITION

Removed BT COGNITIVE DEVELOPMENT and NTs
VERBAL DEVELOPMENT and VOCABULARY
DEVELOPMENT. Added VERBAL DEVELOPMENT as BT.

SATELLITES (AEROSPACE)

Made BT of COMMUNICATIONS SATELLITES.

SPECIFICATIONS

DESIGN REQUIREMENTS and FACILITY
REQUIREMENTS removed from STANDARDS
hierarchy and placed in the hierarchy of
this term.

DESCRIPTORS RECOMMENDED FROM JUN80 TO OCT80 THAT WERE NOT IMPLEMENTED

CULTURAL CONTRIBUTIONS (submitted 7/80 by RC)

Appears to have no utility for indexing/retrieval precision beyond the
existing terms CULTURAL INFLUENCES and MINORITY GROUP INFLUENCES.

DEATH EDUCATION (submitted 10/80 by CG)

Unnecessary -- retained as UF of DEATH.

ENTRANCE EXAMINATIONS (submitted 6/80 by TM)

Unnecessary -- COLLEGE ENTRANCE EXAMINATIONS or OCCUPATIONAL TESTS
adequately cover all potential postings.

WEST INDIANS (submitted 9/80 by UD)

Removed as UF of LATIN AMERICANS, and reinstated as an Identifier. Won't
work as Descriptor since it can't be scoped unambiguously.

MISCELLANEOUS NOTES ON CATALOGING

Prepared by the Facility Editors,
on the basis of recent experiences,
for the Eastern Regional Technical Meeting
October 22-23, 1980

Title

- Foreign language titles should always be followed by their English translation in parentheses.
- Titles should be recorded as on the document and should not be changed arbitrarily, e.g., (1) to make a "maverick" title conform to the others in a related group, or (2) to change state names to the two-character postal abbreviation.
- Phrases designating a "Final Report" or "Progress Report" should be placed in the subtitle position, even if these phrases precede the substantive title. However, titles beginning "Annual Report of the..." should generally be recorded as on the title page. Series titles should also be placed in the subtitle position and should not precede the specific title for the document in hand.

Personal Author

- Position Titles such as "Project Director" should not accompany personal names in the Author field.
- Legitimate qualifiers following personal names, such as "Ed." or "Jr." or "II" should be set off by commas.

Level

- There are sometimes variances in the Level cited on the OCR form, the shipping log, and the release sticker on the document. These should be consistent (unless document legibility problems lead to a Level 2 assignment where permission was granted for Level 1).

Report Number

- Treat International Standard Book Numbers (ISBN's) as any other identifying number and record them in the Report Number field (for retrieval purposes).
- DHEW report numbers should be recorded in their standard format, e.g. "DHEW-ADM-77-454".
- Roman Numerals in Report Numbers should be changed to Arabic.

Contract Numbers

NIE contracts in the 100 to 600 series do not carry a prefix and should be recorded in the form "400-76-0116" regardless of how they appear on the document. In the case of other agencies, where we do not have the benefit of this knowledge, it is best to simply follow the form cited on the document.

Geographic Source

- When there are multiple authors, each from different locations, and no other clues as to where the document came from or was published, use the location of the prime (first listed) author.

Availability

- When citing the availability of GPO documents use the GPO Stock Number whenever it can be determined.
- When citing an availability contact point within an organization, it is better to use a position title than a personal name. Specific people come and go but positions often have more permanence.

Journal Citations

- If the item being cataloged is a journal article or an issue of a serial publication, the journal citation field should always be completed.
- If the item being cataloged is a "theme issue" of a serial publication, it is better to select as the item title the theme name, e.g., "Parachute Instruction", rather than the name of the journal.

Descriptive Note

- Use two character postal state abbreviations in this field, where appropriate, to shorten field length.
- When citing related ED numbers use proper format, e.g., "ED 150 996-997, ED 150 999"
- Separate completely different thoughts or notes with a period rather than a semicolon, just as you would in regular text.
- In citing a "paper present at", the words "Annual Meeting" or "Annual Conference" should be capitalized.
- Reference in a resume to CH numbers to appear in a later issue of RIE should be avoided when possible due to the confusion this can cause the user.
- If a document is pulled (by CH or CERIC) references to it by other accessions should also be removed.

Descriptors

- In addition to making sure that all Descriptors are in the new Thesaurus, the capitalization and word separations should be checked, e.g., "Postsecondary" not "Post Secondary".

Identifiers

- Institutions should not be cited in the Identifier field unless they are actually the subject of the document. There are too many situations where the same organization name appears in both the Institution field and the Identifier field.
- Now that the Publication Type scheme is in full swing and has a code for IAP's (071), it is not necessary to use "Information Analysis Products" as an Identifier, unless IAP's are the subject of the document.
- Don't forget to use state abbreviations after organization names, as shown in the IAL.

Abstract

- Never end a line with a hyphen.
- Do not abbreviate state names in the abstract.
- Use double parentheses when enumerating a list of items, e g.: (1) -----; (2)-----; (3)-----.
- When doing a list of chapters or papers in the abstract, take particular care with author names. Authors do not like to have their names misspelled.
- Recognize that very long abstracts may not fit on the Single-Frame Resume (microfiche lead-in page) and may therefore be truncated on the SFR.
- When related documents are cited in the Note field it is not necessary to repeat this information in the Abstract. (and vice versa).

Analytics

- Analytics are cataloged as individual documents distinct from the parent document. Many data elements may vary from those on the parent document, e.g. Geographic Source.

Document Preparation

- Documents that are volumes or parts of the same work should be accessioned in sequence if at all possible.
- Information obtained from sources other than the document and used in the cataloging should be validated in some way, e.g., attaching the letter containing the information. The appearance of information that is not anywhere in the document gives the Facility editors a problem.
- When inserting additional material in a document or when grouping several documents into one accession, place the material securely in the proper position for pagination. The paginator paginates exactly what you send the Facility as it comes out of the wrapper. If it is not in order it gets paginated out of order.

- If the availability of a document has changed from that recorded on the document (as a result of later information received) then the information appearing in the document should also be changed so as not to mislead users.

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC Clearinghouse on Reading and Communication Skills

- *Governing College Student Publications.* J. William Click. 24p, Fall 1980, CS 205 769. Available from: NCCPA Publications, School of Journalism, Lasher Hall, Ohio University, Athens, Ohio 45701.

This publication analyzes governing and policy documents for student publications from various types of colleges and universities and discusses organizational arrangements and strengths and weaknesses of the documents' various approaches. An appendix includes a checklist for constructing governing documents and lists typical elements of such documents.

- *Communicating in Conferences: Parent-Teacher-Student Interaction.* Paul G. Friedman. 62p, Summer 1980, CS 502 917. Available from: Speech Communication Association, 5105 Backlick Road, Annandale, Virginia 22003. Price: \$3.00.

Addresses the communication processes involved in parent/teacher or parent/teacher/student conferences. Concentrates on "problem situations," such as when parents and teachers disagree, when misunderstandings occur, or when a student is not performing well.

2. ERIC Clearinghouse for Science, Mathematics, and Environmental Education

- *A Directory of Projects and Programs in Environmental Education. Fifth Edition.* John F. Disinger, Compiler. \$16 00.

Presented are more than 400 summaries of environmental education programs being implemented within school systems and institutions of higher education.

3. ERIC Clearinghouse on Tests, Measurement, and Evaluation (TM)

- *Research and Evaluation Studies from Large School Systems, 1979.* TM 800 602.

This bibliography will be announced in the February 1981 issue of RIE. Companion volumes are:

- *Research and Evaluation Studies from Large School Systems, 1976.* ED 142 584.
- *Research and Evaluation Studies from Large School Systems, 1977.* ED 166 262.
- *Research and Evaluation Studies from Large School Systems, 1978.* ED 182 350.

ADDENDUM TO THE LAB - DECEMBER 1980**"VOCABULARY STATUS REPORT"**

The first Vocabulary Status Report is Attachment 18 of the EAB. It includes all Thesaurus recommendations received by the ERIC Facility lexicographic staff since the last update of the Thesaurus file (i.e., during the October 27 - December 10 time frame). Unlike the old DJF Status Report, the new "report" asks for reactions among ERIC components before decisions are made on implementation. All representatives of the newly re-formed Vocabulary Review Group (VRG) are asked to vote on the new recommendations and to return your responses to the Facility no later than January 14, 1981. (Attachment 18 requests responses by January 7; this has been extended 1 week because of the lateness of the EAB.) The results of this voting and VRG Executive Committee dispositions will be announced in subsequent editions of this report. (See November 1980 EAB, Attachment 11, p. 61 for the list of current VRG representatives.)

For the immediate future, distribution of the Vocabulary Status Report to VRG representatives will be via the EAB. Those reviewers who do not get the EAB (external to the ERIC system) will receive a separate transmittal. If VRG representatives should want to retain the report in their EABs, copies will be suitable for responses to the Facility.

The designator "AA" will be used in the report to indicate recommendations of, and reactions by, the Facility lexicographic staff. Some initial reactions of the Facility are currently in the "Reviewer's Remarks" column. Reviewers may respond to all such remarks, as well as to the original recommendations. Your responses may be recorded on the report form itself or on separate sheets of paper.

...Jim Houston (ERIC Facility)

List of Attachments

ACTION ITEMS

1. NOMINATIONS FOR RIE HIGHLIGHTS

Beginning with the December RIE we are announcing in the front of RIE selected ERIC Clearinghouse publications. In doing so it is our desire not to announce all Clearinghouse publications, but only those of substantial length and content. For example, we would not announce user services publications, or even necessarily all the items contracted for as "information analysis products," nor would we plan to announce relatively short documents.

Please continue to use the Pubtype code 071 for those documents for which it is appropriate. Then, in the margin of the Clearinghouse accession log sheet, flag only those documents nominated for the highlight section with the notation "RIE Highlights." These instructions replace those in item 3, page 5 of the November *ERIC Administrative Bulletin*.

...B.C. (Central ERIC)

2. REPRODUCTION RELEASES FOR OLD ACQUISITION ARRANGEMENTS

It has come to our attention that some old acquisition arrangements made before the 1978 copyright law are not covered by a formal blanket reproduction release. Please review Clearinghouse standing acquisition arrangements for a formal blanket reproduction release. As in the case of individual documents, a cover letter is not sufficient. (See April 1980 EAB.)

...B.C. (Central ERIC)

3. SHARING CLEARINGHOUSE PRACTICES

For the past couple of issues of the EAB, there have been a number of descriptions of practices which individual Clearinghouses have developed and which merit sharing with the entire system. As we encounter these activities in the course of annual reviews, we have encouraged Clearinghouses to submit brief descriptions for the EAB. Please consider them in light of your own operation and make contact where further information is needed. Please don't wait for our suggestion to submit such material—the EAB is a good vehicle for such communication among Clearinghouses.

...Bob Chesley (Central ERIC)

4. REVISED ACQUISITIONS DATA REPORT (ADR) PROCEDURES

The considerable variance in the way ERIC Clearinghouses have been submitting data on acquisitions in the monthly ADR's has been a problem which has been discussed at some length at several of the regional technical meetings. An advance copy of the revision of that part of the *ERIC Processing Manual* pertaining to future ADR input is displayed as Attachment 1.

It should be noted that only documents which are selected are to be reported in the future. It is, therefore, important that Clearinghouse Directors take all steps necessary to assure that document selection procedures are streamlined as much as possible. Implementation of this revision is effective with the report that is due to be submitted for documents selected during the month of January 1981. The January report should include all documents selected in January (plus any leftovers from December which were not included in the December report).

Inasmuch as the January report will contain information of a different nature than that previously reported, a new running six-month cumulation will be started, with the January 1981 edition being the initial report in the new series. Succeeding months' data will be added until a six-month cumulation is built up. Thereafter, as additional months are added the oldest month will be deleted.

The ERIC Facility is in the process of producing new ADR input forms which will incorporate the new "Disposition Codes." These will be mailed to Clearinghouses during the latter part of December so that they may be used for the reports to be rendered at the end of January.

NOTE: Particular attention should be paid to the bracketed portions of the revised ADR section of the EPM, since these highlight the principal changes that have been made.

...Frank Smardak (Central ERIC)

5. ONE-SHOT JOURNALS—DUPLICATION OF COVERAGE MUST BE AVOIDED

While preparing the July-December 1980 Semiannual Cumulation of CIJE, it was found that two Clearinghouses abstracted the same article from the same one-shot journal. We are asking all Clearinghouses to help prevent such duplication in the future. Before entering a one-shot into CIJE, please check to be sure that you have not covered a journal that might fall within the scope of another Clearinghouse. If it is a possibility, please check with the other Clearinghouse to be sure that they are not abstracting any articles from that journal.

...Susan Slesinger (Oryx Press)

6. HELP! PLEASE SEND YOUR ACRONYMS AND INITIALISMS

The ERIC Clearinghouse for Junior Colleges is winding up the acronyms dictionary special project. Updating the six-year-old dictionary has resulted in significant changes. Only FL and CG have responded to the October request for a list of acronyms! JC needs to hear from the rest of the Clearinghouses.

...Gayle Byock (JC)

7. ABTRACTOR/INDEXER WORKBOOK USAGE

The ERIC Steering Committee would like to share information about usage of the *Abstractor/Indexer Workbook* among the Clearinghouses. Marilyn Laubacher of the ERIC Clearinghouse on Information Resources is collecting information concerning the number of abstractors and indexers who have been trained using the workbook and would like to have a brief paragraph describing the ways the workbook has been used. Please send this information to Marilyn so that she may have time to compile it for inclusion in the next EAB.

...Marilyn Laubacher (Steering Committee)

I. CENTRAL ERIC ANNOUNCEMENTS

A. "How to Search the ERIC System" Slide Tape Presentation Now Available From UCLA

A new reference aid developed by Lorraine Mathies (at the Education Library of UCLA) to facilitate library use of ERIC materials by either individuals or groups is now available and is priced at \$35. The new aid is very well done and can be adapted to another library with the substitution of a few slides. It consists of:

- 35 millimeter slides,
- 12½ minute recorded cassette,
- 12 page guide (script and index to slides).

An announcement and order form for this product is contained in Attachment 2.

...Bob Chesley (Central ERIC)

B. ORI Wins Competition for ERIC Facility Contract

On December 12, 1980, climaxing a long and strenuous competition that began 6 months earlier with the issuance of the RFP on June 23, ORI Inc. signed the new contract for the operation of the ERIC Facility.

The contract signed is for basic operations. Optional features such as system improvement projects have not yet been decided upon and will be announced in a future EAB.

...Jim Prevel (Central ERIC)

II. ERIC STEERING COMMITTEE ANNOUNCEMENTS

- A. The ERIC Technical Steering Committee met November 10-12, 1980 to consider issues raised at the previous two regional technical meetings. The Committee forwarded 14 recommendations to Central ERIC for their

consideration. Decisions reached will be announced in a later issue of the EAB. For a general review of other topics discussed at the meeting, see Attachment 3.

...Marilyn Shorr (Steering Committee)

III. ERIC FACILITY ANNOUNCEMENTS

A. Season's Greetings From the ERIC Facility

The competition for the ERIC Facility contract has, for the last six months, occupied at least part of all of our minds and a considerable amount of our management time. It has now, just in time for Christmas, finally been decided.

We are, needless to say, very pleased that we will be back in 1981 to serve you. We would like to take this opportunity to thank all the well-wishers and voters-of-confidence that made the waiting period so much easier to take. We feel dedicated to ERIC and its goals and objectives and want to assure the other members of the ERIC network that we will continue to do our very best in the future to work for you and (within budget constraints, alas, always) to be responsive to your needs.

Merry Christmas (it is for us)!

...ERIC Facility Staff

B. ERIC Processing Manual (EPM)—New Sections Should Be Put Into Immediate Use

Five totally revised sections of the *ERIC Processing Manual* have now been distributed and are in the hands of Clearinghouse staff. These sections incorporate all recommended procedural changes approved to date and should be put into immediate use as soon as received.

Because of the many revisions and extensive re-write, it is suggested that Clearinghouses plan section-by-section review sessions with appropriate staff members to go over the changes and to discuss them in detail. To aid in this process, each section begins with a "Summary of Significant Rules" highlighting the most important rules.

When all sections have been issued, the Facility has been asked to prepare a summary outlining the major significant changes incorporated into the text of each section.

For the first time, the EPM is being made available for public sale. Individual sections are priced at \$3.75 each (postpaid). The entire volume, when completed, will be available for \$40.

A table summarizing the present state of EPM revision is displayed as Attachment 4.

...T.B. (ERIC Facility)

C. CIJE Field Size Statistics

The Facility recently ran its statistical program against the CIJE file (August 1979—October 1980) in order to obtain statistics on the use of the Publication Type field. In the course of making that run, average field size statistics were obtained as a by-product. We thought the Clearinghouses might be interested in them:

FIELD	AVERAGE FIELD SIZE
Personal Author	21.71
Descriptor	162.39
Identifier	29.40
Annotation	262.21
Journal Citation	50.90
Language	6.99
Title	59.81

...T.B. (ERIC Facility)

D. RIE Statistics For 1980 (Final)

With the completion of the December 1980 issue of RIE, the annual basic statistics shape up as follows:

Level 1 Documents	12,756	79.8%
Level 2 Documents	2,680	16.7%
Level 3 Documents	<u>557</u>	<u>3.5%</u>
	15,993	100.0%

The quantity of Level 3 documents is at a record low. It would be interesting to know whether this reflects greater success at obtaining reproduction permission or stricter selection criteria applied to documents that cannot be reproduced. If the latter is a significant factor, are the users going to miss the many Level 3 documents that ERIC formerly accessioned or will they applaud the closer correspondence between what they find in the data base and in the microfiche collection? It would be interesting to run a user "poll" on this question.

...T.B. (ERIC Facility)

E. CIJE Record Length Statistics (August 1979—October 1980)

The average length of the EJ records in CIJE is clearly on the increase in recent years. The reason is no doubt attributable largely to the increased number of annotations being written. It is now a rare EJ record that does not have an annotation.

In prior years when the Facility obtained these statistics for CIJE, the average record length was around 450-500. For the period August 1979—October 1980, the average EJ record length is around 700 characters. This distribution is shown in the table below. Considering the fact that the average size of a word is 6 characters and that a 50-word annotation would alone constitute $6 \times 50 = 300$ characters, perhaps these statistics are not all that surprising.

RECORD SIZE (IN CHARACTERS)	NUMBER OF RECORDS	PERCENT OF TOTAL ANALYZED
201- 250	0	0.0000
251- 300	4	0.0156
301- 350	36	0.1403
351- 400	145	0.5649
401- 450	518	2.0181**
451- 500	1154	4.4959****
501- 550	1866	7.2698*****
551- 600	2457	9.5722*****
601- 650	2991	11.6526*****
651- 700	3492	13.6045*****
701- 750	3720	14.4928*****
751- 800	3460	13.4798*****
801- 850	2778	10.8228*****
851- 900	1723	6.7126*****
901- 950	822	3.2024***
951-1000	326	1.2701*
1001-1050	130	0.5065
1051-1100	36	0.1403
1101-1150	8	0.0312
1151-1200	2	0.0078
1201-1250	0	0.0000

...T.8. (ERIC Facility)

F. ERIC Clearinghouse Names in Japanese

The Kinokuniya Bookstore in Tokyo, Japan has long been an active "middleman" supplier of ERIC materials to the Japanese audience community. They recently published a booklet in mixed English/Japanese entitled *ERIC Documents Monthly Service*. The booklet contains a figure depicting the 16 ERIC Clearinghouses all transmitting bibliographic data to the ERIC Facility. We thought you might be interested in seeing your name in Japanese.

The question is—which one is your name? (Attachment 5.)

...T.B. (ERIC Facility)

G. DIALOG'S CHRONOLOG Announces "ERIC File Reloaded to Reflect New Thesaurus" and Highlights Major File Changes

Attachment 6 reports the announcement of the ERIC file reload in the December 1980 issue of *Chronolog*. This material supplements the new DIALOG "Blue Sheet" on ERIC included in last month's EAB. It is of particular interest because it summarizes both the ERIC-generated file changes and the Lockheed-generated changes, e.g., field prefix codes.

...Ted Brandhorst (ERIC Facility)

H. Standardization of ERIC Clearinghouse Name Forms in Source Directory

Central ERIC has approved the standardization of ERIC Clearinghouse names in the *Source Directory*. At the present time, some Clearinghouses appear as sub-components of their parent institutions and some appear directly under their own name. When names following these different approaches are displayed together, as in the IAP Bibliography, it creates some confusing entries.

The new name forms will all begin directly with "ERIC Clearinghouse...." The new names and cross-references that will be created are displayed in Attachment 7. The code numbers for the ERIC Clearinghouses will remain the same.

...Julie Holladay (ERIC Facility)

IV. EDRS ANNOUNCEMENTS

A. ERIC Clearinghouse Microfiche Files Now Available

ERIC Clearinghouse Microfiche files will be available on a standing order basis beginning January 1981. EDRS believes there is sufficient interest on the part of prospective and current ERIC users to offer the Clearinghouse files individually or collectively as a standing order product. The cost, per fiche, for Clearinghouse collections is \$.162. Back orders of all Clearinghouse files are also available with a turnaround time to complete the order of 60 days minimum. Please contact EDRS for additional information.

...Stephanie Baker (EDRS)

V. ORYX PRESS ANNOUNCEMENTS

A. CIJE 1981 SCHEDULE

The revised 1981 schedule for input to CIJE is displayed as Attachment 8. Because of the lighter input from the Clearinghouses for the February issue, Oryx is pleased that it has been able to include 6 weeks' worth of resumes, rather than the 4 originally scheduled. This will have the effect of making CIJE more current, since a batch of resumes sent to the ERIC Facility will now be scheduled for CIJE announcement two weeks earlier. Oryx will continue to do everything possible to make CIJE a truly current publication.

...S.S. (Oryx Press)

B. Thinking of Changing Your Input Method?

Any Clearinghouse that is planning to change to an alternate method of input from OCR forms should contact the Facility and Oryx Press before doing so. Both the Facility and Oryx have established procedures that must be followed when submitting data in the form of a magnetic tape or some other form of direct input, e.g., word processing systems. The contact at the Facility is Pat Brown for RIE data and, at Oryx, Susan Slesinger for CIJE data.

...Susan Slesinger (Oryx Press)

VI. SMERC ANNOUNCEMENTS

A. Winners of the First Annual ERIC Search Tournament Announced

The First Annual ERIC Search Tournament was held at the Online '80 Conference in San Francisco on November 12-14, 1980. Over a two-day period, 1,700 registrants for Online '80 were invited to match their skills against search questions developed by SMERC specifically for the Online Conference (see Attachment 9 for the questions and rules and regulations). Online, Inc. donated a "search room" and telephones; BRS, SDC, and Lockheed each donated search time and the use of a TI.

There were three first, second, and third prizes, respectively:

First Prize: engraved plaques, selected by Kathy Clay (SMERC), paid for by Online, Inc., and presented by Bob Chesley.

Second Prize: "ERIC is for Learners" T-shirts, donated by the EA Clearinghouse, "wrapped" by Ian Templeton in *Directory of ERIC Search Services* covers, and stapled around the edges.

Third Prize: *Thesaurus of ERIC Descriptors*, donated by Oryx Press, "wrapped" by Kay Johnson of the SMERC Reproduction Room in computer printouts and "tied" with film which did not become a MF).

Each prize had a handprinted MF designating 1st, 2nd, and 3rd prize, plus location, etc.

SMERC judges (who could not enter the contest) evaluated each entry, and on the final day of the conference the winning strategy for each of the three questions was demonstrated by the winners in the telebeam room in which a TI was connected to a telephone, both of which were connected to a telebeam which projected what was happening on the TI into multiple giant screens which were scattered strategically around the room.

Two ERIC "users" and one Lockheed/DIALOG trainer won first prizes:

- Question #1: John Evans of Memphis State University Library (searching on BRS);
- Question #2: Anne Caputo of the Lockheed/DIALOG staff (searching on DIALOG);
- Question #3: Ann Scott of Farrell Library at Kansas State University (searching on DIALOG).

A "Rookie-of-the-Year" prize (2 free hours of DIALOG search time) was awarded by Lockheed (with gentle coercion from Kathy Clay) to J. A. Beale of Gulf Oil in Houston (searching on DIALOG) who had never searched ERIC before, and who was positive he was a winner because he located 4 perfect documents—4 out of 4 = 100% precision. Right?

Much fun. Anyone want to run a "Second Annual..." in Dallas in '81?

...Kathy Clay (SMERC)

B. SMERC Publishes Cumulative Edition of *Curriculum Guide Catalogs* (1974-1980)

The San Mateo Educational Resources Center (SMERC) has collected, indexed, abstracted, put into microfiche format, and published a catalog of California Curriculum guides submitted by county and local educators each year since 1974. The curriculum guides, and the catalogs, have been very popular with subscribing agencies.

The guides are practitioner-oriented, with a wide variety of lesson plans, activities, teaching techniques, and other practical materials of interest to teachers, administrators, aids, librarians, counselors, and almost anyone involved in the educational process.

This year, for the first time, SMERC has published a cumulative edition of all curriculum guide catalogs (1974-1980). A brochure describing the catalog is reproduced as Attachment 10.

...Susan Long (SMERC)

VII. ERIC CLEARINGHOUSE ANNOUNCEMENTS

A. ERIC Clearinghouse on Counseling and Personnel Services

1. ID's to DJF's—A Card File Does It All

CAPS maintains a 3"x5" alphabetic ID card file (one term to a card) of Identifiers so that it is easier to see which terms have enough Clearinghouse postings to be nominated to Descriptor status. Only those ID's with promise as potential Descriptors are recorded. When the editors for RIE and CIJE see that such ID's have been used in indexing, they note on the appropriate file card the Clearinghouse Accession Number and the date on which they edited the document or article. When postings are sufficient to warrant submission as a DJF, the information on the card provides at-the-fingertip support for the nomination.

...C.J. (CG)

2. CAPS Hosts Advisory Commission

Members of the 1980-81 Advisory Commission met with the staff at the Clearinghouse early in December to identify critical issues in the areas of counseling and student personnel services, and to suggest new avenues through which CAPS could respond. Consensus priority areas were to create more exposure for ERIC via the popular as well as professional press, and to increase awareness among educators of ERIC as a vehicle for making their professional work more visible. Additionally, they suggested specific topics for use in development of Fact Sheets.

...Carol Jaslow (CG)

3. IAP Marketing Strategies at CAPS

The primary strategy used by the ERIC Clearinghouse on Counseling and Personnel Services for marketing IAP's is the annual mailing of publications brochures and flyers to the mailing lists of the American Personnel and Guidance Association (approximately 40,000 names) and of ERIC/CAPS (approximately 7,500 names now and ever-expanding). In addition, IAP's are advertised extensively in the quarterly information bulletin, *CAPS Capsule*, and short promotional pieces on specific IAP's are submitted to selected journals and newsletters. When staff members travel to conventions or workshops, quantities of IAP materials are given away. Brochures are sent to conventions which cannot be attended by Clearinghouse staff.

...Penny Schreiber (CG)

4. ERIC/CAPS Reaches Out to University of Michigan Faculty

As part of ERIC/CAPS action plan to make University of Michigan educators aware of what ERIC can do and how ERIC can help them, each faculty member in the School of Education was recently sent a letter inviting them to come see and use the Clearinghouse's facilities. Attached to the letter was a Xeroxed copy of a mini-search on "Effective College-Level Teaching Techniques." The response was terrific, both from individual professors and from professors who brought their classes. The Clearinghouse has since done the same type of thing for the School of Public Health, the School for Social Work, and the Department of Psychology. For each group, courses from the Fall schedule were identified, from the most recent issues of RIE were retrieved. This effort has elicited very favorable comments from respondents.

...Carol Mills (CG)

B. ERIC Clearinghouse on Educational Management (EA)

1. Statistics Impress EA Advisory Board Members

At EA's National Advisory Board meeting in October, the members paid special attention to the presentation made by Clearinghouse Director Philip Piele. Prior to the meeting Piele directed the staff to prepare bar graphs showing the total number of documents and journal articles processed into ERIC's data base from each of the professional organizations represented on the board.

One chart portrayed the number of articles from the associations' journals that had been processed into CIJE. Another showed the number of documents published by each association that had been cataloged in RIE. The figures were easily obtained by searching CIJE's journal contents index and RIE's institutional source index.

The associations' executive directors were keenly interested in both the impressive overall figures and the relative standings of the various organizations.

Especially pleased was Scott D. Thomson of the National Association of Secondary School Principals, whose totals exceeded all the others. NASSP celebrated this fact in a front page article in its November *Newsletter* mailed to all members. The article cited the figures and commented that "the titles selected from NASSP's flagship journal in secondary school administration outnumbered by several hundred those from other association journals."

...Stuart Smith (EA)

C. ERIC Clearinghouse on Elementary and Early Childhood Education (PS)

1. Teamwork Aids Abstracting/Indexing Process at PS

The ERIC Clearinghouse on Elementary and Early Childhood Education has begun to implement a new approach to editing and index-checking of RIE resumes. Working as a team, abstractor/indexers check one another's indexing work and make suggestions for improvement. Brief notes clipped to the resumes are used to query terms assigned, the weight given to them, and to suggest alternate and/or additional terms. Abstracts are also reviewed by members of the abstracting/indexing team.

Team members' written suggestions: (1) take less time than direct, face-to-face consultation; (2) provide a mini-in-service to the abstractors/indexers; and (3) result in a record of concerns that can be inspected by team members for repeated errors and other patterns. Team members merely make suggestions to one another. The original abstractor decides on the merits of the suggestions. As a result of the teamwork, continuous feedback to abstractor/indexers is more quickly provided. Resumes are improved before they are sent to the Clearinghouse editors for a final check.

...J.B. (PS)

2. ERIC/EECE Director Consultant to Encyclopedia/IEA

Dr. Lilian Katz has been appointed consulting editor to the *Encyclopedia of Education Research*. Dr. Katz is responsible for entries related to the subject of early childhood education for the fifth edition of the *Encyclopedia*, which will be published by Macmillan in 1981. This major scholarly undertaking of AERA is revised every ten years.

Dr. Katz has also been invited to attend a meeting of the International Evaluation Association (IEA) in Belgium in February 1981. IEA will be meeting to design a cross-national comparison of preschool children in twelve countries, including Australia, Israel, the United States, and European countries. Previously, IEA has made cross-cultural comparisons of children's achievement in mathematics and reading.

...Janet Bowermaster (PS)

D. ERIC Clearinghouse on Higher Education (HE)

1. User Services Detective Work

Recently the ERIC Clearinghouse on Higher Education received a letter forwarded from EDRS from a woman in Hawley, Minnesota requesting "*educational material for a young family from Laos.*" The family was being sponsored by a group of churches whose Education Chairwoman was looking to ERIC for "*general information for secondary-adult and preschool education.*" Laura Ciarniello contacted the Minnesota State Department of Education and was referred to Mr. Hung Nguyen, a specialist in Minnesota's Department of Education Indo-Chinese Education Program ((608) 296-8250). Mr. Nguyen will contact our letter writer with a catalog of educational material and programs for the Laotian immigrants. Congratulations, Laura!

...Lynn Barnett (HE)

E. ERIC Clearinghouse on Information Resources (IR)

1. "Database"—One Word Form Recommended by IR

It might be worthwhile pointing out that a common practice at the Clearinghouse on Information Resources is to use "database" as a single word, rather than two. While the two-word form is employed by the *Thesaurus*, and therefore used in the Descriptor field, it is customary for IR to spell the expression as a single word when used in the abstract. This practice follows the same rationale as making "online" one word. The general trend in the literature (witness the name of the latest journal in the field, *Database Magazine*) seems to be toward the one-word format.

As an aside, when doing full text searching, one should enter the single term form as well as an adjacency search on the two words.

...Bruce Clark (IR)

F. ERIC Clearinghouse for Junior Colleges

1. Selection Assistance Via Computer Searches—Summary Report on a Special Project

During the fiscal year 1980, the ERIC Clearinghouse for Junior Colleges conducted a study to assess the costs and benefits of incorporating into the selection process on-line statistical searches which would provide reviewers with objective data concerning the appropriateness of documents to the ERIC collection. Study methodology involved online subject searches for the 130

potentially acceptable documents received by the Clearinghouse during the months of July and August. Search objectives were to determine:

1. How many documents were already in the system on that particular topic;
2. How many documents were on a slightly broader topic;
3. How many of these related documents had been processed by JC; and
4. When the most recent document on that topic had been added to the data base.

Study findings indicate that reviewers were enthusiastic about the information they received for each document and that the data caused them (in many cases) to change their initial perceptions about a document's value to the collection. However, costs (which totaled \$1,833.33) prohibited the full-scale implementation of this strategy in the selection process. Since reviewers found the searches to be most valuable in making decisions about "borderline" documents, it was recommended that implementation be modified to include only documents of questionable appropriateness. Such documents include those whose subjects overlap the scope areas of other Clearinghouses; those reporting "exemplary practices"; and those dealing with practicums and student papers. The full report of this project is displayed in Attachment 11.

...G.B. (JC)

2. JC Journal Article Publications

In October, an article of Dr. Arthur Cohen's entitled "Linking the Profession, the Discipline, and the Curriculum" appeared in *CEA Forum's* special issue, "Separate but Equal: English in the Two-Year College."

An article by L. Cohen and Jack Friedlander, "What Do Two-Year College Instructors Want?," which appeared in *Community College Review* (Winter 1980) was reprinted in *The Education Digest* (November 1980).

...G.B. (JC)

3. Cohen of JC Appointed to Council

SWRL has appointed Dr. Arthur Cohen to the Secondary/College Council. He attended a meeting of the council on November 17, 1980 in San Diego, California.

...Gayle Byock (JC)

G. ERIC Clearinghouse on Reading and Communication Skills (CS)

1. Staff Changes—CS

Anne Auten recently left the Clearinghouse to work in the community relations department of a local hospital. Hilary Holbrook is joining the ERIC/RCS staff as a full-time research assistant.

...Mary K Monteith (CS)

H. ERIC Clearinghouse for Science, Mathematics, and Environmental Education (SE)

1. ERIC/SMEAC Assisting NSF Meta-Analysis Study

The University of Colorado has received National Science Foundation (NSF) funding to conduct a number of meta-analysis studies related to Science Education. Dr. Ronald Anderson and Dr. Eugene Glass are among the staff at Colorado providing leadership for this activity.

Six universities will be involved in the research.

- University of Colorado
- University of Georgia
- University of Iowa
- University of Minnesota
- Ohio State University
- Stanford University

ERIC/SMEAC and the SMEAC Information Reference Center are assisting by identifying relevant research and by loaning materials for the local SMEAC collection. Over 900 research studies not on ERIC microfiche have been loaned; approximately 2,000 more will be loaned during the next year.

Mr. Gary Sweitzer is serving as a Research Associate and Dr. Robert Howe is serving on the Steering Committee for the project.

...Robert W. Howe (SE)

I. ERIC Clearinghouse for Social Studies/Social Science Education (SO)

1. Portions of ChESS IAP's Gain National Recognition

Excerpts from two recent ERIC/ChESS IAP's have been reprinted in major national publications. Two chapters from *Social Studies in the Mainstreamed Classroom*, by Anna S. Ochoa and Susan K. Shuster (ED 184 911) form the first chapter in a new book on mainstreaming in the social studies published by the National Education Association. Portions of *Social Studies Teacher Education: Practices, Problems, and Recommendations*, by Jan L. Tucker and William W. Joyce (ED 170 187), were reprinted in the October 1980 issue of *Social Education*.

...Ann Williams (SO)

2. Staff Meeting at ChESS Utilize EAB

The ERIC Clearinghouse for Social Studies/Social Science Education has begun a new procedure for staff meetings. All staff meetings are now scheduled to take place two or three days after the arrival of a new EAB (and are held more frequently if needed). A major agenda item for each meeting is to review all EAB items that are of general interest, that need clarification, or that need responses which require staff discussion. Reminders are also given at this meeting of items that should be submitted for the next EAB. Thus far, this has proved to be a useful procedure, insuring staff awareness of important EAB items and assuring that work is begun on items that require action.

...Char Purvis (SO)

J. ERIC Clearinghouse on Tests, Measurement, and Evaluation (TM)

1. Reference Books on Tests

The most widely-used reference book in the area of testing is Oscar Buros' *Mental Measurements Yearbook* (MMY) series, published by Gryphon Press. The most recent additions to the series are *Tests in Print II* (1974) and the *Eighth Mental Measurements Yearbook* (1978). Each MMY contains factual information on all known tests published as separates in the English-speaking countries of the world; critical test reviews written by qualified professionals representing a variety of viewpoints; excerpts of test reviews which have been published in professional journals; bibliographies of references selected for their relevance to particular tests; and listings of books on measurement and closely related fields.

TM has found the MMY to be extremely helpful to people who are involved in selecting a test since it provides ordering information, reviews, and references to research about the test. It should be noted, however, that the MMY covers primarily published tests, and does not include listings for most research instruments.

...Barbara Wildemuth (TM)

2. Useful Acquisitions Tool

The 1980-81 edition of the *National Directory of Addresses and Telephone Numbers* bills itself as "the only book with the 50,000 most wanted numbers in the United States." It has real potential as an acquisitions tool since among the listings are over 11,000 government offices, over 4,000 colleges and graduate schools, and more than 2,500 educational, professional and trade associations and unions. Entries are arranged by broad subject classification and by organization title. The latest edition is available for \$14.95 from Bantam Books, 666 Fifth Avenue, New York New York, 10019.

...Carol Paskowsky (TM)

TYPICAL ERIC-TYPE REQUEST

I don't remember the title ... but it was something about love and had kind of a red and white cover ...

from College Store Journal

Submitted by Lynn Barnett (ERIC Clearinghouse on Higher Education)

- Attachment 18: Vocabulary Status Report

m. Acquisitions Data Report (ADR)

Because of the decentralized nature of the ERIC system, it is necessary to devise some way for each of the Clearinghouses to be able to check on which documents are being processed by the other Clearinghouses. The differing subject specializations of each Clearinghouse are not enough to avoid potential duplicate effort. Document topics have a way of overlapping Clearinghouses, and it is not unusual for two or more Clearinghouses to feel equally justified in processing a given document.

The *Acquisitions Data Report (ADR)* is intended to accomplish this coordination. It is a composite list incorporating the previous month's selections or all the Clearinghouses. Only documents selected for announcement in RIE should be included in the ADR. It should not include any rejects, referrals, material retained solely for local files, or material not yet evaluated/selected. It is produced monthly by the Facility on the basis of input received from the Clearinghouses. The current format is a six-month running cumulation (e.g.: January-June, February-July, March-August, etc.), with entries made by title. See Figure IV-18 for a sample ADR page.

The ADR is intended as a supplement to the cumulated *Title Index*. The *Title Index* incorporates all items having an ED number; the ADR incorporates all items in process during the previous six months, but not yet assigned ED numbers.

At the time a Clearinghouse decides to assign a Clearinghouse Accession Number to a document, the accession should be recorded on the ADR Input Form (Figure IV-19). These forms are available from the ERIC Facility. On the last working day of every month the Clearinghouse should send to the Facility (separately and via Certified Mail) the ADR Input Forms containing records for all the documents accessioned during that month. The Facility waits until it has received input from all Clearinghouses (about one week), then keys the data, enters it into the special Acquisitions Data File, produces the ADR report, prints the report, and distributes copies to all Clearinghouses. The ADR containing a given month's data is available approximately three (3) weeks after the cut-off (or about the 21st of the next month).

The instructions for completing the ADR Input Form are as follows:

- Clearinghouse Accession Number

Enter the Clearinghouse Accession Number in Columns 1-8, e.g., "CE123456."

• Pagination

Enter the number of pages right-justified in Columns 9-12, e.g., 1357. This figure can be the last numbered page in the document and need not be an exact count. Unpaginated documents greater than ten (10) pages in length may be described here as "NP," i.e., not paginated. Pagination is intended as an additional discriminator to assist editors in differentiating items with similar titles.

• Publication Date

Enter the publication date right-justified in Columns 13-19, e.g., "15May77," or "May77," or "77." Like pagination, publication date can help editors in telling like items apart.

• Disposition

Enter the code for "Disposition" in Column 20. The sole permissible codes are as follows:

1 = Selected for RIE, ready for immediate processing.

2 = Selected for RIE, on hold awaiting release, legible copy, etc.

3 = Selected for RIE, but for various reasons could not be processed.

Completion of this field is mandatory. Transfers, rejects, and items retained solely for local files should not be reported.

If the disposition of a document is changed, its ADR record should be changed accordingly.

• Title

Enter the title in Column 21-80. Record the title exactly as it appears on the document, including initial articles and initial punctuation marks or special characters. This simple rule will facilitate both the original making of entries and the later comparison of titles during duplicate checking. Truncate the title if necessary, but do not abbreviate words in the title. Documents with titles that are the same throughout their length (or for at least 60 characters of their length) should be differentiated from one another by the addition of some distinguishing data, e.g., Vol. 1, Vol. 2, etc.

The month to which the data pertain should be recorded in the upper left corner of the ADR in the space provided. Since several sheets will normally be required to report one Clearinghouse's accessions, the sheets should be numbered in the upper right hand corner, e.g., Sheet 1 of 3, 2 of 3, 3 of 3, etc. Space is also provided for the date completed and the preparer's name.

Since keying is done directly from the forms, entries should either be typed or written neatly in unambiguous block capitals. When writing, the space marks on the form should be observed in order to ensure clarity. When typing, the space marks on the form can be ignored. Punctuation and special characters may be used only in the title field. The following conventions should be used when writing:

<u>Alpha Character</u>	<u>Number</u>
Ø (oh)	0 (zero)
I (eye)	1 (one)
Z (zee)	2 (two)

Please note that the ADR Input Form is not an OCR form and it is not necessary to use an OCR typewriter or to follow the OCR input conventions when keying this form.

Each monthly ADR will display in alphabetic sequence all title records gathered from the ADR Input Form during the previous six months and all potential duplicates gathered during the previous year. Potential duplicates will be flagged by printing an asterisk adjacent to the entry date column. Additionally, each Clearinghouse will receive monthly one copy of a customized Activity/Exception Report for that month.

Potential duplicates will be adjudged to be records that have the same title for as long as the shorter of the titles. This convention is necessary due to the variable practices in recording subtitles, series titles, etc. For example, suppose the following two titles have been entered into the system.

Title 1: Motorcycle Safety Education
Title 2: Motorcycle Safety Education. A Curriculum Guide.

The computer will flag these two titles as duplicates, leaving it to human editing to discern if they truly are duplicates. For the purposes of sorting and checking for potential duplicates, the leading articles and all special characters except the left parenthesis will be ignored. (However, these same characters will print in the ADR as part of the title, as recorded by the Clearinghouses.) The slightest difference in the remaining characters will cause the titles to be considered unique (e.g., misspelled words or using a number spelled out vs. a numeric will cause otherwise duplicate titles to be considered unique). Duplicate checking is done only by title. For these reasons, title input to the ADR must be done accurately, and the tool must be used carefully, with full knowledge of its limitations.

The individual "Clearinghouse Activity/Exception Report" will list alphabetically by title all available information for each of the following categories:

(1) Newly Added Records

Within this group, records that contain a valid Clearinghouse prefix, but that do not have six numeric characters immediately following it, will be flagged with a pound sign (#) adjacent to the Clearinghouse number when added to the system, but will also appear in the ADR as entered.

(2) Records Flagged as First Time Duplicates

The first time that a record is detected as a potential duplicate it will appear in this report. This will occur when a new record is entered if it is a potential duplicate to any record then in the file or being added at the same time. Records also appear in this report if a newly entered record appears to be a potential duplicate to an old record and the old record had not been previously considered to be a potential duplicate.

(3) Records Changed

It is possible to change the data in the Pagination, Publication Date, and Disposition fields of an existing record. Records to be changed should be recorded on a separate ADR Input Form and identified as changes rather than new input. When this occurs, the changed record appears in this report.

(4) Records Dropped (Routinely)

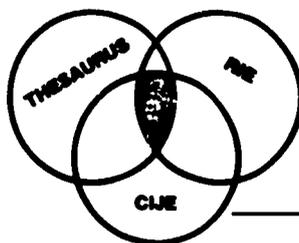

Records are dropped from the file after a one year retention period, at which time they appear in this report.

(5) Records Purged by Request

It is possible, by special request, to remove a record from the system. This is the only way, for example, to remove an incorrectly entered title. Records removed in this manner appear in this report. Contact the Acquisitions Department at the ERIC Facility if it is necessary to remove records. A purge request for a record that is not found in the system at the time the request is received, will be noted in a separate report.

Any of the above reports which do not have any entries for a given month will not be printed.

NOTE: If a document is entered into the ADR but then retained without further processing by the Clearinghouse for longer than 6 months, it should be re-entered into the ADR as a courtesy to other Clearinghouses who may acquire the document after its first ADR listing has "expired." Documents awaiting a release or a legible replacement copy may fall into this category.

HOW TO SEARCH THE ERIC SYSTEM

—a new reference aid

- Appropriate for individuals or groups, this "self-help" instructional program facilitates library use of ERIC materials. The program has been designed for use on a Singer Caramate 3300 Viewer or compatible equipment and can also be read and used with a slide projector.
- Developed by library experts, the program will help free librarians from routine or repetitive explanations about utilizing ERIC.
- The complete package consists of 59 35mm slides, a 12½ minute recorded cassette, and a 12-page guide containing the script and an index to the slides.
- \$35.00. Checks should be made payable to The Regents of the University of California. California residents and institutions please add 6% sales tax.
- Mail orders should be addressed to:
Library Accounting Office
University Research Library
University of California
Los Angeles, California 90024
- The package may be purchased in person from the Library Cashier, University Research Library, UCLA for \$35.00 plus 6% California Sales Tax.

Please detach and use as purchase order

Report from the Technical Steering Committee

This report reviews the responses of the Steering Committee to all recommendations from the Eastern and Western Regional Meetings that were not forwarded to CERIC for their consideration. The formal recommendations will be reported with CERIC's decisions in a forthcoming EAB.

RECOMMENDED THAT ON-LINE THESAURUS HELP WITH CROSS-REFERENCING BE PROVIDED ESPECIALLY WITH DELETED OR "USE" TERMS.

The expense involved in implementing such a project would be prohibitive. In lieu of this idea the Steering Committee has suggested to Lynn Smarte, Coordinator of the On-line Users Group, that she communicate with the vendors and ask that a message appear when users log on instructing them to use the new thesaurus. In addition, the Vocabulary Review Group will request that Clearinghouses generate and submit lists of particular problem terms.

RECOMMENDED THAT SOC'S AND USERS UTILIZE THE ROTATED AND/OR HIERARCHICAL DISPLAYS TO IDENTIFY MORE DESCRIPTORS.

The Steering Committee agrees with this recommendation. The suggestion will appear in the next issue of Interchange and in the letter to SOC's requesting their feedback on the Thesaurus.

RECOMMENDED THAT REFERENCE CARDS BE DEVELOPED TO SUMMARIZE CHANGES IN THE THESAURUS THAT COULD BE POSTED AT COLLECTIONS.

The Steering Committee has recommended to CERIC that the Facility develop Ready Reference Number 2 to cover this topic. In addition, IR is already producing a sheet on how to use the system which can be mass produced and supplied at collections. Also suggested is that Clearinghouse staff should call people's attention to the Thesaurus Introduction. It's written clearly and should be of help.

RECOMMENDED THAT THE VOCABULARY REVIEW GROUP DEVELOP A MECHANISM FOR THE REVIEW OF PROBLEM HIERARCHIES.

This will occur. It is within the purpose of the group to address this problem.

RECOMMENDED THAT CLEARINGHOUSE STAFF MAINTAIN AN ON-GOING LIST OF DELETED AND TRANSFERRED TERMS THAT ARE NOT SUFFICIENTLY REFERENCED BY THE "USE" TERM.

CERIC has already given authority to the Vocabulary Review Group to consider these terms. Lynn Barnett will be requesting this information in the near future. In the meantime Clearinghouse staff should be identifying these terms.

RECOMMENDED THAT CLEARINGHOUSES SHOULD COOPERATE IN THE PROMOTION OF IAP'S OF MUTUAL AND/OR OVERLAPPING INTEREST. PERHAPS ANNOUNCEMENT OF PUBLICATIONS AT THE PROPOSAL AND PUBLICATION STAGES WOULD STIMULATE THIS COOPERATION.

The Steering Committee agrees that such cooperation should occur among Clearinghouses. It is our understanding that CERIC is considering ways to implement this type of cooperation.

RECOMMENDED THAT FURTHER INSTRUCTIONS ARE NEEDED TO GUIDE AUTHORS IN COMPLETING THE REPRODUCTION RELEASE FORM. MANY FAIL TO SEND THEIR PAPERS WITH THE FORM.

The form itself already contains so many instructions that to add more would increase confusion. In addition, many Clearinghouses send out forms after documents have been received and are not requesting that documents accompany the form. The best solution at this time appears to be well organized instructions in the cover letter that accompanies the form.

RECOMMENDED THAT CERIC SHOULD CONSIDER THE "NON-EXCLUSIVE REPRODUCTION RIGHTS CLAUSE."

CERIC is currently considering adding this clause to the next official form.

RECOMMENDED THAT (A) ALL POLICY CHANGES BE ANNOUNCED FIRST IN LETTERS FROM CERIC. THESE LETTERS SHOULD BE SENT TO DIRECTORS WITH A COPY TO THE APPROPRIATE TECHNICAL STAFF PERSON. (B) THAT POLICY CHANGES THAT HAVE ALREADY BEEN ANNOUNCED AS DESCRIBED IN (A) CONTINUE TO BE ANNOUNCED IN THE EAB AS WELL. THE STATEMENT IN THE EAB SHOULD IDENTIFY THE ORIGINAL LETTER.

It's the Steering Committee's understanding that there are times when CERIC announces policy changes through both letters and the EAB, and times when changes are announced only in the EAB. Regardless, all policy changes appear in the EAB. In an attempt to alleviate any problem people have over what is and isn't policy, the Committee has recommended to CERIC that a new heading be added to the EAB titled POLICY.

The Committee agrees that when possible, technical staff should receive copies of letters. It is often difficult, however, to determine who's the person to receive the copy. It continues to be an internal Clearinghouse matter to determine the best methods of communication flow.

RECOMMENDED THAT WHEN A CLEARINGHOUSE IS UNSURE OF WHETHER A DOCUMENT WILL REPRODUCE BECAUSE OF TEXTURE AND COLOR, THE DOCUMENT SHOULD BE SENT TO EDRS FOR TESTING.

The Steering Committee hesitates to support this suggestion for fear that Clearinghouses will deluge EDRS with documents. We have discussed this option with Jack Veale who is willing to try it on a trial basis. Documents should be sent to EDRS only after thorough study of the reproduction guidelines.

RECOMMENDED THAT AN ADHOC COMMITTEE BE FORMED TO STUDY THE USE OF MANDATORY LEVELING TERMS.

CERIC has already "okayed" the formation of this committee. Members (who volunteered at the Eastern Meeting) will be Dorothy Bloch, Chair, Jim Houston, Rob Gillette and John Brosseau. Any ERIC staff wishing to contribute ideas to this group should contact Dorothy Bloch.

The Committee has been charged with examining indexing practices as they relate to present guidelines in the area of mandatory leveling terms. The group will identify problems, look for inconsistencies among Clearinghouses and clarify what "mandatory" means. The recommendations from this group will be forwarded to the Steering Committee February 1, 1981 and scheduled as an agenda item for the National Technical Meeting.

RECOMMENDED THAT MORE CROSS REFERENCING IN THE ERIC SOURCE CODE DIRECTORY WOULD BE HELPFUL.

The Steering Committee is in full agreement. The Committee has talked with the Facility and Ted Brandhorst has suggested that Clearinghouses send their suggestions to Lee Schreiber. In addition, the Steering Committee has recommended to CERIC that an organizational chart and/or list be provided to each clearinghouse of government agencies, (particularly the Dept. of Ed.) since this seems to be the area of most confusion when consulting the Source Code Directory.

RECOMMENDED THAT THE PURPOSE AND SELECTION PROCEDURES FOR CIJE NEED TO BE CLARIFIED.

The Steering Committee totally supports this view and prepared a recommendation to forward to CERIC. In the meantime Kit Welsh released a paper that addresses many issues related to CIJE. By the time this report is published, all Clearinghouses will have read and commented on her paper. Therefore there is no need at this time to submit a recommendation for consideration.

RECOMMENDED THAT THE FACILITY SERVE AS THE "CENTRAL MAILER" OF ALL COMPLIMENTARY MICROFICHE TO STANDING ACQUISITIONS ARRANGEMENTS (SAA) CONTRIBUTORS. THEN ALL MICROFICHE WOULD BE SENT FROM A CENTRAL SOURCE.

In lieu of this recommendation, Grace Sundstrom has offered to provide each Clearinghouse with the names and addresses of SAA contact people. The Facility will not assume responsibility for distributing microfiche.

RECOMMENDED THAT THE WHOLE PROCEDURE OF DOCUMENT RELEASES BE REVIEWED AND IMPROVED.

The Committee feels that considerable time and effort already has been spent by the system in setting up document release procedures. Until specific areas are identified as problems the procedure cannot be thoroughly reviewed. Clearinghouse staff are free to communicate specifics to any Steering Committee member for consideration at a later time.

ERIC PROCESSING MANUAL

TABLE OF CONTENTS

	PUBLICATION DATE	PRICE **
PREFACE ORGANIZATION, AUDIENCE AND AVAILABILITY OF THIS MANUAL	FEBRUARY 1981	Not sold separately
SECTION 1 - INTRODUCTION	OCTOBER 1980	\$3.75
SECTION 2 - ACQUISITIONS	NOVEMBER 1980	\$3.75
SECTION 3 - SELECTION	OCTOBER 1980	\$3.75
SECTION 4 - HANDLING AND SHIPPING	JANUARY 1981 (Projected)	\$3.75
SECTION 5 - CATALOGING	FEBRUARY 1981 (Projected)	\$3.75
SECTION 6 - ABSTRACTING/ANNOTATING	SEPTEMBER 1980	\$3.75
SECTION 7 - INDEXING	OCTOBER 1980	\$3.75

ERIC FILE RELOADED TO REFLECT NEW THESAURUS

The entire ERIC (File 1) database from 1966 to the present was reloaded in November to reflect the vocabulary of the new 1980 *Thesaurus of ERIC Descriptors*. The new version of ERIC reflects several millions of individual changes made in the records by ERIC. The following changes are of key importance.

- Changes in descriptors to conform to the new 1980 *Thesaurus* (e.g., NEGROES has been replaced by BLACKS as a descriptor in records).
- Changes in identifiers to conform to the ERIC editorial effort of the last few years that reduced identifier volume by 40% (e.g., SANTIAGO has been replaced by CHILE (SANTIAGO)).
- Changes to the Document Type (DT=) field to conform to the latest set of codes. All of the old single-character alpha codes have been replaced by the new three-character numeric codes. These may be viewed online by EXPANDING DT=. Each three-digit code has a scope note online reflecting its contents. The text of the scope note is also searchable with the DT= prefix.
- Changes to the EDRS Price field to reflect the new ERIC price codes in lieu of specific dollar prices. Current prices represented by the codes can be viewed online using ?ERICCODE.

- Miscellaneous corrections, additions, and deletions to correct errors in the previous tapes.

During the process of the reload, some field prefix codes were also changed to reflect DIALOG Service efforts at standardization of data elements. The following changes were made:

<u>Field Name</u>	<u>New</u>	<u>Old</u>
Corporate Source	CS=	/CS
Issue	JA=	IS=
Journal Name	JN=	JO=
Sponsoring Agency	SA=	/SA
Publication Year	PY=	YR=

Note in particular that the Corporate Source field (CS=) is no longer part of the Basic Index and that the Journal Name field (JN=) and the Publication Year field (PY=) have been changed to facilitate cross-file searching on the DIALOG system. Note also that the Publication Year field now reflects the actual publication date of the document.

An output sorting capability, both online using .SORT and offline using PRINT with sort features, has been added to this new version of ERIC. You can now sort output by Author (AU), Corporate Source (CS), Journal Name (JN), and Title (TI). Combinations of more than one data element can be used in the same sort request.

A revised Bluesheet for ERIC (File 1) is enclosed with this issue of the CHRONOLOG newsletter.

FIRST ANNUAL ERIC SEARCH TOURNAMENT - ONLINE '80

ENTRY FORM*

1. _____
YOUR NAME
2. _____)
_____) ORGANIZATION NAME,
_____) ADDRESS, & TELEPHONE
_____) NUMBER
3. SEARCH QUESTION - CHECK ONE #1 _____ #2 _____ #3 _____
4. WHERE YOU MAY BE REACHED, OR A MESSAGE LEFT:
ROOM # (?) _____
TELEPHONE # (?) _____
OTHER ? _____

DEPENDING ON THE NUMBER OF ENTRIES WHICH MUST BE EVALUATED, ONE OF THE SEARCH JUDGES WILL ATTEMPT TO CONTACT THE WINNERS (OR LEAVE A MESSAGE IN THE APPROPRIATE PLACE) PRIOR TO 10:00 A.M. ON FRIDAY, 8/14/80.

*ADDITIONAL ENTRY FORMS ARE AVAILABLE AT THE ONLINE REGISTRATION DESK SHOULD YOU NEED THEM.

FIRST ANNUAL ERIC SEARCH TOURNAMENT

ONLINE '80 - NOVEMBER 12 - 14, 1980

THINGS YOU SHOULD KNOW:

1. The contest is designed to be fun, informative, and casual. Bring your good search strategies, your intelligence, and your good humor.
2. The Embarcadero Room has been reserved for the ERIC Search Tournament. BRS, SDC, Lockheed, and SMERC have provided the following:
 - a. Terminals (4)
 - b. Free search time
 - c. Logon procedures
 - d. System search aids
 - e. ERIC Thesauri
 - f. Technical Assistance
3. Available Hours:
 - a. 10:15 A.M. - 5:00 P.M. - Wednesday, 11/12/80
 - b. 9:00 A.M. - 4:30 P.M. - Thursday, 11/13/80
4. Entries:
 - a. Print LULL citations online
 - b. Include Logon and Logoff information (so we know how long the search took)
 - c. Include search strategy (so we can see what Descriptors and free texting were used)
 - d. Up to three entries are allowed (one per search question)
5. Attach the enclosed entry form to your printout(s) and turn them in to the Online registration desk by 5:00 P.M. on Thursday, 11/13/80, at which time the entries will be picked up and evaluated based on specified criteria (see attached). Additional entry forms are available at the registration desk should you need them.
6. Winners will be personally contacted, or a message will be left in a prespecified spot (see Entry Form) prior to 10:00 A.M. on Friday, 11/14/80.
7. Winners will meet with the judges at 1:30 P.M. on Friday, November 14, 1980 in the telebeam room in order to coordinate the 2:00 P.M. presentation of winning search strategies. Winners will be asked to demonstrate their model strategies. Presentation assistance (narrators and/or computer operators) will be provided on request.
8. Judges will be from the San Mateo Educational Resources Center (SMERC) staff. SMERC fills approximately 20,000 requests for educational information from educational practitioners (teachers, administrators, librarians, etc.) each year. Hence their expertise; hence the focus on the practical.

1418

FIRST ANNUAL ERIC SEARCH TOURNAMENT
ONLINE '80 - NOVEMBER 12 - 14, 1980

SEARCH QUESTIONS

1. In 10 days I will be having an interview for the position of Director of Community Services, responsible for setting up an information and referral system which will link community people to appropriate community resources. I'm sure I can impress my interviewers if you could send me information on the following: (1) a form, or letter, or interview schedule that has been developed for gathering information on community agencies; (2) the best way to organize my office and staff and resources once I've gathered them; (3) other communities that have developed such a service. Have they documented their procedures? Do they charge? Have they evaluated their efforts? (4) promotional literature for such a service. (Assuming I will soon have something to promote.)
GRATEFULLY YOURS.
2. I am the head librarian at XYZ Corporation. My colleagues in the area's public and college libraries want my business library to join the regional Cooperative Library Network. The Corporation's directors are somewhat skeptical of the value of such networks, worrying that the costs of our membership, the time spent supplying information needs to non-Company personnel, will outweigh any benefits we may receive in public relations and access to additional information resources. They've asked me to prepare a presentation for them on special library participation in regional networks and the advantages and disadvantages of cooperation with these other types of libraries. Could you send me some information for my presentation?
3. As the training director at a Bay Area electronics company, I am responsible for planning inservice for the engineering staff. How do I structure and schedule such an inservice program? Our company has followed the traditional pattern of workshops and retreats. I would, of course, be interested in these types of programs, but I am especially interested in other options. Can you help me out?

CRITERIA (AND SAMPLE SCORE SHEET) FOR SUCCESSFUL SEARCHES

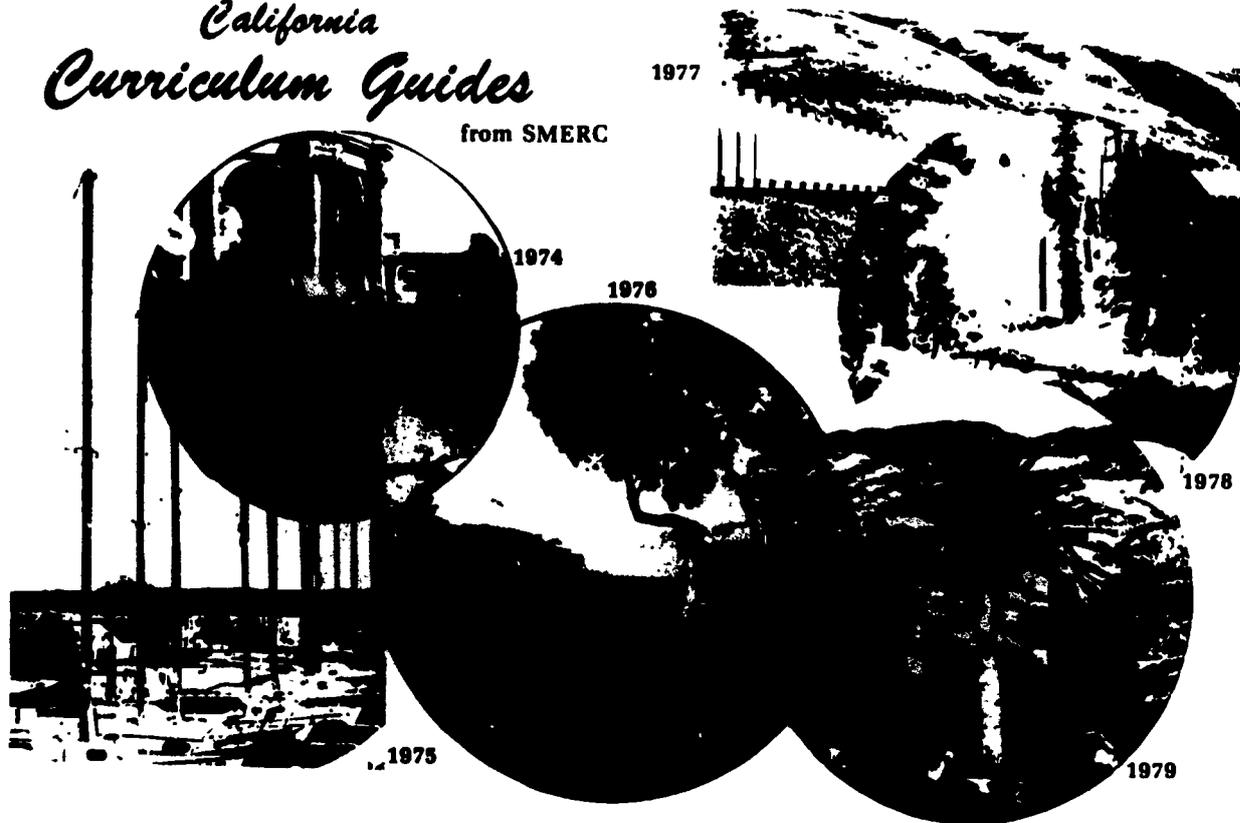

IN KEEPING WITH THE "HOW-TO" PRACTICAL FOCUS OF ONLINE '80, THE SUCCESSFUL SEARCH MUST FOCUS ON PRACTICAL, "HOW-TO" MATERIAL. IT SHOULD BE TO THE POINT, PRECISE, CONCISE, BRIEF--50 CITATIONS MAXIMUM. SEARCH RESULTS WILL BE EVALUATED BY THE SMERC JUDGES (WHO WILL NOT ENTER THE CONTEST), BASED ON THE FOLLOWING CRITERIA:

						POINTS
<i>Search Strategy (inclusion of most relevant terms, and effective manipulation thereof)</i>	1	2	3	4	5	_____
<i>Knowledge/Use of Data Elements in ERIC</i>	1	2	3	4	5	_____
<i>Knowledge/Use of System Capabilities</i>	1	2	3	4	5	_____
<i> bonus points: Creativity/Unique Approach</i>	1	2	3	4	5	_____
<i>relevance of results</i>						_____
<i>(total number of "hits" to be entered here.)</i>						
<i>DO NOT PRINT MORE THAN 50 CITATIONS TOTAL.</i>						
<i>Speed of Searching</i>						_____
<i>number of relevant citations will be divided by the number of online minutes (rounded off) and multiplied by 10. For example, 10 hits in 20 minutes would result in a score of 50.</i>

SELECTION ASSISTANCE SEARCHES:
Special Project Final Report
ERIC Clearinghouse for Junior Colleges

During the summer of 1980, the ERIC Clearinghouse for Junior Colleges conducted a special project to test the feasibility of incorporating on-line statistical searches into Clearinghouse document selection procedures and to provide document reviewers with objective data concerning the availability of documents on particular topics.

As originally conceived, the project was to require the reviewers at the Clearinghouse to request searches on approximately 200 documents during the year. It was intended that the reviewers would select documents of borderline quality for the searches and that the information provided to them would help them assess the documents in terms of the ERIC collection as a whole.

After further consideration, it was decided to run searches on the entire group of documents received during July and August, 1980, in order to determine:

- (1) the kinds of documents and topics that are easiest and most difficult to search;
- (2) the kinds of documents and topics for which the searches are most useful in the reviewing process;
- (3) if the incorporation of on-line searching into the selection process has any unforeseen implications.
- (4) which information was most useful in selecting particular kinds of documents.

The procedures followed during the project were as follows:

- (1) An initial screening by the Documents Coordinator eliminated those documents which were unsuitable for ERIC inclusion, such as catalogs, brochures, etc.
- (2) Each potential ERIC document was assessed carefully to determine its principle subject.
- (3) A search strategy was developed for that topic.
- (4) In batches of ten to twenty documents, the computer searches were conducted.
- (5) Titles of search results were printed on-line.
- (6) The print-out was examined by the Documents Coordinator to identify false drops and titles of documents which seemed to be relevant to the topic.
- (7) A memo was attached to each document indicating:
 - (a) how many documents were already in the system on that topic;
 - (b) if no documents were on that specific topic, how many documents were on a slightly broader topic;
 - (c) how many of the documents already in the system had been processed by the ERIC/JC; and
 - (d) when the most recent document on that topic had been added to the data base.¹
- (8) Reviewers evaluated the usefulness of the information on the memo in terms of various types of documents.
- (9) The search print outs were grouped and stored by major topic (e.g., students, administration, etc.) in order to facilitate retrieval when a topic was recognized as one that had been searched before.

¹ Not all of this information was included for every document.

During July and August, 1980, 152 documents were received at the Clearinghouse. Of these, 130 were considered potential documents. In all, 125 searches were conducted during this period. This figure reflects that searches were not run on five documents because the topics had been searched earlier during the project.

The costs of conducting these searches were high. They are itemized below:

BRS training costs	\$ 44.62
Personnel costs @ \$9.42 per hour for 108.25 hours	\$1019.72
Benefits	\$ 183.55
Computer costs	\$ 141.00
	<hr/>
Subtotal	\$1388.89
+ 32% overhead	444.44
	<hr/>
Total costs	\$ 1833.33

The greatest percentage of the costs of conducting the project were personnel costs. On an average, for each document, the Documents Coordinator spent 10 minutes determining the subject of the document, 15 minutes developing a search strategy, 3 - 4 minutes conducting each search, and 10 minutes evaluating search results and composing the memo for the reviewers. Additional time was expended due to computer and/or telecommunication problems, and in conferences with reviewers over difficult documents, and retrieving the search results for repeat topics.

From the searchers' perspective, it was found that certain documents did not lend themselves well to searching. In particular it was very difficult to conduct productive searches for:

- (1) anthologies which contained articles on several aspects of

a broad topic. Searches which focused only on the broad content area had too many hits. In order to conduct a meaningful search, strategies would need to be developed for each essay in the collection. After the first efforts to conduct searches on conference proceedings, anthologies and collected essays, the Documents Coordinator and reviewers agreed that the efforts had not been worthwhile.

(2) works on vague or amorphous topics. For example, many papers written during the early part of 1980 dealt with "Critical Issues for the 1980's," "Future Trends for Community Colleges in the 1980's," and "The Changing Mission of the Community College in the Decade Ahead." Works such as these addressed numerous issues. Searching on each area discussed was as unproductive as searching on general descriptors such as FUTURES (OF SOCIETY) and COLLEGE ROLE.

The reviewers were enthusiastic about the project. They found that the memos increased the speed with which they made selection decisions, and that it increased their confidence in their decisions with regard to documents of marginal quality. They indicated that the information caused them to take a closer look at documents when there were numerous documents on the topic already in the system.

Our reviewers recorded several cases where the information recorded on the memos caused them to change their decision about a document. In one case, our reviewers were leaning favorably toward a dissertation on dropouts from general chemistry courses, because of the paucity of materials in the junior colleges collection on this topic. However, the search revealed 54 documents on course withdrawal and 39 documents on remedial chemistry instruction, and our reviewers decided, in view of the marginal quality of

the paper, not to accept it. In another case, our reviewers were inclined to discard a part-time faculty handbook on the basis of its primarily local value. The search revealed that although there were other such handbooks in the system, none had been added since 1975. In view of the excellence of the handbook, our reviewers decided to include it in the system as a model of exemplary practice.

The searches also proved valuable in that the reviewers were able to determine whether a topic was well covered for other levels of education, but not adequately covered with regard to community colleges. The reviewers also felt that information on the number of documents included on a given topic by other Clearinghouses helped them estimate the interest in that topic in the field.

Despite the numerous benefits of on-line selection assistance, the costs of the process--as it was conducted during the project--were prohibitive. As the reviewers found that the searches were most valuable to them in making decisions about "borderline" documents, the Documents Coordinator and reviewers recommend the following modifications to the procedure and its continued use:

- (1) During the initial screening of potential documents, the Documents Coordinator will identify and conduct searches for: (a) documents whose subject overlaps the scope area of another Clearinghouse in order to determine how many documents may already have been added to the system by the other Clearinghouse; (b) documents reflecting "exemplary practices," in order to determine the frequency and recency of the inclusion of documents of that type; (c) practicums and student papers which are based primarily upon secondary

sources, to determine how well the area is covered; and
(d) other documents which may seem to fit into the
"borderline" category on initial evaluation.

- (2) Reviewers will request searches on any other document when they desire additional information on the strengths and weaknesses of the collection in that topical area.

NEW INFORMATION ANALYSIS PRODUCTS

1. ERIC Clearinghouse on Higher Education

- *Adult Development: Implications for Higher Education*, by Rita Weathersby and Jill Mattuck Tarule. 58 pages. \$4.00. HE 013 053.

One of the few major student enrollment growth areas in higher education is the adult student. While there is considerable research examining adult development, this literature has not been drawn together to specifically look at it in light of lifelong learning. This report focuses on this literature and discusses its meaning for curriculum and teaching.

- *A Question of Quality: The Higher Education Ratings Game*, by Judith K. Lawrence and Kenneth Green. 68 pages. \$4.00. HE 013 137.

In addressing the question, "What is Quality in American Higher Education?" this report reviews the literature on three types of assessment: the accreditation process, academic studies and state program review.

- *Do Faculty Really Work That Hard?* by Carol H. Shuman. 4 pages. \$.75. HE 013 138

This paper addresses the problem of assessing the amount of time faculty devote to their employment obligations as it relates to making decisions on staffing, promotion, and institutional quality.

These publications are available through the American Association for Higher Education, 1 Dupont Circle, Suite 780, Washington, D.C. 20036.

VISITORS HOSTED BY ERIC CLEARINGHOUSES

ERIC Clearinghouse on Urban Education

Ms. Shoshana Langerman, Head of the Information Retrieval Center for Research in the Behavioral Sciences, Henrietta Szold Institute, Jerusalem, Israel, visited the UD Clearinghouse on November 26, 1980. She was interested in instituting a reciprocal arrangement for the exchange of documents. She met with Dr. Erwin Flaxman, and arrangements were made to provide her with ERIC documents; in exchange, documents developed by the Szold Institute will be sent to the Clearinghouse.

Ms. G. Mollie Lloyd, a teacher educator from the Southlands College of Higher Education, London, England, visited the Clearinghouse on November 7. She met with Dr. Erwin Flaxman and Dr. Jerome Wright to discuss the state of knowledge about multicultural education in the United States. The ERIC system was described to her, and she was provided with a number of ERIC and Clearinghouse brochures and publications.

...Stella Torgoff (UD)

CLEARINGHOUSE PARTICIPATION IN CONFERENCES

1. ERIC Clearinghouse on Elementary and Early Childhood Education (PS)

Mima Spencer represented ERIC at a recent meeting of the Midwest Regional Exchange Advisory Board in St. Louis. Two items of interest from this meeting were:

1. An earlier decision was confirmed and plans are being made for a second regional educational dissemination forum next fall under the chairmanship of Peggy Manter of Columbus, Ohio.
2. A task force was created to investigate the feasibility of computer conferencing for the Exchange (which represents a 10-state region). The conference would focus on an exchange of educational information. Mima Spencer will chair the task force, assisted by Linda Baskin of ERIC/EECE and other members of the Advisory Board.

...Janet Bowermaster (PS)

2. ERIC Clearinghouse on Higher Education (HE)

Jonathan Fife addressed graduate students in the Education Department of the College of William and Mary in Williamsburg, Virginia, November 7, 1980. He spoke on current trends in higher education. The program was sponsored by the College's higher education department.

Lynn Barnett and Margot Eddy represented the Clearinghouse and staffed an exhibit at the Annual Conference of the American Association of State Colleges and Universities, November 16-18, 1980 in Williamsburg, Virginia.

Jon Fife, Marilyn Snorr, and Lynn Barnett presented a two-day workshop at Penn State University at the Center for the Study of Higher Education on October 30-31, 1980. The agenda included:

1. A presentation by Jon Fife to the Higher Education Student Association. John discussed trends in higher education and information resources.
2. A How-to-Use ERIC workshop for graduate students.
3. A workshop on computer searching of ERIC for dissertation level doctoral students.

In addition, Lynn and Marilyn spent an afternoon with the Penn State University staff responsible for microforms, reference, and computer searching. Discussion centered on an ERIC update.

...Lynn Barnett (HE)

3. ERIC Clearinghouse for Junior Colleges

Dr. Arthur M. Cohen continues to help establish humanities programs in Washington State. On December 1, 1980, he attended a meeting with administrators at Green River Community College; on December 2, he attended the Core Group Meeting of Washington's State Humanities Project.

On December 9, 1980, JC hosted an all-day conference of SCCCIRA (Southern California Community College Institutional Research Association). Dr. Florence Brawer gave a paper entitled "Institutional Research: Outside Agencies"; Dr. Arthur Cohen moderated. Anita Colby, Donna Dzierlenga, and Gayle Byock were available to offer information on aspects of the Clearinghouse's activities.

...Gayle Byock (JC)

4. ERIC Clearinghouse on Reading and Communication Skills

Several staff members have recently returned from the National Council of Teachers of English annual convention held in Cincinnati, Ohio. The current emphasis on writing was evidenced in the interest in the ERIC/RCS-sponsored sessions on holistic scoring and writing evaluation methods and also in the sales of computer searches on topics dealing with writing evaluation, writing across the curriculum, writing apprehension, and revision.

...Mary K Monteith (CS)

ACTION ITEMS

ERIC ADMINISTRATIVE BULLETIN—NEW FORMAT EXPERIMENT

The ERIC Technical Steering Committee has recommended that the EAB experiment with a new approach to presenting information in the *ERIC Administrative Bulletin* which is one of sorting the information by category rather than by Clearinghouse. To not lose the advantage of finding information submitted by a particular Clearinghouse, this issue of the EAB is employing the suggested method along with a "Guide to Clearinghouse Input" in the Table of Contents. Headings will be somewhat flexible, depending on the content of each issue. A category entitled "Central ERIC Policy" will be used in response to Steering Committee recommendation, as the occasion arises.

It is anticipated that the Clearinghouses will have a preference as to which format is the most readable, the most useful. Please express your feelings to Elizabeth Pugh at the ERIC Facility, who will compile your responses and communicate them to Central ERIC.

...Elizabeth Pugh (ERIC Facility)

FOREIGN/INTERNATIONAL AGREEMENTS AND CORRESPONDENCE—CENTRAL FILE AT THE ERIC FACILITY FOR ALL ERIC COMPONENTS

The International Relations Committee (formerly Foreign Documents Committee of the Council of ERIC Directors (COED)) has recommended that the ERIC Facility establish a central file of agreements, arrangements, and special contacts with international agencies and foreign governments, for the purpose of coordinating ERIC's international activities. The specific language of their recommendation, contained in their report of April 25, 1980, is as follows:

"The Committee recommends that the Facility monitor (Jim Prevel) arrange for the establishment of 'country files' as described in the recommendation.

"A central file of agreements, arrangements, and special contracts with international agencies and foreign governments be maintained for the purpose of coordinating ERIC's international activities. Profiles of each country should be maintained. Profiles would contain notations of agreements, names and addresses of standing order customers, RIE and CIJE subscribers, institutions with known ERIC activity and names of key persons. All components of the ERIC system would contribute to the profiles."

During 1981, the ERIC Facility will undertake to set up and coordinate these files, and to establish meaningful records which will be use to the ERIC system.

Beginning immediately, all Clearinghouses should send one copy of all significant foreign correspondence to Elizabeth Pugh at the ERIC Facility (appropriately marked as to what it is). Routine acquisition solicitations are not wanted. The correspondence transmitted should be only that of potential interest to an ERIC staffer journeying to the country in question. The Facility will organize all such correspondence by country and organization and will make it available on demand to any members of the system with a legitimate interest.

...Ted Brandhorst (ERIC Facility)

PRIORITY DOCUMENTS—DON'T MIX THEM WITH REGULAR WEEKLY INPUT

Recently an incident occurred which reinforced the need to keep PRIORITY documents separate from other input. A Clearinghouse sent the Facility a group of PRIORITY documents for the very next available issue of RIE (February), but did not separate them from their regular weekly input (which was for March). Also, the corrections for the PRIORITY documents were intermixed with the other March document corrections instead of with the February corrections.

It took the Facility a lot of effort to rearrange the input and get the documents moved over to the February issue and pointed up *the need to keep PRIORITY documents independent from regular input*. If they are kept separate, the Facility has the needed flexibility in moving them into the appropriate issue. If they and their corrections are intermingled with the input of a particular issue it is a time-consuming task to unbundle them.

...Lee Schreiber (ERIC Facility)

NATIONAL TECHNICAL MEETING DATE AND PLACE SET

Please mark your calendar. The 1981 National Technical Meeting is scheduled to be held from 9:00 a.m., June 16 to noon June 18 in Washington, D.C. Arrangements are being made with the Holiday Inn Capitol, a new hotel located in the Mall area in Southwest D.C.

Planning for this meeting will occur during the next several months. We will be in contact with you regarding logistical arrangements and agenda items.

...Pat Coulter (Central ERIC)

ERIC BIBLIOGRAPHY (PUBLICATIONS ABOUT ERIC)—NEW CITATIONS SOLICITED

During 1981, the Facility will be updating and revising the bibliography of publications about ERIC. Since the first edition in 1978, the Facility has identified approximately 40 new citations for documents and journal articles describing various aspects of the ERIC system. We don't want to miss any significant item, however, and would be grateful for any and all contributions from the Clearinghouses.

If you know of a significant document or journal article dealing with ERIC that is not in the existing bibliography, please send the citation to the following address.

ERIC Bibliography Project

Attn: Dorothy Slawsky

...Ted Brandhorst (ERIC Facility)

REMINDERS FROM THE ERIC FACILITY

During the past month, two requests for information have been sent to the Clearinghouses (see Attachments 1 and 2). This is a reminder to return the questionnaires to the appropriate staff at the Facility.

- *ERIC Directory* (Liz Pugh), due January 20, 1981.
- *Information Analysis Products (Jan. 1980-December 1980)*, (Dorothy Slawsky), due January 30, 1981

On-going requests for information for inclusion in the EAB are:

- New IAP's
- Upcoming Conference Participation

...Elizabeth Pugh (ERIC Facility)

VOCABULARY STATUS REPORT

The January 1981 Vocabulary Status Report is displayed as Attachment 3. Members of the Vocabulary Review Group are asked to vote on the new recommendations and to return all responses to the Facility by February 17, 1981.

Voting results of the December 1980 report and final dispositions of the recommendations therein are expected to be ready for announcement in next month's report.

...Jim Houston (ERIC Facility)

ERIC CONTRACT RENEWALS

CONTRACT RENEWALS (ORYX, CG, EA, IR, SE, SO, 1M)

NIE has exercised the Government's option to renew contracts for the operation of the following ERIC components: Oryx Press, the ERIC Clearinghouses on (for): Counseling and Personnel Services; Educational Management; Information Resources; Science, Mathematics, and Environmental Education; Social Studies/Social Science Education; and Tests, Measurement, and Evaluation.

- Oryx Press

This contract has been renewed for the period January 1, 1981 to December 31, 1981. Oryx publishes CIJE, the *Thesaurus of ERIC Descriptors*, and Cumulations of both CIJE and RIE.

- ERIC Clearinghouse on Counseling and Personnel Services (CG)

This contract has been renewed for the fourth year of the present cycle from January 1, 1981 to December 31, 1981. There will be two Special Projects:

- (1) Coordination, development, and distribution of 50 Answer Vans for new SOCs. In addition, 40 extra Answer Vans will be produced for sale at \$35 each.
- (2) A Clearinghouse Management and Technical Skills Self Development Handbook. This handbook would be an organized approach to identifying the most effective management method and technical skills utilized by different Clearinghouses, all of which will be contacted regarding the subject before a synthesis is developed. The handbook could be used as a resource for staff development activities for both Directors and the technical staff.

A list of prospective major Clearinghouse publications follows. (The titles are tentative.)

- A Model for Adult Counseling.
- Career Management, Career Pathing, and Career Counseling for Organizations: Business, Government, and Education.
- Counseling Approaches for Enhancing Self-Esteem for Minorities.
- Broadening Career Options for School-Aged Women.
- Stress Management Counseling.
- Peer Counseling.
- Counseling for Sex Equity.
- Counseling the Bilingual Student.
- Providing Services for Unemployed Youth.

- ERIC Clearinghouse on Educational Management (EA)

This marks the fourth year of this contract (January 1, 1981 through December 31, 1981). The contract provides for customary ERIC input-output activities within the Clearinghouse's scope. The following IAP's will be developed by EA during the FY 1981 contract year.

- Curriculum Planning Models.
- How to Live with Mandated Advisory Councils.
- Planning for Declining Enrollments.
- Student Discipline.
- School Board/School Staff Relations.
- Classroom Grouping.
- Collective Bargaining.
- Three additional Research Action Brief papers, which are to be defined.

- ERIC Clearinghouse on Information Resources

This contract has been renewed for the period January 1, 1981 to December 31, 1981. During this contract year IR will undertake the following special projects:

- (1) Development of a section on the *Thesaurus* for inclusion in the *ERIC Instructional Module for Professional Education Programs in Library and Information Science*, and distribution of this new section to all institutions which have acquired the *Instructional Module* and the *Teacher Education Module*.
- (2) IR will work cooperatively with ERIC/SMEAC to undertake a study dealing with the feasibility of using microcomputers for information retrieval by practitioners in elementary and secondary schools.

Major Clearinghouse publications to be developed by IR in 1981 are:

- A Review of the Literature Related to the Design of Instructional Print Information.
 - A Survey of Instructional Development Models.
 - Automation in the School Library Media Center.
 - Case Studies in the Use of Microcomputers in Elementary and Secondary Schools
 - Information Resources Management in Education
 - Approaches to Teaching Viewing Skills
 - Library Instruction for Elementary and Secondary Learners.
- ERIC Clearinghouse for Science, Mathematics, and Environmental Education

This contract has been renewed for the period January 1, 1981 to December 31, 1981. During this contract year SE will conduct two special projects:

- (1) The marketing of selected products from all ERIC Contractors that wish to participate in the project. SE will utilize a strategy which has proven very successful for marketing its own Clearinghouse products, and will soon be contacting the Clearinghouses and EDRS to provide further details on this system project and solicit participation.
- (2) A feasibility study on using microcomputers for the retrieval of educational information from the ERIC data base by practitioners in elementary and secondary schools. IR and SE will be cooperating on the various phases of this project, which is expected to extend beyond 1981.

Major Clearinghouse publications proposed include:

- Reading on Calculators and Microcomputers for Mathematics Education.
- Research in Mathematics Education (K-College).
- Motivation, Anxiety, and Attitudes in Mathematics.

- Unpublished Instruments in Mathematics Education, Volume 2.
 - Using Research: A Key to Elementary School Mathematics-Update
 - Annual Review of Research in Science Education, 1980
 - Abstract of Presented Papers (NARST), 1981
 - Current Topics for Elementary School Science: Activities and Background Information.
 - Rethinking Secondary School Science Curriculum and Teacher Education.
 - Selected Papers, Seventh Annual Conference, National Association for Environmental Education, 1981.
 - Teaching Activities in Natural Resources Management.
 - A Review of Research in Environmental Education - 1970-80.
 - Environmental Education Activities for Global Education.
- ERIC Clearinghouse for Social Studies/Social Science Education (SO)

The SO contract with the Social Sciences Education Consortium has been renewed for the third time (January 1, 1981 - December 31, 1981). The contract provides funding for two special projects, in addition to customary ERIC activities.

- (1) Revision of the ERIC Filmstrip Kit, "ERIC: What It Is, How to Use It." The Clearinghouse will revise and update the filmstrip which was developed in 1973. One copy each will be provided ERIC Clearinghouses and the ERIC Facility. Sales and distribution will be handled by the National Audiovisual Aids Center.
- (2) Funding was provided for continuation of the Council of ERIC Directors pending transfer of the operational responsibility to the new chairman of COED.

The following IAP's will be developed by SO during the FY 1981 contract year:

- Data Books of Social Studies Materials and Resources.
 - Social Studies Education: Current Status and Future;
 - Advanced Social Studies Skills: Reinforcement Lessons for High School Students.
 - Global Issues in the Elementary Classroom.
 - Economics in the High School Curriculum.
 - Teaching Writing Skills in Elementary Social Studies.
 - Planning a Law-Related Education Program.
 - Tips for Teaching State and Local History and Government.
- ERIC Clearinghouse on Tests, Measurement, and Small Schools (TM)

This contract has been renewed for the period January 1, 1981 to December 31, 1981. This will be the fourth year of the current cycle. A list of planned major Clearinghouse publications follows. (The titles are tentative.) No special project was funded this year.

- Computerized Item Banks: State of the Art Reviews.
- Computerized Item Banks: A Sourcebook.
- Bibliography to Accompany the "Standards for Evaluation of Educational Programs, Projects and Materials.
- Evaluation of Basic Skills Remedial Program.

ERIC TECHNICAL STEERING COMMITTEE

ERIC TECHNICAL STEERING COMMITTEE RECOMMENDATIONS

Recommendations from the ERIC Technical Steering Committee are contained in Attachment 4. Although we are not able to respond favorably to all the recommendations, the large majority will be adopted. We find the process as well as the suggestions for improvement of the ERIC system a constructive and valuable one. We appreciate the time, effort, and concern that is represented by the recommendations.

...Bob Chesley (Central ERIC)

NETWORK NEWS

NEW ERIC MONITORS

As most ERIC Clearinghouses are aware, Frank Smardak and Kit Welsh are retiring in January and February, respectively. They have a combined ERIC experience of almost twenty-seven years and represent an impressive amount of experience and wisdom in data base management and operation. We at Central ERIC will miss their counsel and concern. It is clear that those of you who have worked with them share our feelings.

We are going to be able to hire only one new monitor to fill the two vacancies that will be created. I am pleased to announce that Judi Conrad from the ERIC Clearinghouse on Rural Education and Small Schools has been hired for that position. We are particularly pleased with the experience in Clearinghouse operations that she brings to the job. In addition, Kevin Arundel, presently a member of the Information Resources Division staff, and, incidentally, the monitor of the first ERIC Facility contract in 1966, will work part time with ERIC in order to take up some of the slack. All of the monitors also have responsibilities beyond their basic ERIC assignment.

ERIC monitoring responsibilities are as follows. Parentheses around a Clearinghouse code indicates a new assignment.

Arundel: (TM), (UD)
 Chase: (EA), EC*, (SO), SP
 Conrad: (CG), (CS), (HE), (PS), EC*
 Coulter: FL, (IR), JC, RC
 Prevel: EDRS, Facility, (CIJE)
 Thorne CE, SE, (GPO)

*planned for transfer in several months.

...Bob Chesley (Central ERIC)

LEVEL I AVAILABILITY FROM ERIC DOES NOT AFFECT PUBLISHER'S SALES:
 STATISTICS TO PROVE IT!

In response to those institutions or publishers who feel that citing EDRS as a source of their materials will cut into their profits, the following statistics are offered.

In 1974, the ERIC Clearinghouse on Languages and Linguistics published 200 copies of *Preparing and Using Self-Teaching Units for Foreign Languages* (17 pp.) EDRS was cited as the sole source (the Clearinghouse gave away the 200 copies). As of June 1980, EDRS had sold 371 paper copies and 10 microfiche copies of the publication. *Research with Cloze Procedure in Measuring the Proficiency of Non-Native Speakers of English* (1975, 32 pp.) sold 141 paper copies and 14 microfiche copies. *A Selected List of Instructional Materials for English as a Second Language: Secondary Level* (1975, 13 pp.): 166 paper copies and 6 microfiche.

In 1978 the Center for Applied Linguistics began publishing and marketing the Language in Education series. The publications were entered into the system at Level 1, and the EDRS price was lower than the price charged by the Center for Applied Linguistics.

EDRS SALES

9/78-6/80

<u>ED NUMBER</u>	<u>CAL SALES</u>		<u>EDRS SALES</u>	
	<u>8/79-9/80</u>		<u>Paper Copy</u>	<u>Microfiche</u>
153 503	740		0	1
153 504	476		1	0
153 505	403		1	1
153 506	639		1	3
154 620	745		5	3

Note that the time span covered by EDRS is almost double that of the sales period reported by CAL.

...Sophia A. Behrens (FL)

FIDO INPUT TO ERIC—PRELIMINARY RESULTS

In June 1980, SMERC began sending practitioner-developed materials for input to ERIC. The initial shipment for consideration for RIE was 186 documents. As of December 1, 1980, 131 documents have been accepted (a few of these were ready in ERIC) and 27 have been rejected. No word yet on the remaining 28. The guides were sent to ERIC without reproduction release forms so the Clearinghouses are probably waiting for these. We at SMERC knew that there was a need for this material. It is nice to see that the Clearinghouses agree. Thanks.

...Susan Long (SMERC)

SCHOOL BOARD JOURNAL REVIEWS EA MONOGRAPH

The ERIC Clearinghouse on Educational Management is one of twenty-six publishers whose books were accepted by *The American School Board Journal* for review in its annual December roundup of the "books you should have read this year—and still can."

The journal's editors, reviewers, and consultants searched through 2,000 titles to "come up with a list of 35 that merit your close attention." Among the chosen titles is the Clearinghouse's *The Politics of Educational Governance: An Overview*, A monograph written by Harvey J. Tucker and L. Harmon Zeigler. The authors use both theoretical and historical analyses to explore the tension between experts and laymen in school governance. According to the review, "the book's most interesting, insightful sections are those concerning the gradual shift toward 'depoliticization' of school governance, which occurred between 1835 and the present."

...Stuart Smith (EA)

ADVISORY BOARD ALERT BY ERIC/EECE

ERIC/EECE will be issuing a twice-yearly "Advisory Board Alert" during its 1981-82 contract year. Plans call for a two-sided, one-page bulletin which will keep Advisory Board members posted on plans for Clearinghouse projects, IAP's, and conferences to be attended.

...Dianne Rothenberg (PS)

ERIC/EECE USES TIME TO INCREASE SPACE

Since its move into the Education Building on the University of Illinois campus, ERIC/EECE has been trying to accommodate its operations to reduced floor space. In an attempt to increase effective space for users and staff, the Clearinghouse has begun scheduling the use of its one large open space on a time-sharing basis. On Monday, Wednesday, and Friday mornings and on Tuesday and Thursday afternoons, this space is open to the public as a user library. At other times it is closed to the public and used as a staff work area.

...Janet M. Bowermaster (PS)

NEW PRODUCTS/NEW IDEAS

NEW PRODUCTS, NEW PACKAGES FROM EDRS

With the beginning of 1981 comes the beginning of new products and services from EDRS. Two mailers will soon be distributed introducing the standing order customers to new and updated materials that complement the ERIC Data Base. One mailer is devoted to the IA: Mini-File and its application. The other consolidates the many one-sheet announcements of the past into a concise presentation of the entire cumulative and monthly products package. An order form will be attached to this pamphlet which offers over 25 items useful to the ERIC Collection, making ordering both easy and organized.

...Stephanie Baker (EDRS)

PRODUCT/SERVICE ROUNDTABLE—GOOD TECHNIQUE FOR CONFERENCES

At the recent American Vocational Association convention, the National Center for Research in Vocational Education held a product round table. Ten tables were set up, each with products in different areas, such as handicapped, career, entrepreneurship, and adult education. Attendees chose three areas and spent twenty minutes at each table. During that time, a National Center staff member explained the products and answered questions about them. This technique, which was very successfully rated by those in attendance, could be used to explain ERIC products and services.

...Judy Wagner (CE)

THE "RIPPLE EFFECT" AT WORK

In an effort to better utilize staff time in presenting "How to Use ERIC" orientations for graduate students at local colleges and universities, HE's been working with the Education Department at Howard University. Laura Ciarniello now trains the teaching assistants (TA's) who are responsible for the basic research course. They, in turn, educate their students. Laura maintains close, on-going contact with the TA's answering their questions and the questions raised by their students. In the future, HE will attempt to initiate this type of plan with other area colleges and universities.

...Laura Ciarniello (HE)

A MULTI-PURPOSE PRODUCT

If you are interested in a terrific acquisition tool, a public relations product to serve your clients and a Clearinghouse resource that answers the never-ending question, "Who's publishing what where," HE has a user services product for you.

The Clearinghouse produces a *Quarterly Report of Higher Education Association Publications*. Four times a year, a survey is sent to 35 higher education associations asking for a list of their recently and about-to-be published materials. From the responses, the titles are indexed under broad subject

Topics. The material is reproduced and distributed to a mailing list of 200. The Clearinghouse has had great success with this project for over five years. It helps us keep tabs on issues the associations are addressing, provides a quick check list for acquisitioning and provides a valuable service to the 200 individuals who receive the quarterly report. Contact Laura Ciarniello if you would like specific details.

...Laura Ciarniello (HE)

COURTESY CARDS FOR AUTHORS

To alleviate frequent calls by authors inquiring about document submissions, the Clearinghouse on Teacher Education uses a 3"x 5" courtesy card to inform each author of their document's SP number and the issue of RIE in which the abstract will appear. We believe that this practice enhances our relationship with authors, and thus it is an important component of our acquisitions program.

...Dean Schwanke (SP)

ERIC STAFF ANNOUNCEMENTS

CS STAFF ANNOUNCEMENTS

Holly O'Donnell, Coordinator of User Services at ERIC/RCS, has been appointed an ex-officio member to the NCTE Commission on Alternative Careers for English Majors and English Professions for a three-year term.

Carol Osterbur was married on December 20, 1980. Her new name is Carol Coleman.

Hilary Holbrook has joined the ERIC/RCS staff as a Research Assistant, full-time.

...Jane McClellan (CS)

JONATHAN FIFE NAMED TO EDITORIAL POSITIONS

Jonathan Fife has been named a Consulting Editor for *Change Magazine* and Managing Editor of the *Review of Higher Education*.

...Laura Ciarniello (HE)

DIRECTOR OF FL RESIGNS

Peter Eddy, Director of the ERIC Clearinghouse on Languages and Linguistics since 1976, resigned as of January 16, 1981. He has accepted a position as head of a department in the CIA language school. We will miss his ability to

be calm amidst the storms, his sense of humor, and his expertise in ERIC, foreign language education, and bicycles.

...Mary Niebuhr (FL)

We at CERIC joint the FL staff in wishing Peter all the best in his new position. Peter's leadership talent, both at his Clearinghouse and in the several systemwide positions he has held, will be missed. Thanks for a job well done!

...Pat Coulter (Central ERIC)

STAFF CHANGES AT SP

Robert Gillette, Senior Information Analyst for the Clearinghouse on Teacher Education, has submitted his resignation and accepted another position in systems development with Conserva, Inc. We wish him the best in his new position.

Kathy Julius, formerly Assistant Information Analyst, has been promoted to the position of Senior Information Analyst, effective December 31, 1980.

...Dean Schwanke (SP)

LEE SCHREIBER TO RETIRE

On January 23, 1981 Lee Schreiber will edit her last RIE resume and will take an early retirement after 25 years with ORI, Inc., the last 11 of which have been with the ERIC Facility.

In the ten year period 1970-1980, RIE has had only two senior editors. Orabelle Nuthall and Lee Schreiber. Lee has been the senior editor since Orabelle left in 1978 and has guided the publication safely through innumerable deadlines and difficulties.

We have persuaded Lee to make herself available to us on occasion so that goodbyes sent after the 23rd will still get to her.

Both Lee and Kit are leaving in the same time frame and RIE staff throughout ERIC are going to miss them both tremendously.

...Ted Brandhorst (ERIC Facility)

MEETINGS, CONFERENCES

RC - PRESENTATIONS AND WORKSHOPS

Dr. Everett Edington, Director of ERIC/CRESS, gave four addresses at sessions of the Southwest Educational Development Labs' workshop entitled, "R&D Speaks: Rural and Small Schools," held in Austin, Texas.

Amilita Hill, Information Specialist, ERIC/CRESS, gave an ERIC presentation and conducted computer searching demonstrations during a one-day sharing session at the National Nutrition Education and Training (NET) Conference, Dallas, Texas, December 1-4, 1980. The NET Program is a part of the USDA's Food and Nutrition Services Division. The participants of this meeting passes a resolution to enter all materials developed by the NET Program into the ERIC data base.

Manuela Quezada-Aragon, ERIC/CRESS Information Specialist for Mexican American and Migrant Education, had a booth throughout the entire meeting of the Association for Mexican American Educators, Inc., San Diego, California, November 1980.

One Workshop became two plus an ERIC display when Elaine Roanhorse Benally, ERIC/CRESS Information Specialist for American Indian Education, attended the National Indian Education Conference in Dallas, Texas, December 1980. In addition to her scheduled workshop, she also provided one for the Title IV Indian Education Directors.

Two ERIC presentations were made by Judi Conrad, ERIC/CRESS Information Specialist for Rural, Small School, and Outdoor Education, at the "Workshop on Small Schools," Texas Tech University, Lubbock, Texas, December 1980.

...Amelita Hill (RC)

MIDWEST REGIONAL EXCHANGE ADVISORY BOARD MEETING

Mima Spencer represented ERIC at a recent meeting of the Midwest Regional Exchange Advisory Board in St. Louis. Two items of interest from this meeting were:

- (1) an earlier decision confirmed and plans are being made for a second regional education dissemination forum next fall under the chairmanship of Peggy Mancer of Columbus, Ohio, and
- (2) a task force was created to investigate the feasibility of computer conferencing for the Exchange which represents a 10-state region. The conference would focus on an exchange of educational information. Mima Spencer will chair the task force, assisted by Linda Baskin of ERIC/EECE and other members of the Advisory Board.

...Janet Bowermaster (FS)

CONFERENCE PRESENTATION

Lynn Barnett presented a 1½ hour workshop on information retrieval for college presidents at the Association of American Colleges Conference in Denver, Colorado, January 7-10, 1981. In addition, she staffed a display and demonstrated computer searching during the three-day conference.

...Laura Ciarniello (HE)

VISITORS HOSTED BY ERIC

RUDOLF A. MAYER VISITS CS

On December 19, 1980, Rudolf A. Mayer of the Association of Information Service in Education, in West Germany (see Attachment 5) visited the CS Clearinghouse and talked at length with Jane McClellan and Holly O'Donnell.

...Jane McClellan (CS)

ERIC TECHNICAL STEERING COMMITTEE RECOMMENDATIONS AND CENTRAL ERIC RESPONSES

RECOMMENDATION:

That a letter be sent to SOC's asking for feedback/comments/suggestions on the new Thesaurus.

RESPONSE:

Such a letter has been developed by Lynn Barnett and reviewed by Central ERIC. The Interchange mailing list will be used for distribution. The letter will suggest that a log be kept (for a month) to record reactions and problems encountered in using the new Thesaurus. Users will be instructed to forward this information to Lynn. These responses will be discussed with the Vocabulary Review Group at the spring National Technical Meeting.

RECOMMENDATION:

That the Vocabulary Review Group ask Clearinghouse staff to generate lists of formerly precoordinated terms that should be considered for reinstatement. These terms would be reviewed by the Vocabulary Review Group and appropriate action taken.

RESPONSE:

The Chair of the Vocabulary Review Group will ask the Clearinghouses to identify and make note of any problems encountered with formerly precoordinated terms which were separated as a result of VIP. This information will be collected by Lynn and discussed by the Vocabulary Review Group at the spring National Technical Meeting.

RECOMMENDATION:

That "Ready Reference" Number 2 be developed by the Facility outlining basic search steps. Lynn Barnett has volunteered to provide draft copy.

RESPONSE:

It will be developed. Lynn Smarte is working on the ERIC online search project and will be consulted by Lynn Barnett for input.

RECOMMENDATION:

That item 3b (pp. VII-1) in the ERIC Processing Manual be deleted because it is a misleading statement.

RESPONSE:

The item will be rewritten to clarify the issue.

RECOMMENDATION:

That if a detailed chart and/or list of government agencies is available (particularly Department of Education) that it be circulated to Clearinghouses for addition to the Source Code Directory.

RESPONSE:

Because of constant reorganizations in the Government, such organizational charts pose an accuracy problem. Each Clearinghouse should have a copy of the U.S. Government Manual (GPO #022-003-00982-5) containing all Government agencies and their organizational structures.

RECOMMENDATION:

That the ERIC Processing Manual's section on "Cataloging" contain instructions that every ERIC IAP be assigned the PUBTYPE Code 071, and in addition, any other code when appropriate, such as 170.

RESPONSE:

This instruction will be included in the new ERIC Processing Manual.

RECOMMENDATION:

That ERIC Processing Manual guidelines (VII-35) contain a sentence stating that the Institutional Source of a document is not to be used as an Identifier unless it is also the subject of the document.

RESPONSE:

This instruction will be in both Section VII, "Indexing" Section, and Section V, "Cataloging" Section, of the ERIC Processing Manual.

RECOMMENDATION:

That Interchange, as the system's primary contact with SOC's and other ERIC users, be evaluated.

It is important for this publication to become recognized as the official ERIC communication. It needs to be published on a regular basis (three or four times a year) and Clearinghouses should be encouraged to submit information they would like to have included.

Currently Interchange is published too seldom and too sporadically. When it is published it contains so much material it is overwhelming to even the most avid ERIC user.

RESPONSE:

The last issue of Interchange was late and larger than usual. Nonetheless, the general criticisms are still valid. Interchange will be published quarterly in March, June, September, and December. Readers will be encouraged to make feedback on its contents. Clearinghouses are also encouraged to make specific suggestions for improvement.

RECOMMENDATION:

That the system engage in a project to procure the names and position titles of various library staff at SOC locations. Specifically, the list should contain information about who is responsible for Microfiche Collections, Acquisitions, RIE, CIJE, and Computer Searching.

RESPONSE:

In light of library personnel turnover and subsequent time and effort required to maintain a list with several entries per subscriber, we will not engage in the recommended systemwide project. Individual Clearinghouses may certainly maintain such a list in their respective states and test its utility as well as the effort involved. We do ask all Clearinghouses to maintain a current list of primary contacts for their collections.

RECOMMENDATION:

That the ERIC Administrative Bulletin (EAB) contain a section specifically labelled POLICY.

This recommendation is in response to the expressed concern that when a statement appears in the EAB, it is sometimes unclear as to whether it is actual or contemplated policy. Having a section specifically labelled POLICY would leave no question in anyone's mind.

RESPONSE:

See next recommendation.

RECOMMENDATION:

That the EAB be formatted with the following monthly sections:

POLICY
ACTION ITEMS
REPORTS FROM: CERIC
FACILITY
FDRS
ORYX
STEERING COMMITTEE
ON-LINE USERS GROUPS
VOCABULARY REVIEW GROUP

CLEARINGHOUSE INPUT: PROCESSING
 ACQUISITIONS/SELECTION
 COMPUTER SEARCHING
 USER SERVICES
 HONORS
 MISCELLANEOUS (public relations, equipment,
 training, staff development, all else)

CONTAINED AS ATTACHMENTS: Upcoming Meetings and Conferences
 Clearinghouse Staff and Other Changes
 IAP's

RESPONSE:

The two recommendations above deal with the format of the ERIC Administrative Bulletin. We will experiment with formats that will attempt to meet the needs expressed. Please give feedback to Liz Pugh at the ERIC Facility.

RECOMMENDATION:

That the total number of postings for each Identifier be included in the Identifier Authority List.

This recommendation is made assuming that there is no option for a further breakdown of postings due to cost. If cost weren't a factor, the Steering Committee would suggest postings be broken down by major/minor descriptors.

RESPONSE:

This feature will be a part of the next Identifier Authority List scheduled in June of 1981.

RECOMMENDATION:

That the separate sections of the ERIC Processing Manual be put into RIE individually.

RESPONSE:

The ERIC Processing Manual will be put into RIE as a single entry. However, individual sections will be available from the ERIC Facility, in paper copy, at \$3.75 per section. Announcement of availability of individual sections will be made in the document resume.

RECOMMENDATION:

That PUBTYPE Codes be included in the Resume section (Main Entry Section) of CIJE Main Entry print issues. Although they are on the computer tapes and can be searched online, they are, for all intents and purposes, invisible to the average user. Having them visible would provide more identifying information to users.

RESPONSE:

It has been decided after consultation with Oryx Press not to print PUBTYPE codes in the monthly issue of CIJE. It is estimated that to do so would add approximately 16 pages per issue to the journal. Oryx has determined that this would require a raise in the subscription price. CERIC does not find this acceptable, at present, and therefore is not authorizing the printing of PUBTYPE codes.

Short description
of the
"Dokumentationsring Paedagogik" DOPAED
(Association of Information Services in Education)

DOPAED was created in 1965. The Association has 22 members. Twenty member institutions are located in West Germany, one in Austria and one in Switzerland.

The DOPAED-Secretariat has the following address:

Leitstelle des Dokumentationsrings Paedagogik
Deutsches Jugendinstitut
Muenchen - 40
Saarstrasse 7
West Germany
Tel.: (089) 38183-242

Coverage: education science, pre-school education, school pedagogics, social pedagogics, vocational training, adult education, research in education, didactics in various school disciplines, AV-media for schools and other constituencies, etc.

DOPAED-members publish 41 periodicals as well as reports, statistics, information analysis products, documentations on curricula, didactic material, etc.

The publication of "Bibliographie Paedagogik" is a common operation of all DOPAED-members.

DOPAED-members answer requests and provide referral services.

Some of the DOPAED-members have computerized information systems. (coverage: 500 periodicals plus books/70.000 titles annually).

POLICY STATEMENT

FORMULATING AN ERIC POLICY ON INFORMATION ANALYSIS PRODUCTS (IAPs)

The need for an ERIC policy on information analysis products continually arises as we try to explain to others what these distinctive products are that have become associated with the ERIC name over the years. As a first step in formulating such a policy, CERIC drafted a policy statement on IAPs (see Attachment 1), which was sent in January to the sixteen ERIC Clearinghouse Directors for review and comment.

A number of Directors and their staffs provided thoughtful comments on the statement; and as a next step in establishing policy, CERIC responded to some of their expressed concerns in Attachment 2. The responses in this attachment are likely to become clarifying adjuncts to the final policy statement. Through this "dialogue" process, we seem to be moving together toward a resolution of this issue of mutual concern. We would welcome any further comments you have before we finalize the statement.

...Mildred Thorne and Bob Chesley (CERIC)

ACTION ITEMS

VOCABULARY STATUS REPORT

The February 1981 *Vocabulary Status Report* is displayed as Attachment 3. The report is in two parts:

- 1) Pages 1-7 are "feedback pages" for the December 1980 report. Votes of the Vocabulary Review Group (VRG) are tallied, and final dispositions are indicated. Remarks ending with the designator "(VRG)" do not necessarily indicate VRG consensus. They are merely summary statements of the VRG Chair and the Facility Lexicographer based on their analysis of the VRG voting.

Responses on the December 1980 report were received from 14 VRG representatives. "No opinion" votes were not tallied. Respondents were:

Clearinghouses

CE Janet Thorngate
CG Carol Jaslow
CS Jane McClellan
EA Ian Templeton
FL Mary Niebuhr
HE Lynn Barnett
JC Anita Colby
SO Sydney Meredith

AA (Facility)

Jim Houston
SMERC (for Oryx)

Sara Lake

User Representatives

Charles Brown Lynn Smarte
Jo Ann Davison Suzanne Wise

So-called "feedback pages" may be returned to the Facility at the individual reviewer's option. Any gripes or other opinions on "final" dispositions should be communicated to the Facility Lexicographer. Without such further communication, however, it is unnecessary to return these "feedback pages."

- 2) Pages 8-11 contain new recommendations received by the Facility in the January 10 - February 10 time frame. VRG representatives are asked to vote on these recommendations and to return your responses to the Facility by March 17.

Voting results of the January 1981 report (entry numbers 1022-1031) are currently being gathered and will be announced in next month's report.

Many thanks to the VRG members who responded to the first report! Your participation is making the new program work.

A request and a couple of reminders follow:

- Second Copy of Responses Requested. Clearinghouse VRG representatives are requested to make one copy of all monthly Vocabulary Status Report responses and to forward this copy with your originals to the Facility. The copy is needed for the Facility's lexicographic archives. The originals ultimately go to the VRG Chair (HE Clearinghouse) for final analysis.
- Full Clearinghouse Participation Expected. Central ERIC expects each Clearinghouse to review and comment on the monthly Vocabulary Status Reports. As noted above, not all Clearinghouses are participating in this new program. Please make sure that your responses are returned to the Facility by the requested date.
- Do You Need Original Justification? One VRG member has expressed some reservation concerning the limited information contained in the Vocabulary Status Reports on which to base decisions. The reports necessarily represent summaries of new Thesaurus recommendations. It is recognized that VRG members may occasionally need or want the complete justification information contained in the original Thesaurus input forms. When this is the case, a VRG member needs only to call the Facility Lexicographer. All justification information available will then be read over the phone or, if necessary, copied and forwarded to the caller. Such a procedure will undoubtedly delay dispositions of some recommendations, but this is perfectly OK. Delays on specific recommendations can always be arranged if particular VRG members want them.

...Lynn Barnett, VRG Chair (HE)
...Pat Coulter (CERIC)
...Jim Houston (ERIC Facility)

INTERCHANGE

During 1981, *Interchange* is to become a regularly scheduled quarterly publication. It is also to include contributions from the Clearinghouses (when they wish to make contact with all the SOCs) and contributions from the users

(who will be invited in the next issue to contribute). In addition, following a Steering Committee recommendation, each issue of *Interchange* will carry an evaluation form, seeking feedback from its readers as to which news items they found most useful and how they tend to use the information contained in *Interchange*.

The next issue is scheduled for March 31. The Facility's deadline for input to that issue will be the end of February. All Clearinghouses are invited to submit material suitable for the broad user distribution *Interchange* receives (about 1,500 addresses).

...Ted Brandhorst (ERIC Facility)

SCOPE OVERLAP: A REMINDER

As you know, Project Monitors visit the Facility once a month to look at the documents sent in by their respective Clearinghouses. Documents are examined for quality, overlap, and other factors. Since some Clearinghouses have greater difficulty than others in finding documents, the issue of scope overlap is a sensitive one. Please remember, therefore, that if your Clearinghouse, for some justifiable reason, wishes to input a document that is also within the scope of another Clearinghouse, it is your responsibility to notify the appropriate Clearinghouse before input. (See *ERIC Processing Manual*, Section III: Selection, p. 3.)

...Judi Conrad (CERIC)

ERIC TO PROVIDE SEARCHES TO AUTHORS OF THE *ENCYCLOPEDIA OF EDUCATIONAL RESEARCH*

Central ERIC, through the NIE Directors' reserve fund, has established a special project at the ERIC Clearinghouse on Handicapped and Gifted Children (EC) which is designed to improve the visibility of ERIC documents in the *Encyclopedia of Educational Research*. Specifically, the ERIC system has agreed to provide searches to the authors of articles in the *Encyclopedia*. Authors will send brief descriptions of their search question to EC, which will distribute the requests to appropriate Clearinghouses. Individual Clearinghouses will be asked to:

- call the authors and negotiate the search request;
- conduct and screen the search;
- send it to the requester; and
- invoice EC.

Lynn Smarte at EC will be sending you more information on the procedures which will be used.

The cooperation between ERIC and the authors of the *Encyclopedia* is highly valued by Central ERIC. We hope to provide a useful service and to increase the visibility of ERIC in the research community. The editors of the *Encyclopedia* have agreed to include in the publication LD numbers for all ERIC documents used.

When you receive search requests, which result from this special project, please respond as quickly as possible to the author, since the papers are in the process of being written and the authors will need to receive the information quickly. Also, please exercise care in conducting the negotiations and the

searches. We hope to provide *Encyclopedia* authors with the highest quality searches possible.

We appreciate your cooperation.

...Cheryl Chase (Central ERIC)

MAILING OF EAB ARTICLES

A number of Clearinghouses have been mailing articles for the *ERIC Administrative Bulletin* as late as the 7th, 8th, or 9th of the month. These have not been arriving in time to meet the deadline of the 10th.

Please allow a week for mail delivery, which it sometimes takes, and send articles to the Clearinghouse monitor, not directly to the Facility.

...Bob Chesley (Central ERIC)

ERIC/EECE GETS NEW ADDRESS (MYSTERIOUSLY)

One dark night in January, the boundary lines between Champaign and Urbana appear to have crept unseen past the education building on the University of Illinois campus. The result is that ERIC/EECE has a new street address:

ERIC Clearinghouse on Elementary and
Early Childhood Education
College of Education
University of Illinois
131 South Sixth Street
Champaign, Illinois 61820

Please note that the last two lines of the address should always be written in that sequence for proper delivery by the post office (which is now using mechanical equipment for sorting). Please take appropriate action to change the Clearinghouse's address on all system and Clearinghouse brochures and publications.

...Janet Bowermaster (PS)

FAREWELLS

FAREWELLS FROM KIT AND FRANK

I would like to take this opportunity the EAB offers to thank everyone in the ERIC family for the warmly affectionate letters you have sent me as I retire. Jim Prevel gathered and bound them all in a handsome book with my name on it, which was presented at a delightful party given me by Oryx Press last week. Phyllis' gift to me was an exquisite glass sculpture of a graceful horned beast—that will always be my Oryx. I wish everyone could have been there, but you were represented by the wonderful letters.

You should also know that the Central ERIC staff gave Frank and me a dinner party at Chuck Hoover's when Frank retired. They gave me a lovely silver ERIC logo charm to wear on a necklace, which I do. Bob wrote a splendid poem (see Attachment 4) and a nostalgic version of "Wedding Bells are Breaking Up That Old Gang of Mine" (see Attachment 5) was sung to us dolefully. Also at that time Frank was presented with the great book of letters you all sent him and a PLAQUE from his CERIC colleagues.

These occasions leave us with special appreciation of the unique quality of the people and program we have worked with and for these many years. Our hearts are deeply touched by your affection. We're grateful.

...Kit Welsh and Frank Smardak (Central ERIC)

CONTRACT RENEWALS

NEW ERIC FACILITY "SYSTEM IMPROVEMENT PROJECTS"

A number of new "System Improvement Projects" (SIPs) have recently (end of January) been added to the ERIC Facility scope of work. Additional information will be in future EAB's as each starts up. Those affecting Clearinghouse activities are as follows:

1. Acquisitions Brochure for Foreign Documents

To be distributed to Clearinghouses to ensure a degree of consistency in foreign acquisitions procedures throughout the system and to assist in the acquisition of high quality foreign materials.

2. Centralized Document Preparation for Filming

In the past, some documents requiring additional preparation have been returned to the Clearinghouses or go into RIE unimproved. A very small effort will be undertaken at the Facility to correct some documents before filming. Each Clearinghouse will be notified of any additional preparation work their documents require. This SIP is not intended to relieve the Clearinghouses of their document preparation responsibility.

3. ERIC Abstractor/Indexer Workbook Republication (currently out of print)

Republication to reflect changes made since its original publication. The principal changes involve recognition of the validity of mixed informative/indicative abstracts and the increased pressure to provide annotations for CIJE articles.

4. ERIC "Ready Reference #2"

Basic ERIC facts and statistics (or other topic, to be decided).

5. Foreign/International Agreements and Correspondence Central File

The ERIC Facility will set up and maintain a central file of agreements, arrangements, and special contacts with international agencies and foreign governments to help coordinate ERIC's international activities.

6. Language Bank

A composite list of foreign language skills possessed by ERIC system members. This will be part of the next *ERIC Directory*.

7. Minicomputer Feasibility Study

To investigate the advantages that might be gained and the costs that would be involved in placing a minicomputer at the Facility to perform tasks such as:

- Online direct data entry and editing of RIE and CIJE;
- Duplicate checking;
- Computer conferencing and electronic mail.

8. Descriptive Cataloging Improvements

This SIP consists of the following:

- Clearinghouse Cataloging Practices Report;
- Review of Cataloging Fundamentals and Problems at Regional and National Technical Meetings;
- Development of a Cataloging Training Manual;
- Systematic Training (1 day sessions at five different Clearinghouses, or at the Facility, when appropriate).

9. Study of Current Availability of Level 3 Documents

A random sample of Level 3 documents entered in 1968, 1973, and 1978 to determine the current availability of such documents.

10. News Release

A press release system will be established to highlight major occurrences within the ERIC system. A mailing/distribution list is being developed to include education editors of newspapers, newsletters, journal editors, public affairs offices of state departments of education, etc.

11. Post VIP Lexicographic Improvements (or "Son/Daughter of VIP")

The following tasks will be undertaken:

- Posting data from RIE and CIJE inverted files will be merged into the authority lists and printed.
- Improvements in index term validation programs, e.g., any synonyms (UF's) appearing in RIE indexing will automatically be converted to the correct Descriptor.

- Conversion of *Thesaurus* to New Descriptor Groups.
- Updates of Identifier Category Lists.
- Cross References in IAL.

12. Computer Conferencing/Electronic Mail Pilot Program

At long last we're moving on this. More details will follow in later EAB's.

13. EDRS Order Data Analysis

To generate some basic statistical data concerning documents ordered on demand from EDRS.

14. Guide to Searchers of the ERIC Data Base

To provide comprehensive information about the properties of the ERIC data base, online vendor search systems, etc.

15. ERIC Bibliography

Revised with 1979-1980 citations.

16. Level 3 Accessions List

A cumulative list of Level 3 documents to provide users with an effective tool for identifying Level 3 documents.

...Jim Prevel (Central ERIC)

NETWORK NEWS

INCONSISTENCIES BETWEEN *THESAURUS* AND FINAL TAPE FILES

The November 1980 EAB included a list of major *Thesaurus* changes implemented after the Oryx *Thesaurus* was published. Searchers outside the ERIC system will have access to this list in the January issues of RIE and CIJE. Some of the changes have serious implications for searching. For example, The Oryx *Thesaurus* lists **READING LEVEL** as a UF to **READING ACHIEVEMENT**, which tells the searcher that old **READING LEVEL** postings have been transferred to **READING ACHIEVEMENT**. What the searcher does not know is that **READING LEVEL** was later made an invalid descriptor, and the postings were not transferred. Similarly, we received an ERIC Online Hotline call recently from a searcher who couldn't understand why **TEACHING (OCCUPATION)** yielded approximately 100 hits rather than over 1,000 as the *Thesaurus*

indicates. We discovered that the postings from the old term TEACHING were never transferred because this was later declared an invalid descriptor.

We suggest that those who intend to use the Oryx *Thesaurus* for developing search strategies insert changes where they belong throughout, or at least put a red mark next to all terms that have been changed as a signal to consult the list of changes. (We plan to communicate this to searchers outside the ERIC system through *Interchange*, vendor newsletters, etc.)

...Lynn Smarte (EC)

PROBLEM DESCRIPTORS, INSUFFICIENT "USE" REFERENCES, AND OTHER VOCABULARY PROBLEMS

It has become evident that some deleted Descriptors have not been transferred satisfactorily, or that insufficient "use" references have been given. For example, many people have noticed that the instruction, "COLLEGE DEANS Use DEANS and HIGHER EDUCATION" is misleading since the narrower terms ACADEMIC DEANS or DEANS OF STUDENTS might be more appropriate. A solution might be to add a scope note referring the user or indexer to the more specific terms.

Are there similar problems scattered through the *Thesaurus*? Please notify Lynn Barnett (HE) of the Vocabulary Review Group. List the problem Descriptors and possible solutions. An on-going list will be kept for eventual resolution by the VRG.

...Marilyn Shorr (HE)

AVAILABILITY OF PRIOR YEAR RIE CUMULATIONS

Many users have asked about the current availability of back cumulations of *Resources in Education* (RIE). RIE goes out-of-print very rapidly at the Government Printing Office (GPO) and obtaining older issues can be a genuine problem.

Macmillan Information still has available some of the annual cumulations they prepared during the period 1968-1978. Attachment 6 is a copy of the Macmillan price list for its remaining RIE annual cumulations.

At the same time, we would like to alert users to the plans of Oryx Press to publish (via COM) a microfiche cumulation of RIE (both resumes and indexes) covering the period 1966-1980. It is projected that this product will be available by mid-1981.

...Ted Brandhorst (ERIC Facility)

PROBLEMS WITH ERIC ON BRS

As of this writing, there are numerous problems with the ERIC Database Guide distributed with the December 1980 issue of the *BRS Bulletin*. The list below includes only the major errors. If you search BRS, please make note of these problems for yourself, and when you give workshops or have other contacts with BRS/ERIC searchers, please warn them.

- The LV paragraph is completely misinterpreted as a representation of "age or educational level" when it in fact represents level of availability from EDRS. Searchers are told that the LV codes (1, 2, or 3) can be used to restrict a search to elementary, secondary or post-secondary levels. The last two sample searches in the database guide include erroneous use of the LV paragraph.
- The address given for EDRS is actually the EC Clearinghouse address.
- The Oryx address is their old one.
- Publication Type codes are incorrectly described as applying to "RIE only" when they in fact are also assigned to CIJE. This paragraph is also said to contain Descriptors, which is no longer true.
- Appendix 4, EDRS Price Codes, is now out of date.

The ERIC Facility has transmitted to BRS a detailed list of the corrections necessary in the BRS/ERIC documentation. It is our understanding that BRS intends to reprint a corrected edition.

...Lynn Smarte (EC)

ERIC ONLINE PROJECT: PROGRESS REPORT

The ERIC Online Project is alive and well and doing exactly what it was supposed to do! To date we have received 38 requests from searchers with the following needs:

- 12 interested in hosting workshops on searching ERIC;
- 3 wanting clarifications of the project's purpose;
- 23 with specific search strategy questions.

We also put the ERIC test file through its paces before it was officially reloaded on DIALOG and found some problems which were reported to Lockheed and the Facility. If you see announcements of the project in journals or newsletters, please let us know. Also remember to call us with search tidbits or suspicions of problems we should check on. Since we frequently have reason to refer search strategy questions or requests for workshops to other Clearinghouses, please fill out the ERIC Clearinghouse Computer Searching Information form which appears as Attachment 7 to this EAB and return it to Sharon Hudack at ERIC/EC.

...Lynn Smarte (EC)

ASCD REPRINTS EA PRODUCT ON STAFF DEVELOPMENT

An article originally prepared and disseminated as an EA information analysis product was so admired by the Association for Supervision and Curriculum Development (ASCD) that it was printed verbatim in the November issue of *Educational Leadership*, the ASCD's monthly publication.

The article, originally entitled "Staff Development" in EA's *Research Action Brief* series and retitled "Synthesis of Research on Staff Development" by the ASCD, reviewed research on effective staff development programs and made suggestions about how administrators can institute a successful program.

The article was the second in a new series of articles in *Educational Leadership* "interpreting research on topics of interest." According to the journal's editor, Ronald Brandt, the series is a response to readers' requests for "authoritative articles that synthesize important research findings, generalize the results, and suggest implications for practice." Providing such information has long been the goal of our *Research Action Brief* series and we're glad to know that an organization like ASCD feels we are succeeding. The article was researched and written by Jo Ann Mazzarella.

ASCD has requested that the Clearinghouse prepare two manuscripts during 1981 expressly for publication in *Educational Leadership*.

...Stuart Smith (EA)

COOPERATIVE ARRANGEMENT ESTABLISHED BETWEEN HE AND THE INSTITUTE ON DESEGREGATION

The ERIC Clearinghouse on Higher Education and the Institute on Desegregation at North Carolina Central University have developed a cooperative arrangement to make available through ERIC papers and reports concerned with the general problems of minority students in higher education and the particular problems of desegregation in historically black colleges. The institute will identify sources of documents. HE and UD will share responsibility for acquiring and processing reports related to their particular scope areas. An annual bibliography on the materials identified will be published under the names of the Institute and ERIC.

...Lynn Barnett (HE)

ERIC/CAPS REACHES OUT TO LOCAL UNIVERSITY FACULTY

As part of an action plan to make local University educators aware of what ERIC can do and how ERIC can help them, ERIC/CAPS recently sent each faculty member in the School of Education a letter inviting them to come see the Clearinghouse and use its facilities.

Attached to the letter was a Xerox copy of a mini-search on "Effective College-Level Teaching Techniques." The response was excellent, both from individual professors and from those who brought their classes. The same type of thing has since been done for the School of Public Health, the School of Social Work, and the Department of Psychology. For each, ERIC/CAPS identified courses from the fall schedule, located appropriate Descriptors from the *Thesaurus*, and retrieved ten documents from the most recent issues of RIE. This effort has elicited very favorable comments from respondents.

...Carol Mills (CG)

ADVISORY BOARD ALERT

The ERIC Clearinghouse on Elementary and Early Childhood Education will be issuing a twice-yearly "Advisory Board Alert" during its 1981-1982 contract year. Plans call for a two-sided, one-page bulletin which will keep Advisory Board members posted on plans for Clearinghouse projects, IAPs, and conferences to be attended. It will also provide space for members to suggest acquisition contacts and provide other input for Clearinghouse use. The "Alert" will be issued in early spring and again in the fall in time for responses to be received for proposal planning.

...Dianne Rothenberg (PS)

SE PRODUCT IDENTIFIED AS "EXEMPLARY" FOR TEACHERS

Central ERIC has been informed that an SE publication, *Understanding the Realities of Problem Solving in Elementary School*, has been identified as one of the best in the field of mathematics education by a panel of national experts. The book is being included in a Mathematics Portfolio of exemplary products, collected by the R&D Interpretation Service (part of the NIE-sponsored R&D Exchange) and sent to the seven Regional Exchanges for responding to teachers' information requests.

Dr. Mark J. Driscoll, Research Associate for Mathematics at CEMREL, a regional educational laboratory, used the book last summer with teachers in a Webster College course in the MAT program. He said that the teachers' response to the book, as reflected in class discussions, was enthusiastic.

Kudos to SE!

...Mildred Thorne (Central ERIC)

SUMMARY RIE SCHEDULE

Attachment 8 is a one-page summary RIE schedule designed for easy reference and convenient consultation, courtesy of the Facility editors.

...Christine Taylor (ERIC Facility)

JC ARTICLE TO BE PUBLISHED IN THE EDUCATION DIGEST

"An ERIC Review: Why is Transfer Education Declining?" published in *Community College Review* (Fall 1980) is being condensed in *The Education Digest*. The article provides information on part-time and older students at two-year colleges.

...Gayle Byock (JC)

"WHY STUDENTS DROP OUT" DISTRIBUTED BY JC

Recently the ERIC Clearinghouse for Junior Colleges began distribution of "Why Students Drop Out" by Jack Friedlander. Dr. Friedlander discussed drop-outs from both campuses and classes.

...Gayle Byock (JC)

SUMMARIZING RESEARCH

Coordinators of IAP programs may be especially interested in a recent article by Harold Ladas of Hunter College. Applying a case study method to the research on note taking from lectures, the review uses "a preponderance of evidence" as a standard for drawing conclusions, rather than requiring that findings be consistently statistically significant. The citation is "Summarizing Research: A Case Study," *Review of Educational Research*; v50 n4 p597-624, Winter 1980.

...Barbara Wildemuth (TM)

NEED TO BORROW EXTRA COPIES OF THE *THESAURUS* FOR WORKSHOPS?

The ERIC On-Line Project has purchased fifteen copies of the *Thesaurus* so that we can provide hands-on experience to participants in ERIC workshops. If you would like to borrow them for a workshop you have scheduled, call or write Lynn Smarte or Sharon Hudack at ERIC/EC.

...Lynn Smarte (EC)

UPDATE FIELD ON DIALOG

The Update (UD) field of ERIC on DIALOG cannot be used to specify monthly updates prior to June 1980 (UD = 8006). Apparently the reload of the entire database obliterated this field prior to that date.

...Lynn Smarte (EC)

TELENET VS. TYMNET ON BRS

are you dialing TELENET and being billed for TYMNET rates in BRS? If so, you are probably using C 315 20 which automatically switches you to TYMNET. If you want TELENET (which is cheaper) you must use C 315 20BR.

NEW PRODUCTS/NEW IDEAS

ERIC/TM IDENTIFIER AUTHORITY FILE

The ERIC Clearinghouse on Tests, Measurement, and Evaluation maintains a computerized authority file of identifiers indigenous to the field of tests, measurement, and evaluation. These identifiers are necessary to ensure accurate spelling and consistent word use, particularly in test titles and statistical terms. Currently, the printout includes approximately 1,870 identifiers. The advantages are: two-week (maximum) turnaround time for additions/deletions, and a copy for each staff member, including consultants.

How do we do it? It all started with a box of notecards, too clumsy and time-consuming to maintain. Fortunately, our parent organization (Educational Testing Service) has EASYTRIEVE, a versatile, easy-to-use information retrieval and data management system designed for an IBM 360/370. The system is not complex and allows all information stored in computer files to be available for use whenever needed. The Clearinghouse was able to load its information into this system. Since we began this process in May 1980, we have increased our list of identifiers by approximately 100 terms. To qualify for inclusion, a term must have potential for repeated, worthwhile usage in documents concerning tests, measurement, or evaluation. In addition, a need must exist to include the term in a reference source for grammatical specification, as previously mentioned.

This list, however, is used only to reinforce the IAL. Before any term is used, our indexer checks the IAL and the ETS Test Collection file. Only if the desired term fails to appear there does it become part of our inhouse identifier list.

CIJE LOGS AND PROCESSING NOTES

Journal logs and processing notes are two aids used at the ERIC Clearinghouse on Elementary and Early Childhood Education to control the processing of CIJE materials. Prominently displayed journal logs made of large sheets of posterboards provide at a glance the following categories of information:

- journal name;
- publication year;
- number of issues per year;
- issue number;
- date received;
- number of articles annotated;
- number of articles not annotated;
- date sent to Facility;
- CIJE issue in which annotation appears.

Gaps in the log immediately indicate journals late in arriving, issues that never arrive, and other snags in processing.

Processing notes, stapled to journal covers, are used to cumulatively record the completion of each step involved in CIJE processing. Individuals responsible for logging in, annotating, editing, indexing, index checking, typing and sending the resumes are asked to date and initial the note when they have completed their respective tasks. In this manner, a visual record is created which facilitates the identification of processing delays.

BROCHURES AND FLYERS SELL CAPS IAPs

In addition to creating an extensive brochure that describes all IAPs developed by the ERIC Clearinghouse on Counseling and Personnel Services, three special flyers about special publications were developed in 1980. For example, a leaflet designed to promote the popular *Searchlight* and *Searchlight Plus* series resulted in a tripling of sales. A colorful flyer detailing the contents of *Counseling Exceptional People* has contributed to making this book a genuine CAPS "best seller." Overall, CAPS has doubled publication sales in 1980. These attractive professional-looking brochures and special flyers sent to a wide audience are clearly responsible for the dramatic increase in sales.

VIDEOTAPE PRODUCTION FEATURES COMPUTER SEARCH OF ERIC

A 17-minute color television production featuring a computer search of the ERIC database has been developed by the Center for Rehabilitation Information and the School of Clinical Medicine at the University of Illinois, Urbana-Champaign. ERIC/EECE staff member, Janet Bowermaster, participated in the production of this videotape, portraying the information specialist who conducts the ERIC search.

The production, entitled "Access to Rehabilitation Information: Computer Searching," dramatizes a search negotiation, shows the results of the search, and explains the elements of the computer printout. The videotape is available in captioned and noncaptioned versions, on either 3/4 inch U-Matic or 1/3 inch Beta formats. The price for either version is \$100. For further information, contact Jon Bowermaster, 1980 Medical Sciences Building, University of Illinois, Urbana, Illinois 61801, (217) 333-9284.

...Janet Bowermaster (PS)

JC TO REFORMAT ITS NEWSLETTER

The ERIC Clearinghouse for Junior Colleges is taking advantage of some of the UCLA computer equipment and is using the WYLBUR Text editing programs. The first project is reformatting the Clearinghouse newsletter. Since the newsletter layout and style are in transition, the "how and why" of newsletter changes from other Clearinghouses would be of interest to us.

ERIC STAFF ANNOUNCEMENTS

STAFF CHANGES AT RC

Marj Jane Orner, Cataloger/Processing, resigned in December 1980 and was replaced by Laura H. Connolly. Laura has a BS in English, has held several library positions, and is an avid conservationist.

Judi Conrad, Information Specialist for Rural, Small School and Outdoor Education, resigned in January 1981 after 6 years of service. Judi accepted a position with Central ERIC, Washington, D.C., as a Project Monitor. Due to budget restrictions, her duties have been distributed among other staff members.

Manuela Quezada-Aragon, Information Specialist for Migrant and Mexican American Education, will assume the added responsibility of our rural scope area and that of VIP Coordinator.

Elaine Roanhorse Benally, Information Specialist for American Indian Education, will assume the added responsibilities of the outdoor education and small school scope areas.

A half-time editor will be hired to edit RIE input, CIJE input, IAPs, and other Clearinghouse products.

...Amelita Hill (RC)

NEW COORDINATOR OF USER SERVICES AT SO CLEARINGHOUSE

Sheryl Robinson has joined the staff of the ERIC Clearinghouse for Social Studies/Social Science Education and will assume the duties of user service coordinator. Sheryl will be responsible for information requests, liaison with standing order customers, user workshops, and preparation of user services products. Sheryl is currently a doctoral candidate in social science education at Stanford University.

...Char Purvis (SO)

STAFF CHANGES AT TM

Carol Paskowsky, the Acquisitions Coordinator at TM since 1977, has moved to Colorado. We will all miss her very much.

Cindi Post, Clerical Assistant, has taken another position at the Educational Testing Service. Marie Falsler has been hired to replace Cindi and will begin work on March 2. Her telephone number will be (609) 734-5032.

...Barbara Wildemuth (TM)

NEW VOCABULARY REVIEW GROUP MEMBERS

Manuela Quezada-Aragon of RC and Cathy Julius of SP have assumed vocabulary duties for their Clearinghouses, replacing Judi Conrad and Rob Gillette, respectively.

...Marilyn Shorr (HE)

VAL ROJO JOINS CE STAFF

The ERIC Clearinghouse on Adult, Career, and Vocational Education welcomes Vallentine Rojo to its staff. Val, who is a native of Chile, has a background in journalism and art, and enjoys sculpting and painting in her time away from work. She will be serving the Clearinghouse by typing and helping generally with document processing.

...David Tipton (CE)

STAFF CHANGES AT JC

A new Library Assistant, Donna LeGrand, joined the JC Clearinghouse in January 1981. Donna is assistant to Anita Colby, Documents Coordinator.

...Gayle Byock (JC)

MEETINGS, CONFERENCES, SPEAKING ENGAGEMENTS

GRESS INVOLVEMENT WITH SCHOOL LIBRARIANS

The ERIC Clearinghouse on Rural Education and Small Schools has become increasingly involved with the State Library Associations in Texas and New Mexico.

A handout was developed for a special roundtable on "Bilingual Libraries," which was sponsored by several divisions of the NMLA. Betty Rose Rios and Amelita Hill also staffed a display booth and interacted with participants.

At the New Mexico regional library group "Calling All Local Librarians (CALL)" semi-annual meeting (6:30 a.m.), Betty Rose and Amelita gave an ERIC

presentation. The next CALL meeting will be hosted by ERIC/CRESS and a hands-on ERIC experience will be provided.

The response from these library groups was very favorable. Several of the school librarians were very surprised to find ERIC contained resource materials for the classroom teacher, i.e., cultural colorbooks, etc.

As a result of the meeting with the CALL group, Amelita Hill was invited to meet with a local school committee assigned to study the needs of students in special education classes. Resources developed by the Clearinghouse on Handicapped and Gifted Children were given to this committee, and they were referred to that Clearinghouse for printing of their computer search copies.

ERIC/CRESS will present a workshop for school librarians and an open house for the SOCs at the Texas and New Mexico Library Association Conferences. The Texas Library Association Conference will be held in Houston, Texas, March 31 - April 4, 1981. The New Mexico Library Association Conference will be held in Albuquerque, New Mexico, April 29-May 2, 1981.

...Amelita Hill (RC)

JC PARTICIPATES IN MEETING WITH AACJC AND NEH

The American Association of Community and Junior Colleges and the National Endowment for the Humanities have conducted a series of workshops around the country entitled "Strengthening Humanities in Occupational Curricula."

Teams of three members from each of the invited two-year colleges present programs being developed on their campuses to merge the humanities and occupational issues in curriculum and policy decisions. ERIC staff handed out materials developed at the Clearinghouse about searching and acquisitions, as well as IAPs and ERIC-wide information. On Thursday, February 6, Donna Dzierlenga spent the afternoon conducting searches for the participants.

...Gayle Byock (JC)

ANITA COLBY SPEAKS BEFORE LIBRARY SCIENCE CLASS

Anita Colby was invited to speak to Dr. Roger Palmer's class in library science at UCLA. She discussed all aspects of the ERIC system and the decision-making process involved in acquiring documents for ERIC.

...Gayle Byock (JC)

ERIC/EECE PARTICIPATES IN SCHOOL LIBRARIAN MEETING

Dianne Rothenberg and Janet Bowermaster (ERIC/EECE) took part in a meeting for school librarians hosted by the Lincoln Trails Libraries System, part of the state library system in Illinois. The meeting was held to invite school librarians in the 5-county east-central Illinois region to join the Lincoln Trails System and to acquaint them with the resources available through member and affiliate libraries, including ERIC/EECE.

...Dianne Rothenberg (PS)

UNIVERSITY OF SOUTHERN MISSISSIPPI CONDUCTS ERIC TRAINING SESSION

Nevin Robbins, previously Associate Director of the ERIC Clearinghouse on Adult, Career, and Vocational Education, is now a professor of education at the University of Southern Mississippi. Under the sponsorship of the University, he is preparing a series of professional development seminars for 200 members of the School of Education faculty. He will be using extensively materials prepared by ERIC for training purposes, and we hope to take advantage of his experience to make others aware of the benefits of this type of activity. Nevin may be contacting individual Clearinghouses requesting Clearinghouse products and publications that you are able to spare or lend.

...Bob Chesley (Central ERIC)

VISITORS HOSTED BY ERIC

MEMBERS OF BRITISH PARLIAMENT VISIT UD CLEARINGHOUSE

On January 10, 1981, four members of the British Parliament's Home Affairs Sub-Committee on Race Relations and Immigration, visited the ERIC Clearinghouse on Urban Education to learn about how information on the education of ethnic minorities is collected and disseminated in the United States. They were John Daniel Wheeler, George A. Gardner, John Hunt, and Alexander Ward Lyon, all members of the House of Commons. Accompanying them were David Smith, Special Advisor to the Sub-Committee, and David Natzler, Clerk to the Sub-Committee. Also present were Derek Cherrington, Marika Sherwood, and Raymond Giles, of the British American Community Service Institute, Birmingham, England.

Several members of the Teachers College and Institute for Urban and Minority Education communities also attended the meeting, as did Cyril Tyson, Vice President of City College. Erwin Flaxman, Director of the Clearinghouse, spoke to the group on the ERIC system and on information collection and dissemination. A general discussion took place on the status of research on the education of ethnic minorities. The meeting was hosted by UD Clearinghouse staff: Erwin Flaxman, Director; Jerome Wright, Associate Director, and Stella Torgoff, Assistant Director.

On Monday evening, January 12, Erwin Flaxman was a guest at the British Consulate, where the discussion with the members of the Sub-Committee was continued.

...Stella Torgoff (UD)

REPRESENTATIVES FROM SCOTT COMMUNITY COLLEGE AND FROM THE INSTITUTE OF THE BLACK WORLD VISIT JC

The President, Dean, and two members of the faculty of Scott Community College spent the morning of Tuesday, February 3, 1981, at the Clearinghouse for Junior Colleges. They intend to use the resources of ERIC for research in administrative planning and curriculum development.

Howard Dodson, Executive Director of the Institute of the Black World in Atlanta, Georgia, and special consultant to the Chairman of NEH, visited the Clearinghouse and discussed the acquisition of documents about urban community colleges and black studies programs with Anita Colby and Gayle Byock. Dr. Dodson will be returning to the Clearinghouse at a later date for more extensive instruction to all aspects of the ERIC system.

...Gayle Byock (JC)

EA HOSTS VISITOR FROM GREAT BRITAIN

Dr. Harold Silver, Principal of Bulmershe College of Higher Education in Reading, Great Britain, visited the ERIC Clearinghouse on Educational Management on December 15, 1980. Dr. Silver spoke with Director Philip Piele about the products and services of the Clearinghouse. Dr. Silver was particularly impressed with the quantity and quality of the Clearinghouse's information analysis products. Dr. Silver said the Clearinghouse publications would serve as a valuable resource for the students and faculty of the College's new program in educational administration.

...Stuart Smith (EA)

GALLAUDET DOCTORAL FELLOWS BRIEFED ON ERIC

On Tuesday, November 25, Lynn Smarte and Don Erickson provided an intense briefing on ERIC and on ERIC/EC to six doctoral fellows from Gallaudet College. These students, who are special education administration majors, were accompanied by their Department Chairperson, Dr. Ed Skinski.

...Marion Cambel (EC)

THE LIGHT SIDE

FITNESS AND HEALTH AT SO

Syd Meredith is now teaching an "Early Bird" physical fitness class at 6:30 a.m. When you're in Boulder, you're invited to join Syd's class—she says it's a lot of fun!

Various staff members have given up the smoking habit, and wish to remain anonymous for a few months to make quite sure they have given up the habit. (Well, Jim Davis wants to remain anonymous, anyway!)

The ERIC Information Analysis Product

One of the functions of the ERIC clearinghouses is to keep clients informed of developments in their subject fields. Clearinghouses are uniquely qualified to provide this service because they stay abreast of the current literature and happenings in their fields as they access and review documents for the ERIC data base. They also maintain close working relationships with professionals in the field and thus are on the forefront of new developments.

Clearinghouses use a variety of formats to disseminate information, e.g., journal articles, bibliographies, conference proceedings, information analysis products, newsletters, printed computer searches, and fact sheets. This paper looks briefly at one of these formats--the information analysis product--and discusses the characteristics which distinguish it from other clearinghouse products.

What Is an Information Analysis Product (IAP)?

Is an IAP different from a state-of-the-art report? Is an extensive bibliography an IAP? To help answer these questions, one can get some guidance from the literature.

A number of terms are used in the literature to refer to this type of document: knowledge synthesis, information analysis, distillation, state-of-the-art, literature review, critical review, literature summary, and knowledge interpretation. Although these terms are sometimes used synonymously, people's perceptions of their meanings may differ. The terms do, however, provide a useful clue for our purposes. Most of the terms have a common thread--the pulling together of information on a topic from many sources. But some of the terms imply an

additional characteristic--a "massaging" or analysis of that information for a new contribution to the literature. If we accept then a distinction between the two categories--a pulling together and reporting of information vs. a massaging or analysis of the information--and apply it to the various types of clearinghouse products, it becomes clear that some products logically fall into the first category (bibliographies, newsletters, conference proceedings, computer searches, etc.) while information analysis products fall into the second. Therefore, a bibliography--be it short, extensive, or annotated--is not an information analysis product, nor is a state-of-the-art report an IAP unless it provides an analysis of the information in addition to just the presentation of existing information. Although fact sheets could fall into either category, depending upon the nature of the material, they do not qualify as IAP's because of other required characteristics (see next section).

Characteristics of an IAP

A listing of the distinguishing characteristics of an information analysis product may further clarify its type and provide some guidelines for its development.

A true IAP--

- Not only brings together the literature/information from the ERIC data base and other relevant sources on a topic but also examines, analyzes, and organizes it into "new" information
- Presents the various perspectives on an issue or topic without advocating one over the others

- Is responsive to the information needs of a specific audience
- Suggests alternatives on the application of the information for the improvement of practice
- Represents a relatively high level of effort
- Generally requires about a year for development
- Is reviewed by both clearinghouse specialists and reviewers in the field for accuracy of content, timeliness, and technical quality
- Represents perspectives from multiple sources, rather than those of a single author or individual
- Is generally more than 50 manuscript pages in length
- May be written by clearinghouse specialists or by an author (or authors) under contract to the clearinghouse

IAP POLICY STATEMENT SHAPING UP

A number of Clearinghouse directors and their staffs responded to our request for reactions to the draft policy statement on information analysis products. We do appreciate their comments and found them to be very useful in helping us sharpen our own thoughts on the subject. We have revised the statement to incorporate some of them, and thought it appropriate to share our thoughts on others in order to further clarify our position on IAP's. We have taken the liberty of quoting, combining, and in some instances paraphrasing the comments for ease of response.

1. Depending on the topic, I can envision an issue that does not have various perspectives...People reading a book by a national or world authority would rather have the views of the individual than have him/her discuss views of others in the field.

This type of product would be a scholarly treatise, not an IAP. It would be appropriate for a Clearinghouse to produce such a document, but it would fall under the new category "Other Major Publications." An emphasis, however, is desired on IAP-type products.

2. Perhaps an issue would have such a wide variety of perspectives that no one book could cover them all.

The purpose of an IAP is to analyze and present information on a topic as succinctly as possible and still cover the subject. Varying perspectives should be presented briefly without providing too much detail on any one perspective.

3. If you analyze you probably draw some conclusions. Is that "advocating" something?

Webster defines advocacy as "the action of...pleading for or supporting." An IAP should not advocate one position over another; rather, it should present the various perspectives and then draw conclusions and implications from those "findings" for educational practice. It must be apparent, however, that the conclusions and implications derive from the literature. Such statements as the following are appropriate: "The literature indicates that .," "It can be concluded that...," "This implication can be drawn from the literature...."

4. (Again on the advocacy issue) There are times when research, demonstration, or experienced opinion indicate a particular position. I like to think that ERIC is the the type of operation that would encourage and support bold thoughts and new ideas.

ERIC as a system and Government-sponsored program should not take advocacy positions on education issues. Its primary mission, as you well know, is to acquire and make the education literature available to the field, presenting multiple views on an issue as they appear in the literature. This would not preclude or restrict individual ERIC staff members or commissioned authors from expressing their own professional view on an issue. However, this perspective should not be represented as that of the Clearinghouse itself or of the ERIC system.

5. Do we complete IAP's in one contract year? The policy statement sounds like NIE is accepting multi-year IAP production.

IAP's are funded by NIE as part of the Clearinghouse scope of work for a one-year time period. All work under that scope must be completed within that year to fulfill the terms of the contract. ERIC's policy is that an IAP can and must be completed during the contract year; however, editing, production/printing, and distribution of the IAP may spill over into the following year. To be more precise in the policy statement, the characteristic concerning time will be combined with the preceding one to read: "An IAP represents a relatively high level of effort and must be completed within the contract year in which it was funded." (The intent is to infer a level of effort greater for IAP's than that required for a user services product.)

6. The statement should recognize the individual differences of Clearinghouses in their ability to obtain significant distribution for products beyond the ERIC system for major effort type publications...

The policy statement does not address production, distribution, or marketing of ERIC IAP's—only their development.

8. Instead of the word "true" there could be an overall statement defining/describing levels (maybe 2-4) of IAP's. This would deal both with depth of content as well as length of the document.

If we can make an analogy to Gertrude's Stein's quotation, "A rose is a rose is a rose," an IAP is an IAP is an IAP—regardless of length, depth, complexity, etc. The purpose of the policy statement is to broadly define the term without being too definitive or prescriptive concerning types, lengths, etc. CERIC recognizes that there are different levels of effort required to produce an IAP, that there is a need for varying lengths depending on the volume and complexity of information available, and that numerous circumstances govern production time schedules. Individual Clearinghouses have the freedom (and responsibility) to address these matters in the context of the guidelines provided and their own situations.

8. What is the meaning of "specific" (how inclusive, how exclusive) as applied to audience?

Perhaps the word defined would carry the meaning intended better than specific. Again we would not presume to be definitive about the audience other than to point out that dissemination theory tells us that information which is targeted to a particular audience (however broadly or narrowly defined) is more effective than the "buckshot" approach. Each Clearinghouse will have its own audience(s), and the size and nature of this audience would be determined by the purpose and topic of the IAP.
